The energy picture is in the minds of all citizens—both the petroleum oriented and the business oriented. It requires energy to make our nation build and grow. With the change in administrations on January 20, 1977, there are some petroleum economists and energy specialists who feel the future is shrouded in mystery. Others talk with nervous optimism. My remarks will be based on what we know, and it strongly suggests a positive, dynamic energy picture in the future. Both Carter and Congress are well aware of the pitfalls and possible recession unless we provide a workable energy policy. Carter has promised decontrol of new gas prices which will stimulate exploration for new reserves, and he has also suggested gradual decontrol of oil prices.

As Appendix 1, I am attaching a letter dated October 19, 1976, from President-elect Carter to our great Governor David Boren in the State of Oklahoma. This letter clearly sets out three important steps for a national oil policy. First would be to decontrol new natural gas prices; secondly, he would encourage enhanced recovery from wells already in production, and thirdly, he would encourage the shift from the use of oil and gas to coal. He points out that the administration will work for a stable regulatory climate so that coal producers can expand their production to make America less dependent on foreign oil.

The members of Congress are very cognizant of a need for reducing dependence on foreign oil and took a forward stride when they released "stripper" oil from price controls in the United States and made it competitive in price with imported oil.

The Federal Power Commission, in its actions, is pushing for decontrol of new gas prices and has ordered new gas prices be set at $142 per thousand cubic feet, which is a step forward. Overall, I feel we have the making of strong leadership which will enhance the future energy supply picture in America.

Because we are dependent on about 40 percent of our crude supply from imported oil, I will discuss trends in world prices and world oil reserves as it relates to the overall energy outlook. Since 1970, the price of world oil has come under the influence of the OPEC (Organization of Petroleum Exporting Countries) countries who have unilaterally raised

the price of oil and also gas. Today, we have an administered oil price in which the OPEC functions as a pseudo cartel. The effect of this has been to disproportionately raise the price of oil in the world market without giving free play to oil discovery and producing costs.

We know that the discovery of new oil since 1970 to January 1, 1976, on a worldwide basis has exceeded production during the period by approximately two times. The estimated crude oil reserves in the principal producing countries, as of January 1, 1976, were 578,978,591,000 barrels and the 1975 oil production rate was 19,229,705,990 barrels. The reserve-production ratio was 30 years.

It is important to note that the oil reserves which have been found since 1970 have been concentrated in the OPEC countries. We know, based on January 1, 1976, oil reserve data, that 79 percent of the free world oil reserves are in the Middle East and Africa with Saudi Arabia controlling 109 billion barrels and having high producing capacity in excess of 10,000,000 barrels per day.

The Organization of Petroleum Exporting Countries was formed in September, 1960, by five major crude oil exporting countries: Saudi Arabia, Kuwait, Iran, Iraq, and Venezuela. They have since been joined by most of the exporting oil countries and have a permanent General Secretariat in Vienna. Since 1970, many major oil price developments have been attributable to OPEC. It started with an increased tax from 50 to 55 percent in Libya on August 1, 1970, with producer government revenues per barrel (Arabian Light 34° gravity) increasing from $0.91/barrel on January 1, 1970, to $11.00/barrel on October 1, 1975, as indicated on the attached Table 1. These producer government revenues were taken for every barrel produced (a 12-fold increase in revenue per barrel of oil) without any expenditures for oil exploration by the oil producer governments. During the period, greater government participation was forced upon the oil producing companies.

We know that the oil-producing cartel probably will raise prices by some percentage at its meeting next month in Qatar. Based on a 10 percent increase, which only Saudi Arabia might accept, the increase would put the reference price of Arabian Light crude, the basis on which all crude oil prices are fixed, up from $11.51 per barrel to $12.66 FOB port of delivery to which transportation charges must be added. This would increase OPEC revenue by over $11 billion annually at current output levels.

We know that the argument of the OPEC nations and some of their American advisors is that industrial countries of the world should not be allowed to achieve prosperity by means of cheap petroleum, oil, gas, or products, while they withhold their own energy reserves such as coal, oil shale, lignite, tar sands, geothermal energy and other substitutes for energy. The basic economic theme which has been put forth in numerous communications from the OPEC countries is that the price of oil should be equivalent to substitute energy supplies.

We know that the world oil price is above the cost of many alternative energy sources. Coal-mining costs in the U.S. is an excellent example with present costs less than 50 percent of the world oil price. But the problem is only that coal and other energy sources cannot be produced in adequate quantities quickly enough. For the short term, we will have to rely on the statesmanship of OPEC to produce oil and sell it at prices which will not disrupt world economic progress. The leaders of OPEC are our friends in the free world. But until U.S. alternative energy such as coal, nuclear, oil shale, etc., is expanded dramatically by strong presidential leadership, OPEC will be the key to supply and price. From what we know, it is evident for the immediate future that the world price of oil and the price of imported oil to the U.S. will remain strong.

As to the U.S. energy supply, we know that oil production and oil reserves are declining. Recently, the American Petroleum Institute reported U.S. oil production in 1975 was the lowest since 1966, despite increased drilling—oil drilling was up 17.5 percent. Domestic oil production in 1975 was 2.9 billion barrels while new discoveries added only 1.3 billion barrels, a shortage of 1.6 billion barrels less than produced.

The history of U.S. production and discoveries indicates that yearly discoveries of oil have not equaled yearly oil production for many years. Based on recently released oil reserve data, total U.S. production over a 16-year period was 48.9 billion barrels with discoveries being only 23.3 billion barrels. The U.S. is consuming almost twice as much oil as it produces.

The U.S. oil reserves are declining every year. This is a cheerless oil supply picture with about 50 percent dependence expected on imported oil in the immediate future.

We know that gas production and gas reserves are declining. Recently, the American Petroleum Institute reported that the remaining natural gas reserves declined by 8.9 trillion cubic feet during 1975 to a year-end level of 228.2 trillion cubic feet, the lowest in 21 years. The remaining gas reserve divided by 1975 gas production gives a future life slightly in excess of 11 years with over 10 percent of the remaining gas reserve at the Arctic Circle in Alaska and not connected. The past production gas history and discoveries indicate that yearly discoveries of gas have not equaled production since 1962 in the lower 48 states.

Gas production in 1975 amounted to 19.7 trillion cubic feet, but discoveries were only 10.8 trillion cubic feet. The U.S. is particularly sensitive to the declining natural gas supplies. The importance of one trillion cubic feet of gas is better understood when you consider that it is equivalent to 170,000,000 barrels of oil in heating value. The 1975 gas production was equivalent to 3.35 billion barrels of oil which, in energy value, exceeds the U.S. 1975 oil production of 2.9 billion barrels by 15.5 percent.

It should be pointed out that the estimated supply of natural gas is far below the demand and that there are serious curtailment problems now for the interstate gas pipelines because of gas shortages.

We know that the total energy outlook through at least 1980 is alarming. Domestic oil and gas will be supplying a smaller percentage of the energy to the U.S. economy in the years to come. Coal usage will increase dramatically from the estimated equivalent of 6.5 million barrels per day in 1976. In addition to increased use for direct firing, coal will be utilized for coal gasification and coal syncrude.

To meet the nation's energy requirements, foreign imports of oil are increasing rapidly. Today's cost for imported oil is over $14.00 per barrel. The imported oil outlook for 1976 is a record 7.3 million barrels of oil a day compared to 6.1 million barrels per day in 1975, or up 20 percent. The dependence on foreign oil will be increasing until Congress releases price controls on oil and gas because the finding and development costs exceed the regulated prices allowed.

To complete the supply picture, although the energy supply from nuclear sources at present is only 1.1 million barrels per day of equivalent oil, the future use of nuclear power is encouraging. Hydroelectric sources supply 1.5 million barrels per day. The Nation's increasing energy demand requires that alternate energy supplies be developed. With proper incentives in the short-term period, oil and gas supplies are expected to increase, but due to the known oil and gas reserve information, we cannot expect large increases in the oil and gas supply picture. Much of the long-term supply of future U.S. energy requirements will have to come from alternate sources. The two principal energy sources to supplement oil and gas are coal and nuclear sources. Other sources which are expected to help are hydroelectric, geothermal, oil shale, tar sands of Utah, and the utilization of the sun's omnipresent energy.

There are large undeveloped coal reserves in the U.S. which are equipment and capital intensive and will require a long development time period. Coal producers must be sure of the rules of the game before committing large investments for expansion. Without government leadership, we know coal production will grow from the 640 million tons in 1975 to approximately 1,000 million tons in the late 1980's. However, with government cooperation in relaxation of environment restrictions and Federal coal leasing, the expansion of coal productive capacity could be much greater.

Coal can be used for electrical power generation to replace oil and gas, for coal gasification to replace natural gas, and for coal liquefaction to replace oil for gasoline manufacture. The possibilities for coal are bright but the potentially serious delay problems require that a pragmatic estimator of the future of coal should forecast that the contribution of coal to the total U.S. energy requirements will stay relatively constant in the next 5-year period. We know coal can replace oil and gas for boiler fuel. Recently, I made an inspection of the South African coal gasification and liquefaction facility and we know it is technically and economically feasible to replace oil and gas by coal conversion.

The importance of nuclear power in replacing oil and gas is material. Although previous projections of nuclear growth have been reduced to environmental restrictions, this form of energy supply will continue to develop. The California referendum on June 8, 1976, supported future nuclear development. In the near future the supply of nuclear electric power will be more constrained by environment, regulatory, and engineering factors than by a shortage of basic nuclear fuel. Growth will be dependent upon the ability of government leadership to minimize delay in construction and licensing.

We know that other alternative sources of energy will make a limited contribution to U.S. short-term 5-year energy supply Oil shale, with huge resource potential, has been slowed down because of environment problems and lack of government financial sponsorship to support commercial plants of 50,000 to 100,000 barrels per day capacity. Tosco and Atlantic Richfield have withdrawn their plans for commercial oil shale operations after failure to get government loan support. Shell Oil Company has temporarily stopped oil shale development because its evaluation of economic, political, environmental, and technical considerations in near term caused withdrawal.

The western part of the U.S. has many known geothermal areas. Areas of volcanism and drastic earth movements have permitted molten rock to move relatively close to the surface. The resulting heat has been transferred by conduction to nearby permeable or fractured water-bearing reservoirs. Many tectonic geologic trends are well-known and are manifested on the surface by hundreds of thermal springs.

A limited exploration effort has led to promising discoveries outside The Geysers area. And geothermal electric plants likely will be constructed in New Mexico, Utah, and Southern California in the near future.

In the geothermal field, the government's ERDA group is implementing an active Geothermal Loan Guarnty Program (GLGP). The purpose is to accelerate commercial development of geothermal energy in the pri-

vate sector. As of June 25, 1976, ERDA could accept applications from Borrowers and Lenders to guarantee loans up to $25 million per project. As of November 5, 1976, ERDA has received three applications for geothermal loan guaranty. ERDA has identified projects which, if they were submitted as currently conceived, would have a guaranteed loan value of more than $200,000,000.

The profitability of geothermal electric power development has been proven in The Geysers field 80 miles north of San Francisco where Pacific Gas and Electric Company, the steam purchaser, has planned additional electrical generator installations by 1980 which will increase field capacity to approximately 900 megawatts compared to the present 522 megawatt capacity.

In conclusion, we know that the government's role of the Carter administration should be the following to develop a viable energy policy for the U.S.:

1. Deregulate the new price of natural gas to stimulate exploration of oil and gas.
2. Give incentives for secondary and tertiary oil recovery by decontrol of the oil price as Congress has done for U.S. stripper oil.
3. Relax environmental restrictions and federal lease policies for coal development.
4. Support private enterprise research and programs to handle the utilization of high sulphur coals.
5. Support the private industry nuclear program to increase electrical capacity and production by positive action.
6. Provide loan guarantees and price support for oil shale plants, coal gasification projects, and coal liquefaction projects as has been done for the geothermal industry.
7. Promote meaningful energy conservation and efficiency in all sectors of the economy.

[APPENDIX 1]

OCTOBER 19, 1976.

GOV. DAVID BOREN,
State Capital Building,
Oklahoma City, Okla.

DEAR GOVENOR BOREN: The formulation of a workable national energy policy implemented by a responsive, understandable governmental structure will be of highest priority in a Carter administration. If we are to reach our goals of full employment and a healthy, growing economy, we must reduce our dangerous dependence on foreign oil and we must develop our own domestic energy supplies. These resources must be produced and used in an environmentally acceptable manner at a cost that the consumer can afford to pay.

A sound energy policy must aggressively promote conservation of our scarce oil and gas resources. This is the only way in which we can hope to make ends meet in our energy budget. But, coupled with energy conservation, our policy must encourage additional production of our domestic reserves.

Eight years of Republican administration have failed to produce an energy policy. Demand for new energy supplies has increased by over 4% per year since 1969—even though demand was reduced considerably during the recession triggered by the Arab oil embargo. At the same time, domestic production and resources have decreased substantially, and dependence on foreign supplies has increased from 35% prior to the embargo to over 40% today.

To increase our domestic production, I have proposed three important steps.

First, I will work with the Congress, as the Ford administration has been unable to do, to deregulate new natural gas. The decontrol of producers prices for new natural gas would provide an incentive for new exploration and would help our nation's oil and gas operators attract needed capital. Deregulation of new gas would encourage sales in the interstate market and help lessen the prospect of shortages in the nonproducing states which rely on interstate supplies. While encouraging new production, this proposal will protect the consumer against sudden, sharp increases in the average price of natural gas.

Second, I believe we should act to encourage enhanced recovery from wells already in production. As you well know, an average of 60% of our oil remains in the ground after standard recovery methods have been exhausted. It is estimated that up to 60 billion barrels of crude could be added to our supply if enhanced recovery techniques are used. Since the environmental costs have already been largely paid on these resources, both consumers and producers alike benefit from development of this resource.

Third, I favor a substantial shift from the use of oil and gas—our highest quality energy sources—to coal, which we have in abundance. We must immediately begin a program to encourage conversion from the use of petroleum and natural gas to coal in those applications for which coal is an acceptable substitute. Our present demand for coal is limited by two important factors. First, we have geared our technological growth to oil and gas for well over 100 years. Second, we have failed to establish a stable regulatory climate in which coal producers are sure of the rules of the game before they make investments in expanded production or new mines. Switching to the use of coal will require strong presidential leadership and proper federal incentives to encourage the conversion process. A Carter Administration will provide this leadership.

I hope that these policy recommendations will help to put my views on the supply aspects of the energy problem into focus. Without a strong commitment to increasing our domestic production, while maintaining basic environmental principles, we cannot hope to reverse the unhealthy trends which the lack of leadership of the current administration has produced.

Sincerely,

JIMMY CARTER.

S. 3—THE HEALTH SECURITY ACT

Mr. KENNEDY. Mr. President, yesterday, I introduced the Health Security Act, S. 3, which was referred to the Senate Committee on Labor and Public Welfare and the Senate Finance Committee.

One of the most pressing challenges America is facing today is providing quality health care for every citizen. This is the goal of the Health Security Act of 1977.

The 95th Congress and the new administration have many difficult issues to deal with and one of our priorities has to be the Nation's health care needs. I personally will cooperate in every way I can with the administration's proposals for a national health insurance program as they take shape.

I believe, however, that the guiding principles of national health insurance, which are reflected best in S. 3, should be upheld as the standard for the continuing debate and a tribute to all the years of effort by the people and organizations concerned with this vital issue. I am, therefore, privileged to reintroduce the proposal in the 95th Congress.

The health security program is the result of more than 6 years of intensive study and development by the Committee for National Health Insurance, composed of 100 American leaders from a variety of fields, citizen groups, church groups, labor consumers, and health professionals.

The formulation of this proposal has been guided by two basic beliefs:

First. A national program of health security benefits should be created as part of the social security system to provide comprehensive health care for everyone living in the United States.

Second. The program should be developed to bring about major improvements in the organization, financing and the providing of health care.

The need for a national health insurance program for the United States is urgent. Its time has come because our present methods of getting and paying for health care are dangerously near collapse.

Continuing inflation is driving health care costs to prohibitive levels for more and more Americans. The most recent statistics reveal that more than 38 million Americans have no health insurance and that millions of additional working people and their families lack the security of knowing their hospital and medical costs will be paid during layoffs and periods of unemployment.

Two-thirds of those who are covered by a health insurance plan still have to pay for office visits to their doctors and almost none are covered for preventive health care.

In a nation that has one of the highest per capita incomes in the world, a chronic or catastrophic illness can exhaust a lifetime of savings and reduce a person or family, with even an above-average income, to seeking public or private assistance.

New breakthroughs are being made every day in medical research. Where we have achieved such heights in medical knowledge, and where every citizen should be able to benefit from these accomplishments, there is no room for apprehension concerning health care.

Private health insurance has failed, however, to come to grips fully with the Nation's need for adequate health care coverage. In fact, less than one-third of the health costs are now paid by private health insurance. The remainder comes either from our own pockets or is paid by Government.

As the statistics show, larger and larger proportions of our more and more limited dollars are being spent for health. As a result, the problem of paying for adequate health care has become increasingly difficult for many American families and impossible for some.

An example of this inflationary spiral can be seen in the rising costs of hospital care. According to the Department of Health, Education and Welfare, the average cost of a hospital room in 1974 was $125 per day. In 1976, the average cost of a hospital room was in excess of $200 a day.

During fiscal year 1975, the per capita cost for medical care for Americans was $547, and the projected cost for fiscal year 1976 is more than $600 per person. On a national scale, total health costs are reaching crisis proportions.

According to the Congressional Budget Office—CBO, total medical care costs for Americans in fiscal 1975 was $118.5 billion, and for fiscal 1976, the CBO is predicing a cost of $139 billion. This represents 8.6 percent of the Gross National Product—GNP—devoted to health care in fiscal 1976.

Compared to our neighbor, Canada, which has had a national health care program for the past 10 years, the United States has not fared as well. Only 6 years ago, the United States and Canada were both spending approximately 6 percent of their GNP's for health care. However, between 1971 and 1975, Canada's health care costs have remained at between 6.1 percent and 7 percent of its GNP while the United States' health costs rose to 8.4 percent by 1975 and 8.6 percent in 1976.

And the end is not in sight. The CBO estimates that by 1981, the cost of health care in the United States will be in the neighborhood of $252 billion.

America's public/private partnership in health has never been an easy relationship in the past, and it is not an easy one today. The relationship is full of tension, because it is never easy in our society to draw rigid lines or build high walls between the public and private sectors. In our generation, as in past generations, there are critical choices at hand, and we are facing those choices now.

Simply stated, the critical challenge America is facing is one of providing health care to all citizens. Health care should be a "right" in the sense that to the greatest practical extent, society guarantees quality health care to each citizen under law.

We should make it a right for individuals, regardless of their income, jobs, residence, age, medical history, or any other factor. We should eliminate every contingency under our control that deprives any citizen of quality care. Essentially, health should be like education—a need too basic to depend on a person's income.

A national consciousness of the parity between health and education is dawning on this country, and it would be shameful not to encourage it to the limit of our resources. In short, our national health policy must express this growing belief that health care is right.

Moreover our goal must be to strengthen the public/private partnership in medicine, not to end it, or undermine it, or even to make the Government the senior partner. We must develop a new and more coherent national policy toward health, a policy that expresses and enhances our deepest values about the quality of health care that should be available in our society.

The essence of the Health Security Act is basically a rearrangement of how health care costs are paid. Instead of the individual family being responsible for health and medical costs, the costs will be shared by all citizens on an equitable basis. Necessarily higher tax costs will be offset by the seldom mentioned fact that individuals will not have to pay fees to doctors, charges to hospitals, and premiums to insurance companies.

Benefits under the health security program will cover the entire range of personal health care services, including catastrophic illnesses; full physicians' services; inpatient and outpatient hospital services; home health care services; optometry and podiatry services, and medical devices and appliances.

Dental care, at the outset of the program, will be provided to children 15 years old and under, with the eventual goal of providing dental coverage to the entire population.

Psychiatric services, nursing home care and drugs would be provided under the program, with limitations.

The money people will save by not making payments to doctors, hospitals, or insurance companies will equal, or more than equal, the higher taxes required for national health insurance. In a very few years, a national health insurance program such as health security will reduce the amount the American people will otherwise pay for health care by putting firm controls on the reckless rise in medical and hospital costs which we are now experiencing.

If this legislation is enacted, no American ever again will have to pay a doctor's bill or a hospital bill. Payment in full will be made through a health security trust fund, with Federal general revenues providing half of the necessary financing and the other half acquired as follows:

One percent payroll tax on individual earned or unearned income up to $21,500 per year—for a maximum tax on the individual of $215 per year.

Three and one-half percent tax on employers' payrolls, which will be largely or entirely offset by the elimination of premium payments for private health insurance.

Two and one-half percent tax on the self-employed up to $20,000 income.

Whether working, laid-off, not working or retired, all residents of the United States will be entitled to the benefits as a matter of right.

The Congressional Budget Office has estimated that a tax-financed plan such as health security, with strong built-in cost controls, can save the American people over $23 billion a year by fiscal year 1981, while providing access to care for all citizens.

We need a viable health security program that will not only establish a method of paying the bills for doctors, hospitals, and other services, but that will also make an improved quality of health care available to all Americans.

The health security program, S. 3, goes further than any other proposal to control health care costs and assure every citizen the health care they need. I believe the principles of this legislation can unite the Congress better than any other proposal.

Mr. President, I ask unanimous consent that there be printed in the RECORD a statement on the health security program, a section-by-section analysis of the bill, and a copy of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT ON THE HEALTH SECURITY

HEALTH SECURITY IN BRIEF

Eligibility.—Everyone living in the United States would be eligible for Health Security benefits.

Benefits.—The Health Security Program would pay for nearly the entire range of personal health care services including catastrophic coverage. The covered services would include full physicians' services; inpatient and outpatient hospital services; home health services; optometry and podiatry services, and devices and appliances. It would also cover, at the outset, dental care for children up to age 15 and eventually cover the entire population. And, with limitations, psychiatric services, nursing home care and drugs would be covered. It would establish large pilot projects to determine the feasibility of home maintenance care for the chronically ill or disabled.

Administration.—Health Security would be administered by a five-member Health Security Board as part of the Department of Health, Education, and Welfare. The Board would establish policy, standards and regulations for the program.

Financing.—The program would be financed from a Health Security Trust Fund created by a special tax on employers, employees and the self-employed, with the entire amount matched by Federal general revenues.

Cost and Quality Controls.—Health Security would establish a Quality Control Commission to develop cost control features, including national standards for health care providers.

Payments to Providers.—Physicians, dentists, hospitals, nursing homes and other health care providers would be paid in full directly from the Health Security Trust Fund. The patient could not be charged more.

Consumer Participation.—Health Security would assure effective participation of consumers in policy, development and administration of the program on the national, state and local levels. It would encourage consumer organizations to establish health care plans. Procedures would be built into the entire system to assure public accountability for its operation.

Manpower Support.—Health Security would actively encourage more efficient organization of existing health manpower and provide funds for special training of health professionals and allied personnel.

Resources Development Fund.—To improve the providing of health care, a Resources Development Fund would be established to support innovative health programs, particularly in manpower, education, training and group practice development.

Incentives.—Financial, professional and other incentives would be built into Health Security to move the health care delivery system toward organized arrangements for patient care, such as health maintenance organizations and other prepaid groups practice plans or professional foundations. It would also establish programs for preventive care, early diagnosis of illness and medical rehabilitation.

BENEFITS

Everyone living in the United States would be entitled to have all health care—with few exceptions—paid for by the Health Security Program.

The Program would have no exclusions for pre-existing conditions; no limits on preventive medical services; no co-insurance; no deductibles; no waiting periods.

Here are the details of the services which would be available:

Physicians Services.—Professional services by physicians, furnished in their offices or elsewhere, would be covered in full. This includes general medical and specialized services.

All major surgery and other specialized care would be covered if performed by qualified specialists.

Psychiatric services would be provided to outpatients if given for active treatment of emotional or mental disorders and if provided by comprehensive mental health organizations. Otherwise, there would be a limit of 20 consultations by a psychiatrist during a benefit period.

Dental Services.—At the start, Health Security dental benefits would be limited primarily to children up to age 15, with the coverage including preventive, diagnostic and therapeutic services.

Adults would be entitled initially to certain emergency and rehabilitative services, such as oral surgery to correct accident damage.

The age of eligibility for full dental care would be extended to persons up to age 25 during the first five years of the program's operation and the younger people would remain eligible throughout their lives. The increase of coverage could be accelerated if the Health Security Board believes it is feasible.

Institutional Services.—Health Security would provide full payment for hospital services; skilled nursing home care up to 120 days per benefit period or for an unlimited time if the home is owned or managed by a hospital; other approved non-custodial health services; and, home health services.

The program would also include pathology and radiology services and all other necessary services whether furnished by a hospital or other institution or by others under arrangements with such institutions.

The program would also include recognition as providers of authorized free-standing alcohol, drug abuse, family planning and rehabilitation centers.

Drugs.—Health Security would cover drugs for hospital inpatients and outpatients and for persons enrolled in comprehensive group practice plans and professional foundations as long as the drugs were from an approved list.

For others, drugs would be covered if they were necessary for specified chronic diseases and conditions requiring long or costly drug therapy.

The purpose of the approved drug list—and regular reviews of the list—would be to assure the safety, effectiveness and reasonable cost of the prescribed drugs.

Devices, Appliances and Equipment—Health Security would provide coverage of therapeutic devices, appliances—including eyeglasses, hearing aids and prosthetic devices—and equipment. An approved list of covered items would be prepared and reviewed regularly.

Other Professional and Supporting Services.—Health Security would cover:

1. Professional services of optometrists and podiatrists;

2. Diagnostic services of independent pathology laboratories;

3. Diagnostic and therapeutic services of independent radiologists;

4. Mental health day care services furnished by a health maintenance organization or comprehensive community health center, or 60 days of care furnished, during or following a benefit period, by a hospital or a center affiliated with a hospital;

5. Ambulance services;

6. Other professional services such as psychological counseling, physiotherapy, nutrition, social work and home care or health education when furnished as part of institutional services or through health maintenance organizations;

7. Diagnostic and therapeutic services of free-standing alcohol, drug abuse, family planning and rehabilitation centers.

Social Care Services.—Grants would be provided to local nonprofit organizations to develop social care services to aid chronically ill, aged and other homebound patients. Under this section, while some measure of local financing is developed, Health Security would cover homemaker services, transportation and other social care services as a demonstration of the usefulness of such benefits in reducing unnecessary long-term institutional care.

ADMINISTRATION

Health Security would be administered at four levels—national, regional, area and local—with some important functions carried out by States.

National.—Overall Health Security policy and regulation would be established and carried out by a five-member, full-time Health Security Board appointed by the President and under the supervision and direction of the Secretary of Health, Education and Welfare.

The members normally would be appointed for five-year terms, with one member serving as chairman and with no more than three members from the same political party. The program would be administered through an Executive Director appointed by the Board.

To assist the Board in carrying out its functions and to advise and recommend various changes or actions, a 21-member National Health Security Advisory Council would be established. A majority of the membership of the Council would be consumers of health services. The Council would be authorized to appoint professional and technical committees to help carry out its functions.

The Secretary, Board and Executive Director would all work to assure effective coordination of Health Security with existing HEW programs—and with programs in the regions and States—for the development of health facilities and manpower resources, medical research and public and community health services.

The Health Security Board would control expenditures from the Health Security Trust Fund, establish national benefit patterns, set standards of participation and develop policy guidelines. The Board would also have the responsibility to assure effective consumer participation and public accountability at all levels.

The Board would also have responsibility for studying systems of paying for services and for planning new developments and improvements for health services.

A Commission on Quality of Health Care would be established and charged with assuring and developing standards for care of high quality.

Regional and Health Service Areas.—At the second and third level of administration for the Health Security Program, 10 regional Health Security offices would be established within the regions of the Department of Health, Education and Welfare and approximately 100 health service areas would be established paralleling the natural medical delivery patterns in the United States.

The health service areas normally would consist of a State or part of a State. Interstate areas would be established where the Board found that patterns of health service organization and patient flow made an interstate area a more practical unit of administration.

Local.—As the fourth level of administration, the Health Security Board would establish in each health service area a local Health Security office and any necessary branch offices.

These offices would assist health service consumers and providers and serve an ombudsman function by investigating complaints concerning administration of the program. They would also have informational and other administrative functions.

States.—States would participate in Health Security in a number of ways. They would participate in planning, training, coordination for quality controls and manpower increases, health education, utilization review and the inspection of providers.

The Health Security Board would establish appropriate payment arrangements with the States for the services.

To improve the supply and distribution of health personnel and facilities and the organization of health services, the Board would work with State comprehensive health planning agencies and with regional medical programs.

Existing Programs Affected.—A number of major Federal health programs would be superseded in whole or in part by Health Security.

Medicare.—Everyone 65 or over, along with the rest of the population, would be entitled to Health Security coverage. Because the benefits of Health Security would be broader than those offered under Medicare, the Medicare program would be terminated.

Medicaid.—Most of the benefits of State Medicaid programs would be available under Health Security. Such benefits would be deleted from Medicaid, leaving it as a supplementary program to Health Security. States would claim partial reimbursement for Medicaid services they provided which exceeded those available under Health Security. This would include long-term nursing home care, drugs for certain purposes and adult dental care. Providing the services would be at the option of the individual States.

CHAMPUS.—Under the Civilian Health and Medical Program of the Uniformed Services, the Defense Department reimburses civilian hospitals and private doctors for the health services of servicemen, their dependents and retirees. Most of CHAMPUS benefits would be available under Health Security; CHAMPUS would provide only those benefits not covered by Health Security.

The Department of Defense program for care in military hospitals of servicemen, their dependents and retirees, would continue unaffected by Health Security.

Workmen's Compensation.—Because separation of the health service benefits of Workmen's Compensation programs from cash payments would unduly complicate the eligibility determination process, Workmen's Compensation would continue unaffected by Health Security.

Other Programs.—Maternal and Child Health Programs, Crippled Children Programs, Office of Economic Opportunity Health Programs and Medical Vocational Rehabilitation provide a range of various services to specific groups. In addition to a personal health service component, each program covers other types of health and community service, such as research and vocational training.

Personal health services provided by these programs would be transferred to Health Security, while all other benefit features would remain with the existing program.

Future Plans.—In order to broaden the scope and benefits of Health Security to remove its initial limitations, the program would undertake various studies, including long-term care, coordination of Veterans Administration health care programs with Health Security, and the provisions of Health Security benefits to United States citizens in other countries.

FINANCING

The financing of Health Security would be through a Health Security Trust Fund, similar to the Social Security Trust Fund.

Fifty percent of the money would come from:

1. A 3.5 percent tax on employer payroll.

2. A 1 percent tax on the first $20,000 a year in wages and non-earned income.

3. A 2.5 percent tax on the first $20,000 a year of self-employment income.

The remaining 50 percent would come from Federal general revenues.

If an employer's existing obligations for the purchase of health benefits for his employees are greater than 3.5 percent of payroll, the excess would be applied toward the 1 percent which would otherwise be withheld from an employee's wages.

The first $3,000 income for persons over 60 would be exempt from Health Security tax.

The total of these taxes and the Government matching funds would be the total available ot pay for personal health services in each fiscal year.

After setting aside contingency reserves and money for the development of additional health resources, the remaining money would be divided among the ten regions of the country. This would be done with regard for recent and current use and expenditure patterns for services covered by the program.

Initially, the Health Security Board would look to the latest expenditure, figures available before the program starts, making appropriate adjustments among the region for figures higher or lower than the average. After that, the allocation among regions would be guided by actual expenditures and estimates of what was needed to meet the program's obligations and objectives.

The Board would budget funds for each of the HEW regions in each category of covered service from the total sum allocated to the region. There would be authority for each region to determine its own needs and priorities in supoprt of services.

Operation of the Health Security Trust fund would be taken out of the consolidated budget, except for Government contributions to the trust funds.

COST AND QUALITY CONTROLS

The central cost control feature of the Health Security program is that the health care system would be anchored to a budget established in advance.

The program's main quality control feature would be the establishment of national standards for participation both for individual and institutional providers.

To develop and enforce such standards, a Commission on the Quality of Health Care would be established. It would be a quasi-independent board reporting to the Health Security Board, but with authority to appeal to the Secretary of Health, Education, and Welfare if it believes the Board has failed to implement or enforce effective quality standards.

Here are the details:

Budgeting.—The Health Security Program would establish an advance budgeting procedure for the ocsts of personal health services.

Each year an advance determination would be made of the total amount to be spent in the various regions on physicians' services, institutional services and other categories of services provided in local communities.

The cost of each kind of service and the overall cost of the program would be alllowed to increase only on a controlled and predictable basis.

The program would use the budgetary process not merely to control costs, but also to strengthen local, State and regional planning, stimulate more efficient institutional administration; and gradually reverse the current undesirable emphasis on inpatient hospital and other institutional services. This would be done by stressing preventive and early curative services and by making alternative levels and forms of care available outside of institutions.

In approving budgets for institutions, the program would consider recommendations and decisions of State and other health planning authorities, administrative efficiency of the institution, scope of care provided and the need to achieve an equitable distribution of resources throughout the region and country.

Wasteful duplication of services and facilities would be gradually eliminated by withdrawal of funding. Institutional budgets would be increased to allow for the provision of services needed for a balanced development of regional resources.

National Standards.—The national standards for provider participation would be designed to upgrade the quality of care, encourage appropriate use of health manpower and promote orderly planning of facilities.

Physicians, dentists, osteopaths, optometrists and podiatrists licensed to practice in a state when the program begins would be eligible to take part in the program as long as they met continuing education requirements.

The Health Security Board would be authorized to establish national standards for professional personnel licensed after the program begins and to set requirements for their continuing education.

Hospitals, skilled nursing homes, home health agencies, specified free-standing centers, medical or dental foundations and health maintenance organizations would be eligible to participate if they met national standards established by the Board.

Federal law would supersede state statutes which restrict the development of group practice programs.

Institutions would be required to establish working relationships with other providers of care so that a patient would have continued and appropriate treatment. Institutions which refused to comply with local and regional plans required by the Board would not be eligible to participate in the program.

PAYMENTS TO PROVIDERS

Hospitals, skilled nursing homes and other types of institutional providers would operate on an approved budget basis rather than being able to charge whatever they decided.

Using the precious year's fiscal experience and taking into account standards of participation, range of desirable services and quality controls required by Health Security, the institutions would develop proposed budgets for the next fiscal year. They would be assisted by the regional and local offices of Health Security in preparation of their budget requests. The budgets would be reviewed and given final approval at the regional office level.

Money allocated for payment of individuals, such as physicians, dentists, podiatrists, etc., would be distributed to local areas within the region. This would be done on a per capita basis with adjustments for differences in the cost of goods and services. The budgeted per capita amount for each type of covered service would be divided between the categories of providers according to the number of individuals who elected to receive care from those providers.

For example: In a city of 100,000 people, 25,000 may be enrolled in health maintenance organizations. If the amount budgeted for physicians services in that area is $65 per capita, the Board would pay the HMOs $1,625,000—$65 x 25,000—for physicians services. Since the other 75,000 individuals elected to receive care from solo, fee-for-service practitioners, the Board would create a fund of $4,875,000—$65 x 75,000—to pay all fee-for-service bills submitted by physicians in the community.

Other independent providers such as pathology laboratories, radiology services, pharmacies and providers of appliances, would be paid through methods adapted to their characteristics.

Under Health Security, providers would have to agree not to charge individuals for all or part of any service provided. Payment in full would be made directly by the program to the provider or to the agency representing him. There would be no billing of the patient or indemnity payment to him.

Health maintenance organizations and professional foundations accepting responsibility for providing or securing all covered services for a defined population would receive the total amount budgeted and negotiated as payment. They would share also in the savings they helped to achieve by preventing unnecessary hospitalization of their enrollees.

CONSUMER PARTICIPATION

Health Security would rely heavily on the development of new, comprehensive care organizations such as health maintenance organizations (HMOs) and other forms of prepaid group practice plans to improve consumer opportunities for better health care and provide alternatives for better patient care.

Such organizations will be required to provide or arrange for all covered services except mental and dental services. Professional foundations would be required to provide the same range of services as HMOs and to meet the same strict quality standards.

The manner in which services would be paid for recognizes the added value of the comprehensive care programs as more efficient and higher quality to, and satisfaction of, the consumer.

Consumer organizations would be encouraged to give health care a high priority in their overall activities and to sponsor and develop comprehensive community-wide health care organizations. Along with health maintenance organizations to be developed by hospitals, physician groups and combinations of professionals, the programs developed by consumer-sponsored organizations would be supported and recognized by Health Security.

The Health Security Board would assure effective participation by consumers at all levels of policy formulation and program development. There would be a majority of consumer representatives on the National Advisory Council assisting the Board in its continuing administration of the program, and on regional and local advisory councils. The makeup of the councils would have to reflect the composition of the state or community served. There would be public control of the basic policies governing the program and full public accountability for its finances and operations.

MANPOWER SUPPORT

Health Security would actively encourage more efficient organization of existing health manpower, provide funds for special training of physicians, dentists and other health personnel, and apply financial incentives to stimulate the movement of health manpower to medically deprived areas.

Health Security would recognize costs incurred by HMOs in supporting the training and appropriate utilization of allied health professionals. It would pay the full cost of employing support personnel, such as nurse practitioners, public health nurses, nutritionists and community health workers, thus extending the ability of physicians to provide care and giving the consumer access to a wider range of services.

Training funds could be used for the retraining of health workers to enhance or refresh skills or for new positions of greater responsibility.

Money would be available through the Resources Development Fund to stimulate the expansion of training programs for new categories of health professionals, especially those required as members of primary health care teams—such as pediatric nurse practitioners, physicians' assistants and dental hy-

gienists. Emphasis would be placed upon demonstration programs for the training and placement of allied health workers, and support would be available to institutions for the special costs of educating and training minority group and economically deprived students.

The assured purchasing power of a national health program would help to overcome many of the present barriers to recruiting and holding needed health workers in disadvantaged and remote areas. Substantial efforts would be made to enhance the desirability of practice in such areas by improving local resources and providing money for special communication, transportation and consultation costs.

In addition, special incentives would be used to increase the attractiveness of practice in rural or deprived areas for health workers and their families. There would be financial disincentives for the disproportionate clustering of physicians and dentists in a few metropolitan or suburban areas and corresponding incentives for their location in other areas.

RESOURCES DEVELOPMENT FUND

A substantial Resources Development Fund—Administered by the Health Security Board—would help to increase the resources for services and to bring new organized programs of health service into being and to expand existing ones.

The Resources Development Fund would be formed, first, by appropriations from Federal general revenue for the period between enactment and when benefits began, so that system improvements could get underway promptly, and subsequently, by taking a percentage of the annual income of the Trust Fund (2 percent the first year, increasing in regular intervals to a maximum of 5 percent a year).

A priority would be given in grants and loans to stimulate the development and growth of health maintenance organizations. Essentially, the fund would recognize the responsibility of Health Security to assure the availability of covered health services, and not merely to pay for them. And, it would have concern for the development of services to meet the changing needs of people in the most effective and efficient manner, not merely to build on already overburdened and often wastefully expensive services.

INCENTIVES

Payment for services provided under Health Security would give special incentives to health maintenance organizations and medical or dental foundations.

Physicians who became members of primary health care teams and established working relationships with specialists and with such patient-care resources as hospitals, skilled nursing homes and home health facilities, would be reimbursed for the costs of such linkages and would be encouraged to extend their services through such support arrangements.

Health Security would provide support for continuing studies and demonstrations of new and promising methods of organizing health services.

Members of the Committee of 100 who have, over the past eight years conducted intensive studies and have developed the Health Security Program, include:

CHAIRMAN

Leonard Woodcock, President, International Union, UAW.

SECRETARY

Lane Kirkland, Secretary-Treas., AFL–CIO.

VICE-CHAIRMEN

Vernon E. Jordan, Jr., Executive Director, National Urban League.

Mrs. Albert D. Lasker, President, Albert & Mary Foundation.

Jesse L. Steinfeld, M.D., Chief of Medicine, VA Hospital, Long Beach, Calif.

EXECUTIVE DIRECTOR

Max W. Fine, Washington, D.C.

MEMBERS

I. W. Abel, President, United Steelworkers.

Rev. Ralph D. Abernathy, President, Southern Christian Leadership Conference.

Senator James Abourezk, U.S. Senate.

William S. Apple, Ph. D., Executive Director, American Pharmaceutical Association.

Guillermo Arbona, M.D., Professor, Department of Public Health.

Joseph Thomas August, M.D., Yeshiva University.

George Baehr, M.D., New York, New York.

Grover C. Bagby, Ph. D., Assistant Secretary, United Methodist Church.

Thomas H. Bates, Member, California Assembly.

Mayor Abraham Beame, Mayor, City of New York.

Rabbi Leonard Beerman, Los Angeles, California.

Mrs. William McC. Blair, Jr., Washington, D.C.

Peter Bommarito, President, Rubber, Cork and Linoleum and Plastics Workers of America.

Mayor Thomas Bradley, Mayor, City of Los Angeles.

Lester Breslow, M.D., Dean, University of California, Los Angeles.

James Brindle, Dix Hills, New York.

Mrs. Mary I. Bunting, New Boston, New Hampshire.

Sol. C. Chaikin, President, Inter. Ladies Garment Workers Union.

Irving H. Chase, Cambridge, Massachusetts.

Martin Cherkasky, M.D., Montefiore Hospital of New York.

John Sherman Cooper, Kentucky.

Rep. James C. Corman, U.S. House of Representatives.

William S. Cowles, Jr., Shelburn, Vermont.

Nelson H. Cruikshank, President, National Council of Senior Citizens.

Tony DeChant, President, National Farmers Union.

Rev. Guy Delaney, Second Presbyterian Church, Little Rock, Arkansas.

Stanley Dreyer, President, Co-Op League of the USA.

Robert H. Ebert, M.D., Dean, Harvard Medical School.

William N. Enes, Group Vice-President, Hoffman LaRoche, Inc.

Joseph T. English, M.D., Jacob L. Rice, Mental Health Pavillion, New York, New York.

Bruce W. Everist, M.D., Green Clinic, Rustin, Louisiana.

I. S. Falk, Ph.D., Community Health Center Plan.

Max W. Fine, Executive Director, Committee for National Health Insurance.

Murray H. Finley, President, Amalgamated Clothing & Textile Workers.

Frank E. Fitzsimmons, General President, International Brotherhood of Teamsters.

Emerson Foote, Carmel, New York.

David French, M.D., M.P.H., Director Project for Strengthening Health Delivery Systems in Central West Africa.

Rudolph H. Friedrich, D.D.S., Executive Secretary, New York Academy of Medicine.

Frank Furstenberg, M.D., Associate Director for Program Development, Sinai Hospital of Baltimore.

John Kenneth Galbraith, Professor, Harvard University.

Most Rev. Raymond J. Gallagher, Bishop of Lafayette, Lafayette, Indiana.

General James M. Gavin, Cambridge, Massachusetts.

H. Jack Geiger, M.D., Chairman, Health Sciences Center, Stony Brook, New York

Count D. Gibson, Jr., M.D., Professor and Chairman, Stanford University School of Medicine.

Melvin A. Glasser, Director, Social Security Department, United Auto Workers of America.

Arthur J. Goldberg, Caplan & Drysdale, Washington, D.C.

Mike Gorman, Executive Director, National Committee Against Mental Illness.

Patrick E. Gorman, International Secretary/Treasurer, American Meat Cutters & Butcher Workers.

Martha W. Griffiths, Farmington Hills, Michigan.

A. F. Grospiron, President, Oil, Chemical & Atomic Workers Union.

William Haber, Professor of Economics, University of Michigan.

The Right Reverend Donald H. V. Hallock, Diocese of Milwaukee.

George Hardy, International President, Service Employees Inter. Union, AFL-CIO.

Robert G. Harmon, M.D., Johns Hopkins School of Public Health.

LaDonna Harris, McLean, Virginia.

James G. Haughton, M.D., Deputy Administrator, City of New York Health Services Administration.

Hubert Hemsley, M.D., Director, Watts Health and Family Planning Group.

Terry E. Herndon, Executive Secretary, National Education Association.

John L. S. Holloman, Jr., M.D., New York City Health and Hospital Corporation.

James T. Housewright, President, Retail Clerks Union.

Keith W. Johnson, President, International Woodworkers of America.

Vernon E. Jordan, Jr., Executive Director, National Urban League.

Joseph Kellman, President, Globe Glass and Trim Company.

Sen. Edward M. Kennedy, U.S. Senate.

Clark Kerr, Chairman, Carnegie Council on Policy Studies on Higher Education.

James R. Kimmey, M.D., Administrator, Policy and Planning, State of Wisconsin.

Lambert King, M.D., Cook County Hospital, Chicago.

Mrs. Martin Luther King., Jr., Southern Christian Leadership Conference.

Lane Kirkland, Secretary/Treasurer, AFL–CIO.

Mathilde Krim, Ph. D., New York, New York.

Mrs. Albert D. Lasker, President, Albert & Mary Lasker Foundation.

Russell V. Lee, M.D., Palo Alto, California.

Gov. Patrick J. Lucey, State of Wisconsin—Governor.

Mrs. Jean MacVicar, R.N., University of Southern Mississippi.

Frank Martino, President, International Chemical Workers Union.

E. F. Marriner, M.D., Medical Director, Chicopee Manufacturing Company.

E. G. Marshall, Mt. Kisco, New York.

Charles H. Mayo II, M.D., White Bear Lake, Minnesota.

Emil Mazey, Secretary/Treasurer, International Union, United Auto Workers of America.

Francis McClosky, Ninth Assembly, State of New York.

W. W. McCrory, M.D., Professor and Chairman, Cornell Medical School.

George R. Metcalf, Auburn, New York.

Arnold Miller, President, United Mine Workers of America.

David Miller, Chairman, International Union UAW, Retired, Workers Advisory Council.

Fitzhugh Mullan, M.D., Rockville, Maryland.

Harold F. Newman, M.D., Executive Vice President, Group Health Cooperative of Puget Sound, New York, New York.

Gov. Philip W. Noel, Governor, State of Rhode Island.

Robert Partridge, General Manager, National Rural Electric Coop Association, Washington, D.C.

Charles H. Pollard, President, International Brotherhood of Electrical Workers.

Robert L. Popper, White Plains, New York.

Howard Rome, M.D., Mayo Clinic, Rochester, Minnesota.

Alan Sagner, Commissioner of Transportation, State of New Jersey, Trenton.

Terry Sanford, President, Duke University.

Ernest Saward, M.D., Associate Director, Extramural Affairs, University of Rochester.

William B. Saxbe, Washington, D.C.

Max H. Schoen, D.D.S., M.P.H., UCLA School of Dentistry.

Ray Schoessling, General Secretary/Treasurer, International Brotherhood of Teamsters.

Charles I. Schottland, Brandeis University.

David Seldon, National Institute of Education.

Albert Shanker, President, American Federation of Teachers.

William Sidell, President, United Brotherhood of Carpenters & Joiners of America.

John Siegenthaler, Editor, The Nashville Tennessean.

Mayor Harvey I. Sloane, M.D., Mayor, City of Louisville, Kentucky.

Floyd E. Smith, President, International Association of Machinists.

Oren Lee Staley, President, National Framers Organizations.

Jesse L. Steinfeld, M.D., Dean, Medical College of Virginia.

Carl B. Stokes, NBC Television Network.

The Most Rev. Walter F. Sullivan, Bishop of Richmond, Richmond, Virginia.

Gerald Teplitz, B.S., D.O., Brooklyn, New York.

Myron Wegman, M.D., Dean, School of Public Health.

Jacqueline Wexler, President, Hunter College.

Roy Wilkins, Executive Director, National Association for the Advancement of Colored People.

T. G. G. Wilson, Ph. D., M.D., Director of Clinical Research, Addiction Research Foundation.

Leonard Woodcock, President, United Auto Workers of America.

Jerry Wurf, International President, AFSCME.

Ralph W. Yarborough, Attorney at Law, Austin, Texas.

Alonzo Yerby, M.D., M.P.H., Professor and Head, School of Public Health, Harvard University.

SECTION-BY-SECTION ANALYSIS OF THE HEALTH SECURITY ACT—S. 3

TITLE I—HEALTH SECURITY BENEFITS

Part A—Eligibility for benefits

(Sections 11–12.) Every resident of the U.S. (and every non-resident citizen when in the U.S.) will be eligible for covered services. Reciprocal and "buy in" agreements will permit the coverage of groups of non-resident aliens, and in some cases benefits to U.S. residents when visiting in other countries.

Part B—Nature and Scope of Benefits: Covered Services

(Section 21.) Every eligible person is entitled to have payments made by the Board for covered services provided within the United States by a participating provider.

(Section 22.) All necessary professional services of physicians (including preventive care) are covered wherever furnished, with one quantitative limitation. Psychiatric services to an ambulatory patient are covered without limit if the patient seeks care in the organized setting of a group practice organization, a hospital out-patient clinic, or other comprehensive mental health clinic. In these kinds of organized settings, peer review and budgetary controls can be expected to curtail unnecessary utilization.

If the patient is consulting a solo practitioner, however, there is a limit of 20 consultations per benefit period. In communities where psychiatric services are in especially short supply, the Board may prescribe referrel or other non-financial conditions to give persons most in need of services a priority of access to solo practitioners.

(Section 23.) Comprehensive dental services (exclusive of most orthodontia) are covered for children under age 15, with the covered age group increasing by two years each year until all those under age 25 are covered. (Persons once covered remain covered for the rest of their lives). This benefit is limited initially because, even with full use of dental auxiliaries, there is insufficient manpower to provide dental benefits to the entire population. However, the Board is authorized to expand the benefits more rapidly if availability of resources warrants, and the Board is required within seven years of the effective date of the legislation, to establish a timetable for phasing in benefits for the entire population. To encourage the development of groups which provide comprehensive medical and dental services or comprehensive dental services, the Board is authorized to phrase in full dental benefits more rapidly for the enrollees of those groups than for the general population.

(Section 24.) In-patient and out-patient hospital services and services of a home health agency are covered for the duration of the services, and skilled nursing home services are covered for limited periods. Pathology and radiology services are specifically included as parts of institutional services, thus reversing the practice of Medicare. Domiciliary or custodial care is specifically excluded in any institution, thus necessitating the two important restrictions on payments for institutional care:

(1) Payment for skilled nursing home care is limited to 120 days per benefit period, except that this limit may be increased either when the nursing home is owned or managed by a hospital and payment for care is made through the hospital's budget, or for all nursing homes affiliated with hospitals. It is not practical to assume that the majority of nursing homes and extended care facilities in the country will be able to implement effective utilization review and control plans in the first years of Health Security. The demand for essentially domiciliary or custodial care in nursing homes is so overwhelming that an initial arbitrary limit on days of coverage is necessary. Extension of the benefit is authorized when this becomes feasible.

(2) Many state hospitals do not provide optimal active treatment to their psychiatric patients but rather maintain them in a custodial setting. If Health Security provides unlimited coverage for patients in these hospitals, it might tend to freeze the level of care instead of stimulating these institutions to upgrade their medical care performance. Therefore, the psychiatric hospital benefit is limited to 45 days of *active treatment* during a benefit period.

(Section 25.) The bill provides coverage for two categories of drug use: prescribed medicines administered to in-patients or out-patients within participating hospitals or to enrollees of comprehensive health service organizations, and drugs necessary for the treatment of specified chronic illnesses or conditions requiring long or expensive drug therapy. This will provide coverage of most drug costs for individuals who require costly drug therapy.

The bill requires the Board and the Secretary of HEW to establish two lists of approved drugs. There will be a broad list of approved medicines available for use in institutions and by comprehensive health service organizations and a more restricted list which is available for use outside such organized settings. The restricted list shall stipulate which drugs on it shall be available for treatment of each of the specified chronic diseases. No such restrictions shall be placed upon drug therapy within an institutional setting.

Use of the restricted list will meet the most costly needs for drug therapy while restraining unnecessary utilization. The benefit is more liberal where adequate control mechanisms exist.

(Section 26.) The appliances benefit is similar in concept and operation to the drug benefit, subject to a limitation on aggregate cost. The Board shall prepare lists of approved devices, appliances or equipment which it finds are important for the maintenance or restoration of health, employability or self-management (taking into consideration the reliability and cost of each item). The Board will also specify the circumstances or the frequency with which the item may be prescribed at the cost of the Health Security program.

(Section 27.) The professional services of optometrists and podiatrists are covered, subject to regulations, as are diagnostic or therapeutic services furnished by independent pathology laboratories and radiology services. The care of a psychiatric patient in a mental health day care service is covered for up to 60 days (day care benefits are unlimited if furnished by a group practice organization, by a comprehensive mental health center, or by an approved mental health day care service). Ambulance and other emergency transportation services are covered, as well as non-emergency services where (as in some sparsely settled areas) transportation is essential to overcome special difficulty of access to covered services.

Supporting services such as psychological, physiotherapy, nutrition, social work and health education are covered if they are part of institutional services or are furnished by a group practice organization, individual practice association or certain public or non-profit organizations. This establishes the important principle that these and other supporting services should be provided as part of a coordinated program of health maintenance and care. Psychologists, physical therapists, social workers, etc. will not be permitted to establish independent practices and bill the program on a fee-for-service basis. This is intended to assure that whenever services of this nature are provided they are part of an organized plan of treatment and are germane to the overall care of the patient.

In addition to services available from hospitals, mental health centers or other providers, free-standing alcohol, drug abuse, family planning and rehabilitation centers would be recognized as providers if such centers have an agreement with the Board under section 49(a)(5), (6) and (7).

(Section 28.) Health services furnished or paid for under a workmen's compensation law are not covered. Reimbursement for loss of earnings is so closely interlocked with the health services aspects of workmen's compensation that absorption of the health services portion of workmen's compensation by Health Security could have the effect of delaying findings of eligibility for income payments.

School health services are covered only to the extent provided in regulations.

The Board may exclude from coverage medical or surgical procedures which are essentially experimental in nature. Individuals who enroll in a comprehensive health service organization or enroll themselves with a primary practitioner accepting capitation payments are not entitled to seek covered services from other providers of services (except as specified in regulations). Surgery primarily for cosmetic purposes is excluded from coverage.

The services of a professional practitioner are not covered if they are furnished in a hospital which is not a participating provider. This is intended to discourage physicians from admitting patients to hospitals which cannot or will not meet standards for participation in the program.

Part C—Participating providers of services

(Section 41(a).) Participating providers are required to meet standards established in this title or by the Board under Part H relating to quality of care. In addition, they must agree to comply with such requirements as the Board finds necessary, to assure to their employees, employment rights and working conditions similar to the guarantees of other workers. In addition, they must agree to provide services without discrimination, to make no charge to the patient for any covered service, and to furnish data necessary for utilization review by professional peers, statistical studies by the Board and by the Commission on the quality of the care and verification of information for payments.

(b) A provider's participation may be terminated under procedures described in part G of the bill.

(c) If a provider is merged, consolidated or reorganized, pre-existing employment rights shall be subject to reasonable requirements by the Board for protection of employees' rights.

(Section 42 (a).) Professional practitioners licensed when the program begins are eligible to practice in the State where they are licensed. All newly licensed applicants for participation must meet national standards established by the Board in addition to those required by his State. While stopping short of creating a Federal licensure system for health professionals, this will guarantee minimum national standards. A state-licensed practitioner who meets national standards will be qualified to provide Health Security covered services in any other state. (See also Section 56(a)(1)).

(b) For purposes of this title a doctor of osteopathy is a physician, as is a dentist when performing procedures which, in generally accepted medical practice, may be performed by either a physician or a dentist.

A doctor of optometry or podiatry qualified in accordance with subsection (a) is a physician when furnishing services which are covered services in accordance with regulations issued under Section 27(a) and which he is legally qualified to furnish in the state in which he furnished them.

(Section 43.) This section establishes conditions of participation for general hospitals similar to those required by Medicare. Two requirements not found in the Medicare program are: (1) that the hospital must not discriminate in granting staff privileges on any grounds unrelated to professional qualifications; (2) that the hospital establish a pharmacy and drug therapeutics committee for supervision of hospital drug therapy. Medicare allows any hospital accredited by the Joint Commission on the Accreditation of Hospitals (if it provides utilization review) to participate in the program, thus in effect delegating to the Commission the determination whether the standards are met. This title requires all participating hospitals to meet standards established by the Board.

(Section 44.) Psychiatric hospitals will be eligible to participate only if the Board finds that the hospital (or a distinct part of the hospital) is engaged in furnishing active diagnostic, therapeutic and rehabilitative services to mentally ill patients. Psychiatric hospitals are required to meet the same standards as those prescribed for general hospitals in Section 43, and such other conditions as the Board finds necessary to demonstrate that the institution is providing active treatment to its patients. These standards will exclude costs incurred by state mental institutions to the extent they serve domiciliary or custodial functions.

(Sections 45 and 46.) Section 45 establishes conditions of participation for skilled nursing homes similar to those established for extended care facilities under Medicare. Important differences, however, are the requirement for affiliation with a participating hospital or group practice organization (see Section 51(b)) and changes in the requirements for utilization review (see Section 50). Under Section 46 participation by home health agencies will be limited to public agencies and non-profit private organizations—proprietary home health agencies are specifically excluded.

(Section 47.) Subsection (a) describes a group practice organization (one type of health maintenance organization) which undertakes to provide an enrolled population either with complete health care or, at the least, with complete Health Security services (other than mental health or dental services) for the maintenance of health and the care of ambulatory patients. The bill, in its aim to improve the methods of delivery of health services, places much emphasis on the development of new organizations of this kind and the enlargement of old ones.

Other requirements are spelled out in this section: The organization must furnish medical services (and dental services if they are included) through prepaid group practice. Other services must be furnished by staff of the organization or by contractors for whom the organization assumes responsibility, except that institutional services may be provided by arrangements with other participating providers at the expense of the group practice organization. The organization must be non-profit, but it may utilize proprietary providers in fulfilling its responsibilities.

All persons living in or near a specified service area will be eligible to enroll during an annual open enrollment period, subject to the capacity of the organization to furnish care. Services must be reasonably accessible to persons living within the specified service area. Periodic consultation with representatives of enrollees is required, and they must be given opportunity to participate in policy formulation and in evaluation of operation. Professional policies and their effectuation, including monitoring the quality of services and their utilization, are to be the responsibility of a committee or committees of physicians (and other health professionals where appropriate). Health education and the use of preventive services must be stressed, and lay persons are to be employed so far as is consistent with good medical practice. Charges for any services not covered by Health Security must be reasonable. Finally, the organization must agree to pay for services furnished by other providers in emergencies, either within the service area of the organization or elsewhere, but may meet this requirement to the extent feasible through reciprocal service arrangements with other organizations of like kind.

Subsection (b) makes clear that the organization, or professionals furnishing services for it, may also serve non-enrollees, with payment to be made to the organization, or, at its request, to such professionals.

(Section 48.) An individual practice association (another type of health maintenance organization) must be a non-profit organization, sponsored by a county or other local medical society, which meets all the conditions for participation by a group practice organization other than the requirement of group practice. All physicians practicing in the area (and all dentists if dental services are furnished) must be permitted to become professional members, subject only to criteria, approved by the Board, relating to professional qualifications. For professional services to enrollees, professional members may be compensated by the foundation by whatever method, including fee-for-service, may be agreed upon by it and its members.

Subsection (b) provides that a professional member may furnish services to persons not enrolled in the association and receive payment from the Board on the same basis as independent practitioners, except that if he is paid by capitation, salary, or stipend by the association, the payment for services to non-enrollees is to be made to the association.

(Section 49.) This section deals with several classes of health organizations that vary widely, even within a single class, in their structure and in the scope of the services which they offer. Because statutory specifications cannot well be tailored to so many variables, the section sets forth only a general statement of the kinds of organizations to which it relates and leaves participation of each organization to a case-by-case decision of the Board on such terms as the Board deems proper.

Subsection 49(a)(1) permits the participation of community health centers of the like which, though furnishing a broad range of ambulatory services, do not serve an enrolled or otherwise predetermined population and may not meet some other requirements of section 47(a). Subsection (a)(2) authorizes the Board to deal separately with the primary care portion of a system of comprehensive care where it is necessary to rely on arrangements with other providers, rather than on a unified structure, to round out the other elements of the system. Where organizations meeting the extensive requirements of section 47(a) or 48(a) are not available, these two paragraphs of section 49(a) will give the Board flexibility in furthering one of the bill's prime objectives, the development and broad availability of comprehensive services furnished on a coordinated basis.

Because of the extent to which mental health services are separated from other health care, subsection (a)(3) permits the Board to contract directly with public or other nonprofit mental health centers and mental health and day care services.

If a state or local public health agency is providing preventive or diagnostic services, such as immunization or laboratory tests, the Board may under subsection (a)(4) contract with it for the continuance of these services.

In accordance with regulations, the Board may contract with free standing ambulatory treatment centers for alcoholism and/or drug abuse; for family planning services; and for rehabilitation services.

In the field of private practice, physicians or dentists or other practitioners may group themselves in a clinic, nonprofit or proprietary, or in any number of other ways, and it may be more convenient both to them and to the Board to regard them as an entity than to deal with each practitioner separately. Subsection (a)(8) permits this. The Board will have wide discretion in contracting with such entities subject only to the limitation that, like other organizations described in section 49(a), the entity may not (under section 88(a)) be paid on a fee-for-service basis. Practitioners who elect that method of payments may of course pool their bills for submission to the Board, but there is no reason to contract with a unit for the payment of fees to it.

Subsection (b) makes clear that agreements with the Board under this section shall not (unless expressly so stipulated) preclude practitioners furnishing services under the agreements from furnishing other services as independent providers.

(Section 50.) This section specifies the broad and general conditions under which independent pathology laboratories, independent radiological services, providers of drugs, devices, appliances, equipment, or ambulance services may qualify as providers under Health Security. As under Medicare, a Christian Science Sanatorium qualifies if

operated, or listed and certified, by the First Church of Christ, Scientist, Boston.

(Section 51.) The requirements of utilization review in hospitals and skilled nursing homes are in the main similar to those which Medicare has, since 1966, imposed with respect to services to aged patients. In Health Security the requirements will of course apply to the entire population. As in Medicare, the review is designed to serve a dual purpose: identification of certain specific misuses of the institutional services with a view to their termination, and a focusing of continuing attention and concern of the medical staff on the necessity for efficient utilization of institutional resources. Section 51(a) strengthens the educational aspect of the process by requiring specifically that records of reviews be maintained and statistical summaries of them be reported periodically to the institution and its medical staff (and, on request, to the Board). As under Medicare, the review committee will consist of two or more physicians, with or without other professional participation; and in the case of hospitals, will normally be drawn from the medical staff unless for some reason an outside group is required. For skilled nursing homes, on the other hand, section 51(c) departs from Medicare by permitting as an alternative that the Committee be established by the State or local public health agency under contract with the Board, or failing that, by the Board. If the nursing home operates under a consolidated budget with a hospital, the review will be made by the hospital committee. Like Medicare, Section 51(d) and (e) call for review of specific long-stay cases as required by regulations, and notification to the institution, the attending physician, and the patient when a decision adverse to further institutional services is made.

(Section 52.) Subsection (a) of Section 52 is also like Medicare in requiring a participating skilled nursing home to have in effect an agreement with at least one participating hospital for the transfer of patients and medical and other information as medically appropriate. Subsection (b) introduces a requirement, applicable two years after the effective date of health benefits to both skilled nursing homes and home health service agencies, of affiliation with a participating hospital or group practice organization. Unless the medical staff of the hospital or organization undertakes to furnish the professional services in the nursing home or the professional services of the home health service agency, that medical staff or a committee of it must assume responsibility for these services. Subsection (c) allows the Board to waive the application of either of these requirements to a skilled nursing home or a home health agency which the Board finds essential to the provision of adequate services, if (but only for as long as) lack of a suitable hospital or organization within a reasonable distance makes a transfer or an affiliation agreement impracticable.

(Section 53.) If the construction or substantial enlargement of a hospital, skilled nursing home, or ambulatory care facility has been undertaken after December 31 of the year of enactment, without either a State certificate of need or a prior approval by a planning agency designated by the governor of the State or the Board, section 53 precludes the institution from participating in the Health Security program, except that in case of enlargement, the Board may permit participation subject to reduction in reimbursement for services. This should greatly strengthen state and local planning authorities.

(Section 54.) This section prohibits double recovery in malpractice litigation by stipulating that no damages will be awarded to the injured party for remedial services which are available without cost under the Health Security program.

(Section 55.) Institutions of the Department of Defense and the Veterans' Administration, and institutions of the Department of Health, Education, and Welfare serving merchant seamen or Indians or Alaskan natives, are excluded by section 55 from serving as participating providers, as is also any employee of these institutions when he is acting as an employee. The Board will, however, provide reimbursement for any services furnished (in emergencies, for example) by these institutions or agencies to eligible persons who are not a part of their normal clientele. It will also provide reimbursement for services furnished by the Public Health Service under the Emergency Health Personnnel Act of 1970.

(Section 56.) This section overrides, for purposes of the Health Security Program, State laws of several kinds which inhibit the utilization or the mobility of health personnel, cloud the legality of so-called "corporate practice" of health professions, or restrict the creation of group practice organizations. The authority of Congress to do this, in conjunction with a program of Federal expenditure to provide for the general welfare, flows from the Supremacy Clause of the Constitution and seems now to be clearly established. *Ivanhoe Irrigation District* v. *McCracken*, 357 U.S. 275 (1958); *King* v. *Smith*, 392 U.S. 309 (1968).

The first three paragraphs of subsection (a), while stopping short of creating a system of Federal licensure for health personnel, will greatly facilitate both the interstate mobility of State licensees and the effective use of ancillary personnel in the furnishing of health care. The dispensations contained in these paragraphs will be available to persons who meet national standards established by the Board.

Paragraph (1) permits a physician, dentist, optometrist, or podiatrist, licensed in one State and meeting the national standards, to furnish Health Security benefits in any other state, the scope of his permissible practice being governed by the law of the State in which he is practicing. This paragraph obviates the difficulty and cost which a practitioner may encounter, especially where reciprocity of licensure is not available, in taking up practice in a State in which he has not been licensed.

Paragraph (2) grants a similar authority to other health professional and non-professional personnel. For occupations such as pharmacy and professional nursing, which are subject to licensure in all States, a person can avail himself of this paragraph only if he is licensed in one State and meets the national standards; in other cases, where licensure is not universally required, compliance with national standards is sufficient. Here again, impediments to mobility created by existing licensure laws will be removed.

The restrictions which many professional practice acts impose on the use of lay assistants, and the legal uncertainties which often deter such use, discourage practices that can increase greatly, without sacrifice of safety, the volume of services which professionals can render. Accordingly, paragraph (3) of subsection (a) enables the Board to permit physicians and dentists, participating in public or non-profit hospitals and group practice organizations, to use ancillary health personnel, acting under professional supervision and responsibility, to assist in furnishing Health Security benefits. Such assistants may do only things which the Board has specified, and may be used only in the context of an organized medical staff or medical group. Persons employed as assistant must not only meet national standards for their respective occupations, but must also satisfy special qualifications that the Board may set for particular acts or procedures.

In the interest of encouraging salaried practice and the integration of professional practitioners from well-structured organizations for the delivery of health services, paragraph (4) of subsection (a) does away with the "corporate practice" rule insofar as it concerns participating public or other non-profit hospitals and group practice organizations. These institutions may employ physicians or make other arrangements for their services, unless in the unlikely event that the lay interference with professional acts or judgments should be threatened. No conflict of interest results from such arrangements; in the non-profit setting loyalty to employer and loyalty to patient run parallel.

Some state laws place restrictions of one kind or another on the incorporation of group practice organizations. When these restrictions prevent the State incorporation of an organization meeting the strict requirements of the Health Security Act, section 56(b) empowers the Secretary to incorporate it for purposes of the Act. Except for the special restrictions, State law will govern the corporation.

Part D—Trust Fund; Allocation of Funds for Services

(Section 61.) By section 406(a) of the present bill, section 1817 of the Social Security Act, creating the Federal Hospital Insurance Trust Fund, is amended and transferred to become section 61 of the Health Security Act. The fund will thus become the Health Security Trust Fund, succeeding to the assets and liabilities of both Medicare trust funds, and receiving the proceeds of the health security taxes imposed by title II of the Health Security Act and the authorized appropriations from general revenues equal to 100 percent of those tax receipts.

The Fund will also receive recoveries of overpayments, and receipts from loans and other agreements. To implement the role of the Trust Fund, the Managing Trustee (the Secretary of the Treasury) will make payments from the Trust Fund provided for under Title I, as the Board certifies, and with respect to administrative expenses as authorized annually by the Congress.

(Section 62.) The Health Security program in intended to operate on a budget basis overall. Accordingly, subsection (a) requires the Board to determine for each fiscal year the maximum amount which may be available for obligation from the Trust Fund. The amount so determined in advance (by March 1 preceding each fiscal year) shall not exceed the smaller of two stated limitations. The first limit is fixed on 200% of the expected net receipts from all the Health Security taxes (i.e., the tax receipts augmented by 100% thereof, to be appropriated into the Fund from general revenues of the Government.) The second limit, applicable to each fiscal year after the first full fiscal year of benefit operation (i.e., after fifteen months' availability of covered services), is an amount equal to the estimated obligations of the current year (within which the estimate is being made), subject to certain adjustments. Such adjustments will reflect change expected in: (A) the price of goods and services; (B) the number of eligible persons; (C) the number of participating professional providers, or the number or capacity of institutional or other participating providers so far as such changes are not already adequately reflected; and (D) the expected cost of program administration.

In the interest of prudent fiscal management, subsection (b) requires the Board to restrict its estimate of the amount available for obligation in the next fiscal year (in accordance with subsection (a)) if the Board estimates that the amount in the Trust Fund

at the beginning of the next fiscal year will be less than one-quarter of the total obligations to be incurred for the current year, and that such restriction will not impair the adequacy or quality of the services to be provided. Also, the Board is required to reduce its alternative estimate of the maximum amount to be available if it finds that the aggregate cost to be expected has been reduced (or an expected increase has been lessened) through improvement in organization and delivery of service or through utilization control.

Subsection (c) provides against various other contingencies which may result in increase or decrease in the estimate of the maximum amount to be available for obligation in a next fiscal year. The amount may be modified before or during the fiscal year: if the Secretary of the Treasury finds that the expected Health Security tax receipts will differ by 1 percent or more from the estimate used under subsection (a); or if the Board finds that either its factors of expected change or the cost of administration is expected to differ from the estimate by 5 percent or more; or if an epidemic, disaster or other occurrence compels higher expenditure than had been expected. If, as a result, the maximum estimate has to be increased (rather than being decreased), the Board (through the Secretary) shall promptly report its action to the Congress with its reasons.

(Section 63.) Subsection (a) provides that separate accounts shall be established in the Health Security Trust Fund—a Health Services Account, a Health Resources Development Account, and an Administration Account, as well as a residual General Account. Subsection (b) provides that in each of the first two years of program operation, 2 percent of the Trust Fund shall be set aside for the Health Resources Development Fund; and the allocation shall increase by 1 percent at two-year intervals to 5 percent within the next 6 years. The money in this account will be used exclusively for the planning and system improvement purposes described in part F.

(c)(d) After deducting the amount approved by Congress and transferred to the Administration Account, the remainder of the monies shall be allocated to the Health Services Account, and shall be used exclusively for making payment for services in accordance with part E.

(Section 64.) This section provides for allocation of the Health Services Account among the regions of the country. (a) The allocation to each region shall be based on the aggregate sum expended during the most recent 12-month period for covered services (with appropriate modification for estimated changes in the price of goods and services, the expected number of eligible beneficiaries, and the number of participating providers). (b) In allocating funds to the regions the Board shall seek to reduce, and over the years gradually eliminate, existing differences among the regions in the average per capita amount expended upon covered health services (except when these reflect differences in the price of goods and services). To accomplish this, the Board will curtail increases in allocations to high expenditure regions and stimulate an increase in the availability and utilization of services in regions in which the per capita cost is lower than the national average. (c) A contingency reserve of up to 5% may be withheld from allocation. If the remaining funds available are inadequate, allocations will be reduced pro rata. (d) Allocations may be modified before or during a fiscal year if the Board finds this is necessary.

(Section 65.) The Board will divide the allocation to each region into funds available to pay for: institutional services; physician services; dental services; furnishing of drugs; furnishing of devices, appliances and equipment; and other professional and supporting services, including subfunds for optometrists, podiatrists, independent pathology laboratories, independent radiology services, and other items. The percent allocated to each category of service may vary from region to region. In determining allocation to these funds they will be guided by the previous years' expenditures for each category of service but also take into account trends in the utilization of services and the desirability of stimulating improved utilization of resources. It will encourage a shift from heavy reliance on institutional care to better utilization of preventive and ambulatory services.

(Section 66.) These regional funds will be sub-divided among the health service areas in each region, primarily upon the basis of the previous years' expenditure for each kind of service. Again, the Board will gradually attempt to achieve the equalization of services within each region by restraining the increase of expenditures in high cost areas and channeling funds into health service areas with a low level of expenditures.

(Section 67.) Before or during a fiscal year, the division of regional funds by classes of service or the allotments to health service areas may be modified if necessary or if indicated by newly acquired information.

(Section 68.) By the time Health Security benefits become available, the Government will be opreating on a fiscal year beginning on October 1. This section accordingly allows the Board to make the initial determinations and allocations under this part either for the three-month period from the effective date of benefits on July 1 until the beginning of the next fiscal year or for the fifteen-month period which includes the next fiscal year.

Part E—Payment to Providers of Services

(Section 81.) Payments for covered services provided to eligible persons by participating providers will be made from the Health Services Account in the Trust Fund.

(Section 82.) This section delineates methods of paying professional practitioners. Every independent practitioner (physician, dentist, podiatrist, or optometrist) shall be entitled to be paid by the free-for-service method (subsection (a)), the amounts paid being in accordance with relative value scales prescribed after consultation with the professions (subsection (g)). Each physician engaged in general or family practice of medicine in independent practice may elect to be paid by the capitation method if he agrees to furnish individuals enrolled on his list with all necessary and appropriate primary services, make arrangements for referral of patients to specialists or institutions when necessary, and maintain records required for medical audit; and independent dentist practitioners may elect the capitation method of payment similarly (susection (b)).

These requirements in connection with capitation payments are intended to assure that the physician (or dentist) provides to his patients all professional services within the range of his undertaking and secures other needed services by referral. Through regular medical audits, the Board will monitor the level and quality of care provided.

When necessary to assure the availability of services in a given area, subsection (c) permits paying an independent practitioner a full-time or part-time stipend in lieu of or as a supplement to other methods of compensation. This method of payment will be used selectively by the Board, mainly to encourage the location of practitioners in remote or deprived areas. Practitioners may also be reimbursed for the special costs of continuing education required by the Board and for maintaining linkages with other providers—for example, communication costs. Incentives operative under this provision will encourage physicians to improve the quality and continuity of patient care, even if the physician does not participate in a group practice. The Board may pay for specialized medical services on a per session or per case basis, or may use a combination of methods authorized by this section.

Subsection (d) defines the capitation method of payment.

Subsections (e), (f), (g). These subsections describe the method to be used in applying, as between practitioners electing the various methods of payments, the monies available in each health service area for payment to each category of professional providers. From the amount allocated to each service area, the Board will earmark funds sufficient to pay practitioners receiving stipends and for the professional services component of institutional budgets, such as hospitals. The remainder of the money will be divided to compute the per capita amount available for each category of service (i.e., physicians, dentists, podiatrists, optometrists) to the residents of the area. This per capita amount in each category will fix the capitation payments to organizations that undertake to provide the full range of services in that category to enrolled individuals. Lesser amounts will be fixed for more limited services. For example, if the per capita amounts available for physician and dental services are $65 and $25, respectively, primary physicians accepting capitation payments will receive the percentage of that $65 which is allocated for primary services, a medical society-sponsored individual practice association would receive the entire $65 for physician services, dentists furnishing all covered services would receive the $25 allocated for dental services, and organizations which undertake to provide all physician and dental services to enrolled individuals will receive $90 for each enrolled individual.

The budget per capita amount for each type of covered service (physician, dental, etc.) will be divided between the categories of providers of service according to the number of individuals who elect to receive care from those providers. For example, in a city of 100,000 people, 25,000 may enroll in a group practice organization. Using the figures cited in the example above, the Board will pay the group practice organization $1,625,000 ($65 x 25,000) for physician services. The other 75,000 individuals elect to receive their physician services from solo, fee-for-service practitioners. The Board will create a fund of $4,875,000 ($65 x 75,000) to pay all fee-for-service bills submitted by physicians in that community, in accordance with relative value scales and unit values fixed by the Board. The fund for fee payments will be augmented to the extent that some capitation payments have been lowered because they cover only primary services, and may be augmented further where a substantial volume of services is furnished, on a fee basis, to non-residents of the area.

Subsection (h) authorizes the Board to experiment with other methods of reimbursement so long as the experimental method does not increase the cost of service or lead to overutilization or underutilization of services.

(Section 83.) Hospitals will be paid on the basis of a predetermined annual budget covering their approved costs. To facilitate review of these budgets, the Board will institute a national uniform accounting system. Subsection (b) stipulates that the costs recognized for purposes of the budget will be those incurred in furnishing the normal services of the institution except as changed by agreement, or by order of the Board under section 134. This will enable the Board, on the basis of State and local planning, to eliminate, gradually, wasteful or duplicative services, and also to provide for orderly expansion of hospital services where needed.

Physicians and other professional practitioners whose services are held out as avail-

able to patients generally (such as pathologists and radiologists) will be compensated through the institutional budget, whatever the method of compensation of such practitioners and whether or not they are employees of the hospital. This departs from the practice in Medicare which allows independent billing by such physicians. The institution's budget may also be increased to reflect the cost of owning or operating an affiliated skilled nursing home, or home health service agency. Hospital budgets will be reviewed by the Board, locally or regionally, which may permit participation by representatives of the hospitals in each region. Budgets may be modified before, during, or after the fiscal year if changes occur which make modification necessary.

(Section 84.) If an entire psychiatric hospital is found by the Board to be providing active treatment to its patients, and the institution is therefore primarily engaged in providing covered services to eligible beneficiaries, it will be paid on the same basis as a general hospital (on the basis of an approved annual budget). Otherwise the Board will negotiate a patient-day rate to be paid for each day of covered service provided to an eligible beneficiary.

(Section 85.) This section provides that skilled nursing homes and home health agencies will be paid in the same manner as a general hospital (on an approved annual budget basis). The Board may specify use of nationally uniform systems of accounting and may prescribe by regulation the items to be used in determining approved costs and the services which will be recognized in budgets.

(Section 86.) Reimbursement for drugs will be made to the dispensing agent on the basis of an official "product price" for each drug on the approved list, plus a dispensing fee in the case of an independent pharmacist. The official product price will be set at a level which will encourage the pharmacy to purchase substantial quantities of the drug (this should result in significant reductions in the unit cost of each drug). The official price may be modified regionally to reflect differences in cost of acquiring drugs. The Board will establish dispensing fee schedules for reimbursing independent pharmacies. These schedules will take into account regional differences in costs of operation, differences in volume, level of services provided and other factors.

(Section 87.) Subsections (a) and (b) provide that a group practice organization or individual practice association will be paid a basic capitation rate multiplied by the number of eligible enrollees. The amount of the capitation rate will be determined by the per capita amounts available for the several professional services in the area, and a rate fixed by the Board as the average reasonabe and necessary cost per enrollee for other covered services.

Subsection (c) fixes capitation amounts for institutional services based on per diem rates derived from the budgets of participating institutional providers or institutions with which the organization or association may have a contractual agreement. The organization or association will be entitled to share in up to 75% of any savings which are achieved by lesser utilization of institutional services by its enrollees. Entitlement to such savings is conditional upon a finding by the Board that the services of the organization or association have been of high quality and adequate to the needs of its enrollees, and that the average utilization of hospital or skilled nursing services by the enrolleees of the organization or association is less than the use of such services by comparable population groups not so enrolled but under otherwise comparable circumstances. This money may be used by the organization or association for any of its purposes, including the provision of services which are not covered under the Health Security program.

Subsection (e) directs the Board to allow organizations and associations to reinsure with the Board against catastrophic costs incurred on behalf of any one enrollee, against some or all of the costs of institutional care which it contracts out, and against some or all of the costs of out-of-area services.

Subsection (f) permits the Board to make an additional payment to a group practice organization for the cost of clinical education or training provided by the organization.

(Section 88.) Subsection (a) provides that an organization or agency with which the Board has entered into an agreement under section 49 (such as a neighborhood health center, a non-profit mental health center, or local public health agency furnishing preventive or diagnostic services) may be paid by any method agreed upon other than fee-for-service.

Subsection (b) provides that independent pathology or radiology services may be paid on the basis of an approved budget or such other methods as may be specified in regulations.

Subsection (c) leaves the method of payment for other types of supporting services to be specified in regulations.

(Section 89.) This section provides that the Board will reduce payments to institutional providers in accordance with findings by the Secretary that a facility or any part of a facility has not been built in compliance with the area health plan.

(Section 90.) All participating providers will be paid from the Health Services Account in the Trust Fund at such time or times as the Board finds appropriate (but not less often than monthly). The Board may make advance payment to supply providers with working funds when it deems advisable.

Part F—Development fund

Subpart 1—Planning: Funds to Improve Services and to Alleviate Shortage of Facilities and Personnel

(Section 101.) This section sets forth the general purposes of subpart 1 of Part F. The subpart enables the Board, through selective financial assistance, to stimulate and assist in the development of comprehensive services, the education and training of health personnel who are in especially short supply, and the betterment of the organization and efficiency of the health delivery system. In carrying out these functions, the Board is to be guided by the planning with respect to health facilities and the organization of services which will be conducted under the recently enacted title XV of the Public Health Services Act, when and as the new processes become operative. In the meantime it will be guided by such planning as is conducted by the Secretary under section 102. With respect to the supply and distribution of health personnel, the Board will also rely on planning conducted by the Secretary.

(Section 102.) Subsection (a) directs the Secretary in effect, to fill in the gap in facility and services planning until the new processes can begin to produce results, addressing himself immediately to the most acute shortages and maldistributions of facilities and the most serious deficiencies in organization. He is directed to consult with, and utilize the experience and recommendations of, both existing State and local health planning agencies and the new agencies as they emerge.

Subsection (b) places on the Secretary a continuing duty to plan for improvement of the supply and distribution of health personnel, and to do this in consultation both with the health planning agencies and with appropriate professional organizations.

Thus, the bill takes advantage of the new legislation strengthening State planning agencies, focusing in them eventually the responsibility, visualized in the "Partnership-for-Health" legislation but in many States not realized as an operating reality, for pulling together all health planning efforts within their territories. Recognizing, however, that it will take time to make the new arrangements effective, the bill charges the Secretary with bringing all available experience and skills to bear on the immediate need to identify the most pressing requirements in preparation for the availability of Health Security benefits. These tasks will not be easy, but they are lent new urgency by the Health Security Program.

(Section 103.) In administering subpart 1, this section stipulates, the Board will give priority to improving comprehensive health services for ambulatory patients through the development or expansion of group practice organizations and community health centers, and primary care centers (where full service organizations are impractical), the recruitment and training of personnel, and the strengthening of coordination among providers of services. Funds will not be used to replace other Federal financial assistance, and may supplement other assistance only to meet specific needs of the Health Security program. Other Federal assistance programs are to be administered when possible to further the objectives of Part F, and the Board may provide loans or interest subsidies to help the beneficiaries of other programs to meet the requirements for non-Federal funds.

(Section 104.) Help of several kinds will be available under this section for the creation or the eniargement of group practice organizations to serve an enrolled population on a capitation basis, agencies such as neighborhood health centers which need not require enrollment in advance, primary care centers, or organizations furnishing comprehensive dental services. Grants may be made to any public or other non-profit organization (which need not be a health organization) to help meet the cost, other than construction cost, of establishing such organizations, and to existing organizations to help meet the cost of expansion: the maximum grants being, in the former case 90 percent of the cost, in the latter 80 percent. The Board may also provide technical assistance for these purposes. Loans may be made for the cost of necessary construction, subject to the same 90 and 80 percent limitations on amount. Finally, start-up costs of operation of these organizations may be underwritten, for five years in the case of organizations which must build up an enrollment to assure operating income, and in other cases until the Health Security program begins payment for services in the first year of entitlement to benefits. The effect of these several provisions is to reduce sharply, if not eliminate, the financial obstacles which have heretofore impeded the growth of group practice and similar organizations.

(Section 105.) This section contains a series of provisions to assist in the recruitment, education, and training of health personnel. The Board will establish priorities to meet the most urgent needs of the Health Security system, but the priorities will be flexible both as between different regions and from time to time. Professional practitioners will be recruited for service in shortage areas, both urban and rural, and in group practice organizations, and such practitioners may be given income guarantees. Other Federal assistance for health education and training will be availed of, but the Board may supplement the other assistance if the Board believes it inadequate to the needs, until Congress has had opportunity to review its adequacy. The training authorized includes retraining. It also includes the development of new kinds of health personnel to assist in furnishing comprehensive services, and the training of area residents to participate in personal health education and to serve liaison functions and serve as representatives

of the community in dealing with health organizations. Grants may be made to test the utility of such personnel, and to assist in their employment before the effective date of health benefits. Education and training are to be carried out through contracts with appropriate institutions and agencies, and suitable stipends to students and trainees are authorized. Physicians will be recruited and trained to serve as hospital medical directors. Finally, special assistance may be given, both to institutions and to students, to meet the additional costs of training persons disadvantaged by poverty, membership in minority groups, or other cause.

(Section 106.) This section authorizes special improvement grants: first, to any public or other nonprofit health agency or institution to establish improved coordination and linkages with other providers of services; and, second, to the organizations described in section 104 to improve their utilization review, budget, statistical, or records and information retrieval systems, to acquire equipment needed for those purposes, or to acquire equipment useful for mass screening or for other diagnostic or therapeutic purposes.

(Section 107.) This section provides that loans under part F are to bear 3 percent interest and to be repayable in not more than 20 years. Other terms and conditions are discretionary with the Board, except for required compliance with the Davis-Bacon Act. Repayment of loans made from general appropriations will go to the general fund of the Treasury; repayment of later loans will revert to the Health Resources Development Account in the Trust Fund.

(Section 108.) This section specifies that payments under part F shall be in addition to, and not in lieu of, payments to providers under part E.

Subpart 2—Programs of Personal Care Services

(Section 111.) The purpose of this subpart is stated in this section, to encourage and assist in the development of community programs of maintaining in their own homes, by means of comprehensive health and personal care services, disabled or chronically ill persons who otherwise require or are likely to require institutional care. It is intended that a grant be made in any community that can develop a satisfactory program and such non-Federal financing as the Board finds appropriate.

(Section 112.) This section authorizes grants to public or nonprofit agencies for this purpose, each program being designed to serve a substantial urban or rural population. Grants may be made for up to four years, and shall be irrevocable except for cause.

(Section 113.) The services to be provided include, in addition to covered health services, combinations of personal care services (such as homemaker and home maintenance services, laundry, meals-on-wheels and other dietary services, help with transportation and shopping, and other appropriate services). Different services may be provided in different programs. Full coordination with existing community health or personal care programs is required. Committees are to be established, consisting of professionals and representatives of users of the services, to screen applications for assistance and monitor utilization.

(Section 114.) Grantees must evaluate their programs with respect both to benefits to users of the services and to the fiscal impact on the Health Security system. The Board is also to evaluate each program and summarize its conclusions in its annual reports to Congress.

(Section 115.) Within three years the Board is to make a comprehensive report to Congress on this program with an evaluation of its operation. The Board is to submit also its recommendations of methods of developing, as widely and rapidly as practicable, personal care services where they are then lacking, with a view to making such services generally available throughout the United States; its recommendations with respect to the continuing financial support of such programs; and its recommendations on the proper role of the Health Security program in providing long-term institutional care and in providing personal care services in lieu thereof.

Subpart 3—Availability of funds

(Section 120.) For the two-year "tooling-up" period, appropriations of $200 and $400 million are authorized for financial assistance. Beginning with the effective date of health benefits, percentages of the Trust Fund expenditures will be earmarked for such assistance (section 63). From that date on, the leverage of these expending funds will supplement and reinforce the incentives, which are built into the normal operation of the Health Security program, for improvement of the organization and methods of delivery of health services.

Part G—Administration

This part of the bill creates an administrative structure within the Department of Health, Education, and Welfare with responsibility for administration of the Health Security program. Program policy will be made by a five-member Board, under the supervision of the Secretary of HEW. The Board will be assisted by a National Health Security Advisory Council which will recommend policy and evaluate operation of the program, and an Executive Director who will serve as Secretary to the Board and chief administrative officer for the program. Administration of the program will be greatly decentralized among the HEW Regional Offices. Regional and local health services advisory councils will advise on all aspects of the program in their regions and local areas. The Board may also appoint such professional or technical committees as it may deem necessary.

(Section 121.) This section establishes a five-member full-time Health Security Board serving under the Secretary of Health, Education, and Welfare. Board members will be appointed by the President with the advice and consent of the Senate, for five-year overlapping terms. Not more than three of the five appointees may be members of the same political party. A member who has served two consecutive terms will not be eligible for reappointment until two years after the expiration of his second term. One member of the Board shall serve as chairman at the pleasure of the President.

(Section 122.) This section charges the Secretary of HEW and the Board with responsibility for performing the duties imposed by this title. The Board shall issue regulations with the approval of the Secretary. It is required to engage in the continuous study of operation of the Health Security program; and, with the approval of the Secretary, to make recommendations on legislation and matters of administrative policy, and to report to the Congress annually on administration and operations of the program. The report will include an evaluation of adequacy and quality of services, costs of services and the effectiveness of measures to restrain the costs. The Secretary of HEW is instructed to coordinate the administration of other health-related programs under his jurisdiction with the administration of Health Security, and to include in his annual report to the Congress a report on his discharge of this responsibility.

The Civil Service Commission is instructed to make every effort to facilitate recruitment and employment, to work in the Health Security Administration, of persons experienced in private health insurance administration and other pertinent fields.

Subsection (g) authorizes the Board to establish fifty positions, carrying salaries in the GS–16 to GS–18 range, in the professional, scientific, and executive service, to meet the need for highly qualified personnel both in research and development activities and in administration. It is expected that about half of these positions would be used for high-level administrative assignments, and the other half for the most responsible professional and scientific work of the Board.

(Section 123.) This section creates the position of an Executive Director, appointed by the Board with the approval of the Secretary. The Executive Director will serve as secretary to the Board and shall perform such duties in administration of the program as the Board assigns to him. The Board is authorized to delegate to the Executive Director or other employees of HEW any of its functions or duties except the issuance of regulations and the determination of the availability of funds and their allocations to the regions.

SEC. 124. This section provides that the program will be administered through the regional offices of the Health Security Board. It also directs the Board to establish local health service areas which shall be the same as the health service areas under the new title XV of the Public Health Service Act, except that with the approval of the Secretary the Board may divide such an area into two or more areas for the purposes of the health security program. These areas are to serve as local administrative units, with a local office in each, and perhaps suboffices. One of the responsibilities of these offices will be to investigate complaints about the administration of the program.

(Section 125.) Subsection (a) establishes a National Health Security Advisory Council, with the Chairman of the Board serving as the Council's Chairman and 20 additional members not in the employ of the Federal Government. A majority of the appointed members will be consumers who are not engaged in providing and have no financial interest in the provision of health services. Members of the Council representing providers of care will be persons who are outstanding in fields related to medical, hospital or other health activities or who are representatives of organizations or professional associations. Members will be appointed to four-year over-lapping terms by the Secretary upon recommendation by the Board.

Subsection (b) authorizes the Advisory Council to appoint professional or technical committees to assist in its functions. The Board will make available to the Council all necessary secretarial and clerical assistance. The Council will meet as frequently as the Board deems necessary, or whenever requested by seven or more members, but not less than four times each year.

Subsection (c) provides that the Advisory Council will advise the Board on matters of general policy in the administration of the program, the formulation of regulations and the allocation of funds for services. The Council is charged with responsibility for studying the operation of the program, and utilization of services under it, with a view to recommending changes in administration or in statutory provisions. They are to report annually to the Board on the performance of their functions. The Board, through the Secretary, will transmit the Council's report to the Congress together with a report by the Board on any administrative recommendations of the Council which have not been followed, and a report by the Secretary of his views with respect to any legislative recommendations of the Council.

(Section 126). To further provide for participation of the community, the Board will appoint an advisory council for each region and local area. Each such Council would have a composition parallel to that of the National Council; and each will have the function of advising the regional or local representative of the Board on all matters directly relating to the administration of the program.

(Section 127). The Board is authorized to appoint standing committees to advise on the professional and technical aspects of administration with respect to services, payments, evaluations, etc. These committees will consist of experts drawn from the health professions medical schools or other health educational institutions, providers of services, etc. The Board is also authorized to appoint temporary committees to advise on special problems. The committees will report to the Board, and copies of their reports are to be made available to the National Advisory Council.

(Section 128). Subsection (a) requires the Board to consult with appropriate State health and other agencies to assure the coordination of the Health Security program with State and local activities in the fields of environmental health, licensure and inspection, health education, etc.

Subsection (b) requires the Board, whenever possible, to contract with States to survey and certify providers (other than professional practitioners) for participation in the program. This is similar to Medicare except that the Board is given authority to establish the qualifications required of persons making the inspections.

Subsection (c) authorizes the Board to contract with State agencies to undertake health education activities, supervision of utilization review programs, and programs to improve the quality and coordination of available services in that State.

Subsection (d) requires the Board to reimburse States for the reasonable cost of performing such contract activities and authorizes the Board to pay all or part of the cost of training State inspectors to meet the qualifications established by the Board.

Subsection (e) directs the Board to make inspections if a State is unable or unwilling to do so.

Subsection (f) calls for the publication of the results of the inspections.

(Section 129). The Board is authorized to provide technical assistance either directly or through contract with a State to skilled nursing home and home health service agencies to supplement the skills of their permanent staff in regard to social services, dietetics, etc.

(Section 130). Subsection (a) charges the Board with responsibility for informing the public and providers about the administration and operation of the Health Security program. This will include informing the public about entitlement to benefits and the nature, scope, and availability of services. Providers would be informed of the conditions of participation, methods and amounts of compensation, and administrative policies. In support of the program's effort to improve drug therapy, the Board is authorized with the approval of the Secretary, to furnish all professional practitioners with information concerning the safety and efficacy of drugs appearing on either of the approved lists (Section 25) indications for their use and contraindications. Information of this nature is not now always available to practitioners.

Subsection (b) requires the Board to make a continuing study and evaluation of the program, including adequacy, quality and costs of services. Subsection (c) authorizes the Board directly or by contract to make detailed statistical and other studies on a national, regional, or local basis of any aspect of the title, to develop and test incentive systems for improving quality of care, methods of peer review of drug utilization and of other service performances, systems of information retrieval, budget programs, instrumentation for multiphasic screening or patient services, reimbursement systems for drugs, and other studies which it considers would improve the quality of services or administration of the program.

Subsection (d) authorizes the Board to enter into agreements with providers to experiment with alternative methods of reimbursement which offer promises of improving the coordination of services, their quality or accessibility.

(Section 131). Severe discrepancies exist today between the national need for various kinds of health manpower and the availability of clinical facilities to train such personnel. Certain specialties (such as surgery), in which there is a surplus of manpower, monopolize clinical training facilities to the disadvantage of specialties in short supply (such as primary or family practice), thus perpetuating the imbalance between supply and demand. This section gives the Board authority to bring the availability of clinical training facilities into balance with national or regional manpower needs by issuing training priorities for institutional providers participating in the program.

(Section 132). This section grants authority to the Board, in accordance with regulations, to make determinations of who are participating providers of service, determinations of eligibility, of whether services are covered, and the amount to be paid to providers. The Board is granted authority to terminate participation of a provider who is not in compliance with qualifying requirements, agreements, or regulations. But unless the safety of eligible individuals is endangered, the provider shall be entitled to a hearing before the termination becomes effective.

(Section 133). This section establishes procedures for hearings and for judicial review, similar to those under the Social Security Act.

(Section 134). This section has one of the bill's most important provisions with respect to achieving improvement in coordination, availability, and quality of services. It greatly strengthens state and local planning agencies and gives the Board authority to curtail inefficient administration of participating institutional providers.

The Board is authorized to issue a direction to any participating provider (other than an individual professional practitioner) that, as a condition of participation, the provider add or discontinue one or more covered services. For example, if two community hospitals are operating maternity wards at low occupancy rates, the Board may require that one hospital cease to provide such service. A provider may be required to provide services in a new location, enter into arrangements for the transfer of patients and medical records, or establish such other coordination or linkages of covered services as the Board finds appropriate.

In addition, if the Board finds that services furnished by a provider are not necessary to the availability of adequate services under this title and that their continuance is unreasonably costly, or that the services are furnished inefficiently (and that efforts to correct such inefficiency have proved unavailing) the Board may terminate participation of the provider.

No direction shall be issued under this section except upon the recommendation of, or after consultation with, the appropriate state health planning agency. And no direction shall be issued under this section unless the Board finds that it can be practicably carried out by the provider to whom it is addressed. The Board is required to give due notice and to establish and observe appropriate procedures for hearings and appeals, and judicial review is provided.

Part H—Quality of care

This part authorizes the Board, and charges it with the duty, to maintain and enhance the quality of care furnished under the Act. Section 141(a) sets forth this authority and this duty, to be discharged with the advice and assistance of, and in close collaboration with the Commission on the Quality of Health Care created by an amendment of the Public Health Service Act contained in title III of the present bill.

Regulations under the part are to be issued before health security benefits become effective, and thereafter to be upgraded as rapidly as is practicable. Subsection (b) states as the objective the highest quality of care attainable throughout the nation, with exceptions to quality requirements only when, and as long as, they are necessary to avoid acute shortages of services. Subsection (c) calls for collaboration with the Commission, and stipulates that any failure to follow its recommendations shall be submitted to the Secretary and that, unless he directs the Board to adopt the recommended regulations, the reasons for not doing so must be published by the Board.

(Section 142). The Board is to issue regulations requiring continuing professional education for physicians, dentists, optometrists, podiatrists. Reports of compliance with the regulations will be required and, after warning, practitioners may be disciplined for failure to comply.

(Section 143). Subsection (a) provides that major surgery, and other procedures specified in regulations, are not covered services unless they are performed by a specialist, and (except in emergencies) are, to the extent prescribed in regulations, performed on referral by a physician engaged in general practice. Specialists, according to subsection (b) are those certified by the appropriate national specialty boards, with a five-year period allowed board-eligible physicians to obtain certification, and with a "grandfather" exception for certain physicians practicing when health security benefits go into effect. Subsection (c) authorizes the Board to require, except in acute emergencies, consultation with an appropriate specialist, as a prerequisite to specified surgical procedures; in such cases subsection (d) enables the Board to require pathology reports and clinical abstracts or discharge reports.

(Section 144). Subsection (a) requires that practitioners furnishing services on behalf of institutional or other providers meet the same qualifications that are demanded of independent practitioners. Subsection (b) authorizes the Board to make additional requirements, in the interest of the quality care and of safety of patients, for all providers other than professional practitioners. This is like the authority given the Secretary under the Medicare law, but with the notable difference that standards of the Joint Commission on the Accreditation of Hospitals constitute a minimum for Board requirements, rather than a maximum as under Medicare. Exceptions are permitted only, as stated in section 141, to avoid acute shortages of services.

(Section 145). Although the provisions relating to professional standard review organizations, recently added to the Social Security Act, are repealed by section 405 of the present bill, the Board is authorized, on recommendation of the Commission on the Quality of Health Care, to use organizations previously designated by the Secretary for the purposes of monitoring the quality of services, either institutional or noninstitutional. The Board may also use for this purpose similar organizations approved by it in the future.

(Section 146). In exercising its authority under part H the Board is directed to take into account the findings of the Secretary's

Commission on Medical Malpractice, and to seek to reduce the incidence of malpractice and to improve the availability of malpractice insurance.

Part I—Miscellaneous provisions

(Section 161). This section contains definitions of certain terms used in the title.

(Section 162). This section creates the offices of Deputy Secretary of Health, Education and Welfare and an Under Secretary for Health and Science in the Department of Health, Education and Welfare, and abolishes the office of Under Secretary of Health, Education and Welfare.

(Section 163). This section stipulates that the effective date for entitlement for benefits will be July 1, of the second calendar year following enactment.

(Section 164). Subsection (a) provides that an employer will not be relieved, by the enactment of the Health Securtiy Act, of any existing contractual or other nonstatutory obligation to provide or pay for health services to his present or former employees and their families. An employer whose cost under such a contract, immediately before health security taxes go into effect, exceeds the cost to him of paying these taxes is required by subsection (b) to apply the excess, during the remaining life of the contract, first to the payment of health security taxes on behalf of his employees. If an excess still remains after meeting this obligation, and after an allowance for the cost of any continuing obligation to pay for health services not covered by Health Security, subsection (c) requires the employer to pay the amount of this remaining excess to those employees, former employees, and survivors who are beneficiaries of the pre-existing contract; but by agreement with the employees or their representatives, these funds may be applied to other employee benefits. Computations of the amounts involved are to be made on a per capita basis, as defined in subsection (d).

TITLE II—HEALTH SECURITY TAXES

Part A—Employment taxes

(Section 201). Effective on January 1 of the second year after enactment, subsections (a) and (b) convert the existing Medicare hospital insurance payroll taxes into Health Security taxes and raise the rates to 1 percent on employees and 3.5 percent on employers. Subsection (c) sets the wage base for the employment tax at 150 percent of the Social Security wage base (or a tax base at present of $21,150 in conformity with the recent automatic increase of the Social Security tax base). This subsection also defines covered employment to include all substantial groups now excluded from social security tax coverage, except that State and local governments are excluded from the tax on employers.

(Section 202). This section makes a number of conforming and technical amendments. Chief among these are provision for refund of excess taxes collected from an employee, who has held two or more jobs, on wages aggregating in a year more than the amount of the new wage base; exclusion of Health Security contributions from agreements with State governments for the social security coverage of State and Municipal employees (since these employees will contribute to Health Security through payroll taxes); and exclusion of Health Security contributions from agreements for the coverage of United States citizens employed by foreign subsidiaries of United States corporations (since these empioyees will not benefit materially from Health Security in its present form).

(Section 203). This section excludes from the gross income of employees, for income tax purposes, payment by their employers of part of all of the Health Security taxes on the employees.

(Section 204). This section spells out the effective dates of the new payroll tax provisions.

Part B—Taxes on self-employment income and unearned income

(Section 211). Effective at the beginning of the second calendar year after enactment, this section converts the existing Medicare self-employment tax into a Health Security self-employment tax, sets the rate at 2.5 percent, and sets the maximum taxable self-employment income at $21,150 (with the same upward adjustment as in the employee tax for subsequent rises in average wage levels).

(Section 212). Effective on the same date, this section adds a new 2½ percent Health Security tax on unearned income (unless such income is less than $400 a year), subject to the same maximum on taxable income as is applicable to the employee and self-employment taxes. Taxable unearned income is adjusted gross income up to the stated maximum, minus wages and self-employment income already taxed for Health Security purposes (excluding certain items of income (notably social security benefits) specifically excluded from the other taxes and excluding $5,000 in unearned income for persons over age 60.)

(Section 213). This section makes appropriate changes in nomenclature and in the requirements of tax returns, including reports of estimated tax liability under the new tax on unearned income.

(Section 214). This section details the specific effective dates of the taxes imposed by this part.

Part C—Income tax deductions for medical care

(Section 221). This section amends the Internal Revenue Code so that no medical deductions shall be allowed for the cost of medical care which is covered by the Health Security Act on or after the effective date of health security benefits.

TITLE III—COMMISSION ON THE QUALITY OF HEALTH CARE

(Section 301). The purpose of Title III is to create a Commission on the Quality of Health Care in order to improve health care in the United States. The Commission's function is:

To develop methods of measuring health care;

To develop standards for promoting health care of high quality;

To encourage the use of such measurements and standards under the provisions of the Health Security Act.

(Section 302). This section adds to the Public Health Service Act a new Title XVII, entitled "Commission on the Quality of Health Care."

(Section 1701, Public Health Service Act). Subsection (a) establishes a Commission on the Quality of Health Care within the Department of Health, Education and Welfare. The Commission will consist of eleven members who are to be appointed by the Secretary after consultation with the Health Security Board. The Commission is required to carry out the functions set forth under new sections 1702 and 1703.

Subsection (b) describes the requirements for the membership of the Commission. Seven of the members appointed must be representatives of health service providers or representatives of non-governmental organizations that are engaged in the process of developing standards relating to the quality of health care. Four members must be representatives of consumers who are not engaged in and have no financial interest in the delivery of health care services. Commission members will be appointed to serve five year overlapping terms. Subsection (c) requires the Secretary to designate the Chairman of the Commission, who serves at the pleasure of the Secretary. Subsection (d) authorizes the Commission to employ needed personnel and appoint advisory committees. It also stipulates the conditions of employment and rates and terms of compensation.

(Section 1702, Public Health Service Act.) Subsection (a) defines the primary responsibilities of the Commission. The Commission is directed to initiate and continuously develop methods to assess the quality of health care delivered under the provisions of the Health Security Act; and to initiate and develop ways to use such assessments in order to maintain and improve the quality of health care delivered under the Act. The Commission is required to submit its findings and recommendations to the Secretary and the Health Security Board.

Specifically, the Commission is required to:

(1) collect data on a systematic and nationwide basis that will provide information on the (A) qualifications of health personnel and the adequacy and ability of health care facilities to provide quality health care; (B) the patterns of health care practices in actual episodes of care; (C) the utilization patterns for components of the health care system; and (D) the health of patients during and at the end of actual episodes of care and the relationship of the various factors outlined above to the health of such patients;

(2) use the data it collects to develop statistical norms and ranges to describe the factors outlined in paragraph (1). Such norms and ranges may be developed on a national or regional basis, for particular population groups, or on any other basis deemed most useful by the Commission;

(3) use such statistical norms and ranges as a basis for developing standards (and acceptable deviation from such standards) that will be useful in measuring, controlling, and improving the quality of health care; and

(4) make recommendations to the Secretary and the Health Security Board on the proper use of standards developed under the provisions of paragraph (3) in connection with the Board's continuing responsibility for the maintenance and improvement of the quality of the health care delivered under the Health Security Act. Such recommendations may also be used by the Secretary or the Board when developing proposals to amend the Health Security Act.

When carrying out its duties under the provisions of this subsection, the Commission is directed to give first priority to the quality of care delivered for those illnesses or conditions which have high incidence of occurrence within the population and which are responsive to medical or other treatment.

Subsection (b) requires the Commission to conduct a broad health care research program. Specifically, the objectives of the program are to:

(1) improve technologies for assessing health care quality;

(2) compare the quality of health care under alternative health delivery systems and methods of payments;

(3) analyze the effects of consumer health education and preventive health services;

(4) continue the studies made by the Secretary's Commission on Medical Malpractice. In this respect, the Commission is also required to evaluate any of the recommendations of the Secretary's Commission which the Health Security Board has put into effect or any other measures that the Board has established, which pertain to the incidence of malpractice, malpractice insurance, or malpractice claims;

(5) obtain other information that will be useful in order to accomplish the purposes of this new title of the Public Health Service Act and title I, part H, of the Health Security Act (concerning the maintenance and improvement of the quality of health care delivered under the Health Security Act).

Subsection (c) authorizes the Commission to provide technical assistance to enable participating providers to furnish the Board with information required by it for purposes of the Commission. The Commission is also authorized to provide technical assistance to participating providers who are developing and carrying out quality control programs.

(Section 1703, Public Health Service Act). This section directs the Commission, even before it has developed standards under the preceding provisions, to give advice and recommendations to the Health Security Board concerning quality health care regulations.

(Section 1704, Public Health Service Act). This section authorizes the Secretary to establish twenty-five positions on the staff of the Commission, carrying salaries in the GS–16 to GS–18 range, in the professional, scientific, and executive service, to meet the need for highly qualified personnel in the research and development activities of the Commission.

TITLE IV—REPEAL OR AMENDMENT OF OTHER ACTS

(Section 401). This section repeals the Medicare and Federal Employee Health Benefit statutes on the date Health Security benefits become effective, but stipulates that this shall not affect any right or obligation incurred prior to that date.

(Section 402). This section requires that after the effective date of benefits, no State shall be required to furnish any service covered under Health Security as a part of its State plan for participation under Medicaid, and that the Federal government will have no responsibility to reimburse any State for the cost of providing a service which is covered under Health Security. After the effective date of benefits, the Secretary of HEW shall prescribe by regulation the new minimum scope of services required as a condition of State participation under Title XIX. To the extent the Secretary finds practicable, the new minimum benefits will be designed to supplement Health Security—especially with respect to skilled nursing home services, dental services and the furnishing of drugs.

(Section 403.) This section provides that funds available under the Vocational Rehabilitation Act or the Maternal and Child Health title of the Social Security Act shall not be used to pay for personal health services after the effective date of benefits, except (to the extent prescribed in regulations by the Secretary of HEW) to pay for services which are more extensive than those covered under Health Security.

(Section 404). This section makes applicable to Health Security the provisions recently added to the Social Security Act requiring reduction in reimbursement for care in facilities which have made substantial capital expenditures found by a State planning agency to be inconsistent with standards developed pursuant to the Public Health Service Act. Because the provision will continue to apply to the residual programs under titles V and XIX of the Social Security Act, the reductions will continue to be determined by the Secretary and his determinations are made binding on the Board, as provided in section 89 of the bill.

(Section 405). This section repeals the provisions recently added to the Social Security Act relating to professional standards review organizations. Section 145 of the bill permits the use of such organizations already designated by the Secretary, and approval by the Board and use of similar organizations in the future.

(Section 406). Subsection (a) amends section 1817 of the Social Security Act, creating the Federal Hospital Insurance Trust Fund, and transfers it to become section 61 of the Health Security Act under the title "Health Security Trust Fund". The effect of this transfer is summarized in the description of title I, part D, of the present bill. Subsection (b) extends to the Health Security system the provisions of section 201(g) of the Social Security Act, authorizing annual Congressional determination of amounts to be available from the respective trust funds for the administration of the several national systems of social insurance. Subsections (c) and (d) contain conforming and technical provisions.

(Section 407). This section makes a number of changes in title XV of the Public Health Service Act, which is the planning portion of the recently passed National Health Planning and Resources Development Act of 1974. Subsections (a) and (b) provide that the Secretary's guidelines on national health planning policy should be issued in twelve, rather than eighteen months, and that they must emphasize the need for prompt action to meet the demands of the health security program.

Under subsection (c), the DHEW Under Secretary for health and science replaces the Assistant Secretary on the National Council on Health Planning and Development, and the Chairman of the Health Security Board is added to the Council. Subsection (d) strikes out a requirement of coordination with Professional Standards Review Organizations, in view of the repeal of the PSRO provisions of the Social Security Act. Review and approval or disapproval of Federal grants and contracts by health systems agencies (subject to final decision by the Secretary) is extended, by subsection (e), to include Health Security Board grants and contracts under Part F of title I. Finally, section 1526 providing for grants for State demonstrations in rate regulation is repealed, since the Health Security Board will be fixing the amount of payments to participating providers of services.

(Section 408). This section establishes the salary levels for the Deputy Secretary and the Under Secretary for Health and Science, Department of Health, Education, and Welfare, the Chairman of the Health Security Board, members of the Health Security Board and members of the Commission on the Quality of Health Care, and the Executive Director of the Health Security Board.

(Section 409). This section removes the operations of the Health Security Trust Fund from the administrative budget of the United States, and directs that these operations be reported and projected in a separate statement, as was done with the Social Security trust funds until recently. The Government contribution to the Health Security system will continue to be shown as an expenditure in the administrative budget.

TITLE V—STUDIES RELATED TO HEALTH SECURITY

(Section 501). This section directs the Secretary of Health, Education, and Welfare in consultation with the Secretary of State and the Secretary of the Treasury to study the coverage of health services for United States residents in other countries.

(Section 502). Subsection (a) directs the Secretary of HEW to study means of coordinating the federal health care programs for merchant seamen, and for Indians and Alaskan natives, with the Health Security benefits program. The Secretary and the Administrator of Veterans' Affairs shall conduct a similar joint study of the means of coordinating veterans health care programs with the Heatlh Sceurity benefits program. A similar study is to be conducted, jointly with the Secretary of Defense, relating to the program of care, in civilian facilities, of the dependents of military personnel. Reports to the Congress and any legislative recommendations arising from the studies are required within three years after the enactment of the Health Security Act.

Subsection (b) requires the respective Secretaries and the Administrator to consult with representatives of the affected beneficiary groups, and to include a summary of their views in the reports to Congress.

With respect to the joint study to determine the most effective method of coordinating the Veterans' Administration Health Program with the Health Security program established under this bill, it is important to understand that there is no intention to require either the integration of the VA program into the Health Security Program, or even the consideration of such integration. Rather, the section recognizes that any national health security or health insurance program would be so pervasive as to require other federal health programs such as those of the Veterans' Administration to be effectively coordinated with them. Through such coordination, needless duplication and expenditures should be avoided.

(Section 503). This section authorizes the appropriation of money needed for conducting the studies authorized in this title, and the use of experts and consultants and advisory committees, and of contracts for the collection of information or the conduct of research.

A bill to create a national system of health security

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "The Health Security Act".

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. (a) The Congress finds that—

(1) the health of the Nation's people is the foundation of their well-being and of our Nation's strength, productivity, and wealth;

(2) adequate health care for all of our people must now be recognized as a right; and

(3) a national system of health security is the means to implement that right.

(b) The purpose of this Act is—

(1) to create a national system of health security benefits which, through national health insurance, will make comprehensive health services available to all residents of the United States, will distribute the cost of health care more equitably in relation to income, and will provide major protection against catastrophic costs, and

(2) through the operation of the system, to effect modifications in the organization and methods of delivery of health services which will increase the availability and continuity of care, will enhance its quality, will emphasize the maintenance of health as well as the treatment of illness and, by improving the efficiency and the utilization of services and by strengthening professional and financial controls, will restrain the mounting costs of care while providing fair and reasonable compensation to those who furnish it.

INITIATION OF HEALTH SECURITY PROGRAM

SEC. 3. Health security taxes will become effective on January 1, and health services will become available on July 1, of the second calendar year after the year in which this Act is enacted. Except for the benefit and related fiscal provisions, title I of this Act is effective upon enactment. Certain federally financed or supported health programs will be terminated or curtailed when health benefits under this Act become available.

Effective dates of the several provisions of this Act are set forth in sections 163, 204, 214, 221, 401 to 406 inclusive, and 409.

TABLE OF CONTENTS

Sec. 1. Short title
Sec. 2. Declaration of purpose
Sec. 3. Initiation of health security program
TITLE I—HEALTH SECURITY BENEFITS
PART A—ELIGIBILITY FOR BENEFITS
Sec. 11. Basic eligibility
Sec. 12. Agreements for eligibility of other persons
PART B—NATURE AND SCOPE OF BENEFITS; COVERED SERVICES
Sec. 21. Entitlement to have payment made for services
Sec. 22. Physician services
Sec. 23. Dental services
Sec. 24. Institutional services
Sec. 25. Pharmaceutical benefits

Sec. 26. Devices, appliances, and equipment
Sec. 27. Other professional and supporting services
Sec. 28. Exclusions from covered services
PART C—PARTICIPATING PROVIDERS OF SERVICES
Sec. 41. In general, agreements with the Board
Sec. 42. Professional practitioners
Sec. 43. General hospitals
Sec. 44. Psychiatric hospitals
Sec. 45. Skilled nursing homes
Sec. 46. Home health service agencies
Sec. 47. Group practice organizations
Sec. 48. Individual practice associations
Sec. 49. Other health service organizations
Sec. 50. Other providers
Sec. 51. Utilization review
Sec. 52. Transfer and affiliation agreements
Sec. 53. Newly constructed facilities
Sec. 54. Limitation on malpractice judgments
Sec. 55. Exclusion: Federal providers of services
PART D—TRUST FUND; ALLOCATION OF FUNDS FOR SERVICES
Sec. 61. Health Security Trust Fund
Sec. 62. Annual determination of fund availability
Sec. 63. Health services account, health resources development account, administration account, and general services account
Sec. 64. Regional allocations from health services account
Sec. 65. Division of regional funds by classes of services
Sec. 66. Funds for health service areas
Sec. 67. Modification of fund allotments
Sec. 68. Initial actions under part D
PART E—PAYMENT TO PROVIDERS OF SERVICES
Sec. 81. In general
Sec. 82. Methods and amount of payment to professional practitioners
Sec. 83. Payment to general hospitals
Sec. 84. Payment to psychiatric hospitals
Sec. 85. Payment to skilled nursing homes and to home health service agencies
Sec. 86. Payment for drugs
Sec. 87. Payment to group practice organizations and individual practice associations
Sec. 88. Payment to other providers
Sec. 89. Reduction in payments on account of unnecessary capital expenditures
Sec. 90. Methods and time of payment
PART F—DEVELOPMENT FUND
SUBPART 1—PLANNING: FUNDS TO IMPROVE SERVICES AND TO ALLEVIATE SHORTAGES OF FACILITIES AND PERSONNEL
Sec. 101. Purpose of Subpart 1
Sec. 102. Planning by the Secretary
Sec. 103. General policies and priorities
Sec. 104. Organizations for the care of ambulatory patients
Sec. 105. Recruitment, education, and training of personnel
Sec. 106. Special improvement grants
Sec. 107. Loans under Part F
Sec. 108. Relation of Parts E and F
SUBPART 2—PROGRAMS OF PERSONAL CARE SERVICES
Sec. 111. Purpose of subpart 2
Sec. 112. Grants
Sec. 113. Scope of services and eligibility therefore
Sec. 114. Evaluation
Sec. 115. Recommendations to the Congress
SUBPART 3—AVAILABILITY OF FUNDS
Sec. 120. Authorization of appropriations; expenditures from Trust Fund
PART G—ADMINISTRATION
Sec. 121. Establishment of the Health Security Board
Sec. 122. Duties of the Secretary and the Board
Sec. 123. Executive Director; delegation of authority
Sec. 124. Regions and health service areas
Sec. 125. National Health Security Advisory Council
Sec. 126. Regional and local advisory councils
Sec. 127. Professional and technical advisory committees
Sec. 128. Participation by State agencies
Sec. 129. Technical assistance to skilled nursing homes and home health service agencies
Sec. 130. Dissemination of information; studies and evaluations; systems development; tests and demonstrations
Sec. 131. Guidelines for health manpower education and training
Sec. 132. Determinations; suspension or termination of participation
Sec. 133. Hearings; judicial review
Sec. 134. Directions by the Board for the better organization and coordination of services.
PART H—QUALITY OF CARE
Sec. 141. Purpose and general policies
Sec. 142. Continuing professional education
Sec. 143. Major surgery and other specialized services
Sec. 144. Additional requirements for participation
Sec. 145. Professional standards review and similar organizations
Sec. 146. Findings of commission on medical malpractice
PART I—MISCELLANEOUS PROVISIONS
Sec. 161. Definitions
Sec. 162. Deputy Secretary of Health, Education, and Welfare; Under Secretary for Health and Science
Sec. 163. Effective dates of Title I; Authorization of appropriations
Sec. 164. Existing employer-employee health benefit plans.
TITLE II—HEALTH SECURITY TAXES
PART A—EMPLOYMENT TAXES
Sec. 201. Rates and coverage
Sec. 202. Conforming and technical amendments
Sec. 203. Exclusion from gross income
Sec. 204. Effective dates of part A
PART B—TAXES ON SELF-EMPLOYMENT INCOME AND UNEARNED INCOME
Sec. 211. Tax on self-employment income
Sec. 212. Tax on health security unearned income
Sec. 213. Conforming and technical amendments
Sec. 214. Effective dates of part B
PART C—INCOME TAX DEDUCTIONS FOR MEDICAL CARE
Sec. 221. Denial of deductions for services covered by Health Security Act
TITLE III—COMMISSION ON THE QUALITY OF HEALTH CARE
Sec. 301. Statement of purpose
Sec. 302. Amendment of the Public Health Service Act
TITLE IV—REPEAL OR AMENDMENT OF OTHER ACTS
Sec. 401. Repeal of medicare and Federal employee health benefit statutes
Sec. 402. Medicaid statute
Sec. 403. Vocational Rehabilitation Act; maternal and child health and crippled children's services
Sec. 404. Amendment of section 1122 of the Social Security Act
Sec. 405. Repeal of Title XI, Part B, of the Social Security Act
Sec. 406. Transfer and amendment of section 1817, and amendment of section 201(g), of the Social Security Act
Sec. 407. Amendments of Title XV of the Public Health Service Act
Sec. 408. Salary levels
Sec. 409. Amendment of Budget and Accounting Act
TITLE V—STUDIES RELATED TO HEALTH SECURITY
Sec. 501. Study of the provision of health security benefits to United States citizens in other countries
Sec. 502. Study of coordination with other Federal health benefit programs
Sec. 503. General provisions

TITLE I—HEALTH SECURITY BENEFITS

PART A—ELIGIBILITY FOR BENEFITS

BASIC ELIGIBILITY

SEC. 11. Every resident of the United States and every non-resident citizen thereof is eligible, while within the United States, to receive health services under this Act; except that an alien employee (as defined in regulations) of a foreign government, of an instrumentality of a foreign government exempt from the taxes imposed by section 3111(b) of the Internal Revenue Code of 1954, or of an international organization (as defined in the International Organizations Immunity Act) is eligible only in accordance with an agreement under section 12. An alien admitted as a permanent resident and living within the United States, an alien admitted for employment and employed within the United States, or a refugee lawfully in the United States is for the purpose of this title a resident of the United States.

AGREEMENTS FOR ELIGIBILITY OF OTHER PERSONS

SEC. 12. The Health Security Board (hereafter referred to as the "Board"), with the approval of the Secretary of Health, Education, and Welfare and the Secretary of State, is authorized to enter into agreements with foreign governments, international organizations, or other entities to extend benefits of this title to persons within the United States not otherwise eligible therefor, in consideration of payment to the United States of the estimated cost of furnishing the benefits to such persons, or of an undertaking to furnish in a foreign country similar benefits to citizens of the Unted States, or of a combination of payment and such an undertaking.

PART B—NATURE AND SCOPE OF BENEFITS: COVERED SERVICES

ENTITLEMENT TO HAVE PAYMENT MADE FOR SERVICES

SEC. 21. Every eligible person is entitled to have payment made by the Board for any covered service furnished within the United States by a participating provider if the service is necessary or appropriate for the maintenance of health or for the diagnosis or treatment of, or rehabilitation following, injury, disability, or disease. Participating providers are providers, described in part C, who meet the conditions stated in section 41. Covered services are services described in sections 22 to 27, inclusive, but are subject to the exclusions stated in section 28 and to limitations prescribed by or pursuant to part H (relating to the quality of care).

PHYSICIAN SERVICES

SEC. 22. (a) Professional services of physicians, furnished in their offices or elsewhere, are covered services. Covered physician services include services and supplies of kinds which are commonly furnished in a physician's office, with or without separate charge, as an incident to his professional services.

(b) Covered physicians' services consist of (1) primary medical services, which are the services (as defined in regulations, but including preventive services) ordinarily furnished by physicians, whether general practitioners or specialists, engaged (as determined in accordance with standards for such practice prescribed in regulations) in general or family practice for adults or for children or for both, and (2) specialized services.

(c) Psychiatric (mental health) service to an outpatient is a covered service (1) only if it constitutes an active preventive, diagnos-

tic, therapeutic, or rehabilitative service with respect to emotional or mental disorders, and (2) only (A) if the service is furnished by a group practice organization, by a hospital, or by a community mental health center or other mental health clinic which furnishes comprehensive mental health services, or (B) if the service is furnished to a patient of a day care service with which the Board has an agreement under section 49(a) (3), or (C) to the extent of twenty consultations during a benefit period (as defined in regulations), if the service is furnished otherwise than in accordance with clause (A) or (B). In any community in which the available psychiatric services furnished otherwise than in accordance with clause (A) or (B) are found by the Board to be insufficient to meet the needs of the community, the Board may limit the coverage of such services by prescribing referral or other nonfinancial conditions in order to give priority of access to the services to those persons most in need of them.

DENTAL SERVICES

SEC. 23. (a) Professional services (described in subsection (c)) of a dentist, furnished in his office or elsewhere, are covered services if they are furnished to a person who, at the time when the services are furnished, is entitled to such services in accordance with subsection (b). Covered services include services, materials, and supplies which are commonly furnished in a dentist's office, without separate charge, as an incident to his professional services.

(b) Persons who, on the effective date of health benefits, are less than fifteen years of age are entitled to covered dental services, and will remain so entitled throughout their lives. On July 1 of each of the five years immediately succeeding the year in which the effective date occurs, the following persons will become (and thereafter remain) entitled to such services: on July 1 of the first succeeding year, persons who are then less than seventeen years of age; on July 1 of the second succeeding year, persons who are then less than nineteen years of age; on July 1 of the third succeeding year, persons who are then less than twenty-one years of age; on July 1 of the fourth succeeding year, persons who are then less than twenty-three years of age; and on July 1 of the fifth succeeding year, persons who are then less than twenty-five years of age.

(c) Covered dental services are preventive services (including personal dental health education), diagnostic services, therapeutic services (exclusive of orthodontic services other than for handicapping malocclusion), and services required for rehabilitation following injury, disability, or disease.

(d) The Board is authorized, if it finds that the availability of funds and of facilities and personnel makes it possible, to provide by regulation for acceleration of the entitlement (by age groups) to covered dental services as set forth in subsection (b). Not later than seven years after the effective date of health benefits, the Board shall by regulation provide that entitlement to dental services shall be extended, over such period of time and by such age or other groupings as it finds calculated to make the best use of available resources and personnel, to all persons not otherwise entitled to such services; and it may thereafter, from time to time, amend such regulations on the basis of further experience in the furnishing of dental services as covered services. In exercising its authority under this subsection the Board shall seek to encourage the furnishing of dental services as a part of comprehensive health services, or the furnishing of them by organizations furnishing comprehensive dental services (which meet requirements set forth in regulations under section 104 (a)); and to that end, the Board may limit additional entitlement to dental services, in whole or in part and temporarily or permanently, to services so furnished.

INSTITUTIONAL SERVICES

SEC. 24. (a) Inpatient and outpatient services of a psychiatric or other hospital, the services of a skilled nursing home, and the services of a home health service agency, which are ordinarily furnished by the institution to patients for the purposes stated in section 21, are covered services, subject to the limitations stated in this section. Covered services include services furnished generally to the patients served by an institution, including pathology and radiology services and all other necessary services, whether they are furnished by the institution or by others under arrangement with the institution. To the extent provided in regulations, inpatient services of a Christian Science sanatorium are covered services.

(b) Covered services do not include personal comfort items or, unless required for medical reasons, the additional cost of accommodations more expensive than semiprivate accommodations; and do not include domiciliary or custodial care, or institutional care of a person while he is not receiving active medical treatment.

(c) Covered services do not include care in a skilled nursing home for more than one hundred and twenty days during a benefit period (as defined in regulations); except that the Board may, on such conditions as it finds appropriate to assure effective control of utilization, extend the duration of covered services, either for a stated number of days in a benefit period or indefinitely—

(1) in all skilled nursing homes for which consolidated budgets with hospitals have been approved under section 83(f), or

(2) in all participating skilled nursing homes having in effect affiliation agreements under section 52(b),

if the Board finds that adequate funds and resources are available therefor and that such action will not lead to excessive utilization of nursing home services.

(d) Covered services do not include institutional care of a person as a psychiatric patient while the patient is not receiving active treatment for an emotional or mental disorder; and do not include care of a person as a psychiatric patient for more than forty-five inpatient days in either a psychiatric or another hospital during a benefit period (as defined in regulations).

(e) Covered services do not include institutional care of an inpatient unless a physician has certified to the medical necessity of the patient's admission to the institution, and do not include such care (during a continuous stay in the institution) after such period (if any) as may be specified in regulations unless a physician has certified to the continued medical necessity of such care. Regulations may specify the classes of cases in which certification of continued necessity is required, may specify different periods for different classes of cases, and may permit retroactive certification under such circumstances and to such extent as the Board deems appropriate.

(f) Covered services do not include the services of a psychiatric or other hospital or skilled nursing home, during a benefit period (as defined in regulations), after the third day following receipt by the institution and the patient of notice of a finding by a utilization review committee pursuant to section 51(e) that further stay in the hospital or further stay in the nursing home, as the case may be, is not medically necessary.

PHARMACEUTICAL BENEFITS

SEC. 25 (a) The Board shall establish and disseminate (and review at least annually) (1) a list of drugs for use in participating institutions, group practice organizations, and individual practice associations, and (2) a list (for use outside such institutions, organizations, and associations) of diseases and conditions for the treatment of which drugs may be furnished as a covered service, and a specification of the drugs that may be so furnished for each disease or condition listed. Subject to the provision of subsections (b) and (c), the furnishing of a drug to an eligible person is a covered service if it is furnished by or on prescription of a participating physician or dentist, or by or on prescription of a physician or dentist acting on behalf of a participating institutional or other provider.

(b) The list of drugs referred to in subsection (a)(1) shall be designed to provide physicians and dentists with an armamentarium necessary and sufficient for rational drug therapy incident to comprehensive medical services or incident to covered dental services. The furnishing of a drug on this list is a covered service if it is furnished to a person who is enrolled in a participating group practice organization or individual practice association, or is administered within a participating hospital to an inpatient or an outpatient or is administered to an inpatient of a participating skilled nursing home operated by a participating hospital or having in effect an affiliation agreement in accordance with section 52(b).

(c) The list of diseases and conditions referred to in subsection (a)(2) shall include those chronic diseases and conditions for which drug therapy, because of its duration and cost, commonly imposes substantial financial hardship; and may include other diseases and conditions for which the Board finds costly drug therapy to be commonly required and effective. To assure proper utilization of drugs for specific diseases or conditions, the Board may require that the physician or dentist furnishing or prescribing a listed drug be a specialist qualified to diagnose and treat that disease or condition. The furnishing of a drug (although not to a person or under circumstances described in subsection (b)) is a covered service if (1) the physician or dentist furnishing or prescribing it identifies the disease or condition for which it is furnished or prescribed, and the disease or condition is one appearing on the Board's list, (2) the physician or dentist meets specialist qualification, if any, required by the Board, and (3) the drug is specified on the Board's list as one available for treatment of the disease or condition identified by the physician or dentist.

(d) The Board shall not list a drug under this section unless (1) the Secretary has found that it is safe and efficacious for the purposes for which it is recommended and (on the list established under subsection (c)) for the treatment of each disease or condition for which it is specified on the list, and (2) the Board finds that it is available at a reasonable cost (considering, among other factors, the existence or absence of competition in the production, distribution, and sale of the drug). Drugs shall be listed by their established names (as defined in section 502(e) of the Federal Food, Drug, and Cosmetic Act) and also, to the extent the Board deems appropriate, by trade names.

(e) In reviewing and revising lists established under this section the Board shall take into consideration (1) current information about the safety and efficacy of listed drugs, and about their cost, (2) the results of review of drug utilization under this title, (3) experience bearing on the determination of what diseases and conditions meet the criteria stated in subsection (c), and (4) such other factors as the Board deems pertinent. Drugs shall be added to or eliminated from the lists as the Board finds best calculated to effectuate the purposes of this section.

DEVICES, APPLIANCES, AND EQUIPMENT

SEC. 26. (a) The Board shall esablish and disseminate (and review at least annually)

lists of the therapeutic devices, appliances, and equipment (including eyeglasses, hearing aids, and prosthetic appliances), or classes thereof, which it finds are important for the maintenance or restoration of health or of employability or self-management. The Board shall take into consideration the efficacy, reliability, and cost of each item listed, and shall attach to any item such conditions as it deems appropriate with respect to the circumstances under which or the frequency with which the item may be prescribed. In establishing and revising lists under this section the Board shall seek to avoid a rate of expenditure for the furnishing of devices, appliances, and equipment in excess of 2 per centum of the rate of expenditure for all covered services.

(b) The furnishing of a device, appliance, or equipment prescribed by a participating physician or dentist, or by a physician or dentist acting on behalf of a participating institutional or other provider, is a covered service if the item appears on a current list established under subsection (a) and the prescription falls within any conditions attached, on the list, to the prescribing of that item. The furnishing of any other device, appliance, or equipment so prescribed is also a covered service if, in accordance with regulations, the furnishing of it has been approved in advance by the Board. Regulations under this section may list items or classes of items which, because of lack of efficacy or reliability or because of cost, the Board had determined may not be furnished as covered services.

OTHER PROFESSIONAL AND SUPPORTING SERVICES

SEC. 27. (a) To the extent provided in regulations, the following are covered services:

(1) the professional services of optometrists in the examination, diagnosis, and treatment of conditions of the vision system;

(2) the professional services of podiatrists;

(3) the diagnostic services of independent pathology laboratories, and diagnostic and therapeutic radiology furnished by independent radiology services;

(4) the care of a patient in a mental health day care service (A) for not more than sixty full days (or its equivalent) during or following a benefit period (as defined in regulations), when furnished by a hospital or a service affiliated with a hospital, or (B) if furnished by a group practice organization or by a community mental health center or other mental health center which furnishes comprehensive mental health services, or (C) if furnished by a mental health day care service with which the Board has an agreement under section 49(a)(3);

(5) in addition to the services available from hospitals, mental health centers, or other providers, the active treatment of a person with an established diagnosis of alcoholism or drug abuse, as an outpatient, in a free-standing ambulatory center (that is, a center the services of which are not furnished on behalf of another provider) with which the Board has an agreement under section 49(a)(5) for the treatment of persons with such diagnosis;

(6) in addition to the services available from other providers, family planning services furnished by a free-standing family planning center with which the Board has an agreement under section 49(a)(6);

(7) in addition to the services available from other providers, rehabilitation services furnished by a free-standing rehabilitation center with which the Board has an agreement under section 49(a)(7); and

(8) ambulance and other emergency transportation services, and such nonemergency transportation services as the Board finds essential to overcome special difficulty of access to covered services.

(b) Supporting services (such as psychological, physiotherapy, nutrition, social work, or health education services) are covered services when they are furnished on behalf of an institutional provider or when, with the approval of the Board, they are furnished on behalf of a group practice organization or individual practice association, or of an organization, agency, or center with which the Board has an agreement under section 49(a); but only if the persons furnishing the supporting services are compensated on a salary, stipend, or capitation basis by the provider on whose behalf they are furnished.

EXCLUSIONS FROM COVERED SERVICE

SEC. 28. (a) Health services furnished or paid for under a workmen's compensation law of the United States or a State, or legally required to be so furnished or paid for, are not covered services. Such services, if furnished by a participating provider to an eligible person, shall nevertheless be treated as covered services in accordance with this part unless and until a determination has been made pursuant to the workmen's compensation law that the services are covered by that law, and any resulting overpayment under this title shall, when payment is made under the workmen's compensation law, be recouped in the same manner as other overpayments.

(b) Health services furnished in a primary or secondary school are covered services only to such extent and on such conditions as may be specified in regulations.

(c) Surgery performed solely for cosmetic purposes (as defined in regulations), and hospital or other services incident thereto, are not covered services.

(d) The furnishing of a drug otherwise than in accordance with section 25 is not a covered service. The furnishing of a device, appliance, or equipment otherwise than in accordance with section 26 is not a covered service unless it is furnished, in accordance with section 22(a) or section 23(a), as an incident to professional services.

(e) The Board may by regulation exclude from covered services medical or surgical procedures (and services incident thereto) which it finds both (1) are essentially experimental in character, and (2) because of cost or because of shortage of qualified personnel or facilities cannot practicably be furnished on a nationwide basis.

(f) Except as provided in regulations, services are not covered services if (1) they are furnished by another provider to a person who has enrolled in a participating group practice organization or in a participating individual practice association, and are within the range of services which the organization or association has undertaken to furnish, or (2) they are primary physicians' services or covered dental services and are furnished by another provider to a person who has chosen to be on the list of a physician or a dentist electing to be paid by the capitation method. Regulations under this subsection shall permit termination of the enrollment referred to in clause (1), or of the choice referred to in clause (2), after the enrollment or choice has been in effect for twelve months, or at an earlier time for such reasons as may be specified in the regulations.

(g) The services of a professional practitioner are not covered services if they are furnished in a hospital which is not a participating provider, or are furnished to a psychiatric inpatient of an institution at a time when the institutional services to the patient are, by reason of section 24(d), not covered services.

PART C—PARTICIPATING PROVIDERS OF SERVICES IN GENERAL: AGREEMENTS WITH THE BOARD

SEC. 41. (a) A person, corporation, or other entity furnishing any covered service is a participating provider if he or it (1) is a qualified provider of that service, as determined in accordance with this part, and meets such requirements as are prescribed by or pursuant to part H (relating to the quality of care), (2) furnishes the service as an independent provider and not (as employee or otherwise) on behalf of another provider entitled under part E to payment for the service, and (3) has filed with the Board an agreement (A) that services to eligible persons will be furnished without discrimination on the ground of race, color, or national origin, (B) that no charge will be made for any covered service other than for payment authorized by this title, (C) that the provider will furnish such information and reports as may be required under this title for the making of payments, or as the Board may reasonably require for utilization review by professional peers or for statistical or other studies of the operation of the title (including information and reports required for the purposes of the Commission on the Quality of Health Care), and will permit such examinations of records as may be necessary for verification of information on which payments are based, and (D) in the case of an institutional provider, a group practice organization, an individual practice association, or other provider specified in regulations of the Board, that it will comply with such requirements as the Board finds necessary to assure to the employees of the provider protection of employment rights and working conditions, including the right to collective bargaining, equal, as nearly as may be, to the protection generally available to industrial employees under Federal law or under the law of the State in which the provider is situated.

(b) Participation of a provider may be suspended or terminated pursuant to section 132 or section 134.

(c) If a provider subject to Clause (D) of subsection (a)(3) is merged, consolidated, or otherwise reorganized in a manner affecting the employment or rights of its employees, the Board shall require, as a condition of participation by the merged, consolidated, or reorganized provider, that it undertake to comply with reasonable requirements of the Board for the protection of the pre-existing rights, benefits, and privileges of the employees of the provider or providers involved in the merger, consolidation, or reorganization. If a provider subject to clause (d) which is an agency of a State or local government, is closed, the Board is authorized, for the purpose of this subsection, to treat the closure as a consolidation with such other agency or agencies of the same unit of government as it finds will perform the principal functions of the provider which has been closed.

PROFESSIONAL PRACTITIONERS

SEC. 42. (a) A physician, dentist, optometrist, or podiatrist, legally authorized on the effective date of health security benefits to practice his profession in a State is a qualified provider of covered services within the State. A practitioner first so authorized by a State after the effective date is a qualified provider in that State if, in addition, he meets national standards established by the Board (taking into consideration the criteria applied by any recognized national testing organization) for the practitioner's profession. A practitioner who is a qualified provider in one State, if he meets the national standards, is also in any other State (in accordance with the provisions of section 56(a)(1)) a qualified provider of services which (1) are covered services to persons entitled thereto under this title, and (2) are of a kind which such other State authorizes to be furnished by practitioners of his profession.

(b) For the purposes of this title—

(1) a doctor of osteopathy legally authorized to practice medicine and surgery in a State is a physician;

(2) a dentist qualified in accordance with subsection (a) is a physician when perform-

ing oral surgery or other procedures which, in accordance with generally accepted professional standards, may be performed by either a physician or dentist; and

(3) a doctor of optometry or podiatry qualified in accordance with subsection (a) is a physician when furnishing services which are covered services in accordance with regulations issued under section 27(a) and which he is legally authorized to furnish in the State in which he furnishes them.

GENERAL HOSPITALS

SEC. 43. Subject to the provisions of section 53, a hospital (other than a psychiatric hospital) is a qualified provider if it is an institution which—

(a) is primarily engaged in providing to inpatients (other than mentally ill persons) diagnostic, therapeutic, and rehabilitation services, furnished by or under the supervision of physicians, for medical diagnosis, treatment, care, and rehabilitation of injured, disabled, or sick persons;

(b) maintains adequate clinical records on all patients;

(c) has bylaws in effect with respect to its staff of physicians, and has filed with the Board an agreement that in granting or maintaining medical staff privileges it will not discriminate on any ground unrelated to professional qualifications;

(d) has a requirement that every patient must be under the care of a physician;

(e) provides twenty-four-hour nursing service rendered or supervised by a registered professional nurse, and has a licensed practical nurse or registered professional nurse on duty at all times;

(f) has a pharmacy and drug therapeutics committee which establishes policies for the selection, acquisition, and utilization of drugs;

(g) has in effect a hospital utilization review plan which meets the requirements of section 51; and

(h) meets all applicable requirements of the law of the State in which it is situated.

PSYCHIATRIC HOSPITALS

SEC. 44. Subject to the provisions of section 53, a hospital which is primarily engaged in furnishing psychiatric services to inpatients who are mentally ill is a qualified provider if it (or a distinct part of it) is an institution—

(a) in which diagnostic, therapeutic, and rehabilitative services with respect to mental illness are furnished by or under the supervision of physicians;

(b) which satisfies the requirements of subsections (b) through (h) of section 43;

(c) which, on the basis of staffing and other factors it deems pertinent, the Board finds is qualified to furnish active treatment; and

(d) which maintains such records as the Board finds necessary to determine the degree and intensity of the treatment furnished.

SKILLED NURSING HOMES

SEC. 45. Subject to the provisions of sections 52 and 53, a skilled nursing home is a qualified provider if it (or a distinct part of it) is an institution which—

(a) is primarily engaged in providing to inpatients (other than mentally ill persons) skilled nursing care and related services for patients who require medical and nursing services;

(b) has written policies, which are developed (and reviewed from time to time) with the advice of a group of professional personnel, including one or more physicians and one or more registered professional nurses, to govern the services it provides;

(c) has a medical staff, a physician, or a registered professional nurse responsible for the execution of such policies;

(d) unless it is operated by a participating hospital, operates under the supervision of an administrator licensed by the State in which the institution is situated;

(e) has a requirement that the health care of every patient be under the supervision of a physician, and provides for having a physician available to furnish necessary medical care in case of emergency;

(f) maintains adequate clinical records on all patients;

(g) provides twenty-four-hour nursing service sufficient to meet nursing needs in accordance with the policies developed as provided in subsection (b), and has at least one registered professional nurse employed full time;

(h) provides appropriate methods and procedures for the dispensing and administering of drugs;

(i) has in effect a utilization review plan which meets the requirements of section 51; and

(j) meets all applicable requirements of the law of the State in which it is situated and, unless the Board finds that such law provides equivalent protection, meets the provisions of the Life Safety Code of the National Fire Protection Association (other than any provision of the code authorizing waiver of its requirements) applicable to nursing homes.

HOME HEALTH SERVICE AGENCIES

SEC. 46. Subject to the provisions of section 52, home health service agency is a qualified provider if it is a public agency or a nonprofit private organization, or a subdivision of such an agency or organization, which—

(a) is primarily engaged in furnishing, on an intermittent and visiting basis in patients' homes, skilled nursing and other therapeutic services to patients (other than mentally ill persons) who are under the care of physicians;

(b) has written policies developed (and reviewed from time to time) by a group of professional personnel associated with the agency or organization, including one or more physicians and one or more registered professional nurses, to govern the services which it furnishes, and provides for supervision of such services by a physician or registered professional nurse;

(c) maintains adequate clinical records on all patients;

(d) meets all applicable requirements of the law of the State in which it furnishes services; and

(e) has written policies and procedures which provide for a systematic evaluation of its total program at appropriate intervals in order to assure the appropriate utilization of services.

GROUP PRACTICE ORGANIZATIONS

SEC. 47. (a) A group practice organization (a type of health maintenance organization) is a qualified provider if—

(1) it is a public or other nonprofit organization which furnishes health services to persons enrolled in the organization;

(2) it provides at least annually an open enrollment period of not less than thirty days, during which all eligible persons living within a defined service area (or living near enough thereto to have reasonably ready access to the services of the organization), up to the capacity of the organization to furnish services, are accepted for enrollment in the order in which they apply, except that priority may by given to persons living within the service area; and it does not terminate any enrollment because of the enrollee's health status or his need or demand for health services, or for any other reason except repeated and serious violation of reasonable rules of the organization;

(3) it undertakes to provide to its enrollees, at its expense and in accordance with paragraphs (4) and (5), all of the covered services described in part B, including such supporting services as the Board may have approved under section 27(b); except that it may exclude some or all mental health services or dental services if it assures referral of its enrollees to providers of such excluded services when medically appropriate and maintains arrangements with such providers for the availability of the services to its enrollees;

(4) all physician services, and dental services if the organization undertakes to provide them, are (except for infrequently used services) furnished by a medical group which meets the following conditions, or by two or more groups each of which meets such conditions—

(A) the group consists of physicians, or of physicians and dentists, with or without other professional health personnel, sufficient in number and possessing among them the necessary qualifications to furnish all covered physician services and the dental service (if any) which the group practice organization undertakes to provide (except infrequently used services); and

(B) the members of the group (i) as their principal professional activity practice their profession as a group responsibility in furnishing services to enrollees of the group practice organization, (ii) pool their income from practice as such members (unless they are compensated by salary or stipend by the group practice organization) and distribute it among themselves in accordance with a prearranged salary, percentage, or similar plan, and (iii) jointly use medical and other records, a substantial part of their major equipment, and the services of professional, technical, and administrative staff (including personnel furnishing supporting services approved under section 27(b));

(5) all services, other than physician services and dental services, which the organization undertakes to provide (except infrequently used services) are furnished through its own staff and facilities (or are furnished by others under contract, if the organization retains control of, and full responsibility for, the availability and quality of the services); except that institutional services may be provided through arrangements with other participating providers (either nonprofit or for-profit) for the availability of services;

(6) the organization encourages health education of its enrollees (including education in the appropriate use of health services) and the development and use of preventive health services, and furnishes and arranges services and (to the extent practicable) arranges its system of medical records in such a manner as to facilitate continuity of care, and to the maximum extent feasible makes all services (including emergency services at all times) readily accessible to enrollees who live in its service area;

(7) it makes available to its enrollees and to the public full information about the services it provides and their availability, and such other information about its operations and the utilization of services as the Board may by regulation require;

(8) it provides an opportunity for representatives of its enrollees to participate effectively in the formulation of policies of the organization and in the evaluation of its operation, and provides fair and effective procedures for resolving disputes between enrollees and the organization or providers with whom it has contracted or has arrangements for the furnishing of service;

(9) it provides that a committee or committees of physicians (with other health professionals where appropriate) associated with the organization promulgate professional standards, oversee the professional aspects of the delivery of care, perform the functions of a pharmacy and drug therapeutics committee, and monitor and review the utiliza-

tion and quality of all health services (including drugs);

(10) to the extent practicable and consistent with good medical practice, it employs allied health personnel and subprofessional and lay personnel in the furnishing of services;

(11) it assumes the financial responsibility, without benefit of insurance except in accordance with section 87(e), for assuring to its enrollees the services which it has undertaken to provide;

(12) its premiums or other charges for any services not paid for under this title are reasonable; and

(13) it undertakes, to the extent required by regulations with respect to services of the kinds it has undertaken to provide, to arrange for reciprocal out-of-area services by other group practice organizations, or to pay for health services furnished to its enrollees by other participating providers, in emergencies, within or outside the service area of the organization.

(b) A group practice organization, or with its approval a professional practitioner who furnishes services on its behalf, may furnish services to persons who are not enrolled in the organization. Payment for such services, if they are covered services to eligible persons, shall be made by one of the methods provided in part E for payment to independent practitioners, and shall be made to the organization unless the organization requests that it be made to the practitioner who furnishes the services and he is a participating provider.

INDIVIDUAL PRACTICE ASSOCIATIONS

SEC. 48. (a) An individual practice association (a type of health maintenance organization) is a qualified provider if—

(1) it is an organization sponsored by a county or other local medical society, with a service area coextensive with the area of its sponsoring society, which meets the conditions set forth in section 47(a) (relating to group practice organizations) other than paragraph (4) thereof;

(2) all physician services, and dental services if the association undertakes to furnish them, are (except for infrequently used services) furnished by professional members of the association, who are compensated by whatever method or methods (including fee-for-service) may be agreed upon by the association and its professional members; and

(3) the association permits any physician (or dentist, if the association undertakes to furnish dental services) practicing in its service area, whether or not a member of the sponsoring society, subject only to criteria (approved by the Board) of professional qualifications, to become a professional member of the association to furnish services on its behalf.

(b) A professional member of an association, unless he has agreed otherwise with the association, may furnish services to persons who are not enrolled in the association, and payment for the services, if they are covered services to an eligible person, shall be made by one of the methods provided in part E for payment to independent practitioners. The payment shall be made to the professional member, except that if he is compensated by the association for services to enrollees on a salary, stipend, or capitation basis (or if he is not a participating provider) the payment shall be made to the association.

OTHER HEALTH SERVICE ORGANIZATIONS

SEC. 49. (a) Pursuant to an agreement with the Board containing such terms and conditions, and prescribing such standards, as the Board deems proper, any of the following is a qualified provider of such services as are specified in the agreement—

(1) a public or other nonprofit agency or organization (including a hospital) which furnishes all of the covered services described in part B, including such supporting services as the Board may have approved under section 27(b), except that it may exclude some or all institutional services, mental health services, or dental services if it assures referral of its patients to providers of such services when medically appropriate and maintains arrangements with such providers for the availability of the services to its patients;

(2) a public or other nonprofit center (including a satellite center established by a hospital) which (A) furnishes, as a minimum, the services of two or more physicians engaged in general or family practice, the services of nurses and supporting personnel, and basic laboratory services, which the Board finds sufficient for the primary medical care of a substantial population living in the vicinity of the center, and (B) has arrangements with other providers of services which the Board finds assure to the population served by the center, on a coordinated basis, all components of the covered health services described in part B;

(3) a public or other nonprofit mental health center or mental health day care service;

(4) a State or local public health agency furnishing preventive or diagnostic services, or a public agency furnishing covered health services in a primary or secondary school in accordance with regulations issued under section 28(b);

(5) a free-standing ambulatory treatment center for the treatment of alcoholism or drug abuse, or both;

(6) a free-standing center for the furnishing of family planning services;

(7) a free-standing center for the furnishing of rehabilitation services; or

(8) a medical or dental group practice or clinic, a dental foundation, or another organization or agency furnishing health services to ambulatory patients.

(b) An agreement under this section shall not, except to the extent that it specifically so provides, preclude a professional practitioner who furnishes services on behalf of the provider from furnishing also; either on behalf of the provider or as a participating independent practitioner, services which are of a kind not within the scope of the agreement or are furnished to persons not within its scope. Unless the agreement provides that payment for covered services furnished to eligible presons shall be made to the provider who has entered into the agreement, payment shall be made to the practitioner by one of the methods provided in part E for payment to independent practitioners.

OTHER PROVIDERS

SEC. 50. (a) An independent pathology laboratory (as defined in regulations) is a qualified provider of diagnostic pathology services if (whether or not it is engaged in transactions in interstate commerce) it meets the requirements established by or pursuant to section 353 of the Public Health Service Act. An independent radiology service (as defined in regulations) is a qualified provider of diagnostic and therapeutic radiology if it meets all applicable requirements of the law of the State in which the services are furnished.

(b) A provider of drugs, devices, appliances, or equipment is a qualified provider if he meets all applicable requirements established by or pursuant to the Federal Food, Drug, and Cosmetic Act and all requirements of the law of the State in which the provider is situated.

(c) A provider of ambulance or other covered transportation services is a qualified provider if he meets all applicable requirements of the law of the State in which the services are furnished.

(d) A Christian Science sanatorium is a qualified provider of services specified in regulations prescribed under section 2(a) if it is operated, or listed and certified, by the First Church of Christ, Scientist, Boston, Massachusetts.

UTILIZATION REVIEW

SEC. 51. A utilization review plan of a psychiatric or other hospital or a skilled nursing home shall be considered sufficient if it provides—

(a) for the periodic review on a sample or other basis (and the maintenance of adequate records of such review) of admissions to the institution, the duration of stays, and the professional services (including drugs) furnished, (1) with respect to the medical necessity of the services, and (2) for the purpose of promoting the most efficient use of available health facilities and services; and provides for periodic reports, to the institution and the medical staff (and, when requested, to the Board), of statistical summaries of the review;

(b) in the case of a psychiatric or other hospital, for such review to be made either (1) by a staff committee of the hospital composed of two or more physicians (consulting, with respect to drug utilization, with the pharmacy and drug therapeutics committee), with or without participation of other professional personnel, or (2) by a group outside the hospital which is similarly composed and which, if practicable, is established by the local medical society and hospitals in the locality, or is established in such other manner as may be approved by the Board; but clause (1) of this subsection shall be inapplicable to any hospital where, because of its small size or for such other reason as may be specified in regulations, it is impracticable for the hospital to have a properly functioning staff committee for the purposes of this section;

(c) in the case of a skilled nursing home, for such review to be made by a committee, composed and established as provided in subsection (b), or by a committee so composed which is established by the State or local public health agency pursuant to a contract with the Board, or by the Board; except that if a consolidated budget has been approved for the nursing home and a hospital, under section 83(f), the review shall be made by the utilization review committee of the hospital;

(d) for such review, in each case of inpatient hospital services or skilled nursing home services furnished to a patient during a continuous period of extended duration, as of such days of such period (which may differ for different classes of cases) as may be specified in regulations, with such review to be made as promptly as possible after each day so specified, and in no event later than one week following such day; and

(e) for prompt notification to the institution, the patient, and his attending physician of any finding (made after opportunity for consultation afforded to such attending physician) by the physician members of such committee or group that any admission, further stay, or furnishing of particular services in the institution is not medically necessary.

TRANSFER AND AFFILIATION AGREEMENTS

SEC. 52. (a) A skilled nursing home is a qualified provider only if it has in effect (or there is in effect a finding under subsection (c) temporarily dispensed with) a transfer agreement with at least one participating hospital, providing for the transfer of patients and of medical and other information between the institutions as medically appropriate.

(b) After two years following the effective date of health benefits, a skilled nursing home or a home health service agency will be a qualified provider only if it has in effect (or there is in effect a finding under subsection (c) temporarily dispensing with) an affiliation agreement with a participating hospital or a participating group practice organization, under which the medical staff

of the hospital or organization (or a committee thereof) will furnish, or will assume responsibility for, the professional services in the skilled nursing home, or the professional services furnished by the home health agency, as the case may be.

(c) The requirement of a transfer agreement under subsection (a), or of an affiliation agreement under subsection (b), shall not be applicable in any case if there is in effect a finding by the Board that the lack of a suitable hospital or organization within a reasonable distance makes such an agreement impracticable, and that the services of the skilled nursing home or the home health agency are essential to avoid a critical shortage of services to eligible persons. Such a finding shall be reviewed periodically, and shall be revoked whenever the Board finds it practicable to do so.

NEWLY CONSTRUCTED FACILITIES

SEC. 53. A psychiatric or other hospital or a skilled nursing home, or a provider operating a facility for ambulatory care, is not a participating provider if construction or substantial enlargement of the facility (whether or not in replacement of another facility) was undertaken (as defined in regulations) after December 31 of the year in which this title is enacted unless (a) the construction or enlargement is in accord with a State certificate of need, or has been found by a State agency designated by the Governor of the State for this purpose, or has been found by the Board, to be needed for the furnishing of adequate services to persons residing in the area to be served by the institution, or (b) in the case of enlargement of an existing facility, the Board has found (regardless of the need for the enlargement) that the facility is needed for that purpose. (For provision relating to reduction in payments in certain cases referred to in clause (b), see section 89.)

LIMITATIONS ON MALPRACTICE JUDGMENTS

SEC. 54. In any litigation in any court of the United States or any State seeking damages for injury caused by negligence or other fault in the furnishing of any service covered by this Act, no damages shall be awarded for the cost of remedial services for which the injured party was or is entitled to have payment made under this Act (or for which he would have been, or would be, entitled to have payment made upon obtaining the services from a participating provider).

EXCLUSION: FEDERAL PROVIDERS OF SERVICES

SEC. 55. No institution of the Department of Defense, no institution of the Veterans' Administration, no institution of the Department of Health, Education, and Welfare engaged in the provision of services to merchant seamen or to Indians or Alaskan natives, and no employee of any of the foregoing acting as employee, is a participating provider. The Board shall, however, reimburse the proper appropriation for any covered services furnished by any such institution or employee to an eligible person who is not, under any Act other than this Act, eligible to receive the service from the institution or employee. The Board shall also reimburse the proper appropriation for any covered services furnished to eligible persons pursuant to section 329 of the Public Health Service Act, such reimbursement to be in lieu of payments required by section 329(b) of that Act.

RESTRICTIVE STATE LAWS INOPERATIVE

SEC. 56. (a) In the furnishing of covered services to eligible persons (any law of a State or political subdivision to the contrary notwithstanding)—

(1) A physician, dentist, optometrist, or podiatrist who is legally authorized by a State to practice his profession and who meets national standards established by the Board pursuant to section 42(a) is hereby authorized to furnish in any other State, either as an independent participating provider or on behalf of an institutional or other participating provider, the services which such other State authorizes to be furnished by practitioners of his profession.

(2) A professional nurse, or a practitioner of another health profession or occupation designated in regulations, who meets national standards established by the Board for his profession or occupation is hereby authorized to furnish in any State, on behalf of participating providers of services, the services which that State authorizes or permits to be furnished by practitioners of his profession or occupation. National standards applicable to professional nursing, or to any other profession or occupation the practice of which is subject in all States to licensure or similar authorization, shall contain a requirement of licensure or authorization by at least on State.

(3) In a participating public or other nonprofit hospital or a participating group practice organization, a practitioner of any health profession other than medicine or dentistry or of any nonprofessional health occupation who meets national standards established by the Board for his profession or occupation, and meets any additional qualifications established by the Board for the performance of particular acts or procedures, is hereby authorized to perform, under the supervision and responsibility of a physician or dentist, such of the acts which might lawfully be performed by the physician or dentist as are specified in regulations.

(4) A participating public or other nonprofit hospital or a participating group practice organization is hereby authorized (whether or not the arrangement may be deemed to constitute corporate practice of a profession) to employ physicians, dentists, or other professional practitioners, or to obtain and compensate their services in any other manner, and the practitioners are authorized to serve such a hospital or organization as employees or in any other manner; but only if the employment or other arrangement is not of a kind which the Board finds is likely to cause lay interference with professional acts or professional judgments.

(b) If the Board finds that a proposed corporation will meet the requirements of section 47(a) for participation as a group practice organization, but that it cannot be incorporated in the State in which it proposes to furnish services because the State law requires that a medical society approve the incorporation of such an organization, or requires that physicians constitute all or a majority of its governing board, or requires that all physicians in the locality be permitted to participate in the services of the organization, or makes any other requirements which the Board finds incompatible with the purposes of this title, the Board may issue a certificate of incorporation to the organization, and it shall thereupon become a body corporate. The powers of the corporation shall be limited to the furnishing of services under this title, and the doing of things reasonably necessary or incident thereto. So far as the Board finds to be compatible with the purposes of this title, the certificate of incorporation shall accord with, and the corporation shall be subject to, provisions of the State law which are applicable to nonprofit corporations generally. The corporation shall not be deemed to be an instrumentality of the United States for purposes of exemption from any Federal or State law.

PART D—TRUST FUND; ALLOCATION OF FUNDS FOR SERVICES

HEALTH SECURITY TRUST FUND

SEC. 61. (For the text of section 61, see section 406, transferring section 1817 of the Social Security Act to this Act, redesignating it as section 61, and amending it.)

ANNUAL DETERMINATION OF FUND AVAILABILITY

SEC. 62. (a) For each fiscal year the Board shall, not later than June 1, next preceding the beginning of the fiscal year, fix the maximum amount which may (except as provided in subsection (c)) be obligated during the fiscal year for expenditure from the Trust Fund. The amount so fixed—

(1) shall not exceed 200 per centum of the expected net receipts during the fiscal year (as estimated by the Secretary of the Treasury) from the taxes imposed by sections 1401(b), 1403, 3101(b), and 3111(b) of the Internal Revenue Code of 1954, and

(2) for any fiscal year (except for the period between the effective date of health benefits and the end of the first fiscal year beginning thereafter), shall not exceed the aggregate obligations, as estimated by the Board, incurred and to be incurred by the Trust Fund during the fiscal year current at the time when the determination is made, adjusted to reflect (A) any estimated change expected in the prices of goods and services which enter into the cost of living, (B) the expected change in the number of eligible persons, (C) any expected change (to the extent that the Board finds it not otherwise adequately reflected) in the number of participating professional providers, or in the number or capacity for the provision of services of institutional or other participating providers, and (D) any change in the cost of administration of this Act indicated in the President's budget estimates pursuant to section 201(g) of the Social Security Act.

(b) In fixing the amount to be available for obligation during a fiscal year, pursuant to subsection (a)—

(1) if and to the extent that (A) the Board estimates that the amount in the Trust Fund at the beginning of the fiscal year will be less than one-quarter of the obligations incurred and to be incurred during the fiscal year current at the time when the determination is made, and (B) the Board finds that the restriction of the amount be available for obligation will not materially impair the adequacy or quality of services to eligible persons, the amount fixed under subsecsection (a) shall be less than the maximum stated in paragraph (1) of that subsection; and

(2) if and to the extent that the Board finds that improvement in the organization and delivery of services or in the control of their utilization has lessened their aggregate cost (or has lessened an increase in their aggregate cost), the amount fixed under subsection (a) shall be less than the maximum stated in paragraph (2) of that subsection.

(c) The amount to be available for obligation during a fiscal year, fixed pursuant to subsection (a), may be modified before or during the fiscal year if the Secretary of the Treasury finds that the tax receipts referred to in subsection (a)(1) will differ from the estimate by 1 per centum or more, or if the Board finds that any of the factors of expected change referred to in subsection (a)(2), or action on the budget estimate for the cost of administration, will differ from the estimate by 5 per centum or more; or if an epidemic, disaster, or other occurrence increases the need for health services to an extent which the Board finds requires the expenditure of additional funds. If the amount fixed pursuant to subsection (a) is increased, the Board shall promptly report its action to the Congress with a statement of the reasons therefor.

HEALTH SERVICES ACCOUNT, HEALTH RESOURCES DEVELOPMENT ACCOUNT, ADMINISTRATION ACCOUNT, AND GENERAL ACCOUNT

SEC. 63. (a) There shall be established in the Trust Fund a health services account, a health resources development account, an administration account, and a general account (consisting of all moneys in the Trust

Fund which have not been transferred to another account).

(b) For each fiscal year there shall from time to time be transferred from the general account to the health resources development account the following percentage of the amount to be available for obligation during that year (as determined pursuant to section 62 (a) and (b)): for the fiscal year beginning on the effective date of health benefits, and for the next succeeding fiscal year, 2 per centum; for each of the next two succeeding fiscal years, 3 per centum; for each of the next two succeeding fiscal years, 4 per centum; and for each fiscal year thereafter, 5 per centum. Funds in the health resources development account shall be used exclusively for the purposes of part F, and shall remain available for such uses until expended.

(c) The remainder of the amount to be available for obligation during the fiscal year, after deducting the amount of the President's budget estimates for the cost of administering this Act, shall from time to time be transferred from the general account to the health services account. Funds in the health services account shall be used exclusively for making payments for covered services in accordance with part E, and shall remain available for such payments until expended.

(d) As amounts available for a fiscal year for the administration of this Act are determined by the Congress, the amount available for the administration of the title shall be transferred from the general account to the administration account.

(e) From time to time any necessary adjustments shall be made in the amounts transferred to the several accounts, and in allocations previously made from the health services account.

REGIONAL ALLOCATIONS FROM HEALTH SERVICES ACCOUNT

SEC. 64. (a) For each fiscal year the Board shall, not later than June 1, next preceding the beginning of the fiscal year, make allocations to the regions of the Department from the funds to be available for the fiscal year in the health services account. The allocation to each region shall be equal to the estimated aggregate expenditures in the region for services, described in part B as covered services, in the most recent twelve-month period for which reliable data are available, adjusted to reflect the factors of change referred to in clauses (A), (B), and (C) of section 62(a)(2), and further adjusted in accordance with subsections (b) and (c) of this section.

(b) It shall be the objective of the Board to reduce gradually, and ultimately to eliminate substantially, existing differences among the regions of the Department in the average per capita cost of health services, except as such differences reflect differences in the prices of goods and services which enter into the cost of living for people in the several regions. To this end the Board shall modify the allocations for each fiscal year determined under subsection (a) in order (1) to reduce, or to lessen any increase in, the cost of covered services in regions in which the average per capita cost is higher (to an extent greater than the difference in the estimated weighted average cost of goods and services) than the national average per capita cost, to such an extent as the Board finds practicable without impairing materially the adequacy or quality of services to eligible persons, and (2) to stimulate, to such extent as the Board finds practicable and desirable, increases in the availability and utilization of covered services in regions in which the average per capita cost is lower (to an extent greater than the difference in the estimated weighted average cost of goods and services) than the national average per capita cost. In modifying allocations to the regions, the Board shall take account of regional differences in the composition of populations, in the prevalence and incidence of morbidity indicating need for covered services, in the available and needed resources in personnel or facilities for provision of covered services, in the costs of providing covered services, and in such other factors as the Board may deem pertinent, to the extent that such regional differences are not reflected in allocations under subsection (a) and have not already been taken into account, under this subsection, in modifying these allocations.

(c) The Board shall withhold from allocation to the regions a reserve for contingencies, in an amount not more than 5 per centum of the funds to be available for the fiscal year in the health services account. If the remaining amount to be available for the fiscal year in the account is less than the sum of the regional allocations determined pursuant to subsections (a) and (b), the allocations shall be reduced proportionately.

(d) Allocations under this section may be modified before or during a fiscal year if the amount to be available for obligation is modified pursuant to section 62(c). The contingency reserve shall be available to increase one or more regional allocations, as the Board may find necessary. From the contingency reserve, or from additional funds in the general account made available for obligation, one or more allocations may also be increased if an epidemic, disaster, or other occurrence increases the need for health services to an extent which the Board finds requires the expenditure of additional funds.

DIVISION OF REGIONAL FUNDS BY CLASSES OF SERVICES

SEC. 65. (a) For each fiscal year the Board shall, not later than July 1, next preceding the beginning of the fiscal year, divide the allocation to each region into funds to be available, respectively, to pay the cost within the region of the following classes of services: (1) institutional services, (2) physician services, (3) dental services, (4) the furnishing of drugs, (5) the furnishing of devices, appliances, and equipment, and (6) other professional and miscellaneous services.

(b) The content, for purposes of the division of funds, of each class of services shall be defined in regulations. Within the funds to be available for miscellaneous services, the regulations shall establish subfunds, respectively, for the making of incentive payments not otherwise provided for, for supporting services described in section 27(b), for payments to optometrists, for payments to podiatrists, for payments to independent pathology laboratories, for payments to independent radiology services, and for such other purposes as the Board may determine.

(c) The amounts assigned to the several funds and subfunds in each region shall be determined in accordance with regulations, which shall take into account, in addition to the factors considered in making the regional allocations, trends in utilization of the several services and, to the extent the Board finds it practicable, the creation of incentives to the improved utilization thereof.

FUNDS FOR HEALTH SERVICE AREAS

SEC. 66. (a) For each fiscal year the Board shall, not later than July 1, next preceding the beginning of the fiscal year, allot among the health service areas established in each region under section 124(a), each of the funds established for the region pursuant to section 65 for a class of services. If an interstate health service area lies partly in each of two or more regions, appropriate allotments of funds from each region shall be made to it.

(b) The amount allotted to each health service area from each regional fund shall be equal to the aggregate expenditures in the area for services of the class for which the fund is to be available, as determined (or if necessary, estimated) by the Board for such twelve-month period as may be specified in regulations; modified to take account of the factors considered in making regional allocations and in dividing such allocations by classes of services (including modifications designed to further the objective of equalization within each region, in the manner set forth in section 64(b) with respect to interregional equalization).

(c) Payment for services, in accordance with part E, shall be made to participating providers in each health service area by such officer of the Board as it may designate for the purpose. There shall be established for each area such accounts as the Board may find convenient for making payment to providers of more than one class of services (such as an account for payment to hospitals, or an account for payment to group practice organizations), in which shall be deposited the appropriate portions of the funds for the several classes of services to be furnished by such providers.

MODIFICATION OF FUND ALLOTMENTS

SEC. 67. Before or during a fiscal year the division of funds by classes of services pursuant to section 65, or the allotment of funds to health service areas pursuant to section 66, may be modified if the regional allocations are modified, or if the Board finds that modification is required by events occurring or information acquired after the division and allotment were made.

INITIAL ACTIONS UNDER PART D

SEC. 68. In the determination of fund availability, regional allocations, and all other actions required by this part to be taken on a fiscal year basis, the Board may in its discretion take initial actions either for the three-month period between the effective date of health benefits and the beginning of the next fiscal year, or for the fifteen-month period between such effective date and the end of such fiscal year, making in either case appropriate adjustments in the amounts of such determinations, allocations, or other actions.

PART E—PAYMENT TO PROVIDERS OF SERVICES IN GENERAL

SEC. 81. Payment shall be made to participating providers, in accordance with this part, for covered services furnished to eligible persons. Payments shall be made from the amounts allocated from the health services account in the Trust Fund, in accordance with part D, for the respective areas and purposes.

METHODS AND AMOUNT OF PAYMENT TO PROFESSIONAL PRACTITIONERS

SEC. 82. (a) Every independent professional practitioner shall be entitled, at his election, to be paid by the fee-for-service method, consisting of the payment of a fee for each separate covered service.

(b) Every physician engaged as an independent practitioner in the general or family practice of medicine (as determined in accordance with regulations under section 22(b)), and every dentist engaged as an independent practitioner in the furnishing of covered dental services, shall be entitled, at his election, to be paid by the capitation method if he has filed with the Board an agreement (1) to furnish all necessary and appropriate primary medical services (as defined in such regulations) or covered dental services, as the case may be, to persons on a list of persons who have chosen to receive all such services from the practitioner, (2) to maintain arrangements for referral of patients to specialists, institutions, and other providers of covered services, and (3) to maintain such records and make such reports of services furnished as may be required by regulations for purposes of medical audit. A practitioner electing the capita-

tion method is entitled to be paid by the fee-for-service method for services furnished to eligible persons who are not on his list, but not (except as provided in regulations) for specialized services furnished to persons who are on his list.

(c) When the Board deems it necessary in order to assure the availability of services or for other reasons, the Board (1) may pay an independent practitioner a full-time or part-time stipend in lieu of or as a supplement to the foregoing methods of compensation, and it may reimburse a practitioner for special costs of continuing professional education and of maintaining linkages with other providers of services (such as costs of communication and of attendance at meetings or consultations), and (2) may pay for specialized medical services a stated amount per session or per case or may utilize a combination of the methods authorized by this section.

(d) The capitation method of payment for a specified kind and scope of covered services consists of the payment to a provider of such services, of an annual capitation amount (determined for a health service area) for each person who has chosen to receive all such services from the provider.

(e) The amounts allotted for a fiscal year pursuant to part D for each health service area for physician services, for dental services, for optometrist services, and for podiatrist services, respectively, shall each be used (1) to provide for payments for professional services (made either directly to practitioners or as reimbursement to hospitals or other providers for the compensation of practitioners) to be made by the Board on a budget or stipend basis or any basis other than capitation, fee-for-service, or per case, and (2) from the remainder, to make available (for each kind of professional services) an equal per capita amount for each person resident in the area who is entitled to such services. In any area in which the Board finds that a substantial volume of services is furnished to nonresidents, it may reduce the per capita amount to such extent as it finds necessary to effect an equitable distribution of funds.

(f) The per capita amount shall constitute the annual capitation amount for purposes of payment to any organization, individual practice association or other provider furnishing all covered services (described in part B) of the kind for which the allotment is available. Lesser capitation amounts shall be fixed, on the basis of the relative cost of the services, for primary medical services, and, as may be required, for any scope of services (less than comprehensive) which is furnished by any institutional or other provider. If the Board finds that the population served by a provider requires on the average, because of age distribution or other factor, a volume of services significantly greater or smaller than the average requirement of the population of the local health service area, the Board may, after consultation with the provider, make an appropriate adjustment in the capitation amount payable to him.

(g) For the compensation of professional practitioners who are to be paid by the Board (directly or through a delegation under this subsection) on a fee-for-service or per case basis, there shall be available—

(1) the per capita amount determined under subsection (e), multiplied by the number of residents of the health service area for whom no capitation payment (for services of the kind for which the allotment is available) is to be made under subsection (f),

(2) increased to reflect any excess resulting from a lowering of the per capita amount under subsection (e) on account of services furnished to nonresidents or from the fixing of lesser capitation amounts under subsection (f) for services less less than comprehensive, and

(3) increased or reduced to reflect adjustments under subsection (f), on the ground of age distribution or other factor, in capitation amounts payable to other providers.

The amount of payments under this subsection shall be determined in accordance with relative value scales prescribed by the Board after consultation with representatives of the respective professions in the region, State, or area, and in accordance with unit values prescribed by the Board from time to time. The Board may, on such terms as it deems appropriate, delegate to a professional society or to an agency designated by representatives of a profession in the region, State, or area the payment of fees and per session amounts under this subsection.

(h) The Board may, on an experimental or demonstration basis, enter into an agreement with a statewide or local professional society or other organization representative of independent professional practitioners to substitute another method of compensation for those set forth in this section (either for all such practitioners, for all who have elected the fee-for-service method of payments, or for all who have elected another method), if the Board is satisfied that the substitute method will not increase the cost of services and will not encourage overutilization or underutilization of covered services. The Board shall review from time to time the operation of such an agreement, and shall, after reasonable notice, terminate it if the Board finds it to have led to increased cost or to overutilization or underutilization of covered services.

PAYMENT TO GENERAL HOSPITALS

SEC. 83. (a) A participating hospital (other than a psychiatric hospital) shall be paid its approved operating costs, determined in accordance with regulations, in the furnishing of covered services to eligible persons, as such approved costs for a fiscal year are set forth in a prospective budget approved by the Board. Regulations under this section shall specify the method or methods to be used in determining costs, including, but not limited to review of (1) total hospital income from all sources, (2) total hospital expenditures, and (3) the volume of hospital services; and the regulations shall also prescribe a nationally uniform system of cost accounting.

(b) The costs recognized in each hospital budget shall be those, determined in accordance with subsection (a), to be incurred in furnishing the covered services ordinarily performed by the hospital and ordinarily financed from payments by or on behalf of patients (including the clinical aspects of education or training of professional or other health personnel), except as the scope of services or of other functions may be modified (1) by agreement of the Board and the hospital, (2) by application of guidelines for the clinical education or training of health personnel established pursuant to section 131 for the region or State in which the hospital is situated, or (3) by direction of the Board pursuant to section 134. The budget shall recognize any increase or decrease of cost resulting from a modification of the scope of services or of other functions, either by agreement or by direction of the Board.

(c) The costs recognized in the budget shall include the cost of reasonable compensation to (and other costs incident to the services of) pathologists, radiologists, and other physicians and other professional or nonprofessional personnel whose services are held as generally available to patients of the hospital or to classes of its patients, whatever the method of compensation of such physicians and other personnel, and whether or not they are employees of the hospital.

(d) The Board shall review, through such of its officers or employees or through such boards, and in such manner, as may be provided in regulations, proposed budgets prepared and submitted to it by hospitals, and may provide for participation in such review by representatives of the hospitals in the region or health service area in which the hospital is situated. Each officer of the Board charged with final action on hospital budgets shall receive and consider written justifications of budget proposals, and may provide oral hearings thereon.

(e) A hospital budget approved under this section for a fiscal year may, in such manner as is provided in regulations, be amended before, during, or after the fiscal year if there is a substantial change in any of the factors relevant to budget approval.

(f) If a hospital (other than a psychiatric hospital) operates or has an affiliation agreement (described in section 52(b)) with a participating home health service agency, the Board may, on request of the institution or institutions and in accordance with regulations designed to reflect the cost of a combined operation, approve a consolidated budget and make all payments thereunder to the hospital.

PAYMENT TO PSYCHIATRIC HOSPITALS

SEC. 84. A participating psychiatric hospital which is primarily engaged in furnishing covered services shall be paid in the same manner as other hospitals. Any other participating psychiatric hospital shall be paid an amount determined in accordance with regulations for each patient day of covered services to an eligible person. Such regulations shall take into account, with respect to any distinct part of the hospital which meets the requirements of section 44, the factors to be considered in the approval of the budgets of hospitals other than psychiatric hospitals, but with such adjustments as are necessary to provide equitable compensation to the psychiatric hospital.

PAYMENT TO SKILLED NURSING HOMES AND TO HOME HEALTH SERVICE AGENCIES

SEC. 85. (a) A participating skilled nursing home or home health service agency shall be paid, in the same manner as a hospital (other than a psychiatric hospital), except as provided in subsection (b) of this section its approved operating costs in the furnishing to eligible persons of skilled nursing home services or home health services, as the case may be.

(b) Regulations under this section shall, for skilled nursing homes and for home health service agencies, respectively, specify the method or methods to be used, and the items to be included, in determining costs; may, to the extent the Board deems desirable, specify nationally uniform systems of cost accounting; and, taking into account the prevailing practices of such homes or such agencies, may specify services which will be recognized in budgets and services which will not be so recognized.

PAYMENT FOR DRUGS

SEC. 86. (a) For each drug appearing on either of the lists established pursuant to section 25, the Board shall from time to time determine a product price or prices which shall constitute the maximum to be recognized under this title as a cost of the drug to a provider thereof. Product prices shall be so fixed as to encourage the acquisition of drugs in substantial quantities, and differing product prices for a single drug may be established only to reflect regional differences in cost or other factors not related to the quantity purchased.

(b) Payment for a drug furnished by an independent pharmacy shall consist of its cost to the pharmacy (not in excess of the applicable product price) plus a dispensing

fee. The Board, after consultation with representatives of the pharmaceutical profession, shall establish (and from time to time review) schedules of dispensing fees, designed to afford reasonable compensation to independent pharmacies after taking into account variations in their cost of operation resulting from regional differences, differences in the volume of drugs dispensed, differences in services provided, and other factors which the Board finds relevant.

PAYMENT TO GROUP PRACTICE ORGANIZATIONS AND INDIVIDUAL PRACTICE ASSOCIATIONS

SEC. 87. (a) Payment to a group practice organization or to an individual practice association for covered services to its eligible enrollees shall consist of basic capitation payments (if any) determined in accordance with subsection (d).

(b) The basic capitation payment shall consist of a basic capitation amount multiplied by the number of eligible persons enrolled in the organization or association. The basic capitation amount shall be the sum of the appropriate capitation amount or amounts for professional services or class of services which it has undertaken to furnish.

(c) Capitation amounts for institutional services shall be based on per diem rates derived from the budgets (approved under this part) of participating institutional providers or, if the services are furnished through institutions operated by the group practice organization or individual practice association (or are furnished by contract with institutions which are not participating providers), derived from budgets prepared and approved in like manner as for participating institutions. Per diem rates shall be determined for each fiscal year, and for that year shall be modified only if the institutional budgets are amended or if modification is necessary to avoid substantial inequities.

(d) If it appears to the satisfaction of the Board (1) that the average utilization of hospital and skilled nursing home services by eligible persons enrolled in the organization or association (in whatever manner such services are provided) has, during a fiscal year, been less than the average utilization of such services under comparable circumstances by comparable population groups not enrolled either in group practice organizations or in individual practice associations, and (2) that the services provided by the organization or association have been of high quality and adequate to the needs of its enrollees, the Board shall make an additional payment to the organization or association equal to 75 per centum of the amount which the Board finds has been saved by such lesser utilization of hospital and skilled nursing home services. The amount of any such additional payment may be used by the organization or association for any of its purposes, including the application of such amounts to the cost of services not covered by this title.

(e) The Board shall, in accordance with regulations, make available to group practice organizations and individual practice associations, in consideration of premiums to be deducted from amounts otherwise payable to them under this section, insurance against (1) the cost, in excess of an amount fixed by the Board (which shall be not less than $5,000), of services furnished during a calendar year to any one enrollee, (2) some or all of the cost of institutional services provided through arrangements with other participating providers in accordance with section 47(a) (5), and (3) some or all of the cost, for which the organization or association is responsible in accordance with section 47(a) (13), of services provided by other participating providers. Premium rates for such insurance shall reflect the expected utilization of services by the enrollees of the organization or association insured.

(f) In addition to the payments required by this section, the Board may pay to a group practice organization the cost of clinical education or training provided by the organization (otherwise than in a hospital) which the Board finds to be in accordance with guidelines established pursuant to section 131 for the region or State in which the organization is situated.

PAYMENT TO OTHER PROVIDERS

SEC. 88. (a) An agency, organization, or other entity with which the Board has entered into an agreement under section 49 (a) shall be paid by such method (other than the fee-for-service method) as, in accordance with regulations, may be set forth in the agreement.

(b) An independent pathology laboratory or an independent radiology service shall be paid on the basis of a budget approved by the Board, or on such other basis as may be specified in regulations.

(c) Payment for devices, appliances, and equipment, payment for ambulance or other covered transportation services, and payment for the services of a Christian Science sanatorium shall be made on such basis as may be specified in regulations.

REDUCTION IN PAYMENTS ON ACCOUNT OF UNNECESSARY CAPITAL EXPENDITURES

SEC. 89. Whenever the Secretary, pursuant to section 1122 of the Social Security Act (relating to reduction in Federal reimbursement in cases of unnecessary capital expenditures) issues a direction to the Board with respect to any health care facility owned or operated by a participating provider, the Board shall reduce accordingly amounts otherwise payable under this part to the provider.

METHODS AND TIME OF PAYMENT

SEC. 90. The Board shall periodically determine the amount which should be paid under this part to each participating provider of services (with adjustment for payments by one participating provider to another), and the provider shall be paid, from the health services account in the Trust Fund, at such time or times as the Board finds appropriate (but not less often than monthly) and prior to audit or settlement by the General Accounting Office, the amount so determined, with adjustments on account of underpayments or overpayments previously made (including appropriate retrospective adjustments following amendment of approved institutional budgets). Payment may be made in advance in such cases and to such extent as the Board finds necessary to apply providers with working funds, on such terms as it finds sufficient to protect the interests of the United States.

PART F—DEVELOPMENT FUND

Subpart 1—Planning; funds to improve services and to alleviate shortages of facilities and personnel

PURPOSE OF SUBPART 1

SEC. 101. (a) The purpose of this subpart is—

(1) prior to the effective date of health security benefits, to inaugurate a program of strengthening the Nation's resources of health personnel and facilities and its system of delivery of health services, in order to enable the providers of health services better to meet the demands on them when benefits under this title become available, and to that end to provide financial and other assistance (A) in alleviating shortages and maldistributions of health personnel and facilities in order to increase the supply of services, and (B) in improving the organization of health services in order to increase their accessibility and effective delivery; and

(2) after the effective date, to reinforce the operation of the health security program under this title as a mechanism for the continuing improvement of the supply and distribution of health personnel and facilities and the organization of health services, and to that end to assist in meeting those costs of improvement of personnel, facilities, and organization that are not met either through the normal operation of the health security program under this title or from other sources of public or private assistance.

(b) With respect to health facilities and the organization of health services, the Board shall be guided by the national health priorities established by section 1502 of the Public Health Service Act, the guidelines issued by the Secretary under section 1501 thereof, and State health plans which have been developed for the respective States and found by the Secretary to be adequate under title XV of that Act. Pending findings of adequacy of State health plans, the Board shall be guided by planning of the Secretary pursuant to section 102(a) of this Act.

(c) With respect to the education and training of health personnel, the Board shall be guided by planning of the Secretary pursuant to section 102(b) of this Act.

PLANNING BY THE SECRETARY

SEC. 102. (a) Pending findings of adequacy of State health plans, the Secretary shall conduct within the Department studies addressed to identification of the most acute shortages and maldistributions of facilities and the most serious deficiencies in the organization for delivery of services covered under this Act, and of means for the speedy alleviation of these shortcomings. In carrying out this function, the Secretary shall consult with, and utilize the experience and recommendations of, existing State, regional and local health planning agencies, and State and local planning agencies and centers for health planning established pursuant to title XV of the Public Health Service Act.

(b) The Secretary shall have the continuing duty of planning for improvement of the supply and distribution of health personnel. He shall conduct such planning on a national, regional, state, or local basis as he may consider most appropriate for each kind of personnel, and in consultation with planning agencies referred to in subsection (a) to such extent as he deems desirable, and with appropriate professional organizations.

GENERAL POLICIES AND PRIORITIES

SEC. 103. (a) In providing assistance under this subpart, the Board shall give priority to improving and expanding the available resources for, and assuring the accessibility of, services to ambulatory patients which are furnished as part of coordinated systems of comprehensive care. To this end the Board shall encourage and assist (1) the development or expansion of group practice organizations meeting the requirements of section 47(a), (2) the development or expansion of agencies, organizations, and centers described in section 49(a) (1) or (2) to furnish services to persons in urban and rural areas who lack ready access to such services, (3) the recruitment and training of professional personnel to staff such organizations, agencies, and centers, (4) the recruitment and training of subprofessional and nonprofessional personnel (including the development and testing of new kinds of health personnel) to assist in the furnishing of such services, to engage in education for personal health maintenance, and to furnish liaison between such organizations, agencies, or centers and the people they serve, (5) the strengthening of coordination and linkages among institutional services (including linkages with educational institutions), among non-institutional services, and between services of the two kinds, in order to improve the continuity of care and the assurance that patients will be referred to such services and at such times as may be medically appropriate, (6) the strengthening of coordination and cooperation between hospital medical staffs and hos-

pital administrators, and (7) the inclusion of dental services in systems of comprehensive health care.

(b) Funds available to carry out this part shall not be used to replace other Federal financial assistance, or to supplement the appropriations for such other assistance except to meet specific needs of the health security program under this title (such as the training of physicians or medical students for the general or family practice of medicine). In administering other programs of federal financial assistance the Secretary and other officers of the executive branch, on recommendation of the Board, shall to the extent possible utilize those programs to further the objectives of this part. To this end the Board, on such terms as it finds appropriate, may lend to an applicant or grantee not more than 90 per centum of the non-Federal funds required as a condition of assistance under any such program, and may pay all or part of the interest in excess of 3 per centum per annum on any loan made, guaranteed, or insured under any such program.

ORGANIZATION FOR THE CARE OF AMBULATORY PATIENTS

SEC. 104. (a) The Board is authorized to assist, in accordance with this section, the establishment, expansion, and operation of (1) group practice organizations which meet or will meet the requirements of section 47 (a), (2) public or other non-profit agencies, organizations, and centers described in section 49(a) (1) and (2), and (3) nonprofit organizations furnishing comprehensive dental services, which meet requirements set forth in regulations of the Board.

(b) The Board is authorized to make grants (1) to any public or non-profit agency or organization (whether or not it is a provider of health services), for not more than 90 per centum of the cost (excluding costs of construction) of planning, developing, and establishing an organization or agency described in subsection (a) of this section; or (2) to an existing organization or agency described in subsection (a), for not more than 80 per centum of the cost (excluding costs of construction) of planning and developing an enlargement of the scope of its services or an expansion of its resources to enable it to serve more enrollees or a larger clientele. In addition to grants under this subsection, or in lieu of such grants, the Board is authorized to provide technical assistance for the foregoing purposes.

(c) The Board is authorized to make loans to organizations and agencies described in subsection (a) of this section to assist in meeting the cost of constructing (or otherwise acquiring, or improving or equipping) facilities which the Board finds will be essential to the effective and economical delivery, or to the ready accessibility, of covered services to eligible persons. No loan to a newly established agency or organization shall exceed 90 per centum and no loan to any other agency or organization shall exceed 80 per centum of such cost, or of the non-Federal share if other federal financial assistance in meeting such cost is available.

(d) The Board is authorized to contract with an organization or agency which is described in subsection (a) of this section and which has been either newly established or substantially enlarged, to pay all or a part of any operating deficits, for not more than five years in the case of an organization described in subsection (a)(1), and until not later than the effective date of health security benefits in the case of an agency or organization described in subsection (a)(2) or (a)(3). Any such contract shall condition payments upon the contractor's making all reasonable effort to avoid or minimize operating deficits and (if such deficits exist) making reasonable progress toward becoming self-supporting.

RECRUITMENT, EDUCATION, AND TRAINING OF PERSONNEL

SEC. 105. The Board shall promptly establish (and from time to time review) schedules of priority for the recruitment, education and training of personnel to meet the most urgent needs of the health security program. The schedules may differ for different parts of the United States.

(b) The Board is authorized to provide, to physicians and medical students, training for general or family practice of medicine and training in any medical specialty in which the Board finds that there is, for the purpose of this title, a critical shortage of qualified practitioners.

(c) The Board shall provide education or training for those classes of health personnel (professional, subprofessional, or nonprofessional) for whom it finds the greatest need, if other Federal financial assistance is not available for such education or training; and if other assistance is available but the Board deems it inadequate to meet the increased need attributable to the health security program, it may, with the approval of the Secretary, provide such education or training pending action by the Congress on a recommendation promptly made by the Secretary to increase the authorization of appropriations (or, if the authorization is deemed adequate, to increase the appropriations for such other assistance).

(d) The training of personnel authorized by this section includes the development of new kinds of health personnel to assist in the furnishing of comprehensive health services, and also includes the training of persons to provide education for personal health maintenance, to provide liaison between the residents of an area and health organizations and personnel serving them, and to act as consumer representatives and as members of advisory bodies in relation to the operation of this title in the areas in which they reside. The Board may make grants to public or other non-profit health agencies, institutions, or organizations (1) to pay a part or all of the cost of testing the utility of new kinds of health personnel, and (2) until the effective date of health security benefits, to pay a part of the cost of employing persons trained under this subsection who cannot otherwise readily find employment utilizing the skills imparted by such training.

(e) Education and training under this section shall be provided by the Board through contracts with appropriate educational institutions or such other institutions, agencies, or organizations as it finds qualified for this purpose. The Board may provide directly, or through the contractor, for the payment of stipends to students or trainees in amounts not exceeding the stipends payable under comparable Federal education or training programs.

(f) The Board shall undertake to recruit and train professional practitioners who will agree to practice, in urban or rural areas of acute shortage, in group practice organizations or in agencies, organizations, or centers referred to in section 49(a) (1) or (2). A practitioner who agrees to engage in such practice for at least five years and who enters upon practice in the area before the effective date of health benefits may until that date be paid a stipend to supplement his professional earnings, and in an appropriate case the Board may make a commitment to compensate the practitioner after that date in accordance with section 82(c).

(g) The Board shall undertake to recruit physicians to serve hospitals as their medical directors and to train such physicians (among other matters) in advising on and managing the development and implementation of medical policies and procedures and their coordination with planning and operational functions of the hospital, with its financing, and with its program of utilization review.

(h) In administering this section the Board shall seek to encourage the education and training, for the health professionals and other health occupations, of persons disadvantaged by poverty, inadequate education, or membership in ethnic minorities. To this end the Board may, through contracts in accordance with subsection (e), provide to such persons remedial or supplementary education preparatory to or concurrent with education or training for the health professions or occupations, and may (directly or through such contracts) provide to such persons stipends adequate to enable them to avail themselves of such education or training.

(i) Training which the Board is authorized by this Section to provide shall include retraining, either to refresh and enhance skills of trainees for positions they already hold or to equip them for positions of greater responsibility.

SPECIAL IMPROVEMENT GRANTS

SEC. 106. (a) The Board is authorized to make grants to public or other non-profit health agencies, institutions, and organizations to pay part or all of the cost of establishing improved coordination and linkages among institutional services (including linkages with educational institutions), among non-institutional services, and between services of the two kinds.

(b) The Board is authorized to make grants to organizations, agencies, and centers described in section 104(a) to pay part or all of the cost of installation of improved utilization review, budget, statistical, or records and information retrieval systems, including the acquisition of equipment therefor, or to pay part or all of the cost of acquisition and installation of diagnostic or therapeutic equipment.

LOANS UNDER PART F

SEC. 107. (a) Loans authorized under this part shall be repayable in not more than twenty years, shall bear interest at the rate of 3 per centum per annum, and (subject to the provisions of subsection (b)) shall be made on such other terms and conditions as the Board deems appropriate. Amounts paid as interest on any such loan or as repayment of principal shall, if the loan was made from funds appropriated pursuant to section 120(a), be covered into the Treasury as miscellaneous receipts, and if the loan was made from funds in the health resources development account, be deposited in the Trust Fund to the credit of that account.

(b) No loan for the construction or improvement of a facility shall be made under this part unless the borrower undertakes that all laborers and mechanics employed by contractors or subcontractors in the performance of construction or improvement on the project will be paid wages not less than those prevailing on similar work in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. 276a–276a-5). The Secretary of Labor shall have with respect to the labor standards specified in this subsection the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. Appendix 133z-15) and section 2 of the Act of June 13, 1934, (40 U.S.C. 276c).

RELATIONS OF PARTS E AND F

SEC. 108. Payments by the Board under this subpart pursuant to any grant or loan to, or any contract with, a participating provider of services shall be made in addition to, and not in substitution for, payments to which the provider is entitled under Part E.

Subpart 2—Programs of personal care services

PURPOSE OF SUBPART 2

SEC. 111 (a). The purpose of this subpart is to encourage and assist in the development of community programs for maintaining

in their own homes, by means of comprehensive health and personal care services, persons who, by reason of disability or other health-related causes, would in the absence of such assistance require in-patient institutional services or might be expected to require such institutional services in the near future.

(b) It is the intent of the Congress that a grant under section 112 be made in any community to an eligible applicant which satisfies the Board that the applicant will be able (1) to develop, reasonably promptly, comprehensive services in accordance with this subpart, and (2) to develop non-Federal sources for the financing thereof to such extent as the Board finds appropriate in light of the economic resources of the community and resources otherwise available to it for this purpose.

GRANTS

SEC. 112. (a) The Board is authorized to make grants, for the development and conduct of programs in accordance with this subpart, to participating public or other non-profit hospitals or group practice organizations, or to other public or non-profit agencies or organizations which the Board finds qualified to conduct such programs. Each program shall be designed to serve a substantial population, defined in the grant, in either an urban or a rural community.

(b) A grant under this section may be made to pay a part or all of the estimated cost of a program (including start-up cost) for a period of not more than four years, payable in such installments as the Board may determine, and may provide for meeting a decreasing share of the cost over the period of the grant. A grant shall be irrevocable except for nonperformance by the grantee or violation of the terms of this subpart or of the grant, or for other cause which would justify the termination or rescission of a contract. If it appears during the period of the grant that the cost of the program will exceed the estimate, the Board may increase prospectively the amount of the grant.

SCOPE OF SERVICES AND ELIGIBILITY THEREFOR

SEC. 113. (a) The services to be provided shall include, in addition to all covered health services (other than inpatient institutional services) described in part B (which may be provided by arrangement with participating providers), such groups or combinations of services as the Board deems necessary or appropriate to enable persons, eligible for the services in accordance with subsection (b), to continue to live in their own homes or other noninstitutional places of residence. The personal care services may include homemaker and home help services, home maintenance, laundry services, meals-on-wheels and other nutrition services, assistance with transportation and shopping, and such other services as may be appropriate in particular cases. The Board may prescribe different ranges of services in different programs.

(b) For each program the Board shall prescribe criteria (consistent with section 111(a)) for the approval of the application for assistance, and such criteria may be different in different programs, but all programs shall be required to assure adequate coordination with all agencies in the community furnishing health or personal care services to beneficiaries of the program. Each grant shall require the grantee to establish, or arrange for the services of, a committee to screen applications for assistance under the program, in accordance with the applicable criteria, and no assistance shall be given until an application has been approved by the committee. The committee shall also maintain a constant review of utilization of the services provided by the program, and assistance to any person shall be terminated whenever the committee finds that he no longer meets the applicable criteria. The composition of the committee shall be subject to approval by the Board, and it shall include at least one physician, one professional nurse, one professional social worker, three representatives of the users of the services, and such other qualified persons as the Board may prescribe.

EVALUATION

SEC. 114. Each grant shall require the grantee to establish procedures for the evaluation of the program, with respect both to the benefits accruing to persons receiving assistance and to the fiscal impact of the program on the health security system. The Board shall also make its own evaluation of each program, and shall include a summary thereof in its annual report to the Congress.

RECOMMENDATIONS TO THE CONGRESS

SEC. 115. Before the end of the third calendar year after the enactment of this Act, the Board shall transmit to the Congress a comprehensive report on the operation of this subpart and the Board's evaluation of such operation, and shall submit its recommendation of (a) methods for the development, as widely and rapidly as practicable, of personal care services in communities lacking programs therefor or lacking adequate programs, to the end that such services in leu of institutional care be made generally available throughout the United States, and (b) methods for the continuing financial support of such services; together with the Board's recommendations with respect to the proper role of the health security system in providing long-term institutional care and in providing personal care services in lieu thereof.

Subpart 3—Availability of funds

AUTHORIZATIONS OF APPROPRIATIONS; EXPENDITURES FROM TRUST FUND

SEC. 120. (a) For the purposes of this part there are hereby authorized to be appropriated $200,000,000 for the fiscal year beginning on July 1 of the year in which this title is enacted, and $400,000,000 for the succeeding fiscal year. Funds appropriated under this subsection shall remain available until expended.

(b) For the purposes of this part, the Board is authorized after the effective date of health benefits, to make expenditures from the health resources development account in the Trust Fund, established pursuant to section 63.

PART G—ADMINISTRATION

ESTABLISHMENT OF THE HEALTH SECURITY BOARD

SEC. 121. (a) There is hereby established in the Department of Health, Education, and Welfare a Health Security Board to be composed of five members to be appointed by the President, by and with the advice and consent of the Senate. During his term of membership on the Board, no member shall engage in any other business, vocation, or employment. Not more than three members of the Board shall be members of the same political party.

(b) Each member of the Board shall hold office for a term of five years except that (1) a member appointed to fill a vacancy occurring during the term for which his predecessor was appointed shall be appointed for the remainder of that term, and (2) the terms of office of the members first appointed shall expire, as designated by the President at the time of their appointment, at the end of one, two, three, four, and five years, respectively, after the date of enactment of this Act. A member who has served for two consecutive five-year terms shall not be eligible for reappointment until two years after he has ceased to serve.

(c) The President shall designate one of the members of the Board to serve, at the will of the President, as Chairman of the Board.

DUTIES OF THE SECRETARY AND THE BOARD

SEC. 122. (a) The Secretary of Health, Education, and Welfare, and the Board under the supervision and direction of the Secretary, shall perform the duties imposed upon them, respectively, by this title. Regulations authorized by this title shall be issued by the Board with the approval of the Secretary, in accordance with the provisions of section 553 of title 5, United States Code (relating to the publication of, and opportunity to comment on, proposed regulations).

(b) The Board shall have the duty of continuous study of the operation of this Act and of the most effective methods of providing comprehensive personal health services to all persons within the United States and to United States citizens elsewhere, and of making, with the approval of the Secretary, recommendations on legislation and matters of administrative policy with respect thereto. The Board shall make, through the Secretary, an annual report to the Congress on the administration of the functions with which it is charged. The report shall include, for periods prior to the effective date of health benefits, an evaluation by the Board of progress in preparing for the initiation of benefits under this title, and for periods thereafter, an evaluation of the operation of the title, of the adequacy and quality of services furnished under it, of the adequacy of compensation to providers of services, and of the costs of the services and the effectiveness of measures to restrain the costs.

(c) The Board shall from time to time conduct studies of the adequacy and equity of the financing of the national system of health security established by this Act and shall, with the approval of the Secretary, report its findings to the Congress, together with any recommendations for amendment of this Act or of the provisions of the Internal Revenue Code of 1954 pertaining to such financing. The first report under this subsection shall be submitted not later than two years after the effective date of health benefits, and thereafter reports shall be submitted at intervals not greater than four years.

(d) In performing his functions with respect to the Commission on the Quality of Health Care, and his functions with respect to health manpower education and training, health research, environmental health, disability insurance, vocational rehabilitation, the regulation of food and drugs, and all other matters pertaining to health, as well as in supervising and directing the administration of this title by the Board, the Secretary shall direct all activities of the Department toward mutually complementary contributions to the health of the people. He shall include in his annual report to the Congress a report on his discharge of this responsibility.

(e) The Secretary shall make available to the Board all information available to him, from sources within the Department or from other sources, pertaining to the functions of the Board.

(f) The Civil Service Commission, in consultation with the Board, shall to the greatest extent practicable facilitate recruitment, for employment by the Board in the competitive service, of qualified persons experienced in the administration or operation of private health insurance and health prepayment plans, or experienced in other fields pertinent to the administration of this title.

(g) The Secretary is authorized to establish on the staff of the Board, and to fix the compensation for, not more than fifty positions in the professional, scientific, and executive service, each such position being established to effectuate those research and development activities of the Board which require the services of specially qualified scientific professional, and administrative per-

sonnel. The rates of compensation for positions of this subsection shall not be less than the minimum rate of grade 16 of the General Schedule of the Classification Act of 1949, as amended, nor more than the highest rate of grade 18 of the General Schedule of such Act, and the rates of compensation for all such positions shall be subject to the approval of the Civil Service Commission. Positions created pursuant to this subsection shall be included in the classified civil service of the United States, but appointments to such positions shall be made without competitive examination upon approval of the proposed appointee's qualifications by the Civil Service Commission or such officers as it may designate for this purpose.

EXECUTIVE DIRECTOR; DELEGATION OF AUTHORITY

SEC. 123. (a) There is hereby established the position of Executive Director of the Health Security Board. The Executive Director shall be appointed by the Board with the approval of the Secretary, and shall serve as secretary to the Board and perform such duties in the administration of this title as the Board may assign to him.

(b) The Board is authorized to delegate to the Executive Director or to any other officer or employee of the Board or, with the approval of the Secretary (and subject to reimbursement of identifiable costs), to any other officer or employee of the Department, any of its functions or duties under this title other than (1) the issuance of regulations, or (2) the determination of the availability of funds and their allocation, under sections 62, 63, and 64.

REGIONS AND HEALTH SERVICE AREAS

SEC. 124. (a) This title shall be administered by the Board through the regions of the Department (as they may be established from time to time) and, within each region, through health service areas. The areas shall be the same as the health service areas established by the Secretary under section 1511 of the Public Health Service Act, except that with the approval of the Secretary the Board may divide an area established under section 1511 into two or more areas for purposes of this title.

(b) The Board shall establish in each local health service area a local health security office and such branch offices as the Board may find necessary. The local offices and branch office, in addition to such informational and other administrative duties as the Board may assign them, shall have the function of receiving and investigating complaints by eligible persons and by providers of services concerning the administration of this title and of taking or recommending appropriate corrective action.

NATIONAL HEALTH SECURITY ADVISORY COUNCIL

SEC. 125. (a) There is hereby established a National Health Security Advisory Council, which shall consist of the Chairman of the Board, who shall serve as Chairman of the Council, and twenty members, not otherwise in the employ of the United States, appointed by the Secretary on recommendation of the Board, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service. The appointed members shall include persons who are representative of providers of health services, and of persons (who shall constitute a majority of the Council) who are representatives of consumers of such services. Each appointed member shall hold office for a term of four years, except that (1) any member appointed to fill a vacancy occurring during the term for which his predecessor was appointed shall be appointed for the remainder of that term, and (2) the terms of members first taking office shall expire, as designated by the Secretary at the time of appointment, five at the end of the first year, five at the end of the second year, five at the end of the third year, and five at the end of the fourth year after the date of enactment of this Act. Members of the Council who are representative of providers of health care shall be persons who are outstanding in fields related to medical, hospital, or other health activities, or who are representative of organizations or associations of professional health personnel; members who are representative of consumers of such care shall be persons, not engaged in and having no financial interest in the furnishing of health services, who are familiar with the needs of various segments of the population for personal health services and are experienced in dealing with problems associated with the furnishing of such services.

(b) The Advisory Council is authorized to appoint such professional or technical committees, from its own members or from other persons or both, as may be useful in carrying out its functions. The Council, its members, and its committees shall be provided with such secretarial, clerical, or other assistance as may be authorized by the Board for carrying out their respective functions. The Council shall meet as frequently as the Board deems necessary, but not less than four times each year. Upon request by seven or more members it shall be the duty of the Chairman to call a meeting of the Council.

(c) It shall be the function of the Advisory Council (1) to advise the Board on matters of general policy in the administration of this title, in the formulation of regulations, and in the performance of the Board's functions under part D, and (2) to study the operation of this title and the utilization of health services under it, with a view to recommending any changes in the administration of the title or in its provisions which may appear desirable. The Council shall make an annual report to the Board on the performance of its functions, including any recommendations it may have with respect thereto, and the Board through the Secretary, shall promptly transmit the report to the Congress, together with a report by the Board on any recommendations of the Council for administrative action which have not been followed, and a report by the Secretary of his views with respect to any legislative recommendations of the Council.

(d) Appointed members of the Advisory Council and members of technical or professional committees, while serving on business of the Council (inclusive of traveltime), shall receive compensation at rates fixed by the Board, but not in excess of the daily rate paid under GS-18 of the general schedule under section 5332 of title 5, United States Code; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

REGIONAL AND LOCAL ADVISORY COUNCILS

SEC. 126. (a) The Board shall appoint for each of the regions of the Administration and for each health service area a regional or local advisory council, consisting of the regional or local representative of the Board as chairman and (in such numbers as the Board may determine) representatives of providers of health services and representatives (who shall constitute a majority of the members of each council) of consumers of such services. So far as possible, representatives of providers shall be so selected as to represent professional, subprofessional, and nonprofessional personnel, and representatives of consumers shall be so selected as to represent the major segments of the population to be served. Each council shall meet as often as its members may decide, but in no event less than four times each year. It shall be the function of each such council to advise the regional or local representative of the Board, as the case may be, on all matters directly relating to the administration of this title in the region or area, including methods and procedures followed in the handling of complaints.

(b) The provisions of section 125(d) shall be applicable to the members of councils appointed under this section.

PROFESSIONAL AND TECHNICAL ADVISORY COMMITTEES

SEC. 127. (a) The Board shall appoint such standing professional and technical committees as it deems necessary to advise it on the administration of this title with respect to the several classes of covered services described in part B. Each such committee shall consist of experts (in such numbers as the Board may determine) drawn from the health professions, from medical schools or other health educational institutions, from providers of services, or from other sources, whom the Board deems best qualified to advise it with respect to the professional and technical aspects of the furnishing and utilization of, the payment for, and the evaluation of, a class of covered services designated by the Board, and with respect to the relationship of that class of services to other covered services.

(b) The Board is authorized to appoint such experts and consultants (employed in accordance with section 3109 of title 5, United States Code), and to appoint such temporary professional and technical committees, as it deems necessary to advise it on special problems not encompassed in the assignments of standing committees appointed under subsection (a), or to supplement the advice of standing committees.

(c) In connection with its duties under section 122(c), the Board is authorized to appoint such standing or temporary committees of fiscal, actuarial, and other experts as it deems necessary.

(d) Committees appointed under this section shall report from time to time to the Board, and copies of their reports shall be transmitted by the Board to the National Advisory Council.

(e) The provisions of section 125(d) shall be applicable to experts and consultants and to the members of committees appointed under this section.

PARTICIPATION BY STATE AGENCIES

SEC. 128. (a) The Board shall consult from time to time with State health agencies (including agencies established pursuant to title XV of the Public Health Service Act) or other appropriate State agencies in preparing for and in administering health security benefits, with a view to coordinating the administration of this title with State and local activities in the fields of health planning, environmental health, licensure and inspection, education for the health professions and other health careers, and other fields relating to health. Insofar as practicable, the Board shall conduct such consultation through the regional offices of the Administration.

(b) The Board shall make an agreement with any State which is able and willing to do so under which the State health agency or other appropriate State agency will be utilized by the Board in determining whether providers of services meet or continue to meet the qualifications and requirements established by or pursuant to part C or part H. Such an agreement shall fix the frequency of inspection of the several classes of providers, other than professional practitioners, and shall establish the qualifications required of persons making the inspections. Determinations by State agencies based upon inspections made in accordance with such agreements, and determinations with respect to professional practitioners, may be given by the Board the same effect as determination by the Board.

(c) An agreement under subsection (b) may provide that a State agency, either directly or through local public agencies, will

undertake activities, specified in the agreement, directed to the health education of the residents of the State, the maintenance and improvement of the quality of covered services furnished in the State, the maintenance of effective utilization review, or the better coordination of services of different kinds.

(d) The Board shall pay to a State, in advance or otherwise as specified in the agreement, the reasonable cost of services and activities pursuant to an agreement under this section; and may pay a part or all of the cost of training (or may train) State personnel to enable them to meet the qualifications established by the Board for inspectors.

(e) In any State which is unable or unwilling to make inspections in accordance with subsection (b), the Board shall make such inspections either through its own personnel or through contract with an organization or organizations which it finds qualified to perform this function.

(f) Within ninety days after the completion of an inspection of any provider under subsection (b) or subsection (e), the Board shall make public in readily available place and form the findings of such inspection which pertain significantly to compliance with the qualifications and requirements established by or pursuant to part C or part H; except that if the State agency or the Board, on the basis of such inspection, has made a determination respecting compliance by the provider, the publication shall be based on such determination.

TECHNICAL ASSISTANCE TO SKILLED NURSING HOMES AND HOME HEALTH SERVICE AGENCIES

SEC. 129. The Board is authorized, either directly or through agreements with State agencies under section 128, to provide technical assistance to skilled nursing homes and home health service agencies to supplement, in regard to social services, dietetics, and other matters, the skills of the groups referred to in sections 45(b) and 46(b).

DISSEMINATION OF INFORMATION; STUDIES AND EVALUATIONS: SYSTEMS DEVELOPMENT; TESTS AND DEMONSTRATIONS

SEC. 130. (a) The Board shall disseminate, to providers of services and to the public, information concerning the provisions of this title, the persons eligible to receive the benefits of the title, and the nature, scope, and availability of covered services; and to providers of services, information concerning the conditions of participation, methods and amounts of compensation to providers, and other matters relating to their participation. With the approval of the Secretary, the Board may furnish to all professional practitioners information concerning the safety and efficacy of drugs appearing on either of the lists established under section 25, the indications for their use, and contraindications.

(b) The Board shall make, on a continuing basis after the effective date of health security benefits, a study and evaluation of the operation of this title in all its aspects, including study and evaluation of the adequacy and quality of services furnished under the title, analysis of the cost of each kind of services, and evaluation of the effectiveness of measures to restrain the costs.

(c) The Board is authorized, either directly or by contract—

(1) to make statistical and other studies, on a nationwide, regional, State, or local basis, of any aspect of the operation of this title, including studies of the effect of the title upon the health of the people of the United States and the effect of comprehensive health services upon the health of persons receiving such services;

(2) to develop and test, for use by the Board, records and information retrieval systems and budget systems for health services administration, and develop and test model systems for use by providers of services;

(3) to develop and test, for use by providers of services, records and information retrieval systems useful in the furnishing of health services, and equipment (such as equipment for the monitoring of patients' functions, or for multiphasic screening) useful in the furnishing of preventive or diagnostic services;

(4) to develop, in collaboration with the pharmaceutical profession, and test, improved administrative practices or improved methods for the reimbursement of independent pharmacies for the cost of furnishing drugs as a covered service; and

(5) to make such other studies as it may consider necessary or promising for the evaluation, or for the improvement, of the operation of this title.

(d) The Board is authorized to develop, and to test and demonstrate through agreements with providers of services or otherwise, methods designed to achieve, through additional incentives or in any manner, improvement in the coordination of services furnished by providers, improvement in the adequacy, quality, or accessibility of services, or decrease in their cost; methods of peer review and peer control of the utilization of drugs, laboratory services, and other services not subject to utilization review under section 51; and methods of peer review of quality. Agreements with providers for tests or demonstrations may provide for alternative methods of reimbursement in lieu of methods prescribed by part E, but, in the case of independent professional practitioners, only in accordance with section 82(h).

GUIDELINES FOR HEALTH MANPOWER EDUCATION AND TRAINING

SEC. 131. The Board shall make a continuing evaluation of the adequacy of the various classes of professional and health personnel to furnish services under this title and, after consultation with national and other organizations concerned with education and training of such personnel, and with the approval of the Secretary, shall from time to time issue guidelines designed to relate the clinical education and training conducted by providers of services more closely to the relative need for the several classes of such personnel. The guidelines shall seek to further national health manpower objectives, but shall be adapted for each region or State to take account of the capacity of providers to conduct such clinical education or training, and (to the extent the Board deems appropriate) to take account of any special manpower needs within the region or State.

DETERMINATIONS; SUSPENSION OR TERMINATION OF PARTICIPATION

SEC. 132. (a) Determinations of entitlement to benefits under this title, determinations of who are participating providers of services, determinations whether services are covered services, and determinations of amounts to be paid by the Board to participating providers, shall be made by the Board in accordance with regulations. A provider or other person aggrieved by a determination under this subsection shall, in such cases and on such conditions as are specified in regulations, be entitled to an administrative appeal from it.

(b) If the Board finds that a participating provider of services no longer meets the qualifications and requirements established by or pursuant to part C and subpart 1 of part H for services of the kinds furnished by him, or for some classes of such services, or that he has intentionally violated the provisions of this title or of regulations, or that he has failed substantially to carry out the agreement filed by him pursuant to section 41(a)(3), the Board may issue an order suspending or terminating (absolutely or on such conditions as the Board finds appropriate) the participation of the provider, or suspending or terminating it with respect to particular classes of services.

(c) If the Board has reason to believe that a participating professional practitioner, or a professional practitioner furnishing covered services on behalf of an institutional or other participating provider, has in a substantial number of cases—

(1) furnished professional services, or caused the furnishing of institutional or other services, which were not medically necessary but for which payment was claimed under this title,

(2) furnished to eligible persons covered services which were not of a quality meeting professionally recognized standards of care, or

(3) neglected to furnish necessary services to eligible persons who were his patients, under circumstances such that the neglect constituted a breach of his professional obligation,

or has reason to believe that a participating provider other than a professional practitioner has in a substantial number of cases—

(4) furnished services, for which payment was claimed under this title, known to the provider not to be medically necessary, or

(5) furnished to eligible persons covered services which were not of a quality meeting professionally recognized standards of care, the Board shall submit the evidence in its possession either to an appropriate professional organization or to a committee constituted by the Board after consultation with such an organization (which committee may, when the Board deems it proper, include nonprofessional persons). The Board shall request the organization or committee, with or without further investigation, to recommend what action, if any, should be taken by the Board. Taking into consideration any recommendation so made to it, the Board may issue an order suspending or terminating (absolutely or on such conditions as the Board finds appropriate) the participation of the practitioner or other provider or, in the case of a practitioner furnishing services on behalf of another provider, requiring the other provider, as a condition of continued participation, to suspend or discontinue (absolutely or on conditions) the furnishing of covered services by the practitioner.

(d) The Board shall, either in advance or by way of reimbursement, pay to an organization or committee making a recommendation under subsection (c) its reasonable cost incurred in so doing.

(e) No determination under subsection (a) that a person, previously determined to be eligible for benefits, is not eligible therefor, and (unless the Board finds that eligible persons are endangered) no order under subsection (b) or (c), shall be effective until after the person or provider has been afforded a hearing under section 133 or an opportunity therefor.

HEARINGS: JUDICIAL REVIEW

SEC. 133. (a) A provider of services or other person who is dissatisfied with a determination made or an order issued under section 132 shall, upon request therefor filed in accordance with regulations, be entitled to a hearing before a hearing officer or a hearing panel of the Board. The hearing shall be held as promptly as possible and at a place convenient to the provider or other person requesting the hearing. For the purpose of reviewing the determinations of hearing officers or panels, the Board shall establish appeals tribunals (which may include regional or other intermediate appeals tribunals), and shall by regulation prescribe the jurisdiction of such and procedures for appeal to them. Decision of hearing officers or hearing panels shall, subject to appeals under this subsection, constitute final decisions to the Board.

(b) In any case in which the Board finds (on the basis of the request for hearing and the records of the Board) that a substantial issue of professional practice or conduct, in a health profession specified for this purpose in regulations, will be involved in the hearing, the hearing shall be held either before a person who is qualified in an appropriate health profession or before a panel which includes a person or persons so qualified, and an appeal in such a case shall be heard before an appellate tribunal (or a panel thereof) which includes a person or persons so qualified. In any case in which a single person qualified as a health professional, or a panel composed entirely of persons so qualified, conducts a hearing or hears an appeal, the Board shall assign an attorney to assist in the conduct of the hearing or the appeal and to advise upon the decision of issues of law.

(c)(1) Any provider of services or other person, after any final decision of the Board made after a hearing to which he was a party, irrespective of the amount in controversy, may obtain a review of such decision by a civil action commenced within sixty days after the mailing to him of notice of such decision or within such further time as the Board may allow. Such action shall be brought in the district court of the United States, for the judicial district in which the plaintiff resides or has his principal place of business, or, if he does not reside or have his principal place of business within any such judicial district, in the District Court of the United States for the District of Columbia. As part of its answer the Board shall file a certified copy of the transcript of the record, including the evidence upon which the findings and decision complained of are based.

(2) The Court shall have power to enter, upon the pleadings and transcript of the record, a judgment affirming, modifying or reversing the decision of the Board, with or without remanding the cause for a rehearing. The findings of the Board as to any fact, if supported by substantial evidence, shall be conclusive.

(3) Where a claim has been denied by the Board, or a decision is rendered which is adverse to a provider or other person who was a party to the hearing before the Board, because of failure of the claimant or such provider or other person to submit proof in conformity with any regulation prescribed by the Board, the court shall review only the question of conformity with the regulation and the validity of the regulation. The court shall not review a finding by the Board under subsection (b), or a refusal to find, that a substantial issue of professional practice or conduct will be involved in a hearing.

(4) The court shall, on motion of the Board made before it files its answer, remand the case to the Board for further action by the Board, and may, at any time on good cause shown, order additional evidence to be taken before the Board. The Board shall, after the case is remanded, and after hearing such additional evidence if so ordered, modify or affirm its findings of fact or its decision, or both, and shall file with the court any such additional and modified findings of fact and decision and a transcript of the additional record and testimony. Such additional or modified findings of fact and decision shall be reviewable only to the same extent as the original findings of fact and decision.

(5) The judgment of the court shall be final except that it shall be subject to review in the same manner as judgments in other civil actions.

DIRECTIONS BY THE BOARD FOR THE BETTER ORGANIZATION AND COORDINATION OF SERVICES

SEC. 134. (a) The Board is authorized, in accordance with this section, to issue to any participating provider of services (other than an individual professional provider) a direction that the provider shall—

(1) discontinue (for the purposes of payment under part E) one or more services which the provider is currently furnishing;

(2) initiate one or more covered services which the provider is not currently furnishing;

(3) initiate the furnishing of one or more covered services at a place where the provider is not currently furnishing the services; or

(4) enter into arrangements with one or more other providers of services (A) for the transfer of patients and medical records as may be medically appropriate, (B) for making available to one provider the professional and technical skills of another, or (C) for such other coordination or linkage of covered services as the Board finds will best serve the purposes of this title.

A direction under this subsection shall specify a future date on which, if the direction has not been complied with, the provider to whom it is addressed shall cease to be a participating provider.

(b) If the Board finds (1) that the services furnished by a provider of services (other than an individual professional provider) are not necessary to the availability of adequate services under this title and that their continuance as covered services is unreasonably costly, or (2) that the services are furnished inefficiently and at unreasonable cost, that effort at correction has proved unavailing, and that necessary services can be more efficiently furnished by other providers, the Board may issue a direction that on a specified date the provider shall cease to be a participating provider.

(c) No direction shall be issued under this section except on the recommendation of, or after consultation with, the State health planning and development agency (if such an agency has been established pursuant to title XV of the Public Health Security Act) of the State in which the direction will be operative. No direction shall be issued under subsection (a) unless the Board finds that it can practicably be carried out by the provider to whom it is addressed.

(d)(1) No direction shall be issued under this section until the Board has published notice, in the service area of the provider or providers affected, describing in general terms the proposed action, giving a brief statement of the reasons therefor, and inviting written comment thereon. The notice shall be published in at least one newspaper circulating in the area, and the Board shall use such other means as it finds calculated to inform residents of the area of the proposed action.

(2) If objection to the proposal is made by any interested provider of services (other than an individual professional practitioner) or by an interested health planning agency or by a substantial number of interested professional practitioners or of residents of the area, the Board shall call a public hearing before a hearing officer or hearing panel meeting the requirements of section 133(b). At the hearing the Board shall present evidence in support of the proposal, and any interested provider of services or health planning agency or any other interested person shall be entitled to participate in the hearing and to present evidence or argument or both. On the basis of evidence presented at the hearing, the hearing officer or hearing panel shall make recommended findings of fact and a recommended determination either to issue the proposed direction, to modify and issue it, or to withdraw the proposal. The final determination shall be made by the Board or by a special panel designated by it for the purpose, and shall be subject to judicial review in accordance with section 133(c).

PART H—QUALITY OF CARE

PURPOSE AND GENERAL POLICIES

SEC. 141. (a) The Board, with the advice and assistance of the Commission on the Quality of Health Care (established by section 1701 of the Public Health Service Act), shall have the continuing responsibility to maintain and enhance the quality of health care furnished under this Act, and to that end shall:

(1) prior to the effective date of health benefits, issue regulations authorized by this part, (A) to supplement the qualifications required by part C of providers of services as a condition of participation, and (B) to strengthen existing mechanisms for the control and enhancement of quality; and

(2) thereafter continuously review such regulations with a view to (A) upgrading such requirements as rapidly as the Board finds practicable, and (B) developing recommendations to the Congress for amendments of this Act designed further to assure and enhance the quality of care.

(b) In discharging its responsibility under this part, it shall be the objective of the Board to require the highest practicable quality of care that is attainable in substantially all parts of the United States. Exceptions to requirements under this part shall be permitted only when necessary to avoid critical shortages of services, and shall be reviewed from time to time and shall be eliminated whenever, and as soon as, the Board finds it practicable to do so.

(c) The Board shall assist the Commission on the Quality of Health Care in obtaining reports and information required for the purposes of the Commission, and the Commission shall advise the Board in the development and issuance of regulations under this part and in the development of recommendations to the Congress. If the Board fails to adopt, by regulation issue under this part, a standard which the Commission has recommended be so adopted, the matter shall be reported to the Secretary and, unless he directs the Board to follow the recommendations of the Commission, the Board shall publish a statement of the recommendation and of its reasons for failing to adopt the standard.

CONTINUING PROFESSIONAL EDUCATION

SEC. 142.(a) Not later than two years after the effective date of health benefits, the Board shall by regulation establish for physicians, dentists, optometrists, and podiatrists such requirements of continuing education (taking into consideration standards approved by appropriate professional organizations) as it finds reasonable to maintain and enhance the quality of professional services furnished under this Act.

(b) Regulations under this section shall require the filing of such periodic reports as the Board finds necessary to assure that participating practitioners, and practitioners furnishing services on behalf of participating institutional and other providers, are in compliance with requirements established under subsection (a). The Board shall give warning to any practitioner whom such reports show to have failed to comply substantially with the requirements, and, before taking action under section 132(b), shall afford him an opportunity to explain or correct the deficiency.

MAJOR SURGERY AND OTHER SPECIALIZED SERVICES

SEC. 143. (a) Major surgery and other specialized services designated in regulations are not covered services unless they are furnished by specialists and, to the extent specified in regulations, are either emergency services or services furnished on referral by a physician engaged in general or family practice (as determined in accordance with regulations under section 22(b)).

(b) A physician is a specialist, for the purposes of subsection (a), only if he holds a certificate from the appropriate national specialty board; except that (1) a physician who possesses the qualifications requisite to such certification may furnish services as a spe-

cialist during a period of five years after attaining such qualifications (or, if later, after the effective date of health benefits), and (2) a physician may be authorized by the Board to furnish services as a specialist if (A) prior to the effective date he has engaged in furnishing such services as a specialist or as a substantial part of his medical practice, (B) he meets standards established by the Board, and (C) where appropriate, authorization to him to furnish services as a specialist is recommended by a participating hospital in which he has engaged substantially in furnishing such services.

(c) The Board may by regulation exclude from covered services specified surgical procedures, when not required by life threatening or other acute emergencies, which have not been preceded by consultation with, and recommendation of surgery by, such appropriately qualified specialists as may be required by the regulations. Hospital and other services incident to surgery excluded by regulations under this subsection are not covered services.

(d) With respect to the performance of surgical procedures specified in regulations under subsection (c), including emergency procedures, the Board may require as a condition of payment to the provider that there be submitted to the Board a pathology report on tissue removed and a clinical abstract or discharge report of the case.

ADDITIONAL REQUIREMENTS FOR PARTICIPATION

SEC. 144. (a) No provider on whose behalf one or more physicians, dentists, optometrists, or podiatrists furnish professional services described in section 22 or section 23 or in regulations issued under section 27(a)(1) or (2) shall be a participating provider unless every practitioner furnishing such services is a qualified provider in accordance with section 42 and meets such requirements, applicable to practitioners of his profession, as are prescribed by or pursuant to this part.

(b) The Board may by regulation establish, as conditions, of participation by providers other than independent professional practitioners, requirements (additional to those specified in part C and those otherwise prescribed by or pursuant to this part) which the Board finds necessary in the interest of the quality of care and the safety of eligible persons. In establishing requirements under this subsection, the Board shall take into consideration standards or criteria established or recommended by appropriate professional or other associations or organizations. The Board shall establish such requirements as it finds necessary to assure that participating hospitals and skilled nursing homes meet the requirements prescribed from time to time for accreditation by the Joint Commission on the Accreditation of Hospitals, but the authority of the Board is not limited to the requirements of the Joint Commission. Exceptions to requirements established under this subsection shall be permitted only in accordance with section 141(b).

PROFESSIONAL STANDARDS REVIEW AND SIMILAR ORGANIZATIONS

SEC. 145. On recommendation of the Commission on the Quality Health Care, the Board may contract with a Professional Standards Review Organization heretofore designated or conditionally designated as such by the Secretary, or with an organization performing similar functions hereafter approved for the purpose by the Board, to monitor the quality of some or all institutional and other services furnished under this Act within the area of operation of such organization, and to report to the Board its findings with respect to conformity to the requirements relating to quality prescribed by or pursuant to this Act. Any such contract shall be so designed as to supplement, and not duplicate, inspections by State agencies under section 128(b) or by the Board under section 128(e). The Board shall pay to the organization, in advance or otherwise as specified in the contract, the reasonable cost of services and activities of the organization under the contract.

FINDINGS OF COMMISSION ON MEDICAL MALPRACTICE

SEC. 146. In exercising its authority under this part the Board shall give consideration to the findings, report, and recommendations of the Commission on Medical Malpractice established by the Secretary, and within the authority conferred by this or any other Act shall put into effect such of the recommendations of that Commission and such other measures as in the judgment of the Board will tend to reduce the incidence of malpractice, to lessen the cost or increase the availability of malpractice insurance, or to facilitate the speedy, equitable, and economical adjudication of malpractice claims.

PART I—MISCELLANEOUS PROVISIONS

DEFINITIONS

SEC. 161. When used in this title—

(a) The term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

(b) The term "United States" when used in a geographical sense means the States, as defined in subsection (a).

(c) The term "Secretary", except when the context otherwise requires, means the Secretary of Health, Education, and Welfare.

(d) The term "Department", except when the context otherwise requires, means the Department of Health, Education and Welfare.

(e) The term "Board" means the Health Security Board established by section 121.

DEPUTY SECRETARY OF HEALTH, EDUCATION, AND WELFARE; UNDER SECRETARY FOR HEALTH AND SCIENCE

SEC. 162. (a) There shall be in the Department of Health, Education, and Welfare, in addition to the Assistant Secretaries now provided for by law, a Deputy Secretary of Health, Education and Welfare and an Under Secretary for Health and Science each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall perform such functions (related to health and science, in the case of such Under Secretary) as the Secretary may prescribe. The provisions of the second sentence of section 2 of Reorganization Plan Numbered 1 of 1953 shall be applicable to such Deputy Secretary to the same extent as they are applicable to the Under Secretary of Health, Education, and Welfare and shall be applicable to the Under Secretary for Health and Science to the same extent as they are applicable to the Assistant Secretaries authorized by that section.

(b)(1) The office of Under Secretary of Health, Education, and Welfare, created by section 2 of Reorganization Plan Numbered 1 of 1953 (67 Stat. 631), is hereby abolished.

(2) The President may authorize the person who immediately prior to the date of enactment of this Act occupies the office of Under Secretary of Health, Education, and Welfare to act as Deputy Secretary of Health, Education, and Welfare until that office is filled by appointment in the manner provided by subsection (a) of this section. While so acting, such person shall receive compensation at the rate now or hereafter provided by law for the Deputy Secretary of Health, Education, and Welfare.

SEC. 163. The effective date of health security benefits under this title shall be July 1 of the second calendar year after the year in which this title is enacted, and no service or item furnished prior to that date shall constitute a covered service. Section 406, transferring and amending section 1817 of the Social Security Act and redesignating it as section 61 of this Act, shall be effective on the effective date of health benefits, and part D (including section 61) shall be effective with respect to fiscal years beginning on or after that date. In all other respects this title shall be effective upon enactment, and appropriations for the purposes of this title (including action pursuant to section 201(g) of the Social Security Act, as amended by section 406 of this Act, to make funds available on and after the effective date of health benefits) are authorized to be made prior to the effective date of health benefits.

EXISTING EMPLOYER-EMPLOYEE HEALTH BENEFIT PLANS

SEC. 164. (a) No provision of this Act other than this section, and no amendment of the Internal Revenue Code of 1954 made by this Act, shall affect or alter any contractual or other non-statutory obligation of an employer to pay for or provide health services to his present and former employees and their dependents and survivors, or to any of such persons, or the amount of any obligation for payment (including any amount payable by an employer for insurance premiums or into a fund to provide for any such payment) toward all or any part of the costs of such services.

(b) Any contractual or other nonstatutory obligation of the employer to pay all or part of the cost of the health services referred to in subsection (a) shall continue, and shall apply as an obligation to pay the taxes imposed on his employees by section 3101(b) of the Internal Revenue Code of 1954 (as amended by section 201(a) of this Act), but the sum of the per capita monthly amount involved in the payment of such taxes by the employer on behalf of his employees, and the per capita amount of the liability for taxes imposed on an employer by section 3111(b) of such Code (as amended by section 201(b) of this Act) shall not exceed the per capita monthly amount of the cost to the employer of providing or paying for health services (either through insurance premiums or into a fund) on behalf of persons referred to in subsection (a), for the month prior to the effective date of health security taxes (as defined in section 3121(u) of such Code, added by section 201(c) of this Act.)

(c) At least for the duration of any contractual or other nonstatutory obligation of an employer referred to in subsection (a), an employer shall arrange to pay to eligible employees, former employees, and survivors referred to in subsection (a) such amounts of money by which the per capita monthly costs to the employer of providing or paying for health services refered to in subsection (a) in the month immediately preceding the effective date of health security taxes, exceed the sum of the per capita monthly costs to the employer of the taxes imposed by section 3111(b) of such Code (as amended by section 201(b) of this Act), the employer's liability referred to in subsection (b) of this section, and any other employer contributions for health insurance premiums or health benefits or services provided by the employer after the effective date of health security benefits. By agreement between the employer and his employees or their representatives, an employer may provide other benefits of an equivalent monetary value in lieu of such payments.

(d) For purposes of subsections (b) and (c), the per capita amounts and per capita costs for an employer shall be determined by dividing the aggregate amounts and the aggregate costs by the number of eligible employees, former employees, and survivors on the date as of which the determination is made.

TITLE II—HEALTH SECURITY TAXES

PART A—EMPLOYMENT TAXES

RATE AND COVERAGE

SEC. 201. (a) Section 3101(b) of the Internal Revenue Code of 1954 (imposing a hospital insurance tax on employees) is amended to read as follows:

"(b) Health security.—In addition to the tax imposed by the preceding subsection, there is hereby imposed on the income of every individual a tax equal to 1 percent of the wages (as defined in section 3121(r)) received by him on or after the effective date of health security taxes (as defined in section 3121(u)) with respect to employment (as defined in section 3121(s))."

(b) Section 3111(b) of such Code (imposing a hospital insurance tax on employers) is amended to read as follows:

"(b) Health security.—In addition to the tax imposed by the preceding subsection, there is hereby imposed on every employer an excise tax, with respect to having individuals in his employ, equal to 3.5 percent of the wages (as defined in section 3121(r)) paid by him on or after the effective date of health security taxes (as defined in section 3121(u)) with respect to employment (as defined in section 3121(s))."

(c) Section 3121 of such Code (containing definitions applicable to social security payroll taxes) is amended by adding at the end thereof the following subsections:

"(r) Wages for purposes of health security taxes—For the purpose of section 3101(b), and for the purpose of section 1402(b) as applied to section 1401(b), the term 'wages' shall have the meaning set forth in subsection (a) of this section (as that subsection would apply to employment as defined in subsection (s)), except that in applying paragraph (1) of subsection (a) the term 'the health security contribution base (as defined in subsection (t))' shall be substituted for the term 'the contribution and benefit base (as determined under section 230 of the Social Security Act)' each place it appears therein. For the purpose of section 3111(b), the term 'wages' shall have the same meaning, except that paragraph (1) of subsection (a) shall not be applied.

"(s) Employment for purposes of health security taxes.—For the purposes of sections 3101(b) and 3111(b), the term 'employment' shall have the meaning set forth in subsection (b) of this section except that—

"(1) clause (B) preceding paragraph (1) of subsection (b) shall not be applied to an employee whose principal post of duty is outside the United States;

"(2) the exclusions contained in the following paragraphs of subsection (b) shall not be applied: paragraph (1) (relating to foreign agricultural workers), paragraphs (5) and (6) (relating to employment by the United States or its instrumentalities) other than paragraph (6)(C)(i) (relating to the President, the Vice President, and Members of Congress) and paragraph (6)(C)(iii) through (v) (relating to certain minor employments), paragraph (8) (relating to employment by charitable and similar organizations), paragraph (9) (relating to employment covered by the railroad retirement system), and paragraph (17) (relating to employment by subversive organizations);

"(3) subsection (m) of this section (including services by members of the uniformed services in the term 'employment') shall not be applied; and

"(4) for the purposes of section 3101(b), the exclusion contained in paragraph (7) of subsection (b) of this section (relating to employment by States and their political subdivisions and instrumentalities) shall not be applied, other than paragraph (7)(C)(i) through (iv) (relating to certain minor employments by the District of Columbia).

"(t) Health security contribution base.—The term 'health security contribution base' means, for any calendar year, 150 percent of the contribution and benefit base (as determined under section 230 of the Social Security Act) which is effective for such calendar year.

"(u) Effective date of health security taxes.—The term 'effective date of health security taxes' means January 1 of the second calendar year after the year in which the Health Security Act is enacted."

CONFORMING AND TECHNICAL AMENDMENTS

SEC. 202. (a) Section 3121(1) of the Internal Revenue Code of 1954 (relating to coverage of services performed in the employ of foreign subsidiaries of domestic corporations) is amended by striking out "sections 3101 and 3111" in paragraph (1)(A) and inserting in lieu thereof "sections 3101(a) and 3111(a)", and by inserting at the end of the subsection the following paragraph:

"(11) Notwithstanding the provision of any agreement entered into under this subsection, no domestic corporation shall be under any obligation to pay the Secretary, with respect to services covered under the agreement and performed on or after the effective date of health security taxes (as defined in subsection (u) of this section) amounts equivalent to the taxes which would be imposed by sections 3101(b) and 3111(b) if such services constituted employment as defined in subsection (b) or subsection (s)."

(b) Sections 3122 and 3125 of such Code are amended by striking out "section 3111" wherever it appears and inserting in lieu thereof "section 3111(a)".

(c) (1) Section 3201 (relating to tax on railroad employees) and section 3211 (relating to tax employee representatives) of such Code are each amended by striking out "plus the rate imposed by section 3101(b)."

(2) Section 3221(b) of such Code (relating to tax on railroad employers) is amended by striking out "plus the rate imposed by section 3111(b)."

(d) (1) Section 6413(c)(1)(D) of such Code is amended by inserting "(i)" immediately after "(H)", by striking out "section 3101" and inserting "section 3101(a)" in lieu thereof, and by inserting immediately before the period at the end thereof: "; and (ii) during any calendar year beginning on or after the effective date of health security taxes (as defined in section 3121(u) the wages received by him during such year exceed the health security contribution base (as defined in section 3121(t)) for that year, the employee shall be entitled (subject to the provision of section 31(b)) to a credit or refund of any amount of tax, with respect to such wages, imposed by section 3101(b) and deducted from the employee's wages (whether or not paid to the Secretary or his delegate), which exceeds the tax with respect to an amount of such wages received in such calendar year equal to the health security contribution base for such year."

(2) Section 6413(c)(2)(A) of such Code is amended by striking out "includes for the purposes of this subsection the amount" and inserting in lieu thereof "includes for the purposes of this subsection (i) with respect to the taxes imposed by section 3101(a), the amount"; and by striking out "determined by each such head" and inserting in lieu thereof "and (ii) with respect to the taxes imposed by section 3101(b), the amount for any calendar year equal to the health security contribution base (as defined in section 3121(7)) for such calendar year; each such amount to be determined by each such head".

(e) Section 218 of the Social Security Act (relating to agreements for the coverage of services performed in the employ of States and their political subdivisions and instrumentalities) is amended—

(1) (A) by striking out, in subsection (e)(1)(A), "sections 3101 and 3111" and "section 3121" and inserting in lieu thereof, "sections 3101(a) and 3111(a)" and "section 3121(b)", respectively:

(B) by striking out, in subsection, (e)(2)(B), "section 3111" and inserting in lieu thereof, "section 3111(a)"; and

(C) by adding at the end of subsection (e) the following paragraph:

"(3) Notwithstanding the provisions of any agreement entered into under this section, no State shall be under any obligation to pay to the Secretary of the Treasury, with respect to service covered under the agreement and performed on or after the effective date of health security taxes (as defined in section 3121(u) of the Internal Revenue Code of 1954), amounts equivalent to the taxes which would be imposed by sections 3101(b) and 3111(b) of such Code if such service constituted employment as defined in section 3121(b) or section 3121(s) of such Code."; and

(2) by striking out in subsection (h)(1), "and the Federal Hospital Insurance Trust Fund", and striking out in such subsection "subsection (a)(3) of section 201, subsection (b)(1) of such section, and subsection (a)(1) of section 1817, respectively" and inserting in lieu thereof "subsections (a)(3) and (b)(1) of section 201."

EXCLUSION FROM GROSS INCOME

SEC. 203. (a) Section 106 of the Internal Revenue Code of 1954 (excluding from gross income employer contributions to accident and health plans for their employees) is amended by inserting immediately before the period at the end thereof: ", and payments by the employer (without deduction from the remuneration of the employees) of the tax imposed upon his employees by section 3101(b)".

(b) The heading of section 106, and the line referring to that section in the table of contents in subtitle A, chapter 1, subchapter B, part III of such Code, are each amended by adding at the end: "and employer payment of health security taxes".

EFFECTIVE DATES OF PART A

SEC. 204. The amendments made by section 201 of this Act, and the amendments made by subsections (b) and (d) of section 202, shall be effective only with respect to remuneration received, and remuneration paid, on or after the effective date of health security taxes (as defined by section 3121(u) of the Internal Revenue Code of 1954, added by section 201(c) of this Act), and section 3121(s) of such Code shall be applicable only with respect to remuneration for services performed on or after that date. The amendments made by subsections (a), (c), and (e) of section 202 shall be effective only with respect to remuneration for services performed on or after such effective date. The amendments made by section 203 shall apply to taxable years beginning on or after such effective date.

PART B—TAXES ON SELF-EMPLOYMENT INCOME AND UNEARNED INCOME

TAX ON SELF-EMPLOYMENT INCOME

SEC. 211. (a) Section 1401(b) of the Internal Revenue Code of 1954 (imposing a hospital insurance tax on self-employed individuals) is amended to read as follows:

"(b) Health security.—In addition to the tax imposed by the preceding subsection, there shall be imposed for each taxable year, on the self-employment income of every individual, a tax equal to 2.5 percent of the self-employment income for such taxable year."

(b) Section 1402(b) of such Code (defining self-employment income) is amended—

(1) by striking out "except that such term shall not include—" and inserting in lieu thereof "except that—," and by amending so much of clause (1) as precedes subclause (A) to read as follows:

"(1) for the purposes of section 1401(a), such term shall not include that part of the

net earnings from self-employment which is in excess of—";

(2) by inserting, immediately after the word "wages" in each of the subclauses of clause (1), "(as defined in section 3121(b))";

(3) by striking out "or" at the end of clause (1) and inserting "and" in lieu thereof, and by striking out clause (2) and inserting in lieu thereof the following:

"(2) for the purposes of section 1401(b), such term shall not include that part of the net earnings from self-employment which is in excess of (A) an amount equal to the health security contribution base (as defined in section 3121(t)) for the calendar year in which the taxable year begins, minus (B) the amount of wages (as defined by section 3121(r) for the purposes of section 3101(b)) paid to such individual during the taxable year; and

"(3) for the purposes of both section 1401(a) and section 1401(b), such term shall not include any net earnings from self-employment if such net earnings for the taxable year are less than $400."; and

(4) by striking out "(A)" in the sentence following clause (3), and by changing the comma following the term "section 3121(b)" in that sentence to a period and striking out the remainder of the sentence. (c) Section 1402(d) of the Code is amended by striking out "and the term 'wages'", and striking out "AND WAGES" in the subsection heading.

TAX ON HEALTH SECURITY UNEARNED INCOME

SEC. 212. Section 1403 of the Internal Revenue Code of 1954 is redesignated as section 1404, and the following new section is inserted immediately after section 1402:

"Sec. 1403. TAX ON HEALTH SECURITY UNEARNED INCOME

"(a) Imposition of tax.—In addition to other taxes, there shall be imposed for each taxable year beginning on or after the effective date of health security taxes (as defined in section 3121(u)), on the income of every individual residing in the United States whose health security unearned income (as defined in subsection (b) of this section) for the taxable year is $400 or more, a tax equal to 2.5 percent of the amount of such health security unearned income for such taxable year.

"(b) Definition of health security unearned income.—The term 'health security unearned income' means an amount determined by deducting from the adjusted gross income of an individual for the taxable year any part of such income (whether from wages or any other source) in excess of the amount of the health security contribution base (as defined in section 3121(t)) for the calendar year in which such taxable year begins, and deducting from the remainder any part of the adjusted gross income which—

"(1) consists of wages taxable under section 3101(b), or

"(2) consists of self-employment income taxable under section 1401(b), or

"(3) consists of remuneration for services performed in the employ of the United States as President or Vice President of the United States or as a Member, Delegate, or Resident Commissioner of or to the Congress, or as a member of a uniformed service on active duty, or

"(4) consists of remuneration (not taxable under section 3101(b)) for service performed by an alien in the employ of a foreign government, an instrumentality of a foreign government, or an international organization, or

"(5) consists of payments excluded from wages taxable under section 3101(b) by reason of paragraphs (2) through (13) of section 3121(a) as incorporated in section 3121(r), or

"(6) in the case of a taxpayer who has attained the age of 60 years before or during the taxable year, consists of any other income in an amount not exceeding $5,000."

CONFORMING AND TECHNICAL AMENDMENTS

SEC. 213. (a) The heading and table of contents of chapter 2 of subtitle A of the Internal Revenue Code of 1954 are amended to read as follows:

"CHAPTER 2—TAXES ON SELF-EMPLOYMENT INCOME AND HEALTH SECURITY UNEARNED INCOME

"Sec. 1401. Rates of tax on self-employment income.

"Sec. 1402. Definitions relating to self-employment income.

"Sec. 1403. Tax on health security unearned income.

"Sec. 1404. Miscellaneous provisions."

(b) Section 1401 of the Code, as amended by section 211(a) of this Act, is further amended by striking out the heading of the section and inserting in lieu thereof:

"Sec. 1401. RATES OF TAX ON SELF-EMPLOYMENT INCOME"

(c) Section 1404 of the Code (as redesignated by section 212 of this Act) is amended by striking out "Self-Employment Contributions Act of 1954" and inserting in lieu thereof, "Self-Employment and Health Security Contributions Act."

(d) Section 6015 of the Code (relating to declarations of estimated income by individuals) is amended by striking out in subsection (c)(2) "the amount of the self-employment tax imposed by chapter 2" and inserting in lieu thereof "the amount of the taxes imposed by chapter 2".

(e) Section 6017 of the Code is amended—

(1) by striking out the heading of the section and inserting in lieu thereof,

"Sec. 6107. SELF-EMPLOYMENT AND HEALTH SECURITY TAX RETURNS.";

(2) by inserting, immediately after the first sentence of the section, the following sentence: "Every individual residing in the United States and having health security unearned income of $400 or more for the taxable year shall make a return with respect to the health security unearned income tax imposed by chapter 2."; and

(3) by striking out "the tax" in the sentence immediately following the insertion made by paragraph (2) and inserting in lieu thereof "the taxes", and by inserting immediately before the period at the end of that sentence, "or on the separate health security unearned income of each spouse, as the case may be".

EFFECTIVE DATES OF PART B

SEC. 214. The amendments made by sections 211, 212, and section 213(d) and (e) (other than section 213(e)(1)) shall be effective with respect to taxable years beginning on or after the effective date of health security taxes (as defined by section 312(u) of the Internal Revenue Code of 1954, added by section 201(c) of this Act). The amendments made by section 213 (a), (b), (c), and (e)(1) shall be effective on such effective date.

PART C—INCOME TAX DEDUCTIONS FOR MEDICAL CARE

DENIAL OF DEDUCTIONS FOR SERVICES COVERED BY HEALTH SECURITY ACT

SEC. 221. (a) Section 213 of the Internal Revenue Code of 1954 (relating to income tax deductions by individuals for the cost of medical care) is amended—

(1) by inserting, immediately after the words "for medical care" in paragraph (1) of subsection (a), "(other than any amount paid for medical care covered by the Health Security Act)";

(2) by striking out, in subsections (e)(1)(C), "(including amounts paid as premiums under part B of Title XVIII of the Social Security Act, relating to supplementary medical insurance for the aged)"; and

(3) by adding at the end of subsection (e) the following paragraph:

"(5) The term 'medical care covered by the Health Security Act' means health services for which the individual receiving medical care was entitled to have payment made under title I of the Health Security Act (or for which he would have been entitled to have payments made upon obtaining the services from a participating provider of services under such Act), including the costs of insurance against expenses incurred for any such services."

(b) Section 162 of such Code (relating to income tax deduction for trade or business expenses) is amended by redesignating subsection (f) as subsection (g), and inserting immediately after subsection (e) the following subsection:

"(f) No deduction shall be allowed for the cost of medical care covered by the Health Security Act (as defined in section 213(e)(5))."

(c) The amendments made by subsections (a) and (b) shall be applied with respect to medical care received on or after the effective date of health security benefits, as set forth in section 163 of the Health Security Act.

TITLE III—COMMISSION ON THE QUALITY OF HEALTH CARE

STATEMENT OF PURPOSE

SEC. 301. It is the purpose of this title to improve the quality of health care in the United States by establishing a Commission on the Quality of Health Care to develop parameters and standards for care of high quality, and to promote the application of such parameters and standards in assessing and enhancing the quality of care furnished under the Health Security Act.

AMENDMENT OF THE PUBLIC HEALTH SERVICE ACT

SEC. 302. The Public Health Service Act is amended by inserting after Title XVI the following new title:

"TITLE XVII—COMMISSION ON THE QUALITY OF HEALTH CARE

"ESTABLISHMENT OF THE COMMISSION

"SEC. 1701. (a) There is hereby established in the Department of Health, Education, and Welfare a Commission on the Quality of Health Care (hereinafter in this title referred to as the 'Commission'), consisting of eleven members to be appointed by the Secretary after consultation with the Health Security Board, which shall perform the functions set forth in sections 1702 and 1703.

"(b) The Commission shall consist of persons who are especially qualified by education and experience to perform the functions of the Commission, including seven persons who are representatives of providers of health services or representatives of nongovernmental organizations engaged in developing standards pertaining to the quality of health care, and four persons who are representatives of consumers of health care (who shall be persons not engaged in, and having no financial interest in, the furthering of health services). Each member shall hold office for a term of five years, except that (1) any member appointed to fill a vacancy occurring during the term for which his predecessor was appointed shall be appointed for the remainder of that term and (2) the terms of the members first taking office shall expire, as designated by the Secretary at the time of appointment, three at the end of the first year, two at the end of the second year, two at the end of the third year, and two at the end of the fourth year after the appointment and qualification of at least six members of the Commission. A majority of the members who have been appointed and qualified shall constitute a quorum for the transaction of business.

"(c) The Secretary shall designate one of the members of the Commission to serve, at

the will of the Secretary, as Chairman of the Commission.

"(d) Subject to general policies established by the Secretary, and to the availability of funds, the Commission is authorized to employ such personnel as it finds necessary, including experts and consultants employed in accordance with section 3109 of title 5, United States Code, and to appoint one or more advisory committees (including a committee on the preparation and analysis of statistics) which may include officers or employees of the United States or of State or local governments. Members of committees who are not otherwise in the full-time employ of the United States, and experts and consultants employed pursuant to this subsection, while serving on business of the Commission (inclusive of travel time), shall receive compensation at rates fixed by the Commission, but not in excess of the daily rate paid under GS–18 of the General Schedule under section 5332 of title 5, United States Code; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

"FUNCTIONS OF THE COMMISSION

"Sec. 1702. (a) The primary responsibility of the Commission shall be the initiation and continuing development of methods of assessing the quality of health care furnished under the Health Security Act and methods of utilizing such assessments for the maintenance and improvement of quality, and the submission to the Secretary and the Health Security Board of its findings and recommendations. In discharging this responsibility the Commission shall—

"(1) undertake the systematization and nationwide collection of data bearing on (A) the qualification of health personnel and the adequacy of health facilities to furnish care of high quality, (B) the patterns of medical and other health practice in actual episodes of care, (C) the patterns of utilization of the components of the health care systems, and (D) the health of patients during and at the conclusion of episodes of health care, and the relation of the foregoing elements of health care thereto;

"(2) develop from such data (on a national or regional basis, for particular population groups, or otherwise, as the Commission may deem most useful) statistical norms and ranges with respect to aspects of health care which are comprised by each of the four elements listed in paragraph (1);

"(3) develop, on the basis of these norms and ranges, such standards (together with acceptable deviations therefrom) as will afford useful gages of the quality of care and useful instruments for the control and improvement of quality; and

"(4) make recommendations to the Secretary and the Health Securtiy Board for the use of standards developed under paragraph (3) in the exercise by the Board of its authority under title I, part H, of the Health Security Act, or for their use in the development of recommendations to the Congress for amendment of the Health Security Act.

"In carrying out its duties under this subsection, the Commission shall emphasize, and give first consideration to, care furnished for those illnesses and conditions which have relatively high incidence in the population and which are relatively amenable to medical or other care.

"(b) The Commission shall, through its staff or by contract (or both), conduct a program of research with the objectives of—

"(1) improving the technology of assessing the quality of health care, with regard for both the service input and the end result of such care;

"(2) comparing the quality of health care furnished under different systems of delivery and methods of payment;

"(3) analyzing the effects of consumer health education, and of utilization of preventive health services;

"(4) continuing the studies made by the Secretary's Commission on Medical Malpractice, and appraising the effect of measures taken by the Health Security Board pursuant to section 146 of the Health Security Act; and

"(5) obtaining other information which the Commission believes will be useful in effectuating the purpose of this title and of title I, part H, of the Health Security Act.

"(c) The Commission is authorized to provide technical assistance to participating providers of health services under title I of the Health Security Act (1) in furnishing to the Health Security Board information required for purposes of the Commission, and (2) in developing and carrying out programs of quality control.

"ADVICE TO HEALTH SECURITY BOARD PENDING DEVELOPMENT OF STANDARDS

"Sec. 1703. Pending the development of standards and recommendations pursuant to section 1702(a), the Commission shall, both before and after the effective date of health benefits under title I of the Health Security Act, on the basis of such knowledge as is available from time to time, furnish advice and recommendations to the Health Security Board on the issuance of regulations under part H of such title.

"Sec. 1704. The Secretary is authorized to establish on the staff of the Commission, and to fix compensation for, not more than twenty-five positions in the professional, scientific and executive service, each such position being established to effectuate those research and development activities of the Commission which require the services of specially qualified scientific, professional and administrative personnel. The rates of compensation for positions established pursuant to the provisions of this subsection shall not be less than the minimum rate of grade 16 of the General Schedule of the Classification Act of 1949, as amended, nor more than the highest rate of grade 18 of the General Schedule of such Act; and the rates of compensation for all such positions shall be subject to the approval of the Civil Service Commission. Positions created pursuant to this subsection shall be included in the classified civil service of the United States, but appointments to such positions shall be made without competitive examination upon approval of the proposed appointee's qualifications by the Civil Service Commission or such officers or agents as it may designate for this purpose."

TITLE IV—REPEAL OR AMENDMENT OF OTHER ACTS

REPEAL OF MEDICARE AND FEDERAL EMPLOYEE HEALTH BENEFIT STATUTES

Sec. 401. (a) Effective on the effective date of health security benefits (set forth in section 163)—

(1) Title XVIII of the Social Security Act, except section 1817 thereof, is repealed.

(2) The Act of September 28, 1959 (5 U.S.C., chap. 89), and Public Law 86–724 are repealed.

(b) Subsection (a) shall not affect any right or obligation arising out of any matter occurring before the effective date of health security benefits or any administrative or judicial proceeding (whether or not initiated before that date) for the adjudication or enforcement of any such right or obligation.

MEDICAID STATUTE

Sec. 402. After the effective date of health security benefits no State (as defined in section 1101(a)(1) of the Social Security Act) shall be required, as a condition of approval of its State plan under title XIX of that Act, to furnish any service which constitutes a covered service under title I of this Act, and any amount expended for the furnishing of any such service to a person eligible for services under title I of this Act shall be disregarded in determining the amount of any payment to a State under such title XIX. The Secretary of Health, Education, and Welfare shall by regulation prescribe the minimum scope of services required (in lieu of the requirements of section 1902(a)(13) of the Social Security Act) as a condition of approval, after the effective date of health security benefits, of a State plan under such title XIX. Such minimum scope of services shall, to the extent the Secretary finds practicable, supplement the benefits available under title I of this Act, including supplementation with respect to the duration of skilled nursing home services during the benefit period and with respect to the furnishing of dental services and of drugs (appearing on the list established under section 25(b) of this Act) to persons not entitled to such services, or not entitled to such drugs, under title I of this Act.

VOCATIONAL REHABILITATION ACT; MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICES

Sec. 403. Funds made available under the Vocational Rehabilitation Act or under Title V of the Social Security Act shall not be used, after the effective date of health security benefits, to pay for personal health services available under title I of this Act, but they may, in accordance with regulations of the Secretary of Health, Education, and Welfare, be used (a) to pay for institutional services which are either more extensive or more intensive than the services recognized in institutional budgets approved under title I of this Act, or (b) to pay for special medical or other procedures peculiar to vocational rehabilitation, or peculiar to the correction or amelioration of defects or chronic conditions of crippled children, as the case may be.

AMENDMENT OF SECTION 1122 OF THE SOCIAL SECURITY ACT

Sec. 404. (a) Section 1122 of the Social Security Act is amended—

(1) by striking out the words "titles V, XVIII, and XIX" whenever they appear in the section and inserting in lieu thereof "titles V and XIX of this Act and title I of the Health Security Act", and striking out "title V, XVIII or XIX" in subsection (d)(2) and inserting in lieu thereof "title V or XIX of this Act or title I of the Health Security Act";

(2) by striking out the words "in determining the Federal payments" wherever they appear in subsections (d)(1) and (e) and inserting in lieu thereof "for the purpose of determining the Federal payments";

(3) by striking out in subsection (d)(1) "not include any amount" and "exclude an amount" and inserting in lieu thereof, respectively, "not include, and shall direct the Health Security Board not to include, any amount" and "exclude, and shall direct the Health Security Board to exclude, an amount";

(4) by striking out in subsection (i)(2) "the Health Insurance Benefits Advisory Council" and insert in lieu thereof "the National Health Security Advisory Council".

(b) The amendments made by subsection (a) shall be effective upon the effective date of health security benefits except that prior to that date the Secretary of Health, Education, and Welfare may issue to the Health Security Board directions for reductions in payments to be made on and after the effective date.

REPEAL OF TITLE XI, PART B, OF THE SOCIAL SECURITY ACT

Sec. 405. Part B of title XI of the Social Security Act (relating to Professional Standards Review), and section 249F of the Social Security Amendments of 1972 (which added that part to the Act) are repealed, effective on the effective date of health security benefits.

TRANSFER AND AMENDMENT OF SECTION 1817, AND AMENDMENT OF SECTION 201(g), OF THE SOCIAL SECURITY ACT

SEC. 406. (a) Section 1817 of the Social Security Act (creating the Federal Hospital Insurance Trust Fund and appropriating to the fund the proceeds of the hospital insurance payroll taxes and the hospital insurance self-employment tax) is redesignated as section 61 and is transferred to this Act, to appear under the heading "HEALTH SECURITY TRUST FUND" as the first section of part D of title I; and is amended—

(1) by striking out the section heading, and by striking out the name of the trust fund appearing in subsection (a) and inserting in lieu thereof, "Health Security Trust Fund";

(2) by striking out paragraph (2) of subsection (a) (appropriating to the Trust Fund the proceeds of the self-employment tax for hospital insurance) and inserting in lieu thereof:

"(2) the taxes imposed by section 1401(b) of the Internal Revenue Code of 1954 with respect to self-employment income, and by section 1403 of the Code with respect to unearned income, reported to the Secretary of the Treasury or his delegate on tax returns under subtitle F of such Code."

(3) by striking out subsections (g) and (h), and inserting in lieu thereof:

"(g) On the effective date of health benefits, there shall be transferred to the Trust Fund all of the assets and liabilities of the Federal Supplementary Medical Insurance Trust Fund. The Health Security Trust Fund shall remain subject to the liabilities of the Federal Hospital Insurance Trust Fund existing immeditaely prior to such effective date.

"(h) In addition to the sums appropriated by subsection (a), there are authorized to be appropriated to the Trust Fund from time to time, out of any moneys in the Treasury not otherwise appropriated, a Governmental contribution equal to 100 per centum of the sums appropriated by subsection (a). There shall be deposited in the Trust Fund all recoveries of overpayments, and all receipts under loans or other agreements entered into, under this title.

"(i) The managing trustee shall pay from time to time from the Trust Fund such amounts as the Board certifies are necessary to make payments provided for by this title, and the payments with respect to administrative expenses in accordance with section 201(g) of the Social Security Act."

(b) Section 201(g) of the Social Security Act (providing for annual authorization by the Congress of payment, from the respective trust funds, of the cost of administering the several national systems of social insurance) is amended—

(1) by striking out in paragraph (1)(A) "the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund" and inserting in lieu thereof: "the Health Security Trust Fund";

(2) by striking out the words "title XVIII" wherever they appear in the subsection and inserting in lieu thereof: "title I of the Health Security Act"; and

(3) by striking out the words "for which the Secretary of Health, Education, and Welfare is responsible" wherever they appear in paragraph (1)(A), and inserting in lieu thereof, "for which the Secretary of Health, Education, and Welfare and the Health Security Board are responsible".

(c) All references to the Federal Hospital Insurance Trust Fund or the Federal Supplementary Medical Insurance Trust Fund, appearing in any Act other than this Act or the Social Security Act, shall be deemed to refer to the Health Security Trust Fund.

(d) For the effective date of subsections (a) and (b), see section 163. Subsection (c) shall be effective on and after the effective date of health benefits.

AMENDMENTS OF TITLE XV OF THE PUBLIC HEALTH SERVICE ACT

SEC. 407. (a) Section 1501(a) of the Public Health Service Act is amended by striking out "within eighteen months" and inserting in lieu thereof "within twelve months".

(b) Section 1501(b) of such Act is amended by adding after paragraph (2) thereof the following sentence:

"Such guidelines shall emphasize the need for prompt action to enable providers of health services better to meet the demands upon them when benefits under title I of the Health Security Act become available."

(c) Section 1503(b) of such Act is amended by striking out "and the Assistant Secretary for Health of the Department of Health, Education, and Welfare" and inserting in lieu thereof, "the Under Secretary for Health and Science of the Department of Health, Education, and Welfare and the Chairman of the Health Security Board".

(d) Section 1513(d) of such Act is amended by striking out paragraph (1) thereof and redesignating paragraphs (2), (3) and (4) as paragraphs (1), (2) and (3), respectively.

(e)(1) Section 1513(e)(1) of such Act is amended by inserting immediately after "1970", a comma and the following: "or made available under part F of title I of the Health Security Act,".

(2) Section 1513(e)(2) of such Act is amended by striking out "the Secretary" in the first and second sentences thereof, and inserting in lieu thereof in each instance "the Secretary or the Health Security Board"; by striking out "he" in the second sentence and inserting "the Secretary" in lieu thereof; and by inserting after "may make" in the fourth sentence "(or authorize the Health Security Board to make)".

(f) Section 1526 of such Act is repealed.

SALARY LEVELS

SEC. 408. (a) Section 5313, title 5, United States Code (relating to executive pay rates for positions at level II) is amended by adding at the end thereof the following new clause:

"(23) Deputy Secretary of Health, Education and Welfare."

(b) Section 5314, title 5, United States Code (relating to executive pay rates for positions at level III) is amended by striking out clause (7) and inserting in lieu thereof:

"(7) Under Secretary for Health and Science, Department of Health, Education, and Welfare."; and by adding at the end thereof the following new clause:

"(61) Chairman, Health Security Board, Department of Health, Education, and Welfare."

(c) Section 5315, title 5, United States Code (relating to executive pay rates for positions at level IV), is amended by adding at the end thereof the following new clauses:

"(105) Members (other than the Chairman), Health Security Board, Department of Health, Education, and Welfare (4)."

"(106) Members, Commission on the Quality of Health Care, Department of Health, Education, and Welfare (11)."

(d) Section 5316, title 5, United States Code (relating to executive pay rates for positions at level V) is amended by adding at the end thereof the following new clause:

"(137) Executive Director, Health Security Board, Department of Health, Education, and Welfare."

AMENDMENT OF BUDGET AND ACCOUNTING ACT

SEC. 409. (a) Section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11), is amended—

(1) by striking out "The Budget" in the second sentence of subsection (a) and inserting in lieu thereof "Except as provided in subsection (d), the Budget"; and

(2) by adding at the end thereof the following new subsection:

"(d) The Budget shall set forth the items referred to in paragraphs (4), (5), (6), (7), (8), (9), and (12) of subsection (a) which are attributable to receipts of and expenditures from the Health Security Trust Fund, and shall set forth separately such items (commonly referred to as the 'administrative budget') attributable to all other operations of the Government."

(b) The amendments made by subsection (a) shall be effective with respect to the fiscal year beginning in the first calendar year after the calendar year in which this Act is enacted, and to all subsequent fiscal years.

TITLE V—STUDIES RELATED TO HEALTH SECURITY

STUDY OF THE PROVISION OF HEALTH SECURITY BENEFITS TO UNITED STATES CITIZENS IN OTHER COUNTRIES

SEC. 501. The Secretary of Health, Education, and Welfare, in consultation with the Secretary of State and the Secretary of the Treasury, shall study (a) the practicability and the means of making prepaid health services (or prepaid indemnification for the cost of health services) available, more widely than can be done under section 12 of this Act, to citizens of the United States who are resident in other countries or are temporarily visiting such countries, by supplementing the authority for reciprocal arrangements under section 12 with authority for payments from the Health Security Trust Fund, and (b) means of equitably financing such services (or indemnification) through the extension of health security taxes; and not later than five years after the enactment of this Act shall report to the Congress his findings and recommendations.

STUDY OF COORDINATION WITH OTHER FEDERAL HEALTH BENEFIT PROGRAMS

SEC. 502. (a) The Secretary of Health, Education, and Welfare shall conduct studies of the most satisfactory means of coordinating the program for the health care of merchant seamen, the program for the health care of Indians and Alaskan natives, or both, with the system of health security benefits created by this Act; the Administrator of Veterans' Affairs and the Secretary shall conduct a joint study of the most satisfactory means of coordinating with that system some or all of the programs for the health care of veterans; and the Secretary of Defense and the Secretary of Health, Education, and Welfare shall conduct a like joint study with respect to the program of health benefits furnished by civilian facilities and personnel to dependents of members of the Armed Forces. Reports of these studies, and legislative recommendations to achieve improved coordination, shall be submitted to the Congress not later than three years after the enactment of this Act.

(b) In conducting the studies required by this section, the Secretaries and the Administrator, as appropriate, shall consult with representatives of the respective beneficiary groups, and shall include in their reports to the Congress summaries of the views of such representatives.

GENERAL PROVISIONS

SEC. 503. (a) There are hereby authorized to be appropriated such sums as may be necessary for the conduct of the studies authorized by this title.

(b) In conducting such studies the Secretary of Health, Education, and Welfare, the Secretary of Defense, and the Administrator of Veterans' Affairs are each authorized (1) to appoint such experts and consultants (employed in accordance with section 3109 of title

5, United States Code) and such advisory committees as they may deem necessary; and (2) to enter into contracts with public or private agencies or organizations for the collection of information, the conduct of research, or other purposes related to the respective studies. Experts and consultants and members of advisory committees appointed under this subsection, while serving on business related to the studies (inclusive of travel-time), shall receive compensation at rates not in excess of the daily rate paid under GS–18 of the General Schedule under Section 5332 of title 5, United States Code; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

JOINT REFERRAL OF A BILL—S. 70

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that S. 70, relating to the Homebuyers Assistance Act, which was referred yesterday to the Committee on Banking, Housing and Urban Affairs, be jointly referred to that committee and the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR SENATORS TO PROCEED IN A BODY TO THE HOUSE OF REPRESENTATIVES AT 8:40 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at no later than 8:40 p.m. tomorrow, the Senators proceed in a body to the Hall of the House of Representatives to hear the President of the United States deliver his state of the Union message.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, tomorrow the Senate will meet at 8 o'clock p.m. After the two leaders or their designees have been recognized under the standing order, there will be a period for the transaction of routine morning business not to extend beyond the hour of 8:30 p.m., with statements therein limited to 2 minutes each. Senators may introduce bills, statements into the RECORD, and petitions and memorials, but as of now I know of no business that will be transacted. Certainly no rollcall votes will occur.

At the hour of 8:40 p.m. the Senators will move in a body to the Hall of the House of Representatives to hear the address by the President of the United States on the State of the Union. Following that address, the Senate will stand in adjournment until the hour of 12 o'clock noon on Friday.

RECESS UNTIL 8 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 8 o'clock tomorrow evening.

The motion was agreed; and at 3:55 p.m. the Senate recessed until tomorrow, January 12, 1977, at 8 p.m.

NOMINATIONS

Executive nominations received by the Senate January 11, 1977;

SECURITIES INVESTOR PROTECTION CORPORATION

The following-named persons to be directors of the Securities Investor Protection Corporation for the terms indicated:

For a term expiring December 31, 1977:

F. Barton Harvey, Jr., of Maryland, vice Henry W. Meers, term expired.

For a term expiring December 31, 1978:

J. W. Van Gorkom, of Illinois (reappointment).

H. C. Piper, Jr., of Minnesota, vice Glenn E. Anderson, term expired.

FEDERAL INSURANCE ADMINISTRATOR

J. Robert Hunter, of Virginia, to be Federal Insurance Administrator, Department of Housing and Urban Development (new position).

IN THE NAVY

Vice Adm. Marmaduke G. Bayne, U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

Vice Adm. Bernard B. Forbes, Jr., U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

HOUSE OF REPRESENTATIVES—*Tuesday, January 11, 1977*

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WRIGHT) laid before the House the following communication from the Speaker:

THE SPEAKER'S ROOMS,
Washington, D.C., January 11, 1977.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore for today.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Dr. John A. Wood, pastor, First Baptist Church of Paducah, Ky., offered the following prayer:

Heavenly Father, we pray for each Member of this body, its officers, and all who share in its labors. Make us responsive to the opportunities of serving our country and mankind. May each Member put his heart into his work, that the work may get into each Member's heart.

We pray for this session. Make this a sacred moment, a moment when men are aware of their need of God. A moment when answers come and guidance is given. We know that a different world cannot be built by indifferent leaders. Refresh us with Thy spirit to quicken our thinking and make us sensitive to Thy will. May the faith stamped on our coins be expressed in our lives. Through Jesus Christ our Lord. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Marks, one of his secretaries.

DR. JOHN A. WOOD

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, it is indeed a pleasure to have with me in the Chamber today as our guest minister to give the invocation, a longtime friend, Dr. John Wood, pastor of the First Baptist Church of Paducah, Ky.

This native Texan, who has previously declined opportunities to serve as pastor of some of the largest Baptist churches in the United States, continues in his 13th year as the effective minister of the Paducah church. The church of which Dr. Wood is pastor has the largest membership of any church in my congressional district, is among the most beautiful church buildings in the Nation, and their ministry includes televising their Sunday morning service into four States over station KFVS, Cape Girardeau, Mo.

Dr. Wood is a graduate of Baylor University in Waco, Tex., and the Southern Baptist Theological Seminary of Louisville, Ky. His degrees include a doctor of ministry degree at Southern Baptist Theological Seminary, which he earned, and the degree was awarded him in 1976. He is a past president of the Kentucky Baptist Convention.

Again, it is a personal joy to have Dr. Wood and his son Alex with me today.

PROPOSED DESIGNATION OF VA HOSPITAL IN TAMPA AS THE JAMES A. HALEY VA HOSPITAL

(Mr. IRELAND asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. IRELAND. Mr. Speaker, today I am introducing a bill to designate the Veterans' Administration hospital in Tampa, Fla., as the James A. Haley Veterans' Hospital. Jim Haley, who retired January 3, represented Florida's Eighth Congressional District the past 24 years. During all of those years, he championed the rights of veterans and his dedicated service is recognized nationwide. I am sure the Congress will agree with me that this honor will be a proper and fitting tribute to this distinguished American who served the Nation so well.

I am happy to state that the entire Florida House delegation has joined me in cosponsoring this bill. We will, of course, be happy to have other friends of Jim Haley join as cosponsors of this legislation for deserved recognition of a job well done.

I am providing details of Mr. Haley's service, with particular reference to his contributions to veterans' legislation, at another point in the body of the RECORD, and I request unamimous consent that those who desire to do so may join in revising and extending their remarks at that point in the RECORD.

PROPOSED DESIGNATION OF VA HOSPITAL IN TAMPA AS THE JAMES A. HALEY VA HOSPITAL

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKES. Mr. Speaker, I am very pleased that the first bill of our colleague from Florida, the Honorable ANDY IRELAND, has chosen as his first legislative effort to introduce legislation honoring our former colleague, his predecessor, a great Congressman, Jim Haley. The bill would designate the Veterans' Administration Hospital in Tampa, Fla., as the James A. Haley Veterans' Hospital. I sponsored this proposal last year and, although it was approved in the House, the Senate failed to complete action on the measure before the 94th Congress adjourned. The entire Florida House delegation cosponsored this bill last year and again this year.

Now, let me take a moment to express my great pleasure at the responsible manner in which ANDY IRELAND has assumed the important work of a Member of Congress. He has clearly demonstrated leadership capability and a faculty for working cooperatively with other members of our delegation and of the Congress. I am convinced that he will quickly establish himself as one of the new and progressive young leaders in the House.

The honor which is proposed for our former colleague, Jim Haley, will be a proper and fitting tribute for a man who championed the rights of veterans all the years he was in the Congress. Through his tireless efforts and years of dedicated service on the Veterans' Affairs Committee, the veteran population throughout the Nation now has access to greatly improved medical programs and significantly expanded hospital facilities.

Prior to Mr. Haley's service in Washington, he was an outstanding member of the Florida Legislature and his leadership talents there also were directed in considerable measure to legislation benefiting veterans and their families.

When Mr. Haley came to Congress in 1953, he was assigned to the House Committee on Interior and Insular Affairs and the Committee on House Administration. In 1955, he accepted an assignment to the House Committee on Veterans' Affairs. As a veteran, he had a deep and sincere interest in all veterans and their dependents. As a Floridian, he felt that Florida's rapidly growing veteran population should have representation on a committee which is so very important to his State. He served on the Hospitals Subcommittee for 18 years and was chairman of the subcommittee the last 8 years. This subcommittee has oversight over the 166 VA hospitals and the entire VA medical program throughout the United States.

After becoming chairman of the Interior and Insular Affairs Committee in 1973, Mr. Haley relinquished his seat on the Veterans' Affairs Committee. His new responsibilities would leave him but little time for any other committee assignment and, in his characteristic unselfish way, he wanted to provide an opportunity for another Member with fewer responsibilities to devote more time to the needs of the Nation's veterans.

During his service on the Hospitals Subcommittee, Mr. Haley helped bring about the construction of three new Florida Veterans' Administration hospitals—Gainesville, Miami, and Tampa—and the modernization of the VA hospital facilities at Lake City and Bay Pines. During this same period, Florida's VA hospital beds were increased from 1,353 to 3,501. Congressman Haley's work nationwide was equally important. He helped to build needed hospitals and to improve veteran facilities in other areas, and he was instrumental in preventing the closing of VA hospitals and regional offices in areas where he considered their contributions essential.

In short, Mr. Speaker, Jim Haley fully deserves this recognition. His many years of hard work and concentrated efforts on behalf of all veterans has earned their respect and admiration. I am very hopeful that the Veterans' Affairs Committee will quickly favorably report this proposal to bestow the name of a very distinguished Floridian on a needed veterans' hospital as proper recognition for his long years of service to America's veterans and their families. I am confident the bill will again receive the approval of the House and hopefully the Senate will concur. I know that all of you join me in wanting Jim Haley to be able to smell the flowers he so richly deserves.

Mr. FREY. Mr. Speaker, due to the preadjournment rush, the Senate was unable to act on a bill to name the Veterans' Administration hospital in Tampa, Fla., the "James A. Haley Veterans Administration Hospital." Congressman ANDY IRELAND who now represents Jim Haley's district, is today introducing this measure to honor a gentleman who was instrumental in modernizing two veteran facilities in Florida and helped to bring about the construction of three VA hospitals in Florida.

A hard worker for all veterans, this measure is a most fitting tribute to former Congressman James A. Haley. I hope all my colleagues will join me in supporting its passage.

GENERAL LEAVE

Mr. IRELAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of designating the veterans hospital in Tampa, Fla., the James A. Haley Veterans Hospital.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

NATIONAL PARK SYSTEM WILDERNESS

(Mr. SEBELIUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEBELIUS. Mr. Speaker, I am today introducing 27 individual bills, each of which proposes the designation of wilderness at a particular unit of the national park system. These bills represent the recommendations which have come from the studies conducted by the National Park Service as required by the Wilderness Act of 1964. All of these bills and 13 others were introduced by me in the 94th Congress. The 13 others were enacted into law in modified form by the 94th Congress. Hence, I am reintroducing these remaining 27 bills with the hope and expectation that many, if not most, of these can be acted on by the 95th Congress.

I recognize that each of these bills involves matters of consideration of other Members in whose congressional district these wilderness proposals are located. I introduce these bills without knowledge of the position of the affected Members, and I take no advocacy position on any of these bills by virtue of my introduction of them. However, as the ranking minority member of the Interior Committee's Subcommittee on National Parks and Recreation during the last Congress, I was quite interested and involved in the consideration of wilderness legislation. I introduce these bills again today for the principal purpose of bringing this backlog of wilderness legislation back before the committee for its consideration. I would hope and urge that prompt action might be taken on these bills as a priority item this year.

FULL OPPORTUNITY FOR DEBATE NEEDED ON REESTABLISHING COMMITTEE ON ASSASSINATIONS

(Mr. BAUMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAUMAN. Mr. Speaker, it is my

information that the majority leadership has decided to pull from today's Suspension Calendar the resolution which would recreate the Select Committee on Assassinations.

I am further informed that this resolution will be referred to the Committee on Rules which will be reconstituted. I hope that full hearings will be held before that body prior to that resolution being brought to the floor. Further, when the resolution does come to the floor, I hope that all Members are given a chance to not only debate the merits of this committee and its continuation, but the opportunity to offer amendments so that the committee is circumscribed in the scope of its investigations and also the activities of its staff.

Those of us who supported the creation of the committee originally are not necessarily opposed to the idea of such an investigation but we definitely want the integrity of the House of Representatives to be upheld. I believe that the withdrawal of this resolution today is one small step in that direction.

ELECTION OF DEMOCRATIC MEMBERS OF COMMITTEE ON THE BUDGET

Mr. FOLEY. Mr. Speaker, as Chairman of the Democratic Caucus, and by direction of the Democratic Caucus, I offer a privileged resolution, House Resolution 95, and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 95

Resolved, That the following-named Members be, and they are hereby, elected to the Committee on the Budget: Robert N. Giaimo (chairman), Connecticut; Jim Wright, Texas; Thomas L. Ashley, Ohio; Robert L. Leggett, California; Parren J. Mitchell, Maryland; Omar Burleson, Texas; Louis Stokes, Ohio; Elizabeth Holtzman, New York; Butler Derrick, South Carolina; Otis G. Pike, New York; Donald M. Fraser, Minnesota; David R. Obey, Wisconsin; William Lehman, Florida; Paul Simon, Illinois; Norman Y. Mineta, California; Joseph L. Fisher, Virginia; Jim Mattox, Texas.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ELECTION OF REPUBLICAN MEMBERS OF COMMITTEE ON THE BUDGET

Mr. DEVINE. Mr. Speaker, I offer a privileged resolution, House Resolution 96, and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 96

Resolved, That the following-named Members be, and are hereby elected members of the House Committee on the Budget: Delbert L. Latta, James T. Broyhill, Barber B. Conable, Jr., Marjorie S. Holt, John H. Rousselot, John J. Duncan, Clair W. Burgener, and Ralph S. Regula.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SECOND REPORT OF UNITED STATES SINAI SUPPORT MISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–41)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations and ordered to be printed with illustrations:

To the Congress of the United States:

I am pleased to transmit herewith the Second Report of the United States Sinai Support Mission. This report, following that which I forwarded on April 30, 1976, describes the manner in which the Mission is carrying out its responsibility for operating the early warning system in the Sinai, as specified in the Basic Agreement between Egypt and Israel and its Annex signed on September 4, 1975. This report is provided to the Congress in conformity with Section 4 of Public Law 94–110 of October 13, 1975.

The Report includes a summary of the operations of the early warning system since its inauguration on February 22, 1976, and a description of the Mission's permanent base camp facilities which were officially dedicated on July 4.

With the completion of major construction activity, it has been possible to reduce somewhat the number of Americans working in the Sinai in accordance with the wishes of the Congress. The United States Sinai Support Mission will continue to analyze carefully all aspects of the Sinai operation to identify ways whereby the numbers might be further reduced.

The proposal to establish an American-manned early warning system in the Sinai was made at the request of the Governments of Egypt and Israel. With the concurrence of the Congress, we accepted this undertaking because the United States strongly seeks the achievement of peace and stability in the Middle East.

The United States Sinai Support Mission plays an important role in support of the Basic Agreement. Both sides have recently reaffirmed their confidence in the manner in which the United States has been carrying out its responsibilities in the Sinai, and as long as it continues to enjoy this support, the United States role will represent a meaningful contribution to the prospects for attaining a just and lasting peace in the Middle East.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

REPORT OF OFFICE OF ALIEN PROPERTY FOR FISCAL YEAR ENDED JUNE 30, 1975—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations:

To the Congress of the United States:

I herewith transmit the annual report of the Office of Alien Property, Department of Justice, for the fiscal year ended June 30, 1975, in accordance with section 6 of the Trading with the Enemy Act.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

CALL OF THE HOUSE

Mr. ASHBROOK. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 6(e) of rule XV, the Chair cannot entertain a point of order of no quorum at this time.

Under that rule the Chair does, however, recognize the gentleman from California (Mr. DANIELSON) to move a call of the House at this time.

Mr. DANIELSON. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 5]

Adams	Foley	Shipley
Allen	Ford, Tenn.	Snyder
Anderson, Ill.	Fraser	Staggers
Andrews, N.C.	Frey	Stanton
Armstrong	Giaimo	Stark
Bergland	Gibbons	Teague
Bingham	Heckler	Traxler
Broyhill	Hillis	Udall
Burton, John	Jeffords	Ullman
Byron	Lundine	Van Deerlin
Cleveland	McEwen	Walsh
Dent	Moss	Watkins
Dicks	Railsback	Weaver
Diggs	Rhodes	White
Dornan	Roberts	Wydler
Eckhardt	Rogers	Young, Ga.
Erlenborn	Ruppe	
Florio	St Germain	

The SPEAKER pro tempore. On this rollcall 382 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

EIGHTH QUARTERLY REPORT OF COUNCIL ON WAGE AND PRICE STABILITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

In accordance with section 5 of the Council on Wage and Price Stability Act, as amended, I hereby transmit to the Congress the eighth quarterly report of the Council on Wage and Price Stability. This report contains a description of the Council activities during the third quarter of 1976 in monitoring both prices and wages in the private sector and various Federal Government activities that lead to higher costs and prices without creating commensurate benefits. It

discusses in some detail the Council's study of collective bargaining negotiations for 1976, health costs, aluminum prices, and chlorine, caustic soda prices as well as its filings before various Federal regulatory agencies.

During the remainder of 1976, the Council on Wage and Price Stability will continue to play an important role in supplementing fiscal and monetary policies by calling public attention to wage and price developments or actions by the Government that could be of concern to American consumers.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

PROVIDING FOR ESTABLISHMENT OF A SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent that the Committee on Rules be discharged from further consideration of the resolution (H. Res. 77) providing for the establishment of a Select Committee on Narcotics Abuse and Control, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 77

Resolved, That (a)(1) there hereby is established in the House of Representatives a select committee to be known as the Select Committee on Narcotics Abuse and Control (hereinafter in this resolution referred to as the "select committee"). The select committee shall be composed of eighteen Members of the House.

(2) Members of the select committee shall be appointed by the Speaker of the House. One member of the select committee shall be designated by the Speaker to serve as chairman of the select committee.

(3) At least one member of the select committee shall be chosen from each of the following committees of the House: The Committee on Armed Services, the Committee on Government Operations, the Committee on International Relations, the Committee on Interstate and Foreign Commerce, the Committee on the Judiciary, the Committee on Merchant Marine and Fisheries, and the Committee on Ways and Means.

(4) Any vacancy occurring in the membership of the select committee shall be filled in the same manner as the original appointment.

(b) The chairman of the select committee may establish such subcommittees of the select committee as he considers appropriate. Any such subcommittee shall be composed of not less than four members of the select committee.

SEC. 2. The select committee shall not have legislative jurisdiction. The select committee shall have authority—

(1) to conduct a continuing comprehensive study and review of the problems of narcotics abuse and control, including, but not limited to, international trafficking, enforcement, prevention, narcotics-related violations of the Internal Revenue Code of 1954, international treaties, organized crime, drug abuse in the Armed Forces of the United States, treatment and rehabilitation, and the approach of the criminal justice system with respect to narcotics law violations and crimes related to drug abuse; and

(2) to review any recommendations made by the President, or by any department or agency of the executive branch of the Federal Government, relating to programs or policies affecting narcotics abuse or control.

SEC. 3. (a) For purposes of this resolution, the select committee, or any subcommittee thereof authorized by the select committee, may sit and act at such times and places as it considers appropriate whether the House is sitting, has recessed, or has adjourned.

(b) For purposes of this resolution, the select committee, or any subcommittee thereof authorized by the select committee to hold hearings, may hold such hearings, and may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, documents, and other exhibits and materials, as it considers necessary. Subpenas may be issued under the signature of the chairman of the select committee or any member of the select committee designated by him, and may be served by any person designated by such chairman or member.

(c) A majority of the members of the select committee shall constitute a quorum for the transaction of business, except that the select committee may designate a lesser number as a quorum for the purpose of taking testimony. The chairman of the select committee, or any member of the select committee designated by him, may administer oaths or affirmations to any witness.

(d) The select committee and any subcommittee thereof and its staff may conduct field investigations or inspections. Members and staff of the select committee may engage in such travel as may be necessary to conduct investigations relating to the purpose of this resolution.

SEC. 4. The select committee may employ and fix the compensation of such clerks, experts, consultants, technicians, attorneys, investigators, and clerical and stenographic assistants as it considers necessary to carry out the purposes of this resolution. The select committee may reimburse the members of its staff for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the select committee, other than expenses in connection with meetings of the select committee or any subcommittee thereof held in the District of Columbia.

SEC. 5. The provisions of clause 2(g)(1) of rule XI of the rules of the House shall apply to the select committee.

SEC. 6. (a) The select committee shall report to the House with respect to the results of any investigation conducted by the select committee, or any subcommittee thereof, under section 3(d).

(b) The select committee shall submit an annual report to the House which shall include a summary of the activities of the select committee during the calendar year to which such report applies.

(c) Any report of the select committee under this section which is submitted during a period in which the House is not in session shall be filed with the Clerk of the House.

Mr. BRADEMAS (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GILMAN. Mr. Speaker, I rise in support of the proposal offered by my esteemed colleague, the gentleman from New York (Mr. WOLFF) which calls for the continuation of the House Select Committee on Narcotics Abuse and Control. This committee received a mandate from the Members of the House last year when the measure introduced by Mr. WOLFF, House Resolution 1350, passed the House by a vote of 361 to 10 last July. The bill, which had over 200 cosponsors, created the Narcotics Select Committee, which, to date, has conducted several extensive, informative hearings in Washington and New York, and which has been instrumental in the dissemination and publication of material which focuses the attention on the need for stricter, more responsible regulation of drug trafficking and abuse.

The members of the select committee have garnered many salient facts about the national and international narcotics problem in the brief months of the committee's existence, but there is still so much more which must be done. The need for cooperation and coordination within the many Government agencies presently involved in narcotics control has been attested to in testimony delivered by many outstanding witnesses from various Federal and State agencies and departments: the CIA, the Department of State, the League of Cities, the U.S. Justice Department, DEA, the office of New York's special narcotics prosecutor, and many others who have given their time, expertise, and assistance to the members of this committee.

It is urgent that this committee receive the same kind of mandate that was given last July. The narcotics problem in our Nation has reached crisis proportions. The severity of the problem grows every day. This committee was envisioned by the House as a tool which would be used to pry open sources of information which would shed light on the reasons why America's present narcotics effort has, to a large extent, been ineffective in the widescale war on drugs. The recommendations and conclusions of this House select committee will prove, I believe, invaluable to the Members of Congress, and to the entire Nation which is so directly affected by the rampant abuse of narcotics in our society.

I urge my colleagues to join in support of the gentleman's recommendation that the life of this House select committee be further extended.

Mr. AMBRO. Mr. Speaker, today the House is discussing a resolution to reconstitute the Select Committee on Narcotics Abuse and Control. While I would have liked to engage in a dialog on certain aspects of the select committee's activities, the unanimous consent parliamentary procedure makes this a difficult task. However, I would like to bring to my colleagues' attention a situation in La Paz, Bolivia, which bears on U.S. efforts to control drug trafficking.

I might preface my remarks by saying that certainly no one has any quarrel with the objectives of eliminating drug trafficking. However, when these objectives are implemented by government departments, agencies and officials, both foreign and U.S., the spirit and intent of Congress in the enacting legislation are often distorted.

For example, if it is incumbent upon a foreign country to cooperate in the U.S. drug control efforts in order to continue to receive foreign aid moneys, a country might merely arrest a group of

Americans to establish a record, so to speak, saying in effect that the arrests are tangible evidence of their cooperative efforts. Such an aberration appears to be taking place in Bolivia. The situation is exacerbated when corruption is rife with respect to drug traffic among Bolivian officials who have political influence and protection and, in order to placate loud voices in Congress and the United States, they arrest young people from the United States to give the perception of complying with U.S. desires.

In short, the Bolivian narcotics law promulgated 3 years ago—some say at U.S. Drug Enforcement Administration initiation and insistence—is a bad law. This is openly admitted by both U.S. and Bolivian officials, and yet U.S. officials contend that there is little they can do when a narcotics violator is arrested. If the United States, through the DEA, is going to participate in raids on American citizens in Bolivia, it seems to me that the United States must take some responsibility for what happens afterward.

I commend to my colleagues' attention a recent column by Jack Anderson, which, I am told by persons who have firsthand knowledge of conditions in Bolivia, is an accurate portrayal of the situation as it exists in general and which I have inserted in the RECORD following my statement.

Unsaid, but clearly implied in the Anderson column, is the hardship and deprivation suffered in human terms by those incarcerated, their families and loved ones.

The Bolivians, ostensibly reluctant to try people under an extremely harsh law, which until last month, did not even distinguish between a casual user and the trafficker, have postponed, shuttled and otherwise delayed cases endlessly. These American prisoners, typically 20 to 30 years of age, are drained of money by lawyers who can do nothing for them. Additionally, those incarcerated require $100 to $200 per month to merely exist in jail, for if they had to depend on the prison allowance for sustenance, disease and malnutrition would quickly overcome them. The American prisoners, obviously small fry, are, however, forced to live in abject despair with little or no hope for the future. Rehabilitation programs, or even "busy work" are alien to their prison experience, and they literally sit around a courtyard all day long, retiring to their rooms in the evening.

Meanwhile, the actual drug traffic is unaffected. Typically, the jailed Americans are minor users, some of whom have never been near cocaine. Others who themselves never even experimented with drugs but were merely in the company of minor users and, therefore, arrested are wholly innocent of any drug-related experience. While the drug traffic prospers, the prisoners are stagnating, and their incarceration is destroying them. Some are held without any hope of bail and in the absence of arraignment, indictment, or trial.

In conclusion, while reiterating support of the noble objectives of germane legislation, it seems to me that the Bolivian story must be told and addressed in the human terms of wasted lives for the wrong reason and the Select Committee on Narcotics Abuse and Control should take a long, hard look at these factors as they undertake their formidable task.

IN LATIN AMERICAN PRISONS: BUT SOME STILL LANGUISH

(By Jack Anderson)

Hundreds of American youths spent the Christmas holidays in dismal, dingy Latin American prisons.

Most of them were arrested on drug charges, usually for possessing a few pinches of marijuana, but sometimes merely for attending a party where marijuana was smoked. Often the evidence against them was dubious.

The U.S. government has done little to get them out. What they may not know is that the U.S. government helped to put them in.

For Washington officialdom, in its zeal to halt the drug traffic from Latin America, brought pressure on various governments to crack down on drug violators. Unfortunately the dragnets caught few smugglers but many users, including more than a few innocents.

We have written in the past about the plight of the young Americans who have received stiff sentences in Latin America for drug offenses that would have been excused in the United States. A couple of summers ago, our associate Joe Spear interviewed several of them in Mexican jails. Their arrests were the direct result of pressure from Washington.

Today, we turn the spotlight on Bolivia, whose harsh narcotics laws failed to distinguish between pushers and users until a few weeks ago. Thus a person caught with a gram of cocaine could be sentenced to 25 years in miserable Bolivian jails.

These tough, new narcotics laws were drafted in 1973 by a special Bolivian commission. The United States actually helped to pay the salaries of the Bolivian attorneys who were appointed to the commission. The United States also dispatched a Justice Department lawyer to Bolivia with a proposed narcotics code.

Thereafter, Bolivian and American narcotics agents worked closely together. This cooperation earned Bolivia some generous U.S. financial aid. The United States, for example, is planning to supply the Bolivian police with vehicles, telecommunications, contract advisers and investigative equipment.

The United States will also help train the police and will pay part of their operational costs. No less than Secretary of State Henry Kissinger, after meeting with the Bolivian leaders, urged U.S. support of the Bolivian narcotics campaign.

This campaign, meanwhile, has caught several American youths who swear they are guilty of no more than minor misdemeanors or are innocent altogether. The narcotics penalties were so harsh, according to our sources, that Bolivian judges have been unwilling to sentence the young Americans to long sentences.

Many Americans, therefore, are waiting in legal limbo for hearings. Several have joined in sending President-elect Carter a poignant plea for help.

"We are presumed guilty until we prove ourselves innocent," they write. "Some people have not had a hearing in over a year. It seems that the Bolivian officials do not know what to do with us . . . We are all young . . . some of us with children, and all of us with families we love and miss."

Sensitive sources inside Bolivia tell us, for example, that one 21-year-old woman has been in jail for six months. Yet she was detained on purely circumstantial grounds.

She had been invited to the hotel room of friends to listen to music. According to sources, the entire group was arrested 30 minutes later by Bolivian police, who found 40 grams of cocaine underneath a mattress. One man confessed that the cocaine belonged to himself alone. The entire group, nevertheless, has been jailed.

The young woman was sent to a prison-convent. Each day she is locked in an outside courtyard and then herded inside at night. The Bolivian government contributes 12 cents a day to her support; it takes a monthly check from her parents to feed her.

There are many similar stories, which don't make pleasant reading during the Christmas season.

Footnote: In fairness, it should be reported that the State Department has quietly urged Bolivia to soften its drug sentences. This quiet diplomacy was probably responsible for a revision of the law on December 17. Hereafter, simple cocaine possession will be punished in Bolivia by a minimum of two years and a maximum of eight years behind bars. This is better, at least, than 25-year sentences.

Mr. WOLFF. Mr. Speaker, House Resolution 77, which I introduced on January 4, will reestablish the Select Committee on Narcotics Abuse and Control during the 95th Congress, in order to continue the work so fruitfully begun at the direction of the 94th Congress.

The initial purpose of the select committee will continue to be to help coordinate congressional policy on all aspects of drug abuse. It will continue to help the seven standing committees of the House which currently exercise jurisdiction over the many facets of drug abuse legislation to formulate comprehensive plans and responses to the problem.

On the basis of our work to date, it is clear that we must strike a balance between what are now independent anti-drug abuse approaches. Federal programs which aim at reducing supply must be balanced against those which are geared toward eliminating demand. Programs of enforcement must be coordinated with programs of treatment and prevention.

During the 5 months of the 94th Congress in which the committee was in operation, we held 9 days of hearings and issued four substantive reports. We have begun the task of analyzing the Federal strategy to combat drug abuse and will shortly issue our report and recommendations.

We are now at a critical time in this Nation's effort to control drug abuse which at the present time is at historically high levels. Drug related crime, numbers of addicts, overdoses, and other indicators have never been as high as they are at present.

It is essential that the House of Representatives take a lead role in formulating a comprehensive policy to deal with the national nightmare of drug abuse. It is our hope that our soon-to-be-issued report and recommendations will take an important step in this direction.

I am joined today by the other members of the select committee who have worked so hard during the closing months of the 94th Congress, and already this year. We have been able to meet, through the staff, with members of the President-elect's transition team to discuss the mutual effort of making the Federal strategy to combat drug abuse

more effective, and to discuss the results of our initial series of hearings here and in New York City.

I would like to take this opportunity to commend the work of the other Members who have worked over the years on this most urgent issue.

During the debate on the resolution to create the select committee the chairman of the Judiciary Committee, Mr. RODINO, made the following observation:

For a great many years, we in government have decried the dangers posed by narcotics, yet we have failed to act in a systematic coordinated fashion. The results have not satisfied any of us.

This fact alone is enough to justify the extraordinary step in creating a Select Committee of the House to focus our best efforts upon this terrible and crippling problem.

Mr. Speaker, we have begun upon this great and significant effort and I, therefore, ask that the House give its support in the same overwhelming manner in which it acted in the national interest last July. I invite my colleagues to join with me in supporting the reestablishment of the Select Committee on Narcotics Abuse and Control.

Mr. BADILLO. Mr. Speaker, I hope that my colleagues will vote to overwhelmingly support the reestablishment of the Select Committee on Narcotics.

As a member of the committee, I can attest that although it has been in existence for only a short period of time, its accomplishments are impressive. Subject to final membership approval, it will issue its first comprehensive and informative report, on hearings it held last fall on the subjects of law enforcement and rehabilitation. It has begun to compile a complete bibliography—which will be published—of resource materials in the area of drug abuse that presently exist. A report on a seven-nation factfinding trip by the committee's esteemed chairman, LESTER WOLFF, and three of our colleagues, Representatives JIM SCHEUER, CARDISS COLLINS, and BENJAMIN GILMAN has been published. And, in addition, under the leadership of my colleague from New York, Representative CHARLES RANGEL, a report on drug law enforcement and drug abuse in the New York City schools is being developed.

We have drawn up an equally impressive agenda for this session of Congress. It includes, among other things:

A study into the possibility of reducing demand for drugs through an increase in the effectiveness of current treatments, which will explore the types of programs available and the possibility of further, and more intense educational programs to alert our youth to the dangers of drug abuse.

An investigation of possible criminal justice system reform, with special emphasis on bail reform, sentencing, alternative modes of rehabilitation and decriminalization.

A study of the reduction of the supply of drugs, focusing on such areas as international trafficking, crop and income substitution for nations whose present heavy involvement in narcotics production derives from their need for a source of ready revenue.

In addition, the committee proposes to explore present law enforcement efforts, the interrelation between narcotics traffic and organized crime, levels of existing narcotics research, and efficacy of narcotics intelligence gathering and information sharing.

Mr. Speaker, I am enthusiastic about the progress achieved by our committee during its brief existence. I consider it to be an honor to be a member, and I urge my colleagues to allow its significant work to progress.

Mrs. COLLINS of Illinois. Mr. Speaker, narcotics abuse is indisputably one of the major problems facing the Nation today. It destroys our youth and increases criminal activity. It is a worry facing both big cities and small towns across the Nation and one that cuts across economic lines.

House Resolution 77, which reconstitutes the House Select Committee on Narcotics Abuse and Control, deserves the support of every Member. The committee, in its 5 month existence, has already collected valuable data, held hearings, released useful reports, and acquired information that will be important in determining better ways to combat narcotics use and abuse. The committee is essential for coordinating congressional policy and the direction it should take in helping to solve the drug abuse problem.

Narcotics abuse is not a problem that is going to be solved easily and nobody is pretending that it will. Through the efforts of the committee, however, the Congress may be able to come closer to positive steps aimed at coming to grips with narcotics abuse and its related and resulting consequences.

It is with these facts in mind that I am pleased to commend and to support the House Select Committee on Narcotics Abuse and Control.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING ESTABLISHMENT OF AD HOC SELECT COMMITTEE ON THE OUTER CONTINENTAL SHELF FOR CONSIDERATION OF H.R. 1614

Mr. BRADEMAS. Mr. Speaker, by direction of the Speaker, I offer a privileged resolution (H. Res. 97) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 97

Resolved, (a) That pursuant to Rule X, clause 5, the Speaker is authorized to establish an ad hoc Select Committee on the Outer Continental Shelf to consider and report to the House on the bill H.R. 1614, a bill to establish a policy for the management of oil and natural gas in the Outer Continental Shelf, to protect the marine and coastal environment, to amend the Outer Continental Shelf Lands Act, and for other purposes; and on any related bill or matter on this subject which the Speaker determines falls within the jurisdiction of the select committee as formulated in subsection (b) of this section.

(b) The select committee shall be composed of Members of the House appointed by the Speaker from the Committee on Interior and Insular Affairs, the Committee on the Judiciary, the Committee on Merchant Marine and Fisheries, and such other Members from other committees as the Speaker may appoint so as to insure the expeditious consideration and reporting of appropriate legislation. The Speaker shall designate one of the Members as chairman.

SEC. 2. In so far as applicable, the provisions of rule XI, clauses 1 and 2, shall apply to the select committee.

SEC. 3. To enable the Select Committee to carry out the purposes of this resolution, such Committee is authorized to utilize the services of the staffs of those standing committees of the House from which Members have been selected for membership on the Select Committee.

SEC. 4. (a) The Select Committee is authorized and directed to transmit its findings and report to the House such matters as may have been referred to it and on which it has acted as soon as practicable, but no later than the last day of the First Session of the 95th Congress.

(b) Any bill and accompanying report of the Select Committee shall be subject to the rules of the House in the same manner as though such bill and report had been reported from a standing committee of the House.

SEC. 5. The Select Committee shall expire upon completion of the legislative process, including final disposition of any veto message, with respect to all legislation reported by the Committee.

SEC. 6. The effective date of this resolution will be January 3, 1977.

Mr. BRADEMAS (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

Mr. MICHEL. Mr. Speaker, reserving the right to object, having not seen the resolution, may I simply inquire whether or not the language of the resolution is consistent with the language of the privileged resolution we had before in the last Congress constituting the makeup of that committee?

Mr. BRADEMAS. Mr. Speaker, if the gentleman from Illinois will yield, I would like to ask the gentleman from New York (Mr. MURPHY) to answer that question.

Mr. MURPHY of New York. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Speaker, the language is basically consistent with the resolution creating this ad hoc select committee in the past Congress.

The membership of this committee will be the same as it was in the last Congress, with the exception of one majority member who did not stand for reelection. With the committee changes that are taking place right now involving individual members, there may be a difference in the full committee membership as to the service of those individual members. However, the membership will be basically the same as it was in the last Congress.

Mr. MICHEL. Will the ratio of membership as between the majority side and the minority side remain the same?

Mr. MURPHY of New York. There will be no difference between the ratio of membership on the majority and minority sides.

Mr. MICHEL. Is the jurisdiction of this ad hoc committee confined to consideration of H.R. 1614?

Mr. MURPHY of New York. That is the bill number to which the resolution refers.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I thank the gentleman.

I would like to advise the gentleman from Illinois (Mr. MICHEL) that in addition to one majority member who did not seek reelection, a member of the minority side, the present Governor-elect of the State of Delaware, is also no longer a potential member of this committee. I would be curious to know whether or not the minority members will be elected the same as before. In other words, will we have a right to name a replacement for Mr. du Pont?

Mr. MICHEL. Well, of course, no members have formally been chosen yet for that matter, and I would insist that we retain the right that we had before in the selection of our own members to serve on that committee.

Mr. Speaker, I might inquire of the gentleman from New York (Mr. MURPHY), am I right in that assumption?

Mr. MURPHY of New York. Mr. Speaker, if the gentleman will yield, the minority membership is, of course, the business of the minority side.

Mr. FISH. Mr. Speaker, if the gentleman from Illinois will yield further, my question comes now as to whether the ratio of the minority and the majority sides will remain the same as it was the last time.

Mr. MICHEL. Yes. I inquired of the gentleman from New York (Mr. MURPHY) earlier, and it was my understanding that the ratio was to remain as it was in the last Congress. Is that correct?

Mr. MURPHY of New York. The gentleman is correct.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, the only question I have regarding the continuation of this select committee on which I have had the honor to serve with our distinguished chairman is regarding its tenure, its existence, and the length of time it will remain as a committee.

Mr. Speaker, we reached a conclusion and wrote a bill and resolved most of our differences. We debated the bill on the floor here, and it was recommitted only at the very end.

Mr. Speaker, it seems to me that the committee would not be needed for a 2-year life; the legislation is already in form, and there should be a more limited time assigned to its existence.

Mr. MURPHY of New York. If the gentleman will yield further, Mr. Speaker, I understand that, as a consequence, authorization was asked for only until the end of the first session, however, we expect to finish by the 30th of June since there was a feeling that basically the work was done. It is a question of the other body's ability to meet with us as well as the holding of hearings, to enable this administration to have enough time, and to see just what the ramifications of the legislation are.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman from New York.

Mr. MICHEL. Mr. Speaker, further reserving the right to object, I ask one more question. I note that the language in section 4 refers only to the first session of the 95th Congress. Am I to assume that the ad hoc committee then would cease to exist after the 1st session, or would it be ongoing through the 2d session of the 95th Congress?

Mr. MURPHY of New York. If the gentleman will yield, we would anticipate that it would be done by the 30th of June, in the first session.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Speaker, I thank my friend, the gentleman from Illinois (Mr. MICHEL), for yielding.

I have discussed this matter at length with the whip, with the distinguished chairman, and also with my friend and colleague, the gentleman from New Jersey (Mr. FORSYTHE).

We have kept a careful eye on the expenditures. The work is progressing very well in a highly cooperative atmosphere.

Mr. Speaker, I therefore would assure the gentleman that I think this is a reasonable request. They do not want to stay in business any longer than is necessary to do the job which they are doing and doing very, very well.

Mr. MICHEL. Mr. Speaker, I thank the gentleman for his comments, and I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BRADEMAS. Mr. Speaker, I think the dialog that we just had under the reservation of objection to my unanimous-consent request has afforded an opportunity for a discussion of the merits of this resolution.

Mr. MURPHY of New York. Mr. Speaker, I introduce for appropriate reference a bill to amend the Outer Continental Shelf Lands Act of 1953. When enacted, this bill will be the first major revision of the present statute since its initial passage almost a quarter of a century ago. It will establish a new statutory regime for the development of the oil and natural gas resources of the Outer Continental Shelf extending outward from the American coastline—a regime that will promote the rapid, efficient, and orderly development of the energy resources of the Continental Shelf in ways that are compatible with the protection of our coastal and marine environment.

There is no doubt that the 1953 act worked well for a considerable length of time. But the simple fact is that in today's world, the present statute is no longer adequate to the task of developing the energy resources of the Outer Continental Shelf. The act's leasing arrangements give the Federal Government no flexibility so that it may adjust the way in which it awards leases to changing economic conditions. And the act is silent about the participation of the States in the Federal regulatory process, about the protection of the coastal and marine environment, and about the safety of the worker. The bill I am introducing today would change all this. Using the present statute as its takeoff point, it would bring the Outer Continental Shelf Lands Act into the modern world. It is in this sense that I speak of a new statutory regime.

The bill I am introducing today is the same bill that was before the House at the end of the last working session of the Congress. In the closing days of the session, the bill was recommitted to a conference committee of the Senate and the House. There was no time for further action, and none was taken. The recommittal was inspired by a diehard minority of the House, assisted by the Secretary of the Interior and the major oil companies. Their tactics were delay and distortion. Their ultimate hope was that the bill would never be revived. But time has its own irony, and the 3-month period since recommittal has only served to underscore the importance of the bill.

In this 3-month period, the United States was made acutely conscious of its dependence on imported oil. In the spring of 1975, the House created the Ad Hoc Select Committee on the Outer Continental Shelf to consider and report to the House on the predecessor of the bill I am introducing today. The select committee was drawn from the membership of three standing committees, all of whom had jurisdiction over one important aspect or another of the bill: Merchant Marine and Fisheries, Judiciary, and Interior and Insular Affairs. When the select committee began its work, the United States was importing approximately 35 percent of the oil it consumed. Today, slightly less than 2 years later, the Nation is importing approximately 44 percent. This is a dangerously high percentage and places our national economy at severe risk.

When the oil ministers of the Organization of Petroleum Exporting Countries—OPEC—met last month to consider a price increase for their oil, a majority of OPEC, led by Iran, suggested that the price be increased by 15 percent. The suggestion sent a shiver through the American business world. As things turned out, a two-tier price was established because of the restraint of Saudi Arabia, OPEC's largest producer. The lower tier had a price increase of only 5 percent, which can be absorbed with relative ease. But had the majority prevailed, the consequence for the American economy would have been inflation and its concommitant effects.

A DECLINE IN CONSUMER SPENDING AND A LOSS OF JOBS

And we should never forget that it is OPEC and not the United States that possesses the ultimate economic weapon—an oil embargo. If there is another embargo, there is no doubt that the economic dislocation in our country will be considerably more severe than it was after the 1973 embargo—and that we will feel its effects for a long time.

The high level of our oil imports has also had a deleterious effect on our balance of payments. In 1975, the United States had a trade surplus of $11 billion. In the first 11 months of 1976, it had a

deficit of $5 billion. There are many commodities involved in American world trade and hence many reasons for the shift. But oil imports are the single largest factor. In the first 11 months of 1976, our import bill was $29.1 billion. For the same period in 1975, it was $22.6 billion. The jump was $6.5 billion.

There has been much discussion of the threat to our national economy posed by our growing dependence on OPEC oil. There has been little discussion—much too little, in my view—of the threat to our national security. In the last analysis, it is oil that runs the wheels of our National Defense Establishment, and more and more of the oil we import is coming from distant localities. Before the 1973 oil embargo, only about 15 percent of the total oil we imported came from the Arab countries bordering the Persian Gulf and the Mediterranean. The figure is now 34 percent. Only about 17 percent came from Iran, Indonesia, and Nigeria. The figure is now 29 percent. In the meantime, our oil imports from Venezuela have declined from 21 to 10 percent: from other Latin American countries, from 19 to 13 percent; and from Canada, from 22 to 9 percent. What this means is that our oil lifelines are now longer than they were 4 or 5 years ago and cannot be as easily defended. A foreign superpower with large naval strength could cut these lifelines with relative ease in the event of conflict. Today we are very much concerned about the continuous expansion by the Soviet Union of its military and naval forces. We should be equally concerned about the vulnerabiilty of our oil lifelines. One answer is the development of the oil resources off our own shores so that we may reduce our dependence on OPEC oil.

But the rapid development of offshore oil and gas must never be at the expense of the quality of the coastal and marine environment. Last month there were two large oil spills from tankers—one off Nantucket and the other at the mouth of the Delaware River. I do not mean to equate tanker operations with offshore drilling. The evidence is that there is considerably less risk of an oil spill in the case of offshore drilling than in the case of tanker transportation of oil. But the two tanker spills teach us a very important lesson—that a spill, when it does occur, can be very costly, in both social and economic terms. It can foul beaches and destroy the beauty of a coastline for hundreds of miles. Here the loss is not only esthetic, but also economic. In many coastal areas, tourism is the main source of income, and the destruction of recreational areas means severe economic hardship for those who depend on tourism for their income. A spill can also destroy the spawning grounds of fish and shellfish and their ocean habitats. For our commercial fishing industry, the loss may be measured in millions of dollars a year.

Over the long term, the preservation of the living resources of the oceans will become increasingly important. It is estimated that the world's population will double over the next 25 years and endanger the world's capacity to feed itself. The fish and shellfish that spawn and dwell off our shores will be a vital source of food—not only for our nation, but for the world at large. And so as we proceed to develop the energy resources of the Continental Shelf, we must insure that the marine environment is adequately protected.

The threat of a large OPEC price rise and the tanker spills were dramatic events and were extensively covered by the American press. But there has been a third event to remind us of the importance of the bill I am introducing today. It has not been a dramatic event; it has swept over us slowly. I am referring to the cold winter along the eastern coast of the United States. Over the past few years, there has been talk of a shortage of natural gas, although none materialized. This year, as the cold increases the demand for heating supplies, the threat will probably become a reality in the northeast. The bill I am introducing today has an important provision designed to deal with the chronic threat of a natural gas shortage. It would require the Federal Power Commission to permit a natural gas distributor involved in the development of offshore oil and gas to transport any gas it obtains from its lease area to its service area. Without this mandate, a State regulatory agency may well be reluctant to authorize a natural gas distributor to participate in offshore activities. The mandate, by making the distributor's service area the ultimate beneficiary, will help overcome this reluctance.

This is only one of the many ways in which the bill would modernize the Outer Continental Shelf Lands Act of 1953. Another important way is the set of provisions dealing with the economic arrangements for the leasing of Outer Continental Shelf Lands. We all recognize that in the development of offshore oil and gas, the oil companies will be called upon to risk their capital. They are entitled to earn a fair return on their capital investment.

But we should never forget that these lands are the property of the Federal Government and belong to the Nation at large. The Government should be able to recapture at least a reasonable portion of any windfall profit the producing companies earn. When the Government leases Outer Continental Shelf Lands for the exploration and production of oil and gas, it must strike a proper balance between profits to the oil companies and a fair return to the Government as the owner of these lands.

I do not think that the leasing arrangements of the Outer Continental Shelf Lands Act, as it stands today, meets this standard. The present statute offers only two methods of auctioning leases. One is to fix a royalty of not less than 12½ percent of what is produced and award leases to the company bidding the largest cash bonus. The other is to fix the cash bonus and to award leases to the company bidding the largest royalty percentage. The second is probably useless, and the first has proven to be the method historically chosen by the Secretary of the Interior. The cash bonus bid system worked reasonably well, at least until the early 1970's; but in today's world, it no longer seems to be the best method. One difficulty is that each bid will require a very large amount of front money—at a time when the economy is facing a severe shortage of investment capital. This may very well mean fewer bidders per tract, which should worry any auctioneer, including the Federal Government. Large cash bonuses may also mean less capital for exploration. There is also increasing awareness that large cash bonuses may be an invitation to early abandonment of an exploratory effort. If a company were to bid $100 million, sink a few exploratory wells, and find nothing, the company might be tempted simply to take an immediate tax writeoff and forget the whole thing.

Another criticism of cash bonus bidding is that there is too much uncertainty for a bonus bid to reflect the true value of a tract. The shelf as a whole has huge reserves of oil and gas, but a bidder cannot be sure about any particular tract or groups of tracts. A consortium led by Exxon, for example, bid $212 million for a single tract off the gulf coast of Florida in the conviction that it contained large reserves of oil and gas, but found nothing. It may be commercial wisdom to discount the risk of discovery, but will the Government then get a fair return for its leases?

The risk of uncertainty is being compounded because the coastal States lack a voice in the development of offshore oil and gas. In consequence, some State governments are withholding permission for the construction of onshore facilities to receive and handle offshore oil and gas, and they and environmental groups are turning to the courts in an effort to halt lease sales. In effect, the oil companies are being asked to bid on leases that they may not be able to exploit fully because of this opposition. Their bids will surely reflect this fact.

The new bill would remedy the defects of the present statute in the auctioning of Federal leases of Outer Continental Shelf lands. It would end the exclusive reliance on cash bonus bidding. It would provide alternative leasing arrangements and require the Department of the Interior to experiment with them during the next 5 years to that we may work out the best arrangements for the future. The bill also has provisions designed to spur competition and to prevent monopolization by the large companies through joint bidding.

Still another important way in which the new bill would modernize the Outer Continental Shelf Lands Act is by opening up the Federal decisionmaking process with regard to offshore oil and gas development. It would give the coastal States, and other States that may be affected by offshore activities, an opportunity to participate in the process. It would also give local communities that may be affected and the public at large an opportunity to have a say.

At the present time, the Secretary of the Interior, who administers the Federal program for the development of offshore oil and gas, does so almost as a closed shop. He is under no statutory compulsion to receive the views of State governments, local communities, or members of

the public who may have an affected interest, and he does not always give their views a fair hearing. This situation has created considerable hostility toward the Federal program; and, as I have just pointed out, this hostility has found expression in an unwillingness of State governments to permit the construction of onshore facilities and in legal action by State governments and environmental groups to halt lease sales. If we are to create a spirit of cooperation between the Federal Government and State governments in the development of offshore oil and gas and if we are to secure a fully informed Federal decisionmaking process, we must open the process so that State governments and others may present their views and be heard. The new bill would provide this opportunity. It would particularly give State governments the weighty voice they should have in the administration of a Federal offshore oil and gas program.

The bill I am introducing today also contains a variety of provisions that would insure meaningful protection for the coastal and marine environment. One is the requirement that every holder of a Federal lease of Outer Continental Shelf lands must submit a development and production plan to the Secretary of Interior for his approval before the lessee moves from exploration to production. The Secretary must then decide whether development and production pursuant to the plan is a major Federal action for purposes of the National Environmental Policy Act of 1969. If he determines that it is a major Federal action, the Secretary must prepare an environmental impact statement. The bill makes it clear that at least once prior to major development in an area or region where there has been no prior development, the Secretary must find that development and production pursuant to the plan constitutes a major Federal action. Thus, in each new area, there will be at least one environmental impact statement. The impact statement itself must include such things as the probable impact on the human, marine, and coastal environments; unavoidable adverse environmental effects, such as air and water pollution or undesirable land use patterns; and the extent to which there may be tradeoffs betwen short-term environmental gains and long-term losses or the other way around.

Another environmental provision would require the National Oceanic and Atmospheric Administration within the Department of Commerce to gather information about the present environment of areas that would be affected by offshore oil and gas development and to monitor the environment on a continuing basis. And the bill would establish the extent of liability for oil spills and provide compensation for oil spill damage and to pay for the cleanup of spills.

Finally, I should point out that the new bill contains significant new provisions designed to enhance the safety of working conditions and to protect the worker—provisions that do not now appear in the Outer Continental Shelf Lands Act. The bill would require the promulgation of new safety and environmental regulations for the worker. It would also require the National Academy of Engineering to conduct a study of safety so that we may continue to improve our protective measures for those who are actually engaged in offshore activities.

The bill to amend the Outer Continental Shelf Lands Act of 1953 is a long, detailed, and comprehensive bill. It is the product of intensive and thoughtful study. The Ad Hoc Select Committee on the Outer Continental Shelf was established in April 1975. Over the next 8 months, it held hearings in 14 different cities—in Washington, on the Gulf of Mexico, and along our Atlantic and Pacific coasts. It heard more than 300 witnesses—officials of the Federal Government, State and local officials, representatives of the oil industry and of the natural gas industry, representatives of the fishing industry, geologists, economists, labor organizations, environmental organizations, and citizens' groups. The hearing record totaled more than 8,000 pages. In addition, the committee received briefings by the Department of the Interior, the Congressional Research Service, the American Association of Petroleum Geologists, and the American Petroleum Institute. It also had the benefit of special studies on offshore energy problems conducted by the Office of Technology Assessment of the Congress. And the committee itself visited and inspected actual drilling operations off Louisiana, near Santa Barbara, Calif., in the North Sea, and on the North Slope of Alaska.

Once the hearing process was completed, the committee turned to the preparation of a legislative text. A working draft was written, and the committee spent the next 4 months marking it up. In all, the committee considered almost 200 amendments. The bill then went to the House floor, where an additional 80 amendments were proposed and considered. Throughout this process, the committee received and carefully reviewed the views and recommendations of the Secretary of the Interior. In February of last year, the Secretary proposed 14 changes in the working draft of the bill. The committee accepted nine of these recommendations in full and five in part. In April, the Secretary submitted 39 additional amendments. Fifteen were accepted in full; and six, in part.

The Senate had pioneered the congressional effort to amend the Outer Continental Shelf Lands Act and had passed a bill in 1975. The House bill built on that effort. A conference committee was established to resolve the differences between the Senate and House versions. At this juncture, the Secretary of the Interior submitted once more those of his earlier proposals that the House could not accept. Late in August, the Secretary of the Interior wrote Senator Jackson informing him that the Senate version was "objectionable to the administration in almost every section" and that there were 13 areas in the House version where amendment was critically needed if the bill was to be made acceptable to the administration. While the letter came virtually at the twelfth hour, its substance was not new. The Secretary's arguments had already been carefully and exhaustively reviewed by the Congress, and the conference committee rightfully regarded the Secretary's submission as a delaying tactic. It was able to dispose of it with relative speed. The conference committee then proceeded to accept the House version with some amendments from the Senate version, and the bill reported out of the conference committee was sent back to the two Houses for final passage.

The last Congress was then nearing the close of its working days, and the large oil companies mounted an intensive campaign to stave off final congressional action. They did so directly, through the American Petroleum Institute—their trade organization—and through the National Ocean Industries Association, a trade association comprising companies that supply materials and services to the major oil companies.

In a full-page advertisement in the Washington Post, NOIA, which was originally established by Exxon as an additional lobbying arm, charged that the bill reported out by the conference committee would delay the development of the energy resources of the Continental Shelf by as much as 2 years by adding new regulatory measures to the present statutory regime. NOIA alleged that this delay would ruin its member companies and make the United States even more dependent on foreign oil. The allegation was ridiculous because the premise was ridiculous. The new regulatory requirements established by the bill replaced old ones; they did not add new steps. There was no doubt that if the Department of the Interior did its job efficiently, the new regulatory measures would not create delay.

The second distortion was that the bill would put the Government in the oil business by mandating a Federal program of exploration. The major oil companies alleged that this was the first step toward the creation of a national oil company. The bill had no such provision. All it asked was the Secretary see to it that there was a program of exploratory drilling so that the national security might be adequately safeguarded, the marine environment might be adequately protected, and the development of offshore oil and gas might be expedited. How the Secretary carried out this requirement—whether he left actual exploration to the industry or contracted for it—was discretionary. Moreover, if he elected to proceed by Government contract, he could do so only subject to the appropriation process of the Congress.

In essence, the issue of a national oil company was a nonissue. But it was repeated so often and with such inflammatory rhetoric by a die-hard Republican minority that it eventually seemed to be a real issue. With 3 working days of the session remaining, the House voted by a slim margin to recommit the bill to the conference. There was no time to reconsider the bill in conference. Even if the House acted as expeditiously as possible, there would have been a filibuster in the Senate, and the Senate rules on cloture would have left no time for Senate consideration before adjournment.

The vote to recommit effectively killed the bill for the year, as was the intent of the major oil companies, the Ford administration, and their allies in the Congress.

It is now a new Congress, and I am introducing the bill to amend the Outer Continental Shelf Lands Act that came out of last year's conference committee. Over the intervening months, the Nation's energy picture has continued to darken, and we have all become more aware of the fragility of the coastal and marine environment, of the need for safe working conditions in offshore areas, and of the desirability of giving the States a strong voice in the Federal decisionmaking process with regard to the development of offshore oil and gas. The bill I am introducing today will lighten the picture. It is a bill which, when enacted, will make a profound contribution to the solution of the Nation's energy crisis—and in a manner that takes into account the needs of our States, the protection of our marine and coastal environment, and the protection of the worker. It is a bill that is vital to our economic and social well-being as a nation and to our national security.

Mr. BRADEMAS. I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 77 and House Resolution 97, the two resolutions just agreed to.

The SPEAKER pro tempore. Is there obection to the request of the gentleman from Indiana?

There was no objection.

VETERANS' RELIEF LEGISLATION

(Mr. ANDERSON of California asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. ANDERSON of California. Mr. Speaker, today I am introducing legislation that would establish a program of mortgage cancellation life insurance for veterans with service-connected disabilities which now make it impossible for them to obtain commercial life insurance.

As I am sure many of you are quite aware, a veteran with a service-connected heart condition or other disability can be in the position of being completely unable to obtain commercial life insurance at any price. He may be eligible for a VA loan to purchase his home, but as the law now stands, he cannot buy mortgage cancellation life insurance to protect his widow in the case he should die before the loan is paid.

My legislation would direct the VA Administrator to set up a program with premiums established at a level which provide a self-sustaining program. These premiums would thus insure that this new plan would not become an additional drain on the Treasury. Such coverage would not extend beyond a veteran's 70th birthday.

Mr. Speaker, I believe that this legislation would be a Godsend to many disabled veterans and would not bear any additional cost to tapxayers other than for administration. I hope the appropriate committee will schedule hearings at the earliest possible convenience and my colleagues will join with me and cosponsor this most urgent legislation.

PRESIDENT-ELECT CARTER SHOULD NOT GIVE A BLANKET PARDON TO ALL DRAFT EVADERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 60 minutes.

(Mr. MONTGOMERY asked and was given permission to revise and extend his remarks and include the extraneous matter.)

Mr. MONTGOMERY. Mr. Speaker, it is indeed encouraging and significant to see so many Members present this afternoon to discuss the proposal of President-elect Carter to issue a blanket pardon for those who illegally evaded the draft during the Vietnam conflict. I might point out that Mr. HANSEN and Mr. DAN DANIEL each have a 60-minute special order following this one in order that we might have adequate time to fully discuss the pardon proposal and present our reasons for opposing it.

Since there are so many of our colleagues who wish to express their views, I will be brief in my own remarks, but I did want to see the tone for today's discussion.

Mr. Speaker, from the outset let me stress that this is a nonpartisan matter. Our strong opposition to a blanket pardon cuts across party lines. This is a matter of great importance to all Americans no matter what their political persuasion.

It should also be stressed that as each of our colleagues rise to speak they will be doing so on behalf of the people they represent. In effect, it is the American people speaking out in opposition to a blanket pardon. We can only hope President-elect Carter will heed the words of his fellow Americans as expressed by their elected representatives.

Based on reports I have received from Atlanta and Plains, Mr. Carter intends to issue a blanket pardon for everyone who illegally evaded the draft during the Vietnam conflict. He will evidently do this his first week in office. He has further expressed an intent to look into the matter of military deserters during the Vietnam conflict and less than honorable discharges. I understood the proposal has not been finalized, but this is generally what he is considering at this time.

Mr. Speaker, let us make no mistake about this controversial issue. Those who evaded the Selective Service System laws by fleeing the country or going "underground" broke the law. There should be no confusion in anyone's mind about this fact. Those who evaded the draft, whatever the reason, broke the law. As lawbreakers, I feel very strongly they should make themselves available to the appropriate authorities for disposition of their cases through the judicial system. There is absolutely no reason for establishing special rights and privileges for this one group of lawbreakers, while prosecuting others who break numerous other laws in the United States Code. Each of the draft evader cases should be decided on their individual merits and not erased by the simple stroke of a pen.

Another reason I oppose a blanket or universal pardon for Vietnam-era draft evaders is because of the dangerous precedent such an action would set. Contrary to what some would have you believe there have never before in the history of our Nation been an outright blanket pardon for those who illegally avoided our laws of conscription for military service.

There have been provisions for case-by-case reviews of those who violated conscription laws with provision for alternate service, but never a universal pardon across the board. I point this out to show that a blanket pardon would definitely be a precedent.

As to why this precedent would be dangerous it would be inviting wholesale resistance or evasion in any future military conflicts with the expectation of forgiveness once the hostilities ceased. While it is true that we are not presently operating under the Selective Service System law, there is no doubt we would have to return to it if America were ever again forced into a combat situation. Furthermore, the esteemed chairman of the Senate Armed Services Committee, JOHN STENNIS, recently stated that he felt it was going to be necessary for the United States to return to the Selective Service System to maintain our Armed Forces strength levels even in peacetime. I feel very strongly that a blanket pardon at this time would only serve to undermine the Selective Service System law in the future.

A further reason I oppose a blanket pardon is I feel it would be unfair and an injustice to those who did abide by the law and served in Vietnam. Unfortunately, far too many of those who answered their Nation's call returned home injured and some did not return at all.

I feel sure many of the young men who served in Southeast Asia would have preferred not to have gone, but they did because they chose to abide by the law rather than break it. It should also be noted that by simply labeling the Vietnam conflict as an unpopular war is not justification for violating the laws of the land and expecting a clean slate once the fighting stopped. No war is popular and never will be. I also point to a survey of civilian draft evaders which showed that only 14.9 percent gave their opposition to the Vietnam conflict as their reason for dodging the draft.

Mr. Speaker, when I say a blanket pardon would be an injustice to those who did serve and to the families who lost their loved ones, others sometime say, "but we never declared war, so why should the draft evaders obey the Selective Service System law?"

My answer to them is twofold. First, we are not afforded the right to selec-

tively obey those laws we like and disobey those we do not like. To do so would bring our democratic form of government to its knees and result in chaos.

My second response is to point out that year after year after year the executive and legislative branches of Government condoned and supported our involvement in Southeast Asia through both word and deed. True, we never had an official declaration of war, but it can never be disputed that in effect war was being declared each time the President requested and a majority of the Members of the U.S. House of Representatives and the U.S. Senate approved Federal tax dollars to support our military involvement. Never once was such majority support lacking as long as we had American personnel actively engaged in combat in Southeast Asia.

Another problem which might arise from a blanket pardon would concern those who did refuse to obey the draft laws, but at the same time followed the more honorable course of surrendering themselves for the appropriate judicial proceedings and served whatever sentence was imposed.

These young men are now seeking to begin life anew and put past events behind them. From what I have been told, they do not wish to be reminded of the past and many do not want their present friends and neighbors to find out about what happened in the past. Yet Mr. Carter's blanket pardon would do this since it evidently would apply to them also. It would simply call attention to them once again, which would be an injustice to those who paid the price.

I mentioned earlier that Mr. Carter is also considering some type of pardon for military deserters and those who have less than honorable discharges. In both instances, I feel he would be well advised to allow these cases to be determined in normal military channels. I believe the services are doing a good job of reviewing the less than honorable discharges. I feel more boards and teams could be placed in the field in order to speed up the process of review, but I see no reason for Mr. Carter to intervene in this area. The military is proceeding according to established procedures and law.

I might point out that I personally have more compassion for those who abided by the Selective Service System law and later ran afoul of military regulations and received a less than honorable discharge than I do for those who chose to violate the law in the first place.

Mr. Speaker, I could list several more reasons for my very strong opposition to President-elect Carter's blanket pardon, but I want to save time for the other Members who also wish to be heard on this matter. However, there is one final point I would like to stress. Never once has Mr. Carter sat down and talked with the veterans' organizations in America in a face-to-face situation to learn their views on the pardon and their suggestions for dealing with the matter. There is no other group in this Nation closer to the situation than our veterans who did serve. We have some 29 million veterans, plus their families, representing all income levels, race, creeds, and religious beliefs. Unfortunately, they have had no input into Mr. Carter's decision which is a mistake in my opinion.

I realize it is simply not enough to oppose something without offering a viable alternative. For this reason, I call on President-elect Carter to drop his blanket pardon proposal and instead institute a system of case-by-case reviews similar to that of President Truman following World War II.

While I feel sure there will be some who evaded the draft deserving of pardons, I feel equally certain that all should not be automatically and universally pardoned thereby allowed to go free without paying for their mistake.

When I speak of case-by-case reviews, I am not speaking of those who dodged the draft alone. I also mean those who are listed as deserters and those with less than honorable discharges. These people are also deserving of compassion and understanding. However, I reemphasize my belief that the deserter and discharge matter should be handled by established military procedures which are currently in effect and operating as they should.

Mr. Speaker, let me conclude by once again stressing that this is a nonpartisan issue. We are not attempting to embarrass Mr. Carter. We are simply allowing the American people to speak through us and express their opposition to this unwarranted and illadvised proposal to issue a blanket pardon for Vietnam-era draft evders. We only ask that President-elect Carter listen to a majority of the people who elected him to the highest office in the land and heed their wishes for a compromise proposal on the pardon issue.

WHY THE VETERANS OF FOREIGN WARS OF THE UNITED STATES WILL NEVER AGREE TO A BLANKET PARDON OF DRAFT DODGERS OR MILITARY DESERTERS

(By R. D. "Bulldog" Smith, National Commander-in-Chief)

The 1.8 million members of the Veterans of Foreign Wars of the U.S. (including over 500,000 Vietnam veterans), joined by 567,000 members of our Ladies' Auxiliary, oppose with one voice the apparent decision of President-elect Carter to issue a blanket pardon covering all Vietnam war draft dodgers. With equal vehemence, we urge President Ford to hold firm on his decision not to grant an 11th hour mass pardon.

As first announced, Mr. Carter's campaign blunder would affect about 4,000 law breakers. Press reports now indicate that this early blunder is being parlayed by his staff aides into an exercise of mass lunacy; ie, pardons, not only for draft dodgers, but for military deserters and so-called "bad paper" dischargees—some 250,000-plus.

Why will the V.F.W. not agree to Mr. Carter's announced effort to "bind up the nation's wounds?"

To begin with, whose "wounds" will a blanket pardon "bind up?"

Surely *not* the overwhelming majority of the next-of-kin of the 56,234 American dead from all causes in Vietnam (a war we chose not to win), the 303,000 wounded, the families of the hundreds still carried as Missing in Action, the 591 returned Prisoners of War, the 2½ million who served honorably in Vietnam, the 600,000 conscriptees who served in Vietnam, like it or not, and suffered 71,500 killed and wounded while so doing.

No, Mr. Carter's folly would "bind up" only the self-preening egos of those hard core "amnesty addicts" who have always viewed the amnesty issue as a convenient weapon to discredit our country, our history, and our institutions, and find draft dodgers and deserters to be handy props in this paranoid effort.

As to the future, a distinguished U.S. Senator, John Stennis, Chairman of the Senate Armed Services Committee, foresees the need soon for a resumption of obligatory military service. I believe the need for such a step is becoming increasingly clear. A 1977 blanket pardon would destroy forever the pride and honor connected with service to our beloved country and gut a future conscription before its inception.

But even today there is a serious desertion problem that a blanket pardon would compound. In 1976, for example, the Navy suffered the highest desertion rate in its history—more than double the highest Navy rate during the Vietnam war. The Marines and the Army are also experiencing serious desertion problems.

If war-time desertion and draft dodging are to be excused by the new President (Commander-in-Chief of the Armed Forces), why not the less serious offense of peacetime absences? In the era of all volunteer forces, a young man could reasonably make a decision to "volunteer out" as easily as he "volunteered in," and how could he be held accountable?

"Blanket pardon" would constitute class action by a President which would equal mass burial of due process of the law. Judicial findings in light of individual circumstances would never see the light of day. A general pardon or amnesty would define the word "prejudicial."

Amnesty on its merits breaks down badly in terms of (a) equity; (b) precedent; and, (c) faith in the efficacy of our home-grown system of justice—and whatever else may or may not be wrong with the U.S., American justice (properly prodded by a free press) is doing just fine.

The new President has a plateful of real problems to work on; the self-preening and divisive issue of "amnesty" has been center stage for far too long. No American should expect more, nor settle for less, than his fair day in court.

A final thought.

More than most, the V.F.W. knows full well that wars are fought by boys, suffered by women, and started by men old enough to know better.

But—and here's the crucial "but"—while we hate the war, we will *never* desist in our support for those who are called upon to be our warriors.

I earnestly commend this approach to President-elect Carter and call upon him to reconsider his announced plan and let our on going systems of justice accommodate all violators of the law, before irremediable damage is pointlessly inflicted on the country he has been summoned to lead.

STATEMENT BY NATIONAL COMMANDER WILLIAM J. ROGERS, THE AMERICAN LEGION

The American Legion is unalterably opposed to any blanket amnesty or pardon for draft evaders or military deserters. We have consistently urged that each case be tried and/or reviewed on an individual basis by existing judicial and administrative authority.

Our views are firmly founded upon the demonstrated compassion and fairness of the American judicial system and the responsibilities of citizenship. The military deserters and those receiving less than honorable discharges constitute less than 6% of the nearly 9 million Americans who honorably served during the Vietnam period. To focus national attention on this small group and not upon the vast majority who honorably served, were wounded, held prisoner or died, is a serious reversal of national priorities.

Additionally, any unconditional amnesty or pardon may seriously impair our already

lagging recruiting efforts in the all-volunteer environment and will bring into serious question our ability to ever conscript military forces in a future national emergency.

The official policy of the 2.7 million members of The American Legion, unanimously adopted at our 58th National Convention is:

Whereas, young men throughout the history of the United States have patriotically answered the call of their country and defended its lands and ideals; and

Whereas, hundreds of thousands of these young men volunteered for, or accepted, duty in Vietnam and served with honor and distinction; and

Whereas, thousands were captured by the enemy and were imprisoned and/or tortured for long periods of time; and

Whereas, the question of amnesty for those who have fled the country to avoid induction into the Armed Services, or have deserted their assigned military units to avoid military obligation during the Vietnam conflict has been again raised; now, therefore, be it

Resolved, by The American Legion in National Convention assembled in Seattle, Washington, August 24–26, 1976, that we reaffirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice; and, be it further

Resolved, that we urge the United States Government and its courts of justice to prosecute to the full extent of the law, all individuals charged with evading the military draft; and, be it further

Resolved, that all members of The American Legion are urged to publicize our stand on draft evaders, deserters and blanket amnesty.

DISABLED AMERICAN VETERANS,
Washington, D.C., January 10, 1977.

Hon. G. V. "SONNY" MONTGOMERY,
Rayburn House Office Building, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: On behalf of the 522,000 members of the Disabled American Veterans and the 58,000 ladies of the Auxiliary, I wish to commend you for the leadership role you have taken in attempting to persuade President-Elect Carter to reconsider issuing a general pardon (amnesty) for draft evaders and military deserters.

The most recent National Convention of the Disabled American Veterans held in Miami Beach, Florida, August 1–5, 1976, unanimously approved a resolution opposing any proposal that would grant a blanket amnesty for such evaders and deserters. For your convenience, I am enclosing a copy of Resolution No. 349 which calls for a review of each case on its individual merits utilizing existing judicial and military systems.

As you are aware, the Clemency Program, initiated in September, 1974, implemented a "case-by-case" review procedure. It is interesting to note that of the 14,514 cases considered, 13,603 either received clemency or were granted outright pardons. Considering the high rate of favorable determinations—94%—made by the Clemency Board, the DAV seriously questions the need for an absolute pardon.

May I express the sincere appreciation of the DAV for your efforts to preserve the dignity of those who served honorably in Vietnam and if our organization can be of any assistance to you in this endeavor, please do not hesitate to call upon us.

Sincerely yours,

FRANK J. RANDAZZO,
National Commander.

RESOLUTION NO. 349—OPPOSITION TO AMNESTY

Whereas, amnesty for draft dodgers and military deserters continues to be a controversial political issue, and

Whereas, the DAV has previously opposed all proposals that would grant blanket amnesty; Now

Therefore, be it resolved that the Disabled American Veterans in National Convention assembled in Miami, Florida, August 1–August 5, 1976, reaffirm its opposition to the granting of blanket amnesty, and that draft dodgers and military deserters be tried on an individual case-by-case basis.

VETERANS OF WORLD WAR I
OF THE U.S.A., INC.,
Mt. Vernon, Ill., November 24, 1976.

Hon. G. V. MONTGOMERY,
House Office Building,
Washington, D.C.

DEAR MR. MONTGOMERY: Your opposition to the Carter plan of pardon for law violaters has the complete approval of the millions of patriots who voted for Mr. Carter and who still want him to respect and honor those Americans who kept their obligations to our country when asked to do so by selective service.

My compliments to you and I hope 434 other congressmen record themselves as in sympathy with your stand and that our incoming President Jimmy Carter will reconsider and act as you propose.

Yours most sincerely,

LEWIS BRAKE,

NATIONAL GUARD ASSOCIATION
OF THE UNITED STATES,
Washington, D.C., January 3, 1977.

Hon. G. V. MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR MR. MONTGOMERY: I wish to take this opportunity on behalf of the President of the National Guard Association of the United States and members to personally express support for your position on the pardoning of Vietnam draft evaders outlined in your December 17th letter to the President-elect.

Your early action to enjoin the issuing of ill-advised pardons clearly demonstrates your recognition of this as a seductive proposal demeaning to military service and counterproductive to the nation. This kind of thinking transcending party loyalties is commendable.

Sincerely,

FRANCIS S. GREENLIEF,
Executive Vice President.

AIR FORCE SERGEANTS ASSOCIATION,
Washington, D.C., January 6, 1977.

Hon. G. V. MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE MONTGOMERY: On behalf of the 62,000 members of the Air Force Sergeants Association, I commend you and render full support to you in your opposition to the proposed action by President Elect Carter to pardon all draft evaders of the Vietnam conflict.

To substantiate the position of our association on the issue, enclosed is a copy of the letter forwarded to Jimmy Carter expressing our strong opposition.

If we can assist you further on this important issue, please do not hesitate to call upon us. A copy of the enclosed letter is also being forwarded to Senator James B. Allen.

Yours in dedication and service,

DONALD L. HARLOW, CMSAF, Ret.
Director of Legislation.

AIR FORCE SERGEANTS ASSOCIATION,
Washington, D.C., December 1, 1976.

President-elect JIMMY CARTER,
Plains, Ga.

DEAR PRESIDENT CARTER: On behalf of the 62,000 members of the Air Force Sergeants Association, I request you carefully consider the impact on future military commitments of the United States should you grant a pardon to all draft evaders of the Vietnam conflict.

As a President of the people, as you have been depicted by some news media, you certainly must have compassion for the 122,000 disabled American veterans, many of whom did not want to go to war, yet deemed it their responsibility as citizens. Think of the families of those who lost sons, daughters, husbands, and fathers during the wars. They did not want to lose their loved ones, yet the preservation of freedom for all Americans, and honoring commitments to other nations, overshadowed their personal, selfish motives.

Despite the discord brought about by the United States' involvement in the Vietnam conflict, Presidents before you, and learned members of Congress, rendered what they considered to be sound decisions in their belief that someone needed to stop the oppression of people in Southeast Asia.

During your Presidency, you may also be confronted with a decision regarding America's Armed Forces involvement in a foreign conflict. Depending upon the extent of the conflict, the draft may have to be reinstated. Are you willing to permit those, who will be subject to the draft, to make their own decision regarding the morality of the United States' involvement, and whether they will or will not respond to their nation's call?

Granting a pardon to those who valued their own pursuit of happiness and personal desires over the responsibilities as citizens of America, is a clear indication to the youth of tomorrow that they will not be held morally responsible for the defense of their nation or the statutes set down by our lawmakers.

On January 31, 1973, the Honorable F. Edward Hébert entered into the Congressional Record the association's statement on amnesty. Quoting from that statement, we firmly believe that "a case by case review be undertaken of those who, having turned their backs on their country in her hour of need, now seek full rights of citizenship when boastfully they chose to evade its accompanying responsibilities."

We would kindly ask you, as the forthcoming Commander-In-Chief of our Armed Forces, to provide a case-by-case review of each of the draft evaders, but not—repeat—not grant a blanket pardon for all.

With all good wishes for a happy holiday season for you and your loved ones, I remain,

Yours in dedication and service,

DONALD L. HARLOW,
CMSAF, Retired, Director of Legislation.

AMVETS,
Washington, D.C., January 6, 1977.

Hon. G. V. MONTGOMERY,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: AMVETS wishes to take this opportunity to express the gratitude of our entire membership for your support in requesting President-elect Carter to reconsider his stand on amnesty for draft evaders.

It is our belief that "blanket" amnesty or pardon for these violators would be an affront to those who served and died in the service of our country.

We have no contest with the President-elect's proposals as they pertain to deserters and former servicemen who have received less than honorable discharges. They have and/or will receive their day in court for AMVETS and our great brother organizations have for many years been active in representing applicants for Discharge Review and correction. The evaders should also be subjected to "due process" of law and answer to the charges brought against them.

We are not without compassion then when we state that our principal disagreement with Mr. Carter's proposed action is directed at his intent to "pardon" without question, those who "fled" the country or "went underground" to *evade* military service and

at the same time render invidual judgment on those who did, in fact, serve and received questionable discharges or deserted for many reasons other than moral. This concept does not reflect the "equal justice under the law" principle which, for 200 years, has been the "hallmark" of democracy.

Your views, as described in the collective communication to the President-elect, dated December 17, 1976, signify the fair-minded approach to this matter in concurrence with the feelings of the major veterans' organizations and your efforts, directed toward the persuasion of your colleagues in Congress to add their support to this vital endeavor will be very much appreciated.

Sincerely,

THOMAS J. MCDONOUGH,
National Commander.

JANUARY 8, 1976.

DEAR CONGRESSMAN MONTGOMERY: Several years ago I was discharged from the U.S. Army for writing bad checks—all the checks totaled less than a thousand dollars, for the offense I was given a less than honorable discharge plus 2 years in Federal prison. All of this happened when I was 18 years of age. I have attempted several times to get my discharge upgraded, to no avail. Had I been called on to fight for the country I would have gone even if I was in prison. I am writing you this letter to inform you that I am against a pardon for draft dodgers and military deserters. When I did wrong in the Army, I paid my debt to society. Why should they be given any special treatment? At least I am willing to still fight for my country against those who would attempt to destroy it. The law is the law, whether we like it or not. We still should obey it until it changes. I agree with everything you said in U.S. News & World Report, 1–10–77. I am willing to express my views before any committee in Congress.

Sincerely,

PAUL B. OWENS,
U.S. Penitentiary.

LEWISBURG, PA.

ALBUQUERQUE, N. MEX.,
November 30, 1976.

Hon. Congressman G. V. MONTGOMERY,
Chairman, MIA Select Committee,
Washington, D.C.

DEAR CONGRESSMAN: Today's news release stated your stand on President-elect Carter's blanket pardon on Vietnam draft evaders which concurs with our national organization, the American Ex-Prisoners of War, Inc., whose membership consists of POW's of World War One, World War Two, Korea and Vietnam, and also the support of the Gold Star Mothers, the MIA wives, KIA wives, that we do not want our President to betray the Americans who gave their lives or the injured or the loved ones by granting or declaring unconditional amnesty or pardons for those who chose to desert or evade military service during Vietnam conflict.

MEL MADERO,
National Commander, American Ex-Prisoners of War, Inc.

ALLIED POST NO. 369,
East Chicago, Ind., December 21, 1976.

Hon. C. V. MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: Please accept the appreciation and commendation of the members of this Post for your extraordinary efforts, in the attempt to halt the pardoning of Vietnam War draft evaders.

Members of this Post made some contacts with members of the Indiana Congressional delegation, urging that they join your effort. Some, may not have been contacted in time. However, it would be of great interest to our membership if we had definite knowledge of Indiana Congressmen being amongst the 106 signers.

Action is being started by this Post for you to be given deserving recognition in this matter. As you know, The American Legion has taken National Convention action to oppose any and all forms of amnesty.

We applaud your efforts, asking that you continue to serve in the spirit of keeping America strong so that it can continue its greatness.

Most sincerely,

ALLIED POST 369 AMERICAN LEGION,
JOE JAKUBOWICZ, *Commander,*
JOHN G. KRUPA, *Post Adjutant.*

ALBUQUERQUE, N.M.

Congressman G. V. MONTGOMERY,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: Please contact us as soon as possible in regard to the Executive Pardon being planned by President-Elect Carter. As a former Vietnam POW and MIA wife, we have started a campaign against such a proclamation.

We have contacted as many military affiliated groups as possible, and have gained support of many. We must try to impress upon President-elect Carter that this is not the wish of many Americans.

Our plan is to deliver the enclosed signed petitions to him before his inauguration if possible, or as soon thereafter as an appointment can be arranged. We must have him reconsider his position immediately, and delay any statement of this issue until he can be presented with the feelings of the poeple. Possibly we can convince him to initiate a new program of case by case review and alternate service for draft evaders.

Please call us at the first opportunuity so we can add support to your efforts on behalf of the MIA's in this issue.

Sincerely,

VICKIE DAUGHTREY.

MISSOURI HOUSE OF REPRESENTATIVES,
Jefferson City, Mo., December 3, 1976.

Hon. G. V. MONTGOMERY,
Member of Congress,
Washington, D.C.

DEAR REPRESENTATIVE MONTGOMERY: Thank you for your effort in opposing Mr. Carter's plan to give pardon to the draft dodgers (yellow bellies). I have written my congressman and good friend Bill Randall asking his support.

Respectfully,

GLENN H. BINGER.

ARIZONA HOUSE OF REPRESENTATIVES,
Phoenix, Ariz., December 21, 1976.

Hon. G. V. SONNY MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: Allow me to congratulate you on your leadership in protesting President-elect Carter's intention to grant amnesty to all draft evaders. My feeling is the same as yours, as I do not believe these evaders should be given amnesty.

With best wishes for the Holiday Season.

Sincerely,

J. HERBERT EVERETT,
State Representative.

THE AMERICAN LEGION,
Austin, Tex., January 4, 1977.

Hon. G. V. SONNY MONTGOMERY,
House of Representatives,
Washington, D.C.:

We of the American Legion of Texas wish to thank you for your efforts in the Congress to convince President Elect Jimmy Carter that his pardon proposal for "draft dodgers" is wrong. It is our sincere hope that your colleagues in the Congress will support your efforts, partciularly your Texas colleagues whom we are mailing copies of this communication.

Instead of putting the Viet Nam War behind us, his proposal is doing nothing more than stirring up old wounds and further alienating the people simply for the benefit of a very few thousand unworthy citizens who are law violators at best and un-American at worse.

It is strongly suggested that as long as one mother, father, widow, child, brother, or sister of those killed in Viet Nam are alive the war in Viet Nam will not be behind us. As long as one MIA remains that war will not be behind us. As long as one maimed and crippled veteran of the Viet Nam War is alive that war will not be behind us. And as long as there are deserters and draft dodgers alive that war will not be behind us. The American Legion has passed numerous resolutions rejecting blanket amnesty or blanket pardon for those who broke the law by deserting or evading the draft. These resolutions call for every person guilty of the above offenses be held accountable for his actions. We commend you for your efforts.

C. G. MCKINZIE,
Department Commander,
The American Legion.

SAN ANTONIO, TEX.,
December 9, 1976.

Hon. JIMMY CARTER,
Plains, Ga.

DEAR PRESIDENT-ELECT CARTER: I feel that I must write to you concerning your promise to pardon Viet Nam War draft resistors. Let me say first that I do not doubt your sincerity, motives or convictions in proposing the pardons. I do fail to understand what purpose they will serve. I would like to share with you my personal experiences concerning the Viet Nam War in hopes that it will assist you in making whatever decisions you will make.

While serving as an Active Army Advisor to the Army Reserve at a duty station just outside Detroit, Michigan, I was assigned the very difficult task of notifying the next of kin of enlisted personnel from the Detroit area who were killed or seriously wounded in Viet Nam. The procedure of notification by telegram was discontinued in favor of personal notification by a senior non-commissioned officer. On the 21st day of December 1967 I received a telephone call, at my home, from the Casualty Section, Fort Benjamin Harrison, Indiana. I was instructed to notify the mother of a young specialist fourth class that he had been killed that day by hostile fire in the Republic of Viet Nam. The soldier's mother lived on a farm in a rural area just outside the Detroit area. I stopped by a Roman Catholic rectory to ask a priest to accompany me. After informing the priest the nature of my duty he declined to accompany me saying that he had been ill and that this was a very difficult thing to do. I tried another rectory and after much debate I convinced a young priest to accompany me. On arrival at the farmhouse the soldier's mother called out from the door, "My boy, what's happened to my boy?" It took all the strength I could muster to say that the Secretary of the Army extended his deepest sympathy on the death of her son, killed by hostile fire in the Republic of Viet Nam. The Christmas tree, presents and a letter from him received that day were quite obvious. The latter said he would be home in three months to marry his girl. The boy's mother screamed "Where are the Johnson boys," a reference to President Johnson, and all the sons of the politicians. Tell me, she screamed. What answer could there be—what answer to the pain and heartbreak she was experiencing. She was fifty-two years old, had one other son in the Air Force and a husband with a weak heart. I made eleven other notifications prior to going to Viet Nam. Each one as tragic and each one a heartbroken mother, father, or widow asking—what of the draft dodgers and the rich kids. Maybe those questions are about to be answered.

I believe there are many reasons why young men resisted the draft. Some resisted because they did not want their lives interrupted by the War. Others because they were tied to their environment by drugs and others for ideological reasons. The ones who said they were anti-war were in fact anti-United States winning the war. How else can anyone explain the Viet Cong flag being paraded through the streets in America. While these same young men desecrated and burned our own flag. If they were, in fact, anti-war they would be directing their verbal outburst at Ho Chi Minh and North Viet Nam as well as the United States. I question if it is wise to allow these expatriates the opportunity to carry on their anti-U.S. activities. In a recent speech you said that "the laws of the land must be obeyed." The draft resistors violated the law and for each resistor a law abiding young man had to take his place. In many cases it was a life or death issue. I do not believe you would be exacting "a pound of flesh" if you require the draft resistors to formally request pardons stating that they admit to wrongdoing (braking the law) if you will and further stating the reasons why. If they tell the truth maybe this will give us an insight to what happened in the 60's.

I realize that you are very busy and have many important decisions to make. Please allow me to make one other suggestion concerning deserters and veterans who got "bad paper"—other than honorable discharges. There were many young men who went to Viet Nam and served in combat only to receive "bad paper," because they could not cope with the guilt heaped upon them by misguided civilians or other reasons related to their combat experiences. A young sergeant in my unit served as a combat infantryman in Viet-Nam. He was wounded and received hospitalization. His wounds necessitated the placement of a protective implant in his head. He was reassigned to a supply unit in Okinawa shortly after his arrival he began drinking heavily and went AWOL for a week and it seemed he was unable to adjust to his assignment. His unit commander recommended that he be eliminated from the service with a less than honorable discharge. He was subsequently reduced to private E-1 and discharged on 29 May 1973. He served with honor in Viet Nam, was awarded a Bronze Star Medal, attained the rank of sergeant and then received "bad paper." There are many parallels to this man's case. I believe they deserve a review of their discharges. Not because pardons will be given to draft resistors but because it would be the honorable thing to do—after all, they at least tried.

Mr. Carter, there were 50,000 men killed in Viet Nam, 340,000 wounded and there are over 3,000,000 Viet Nam era veterans. Will the pardons to 160,000 draft resistors alienate these veterans and cause further pain and regret to those families who gave a son, father or brother? Will the pardons be worth it?

If you have taken the time to read this lengthy letter and weigh what I have said, I sincerely appreciate the time you have taken. I know this is a long letter but I could not have said what I want to say in fewer words.

I realize you have a tough job ahead of you in the Presidency. I wish you well and that God give to you the strength, wisdom and guidance you will need to carry out the very difficult task ahead of you. My best wishes to you and your family for a happy holiday season—God bless you and your family.

Sincerely,

RICHARD G. LONGFELLOW,
First Sergeant, U.S. Army (Retired).

DELRAY BEACH, FLA.
December 2, 1976.

Representative G. V. MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: I was delighted to note in the local newspaper that you were attempting to start an Anti-Pardon Drive. Everyone I have spoken to is definitely against President Elect Carter pardoning the draft evaders and I frankly feel it would be impossible to ever get the youth of our country to fight if unfortunately the necessity arose and he does issue the pardons. I say this with an 18 year old son at VMI but why should he go if you can just go to Canada and come back later and all is forgiven.

Sad to say the people as you know just complain and don't do anything. Is it possible to get this as a national vote? I don't think it is but then could the congress send out to homes cards listing 3 choices. 1. Definitely against any pardon. 2. Extending President Ford's program which gave the evaders the chance to come back and work in a hospital, etc. or 3. Granting Full Pardon. If these could be mailed to every voter and regretfully postage back franked as so many wouldn't pay to mail them back I feel that Mr. Carter would then get a fair idea of what the people of the country want.

I am sure that someone has a better plan—perhaps the newspapers could put in something people could check in and mail to Washington but something truly has to be done.

Again, thank you for starting the ball rolling and I certainly trust it is a success.

Sincerely yours,

MRS. PHYLLIS B. MEYER.

CHICAGO HEIGHTS, ILL.,
December 1, 1976.

Rep. G. V. MONTGOMERY,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: I am very pleased at what I hear you are doing re amnesty and/or pardons for draft dodgers. There will never be enough money available for the Armed Forces to undo the damage caused by any blanket forgiveness! No major power has won a major conflict without conscription in modern times—nor can we. We MUST retain that power for future use if needed. (Naturally, I hope we never need it!)

I would say to President Elect Carter that—the precedent you propose to establish will lead to grave and totally unnecessary problems in the future.

Actually, as Commander-in-Chief of the Armed Forces, I would presume that any President who took his proposed action after taking the Oath of Office should be subject to Impeachment! Am I not correct?

I was never drafted. After shoulder injuries kept me out of WW II draft, I "conned" my way into the Navy—I had excellent eyesight and found that made up for a lot!—and served in the Pacific, rising from seaman to Lieutenant with duty with Seventh Fleet Amphibious forces.

My only son, the eleventh generation of our family in America, is a career Army man with the Paratroopers. We both have very strong feelings about duty, not glory nor pay—just duty.

These personal comments are intended only to provide background for the opinions expressed in this letter.

You are welcome to use any or all of this in any manner you see fit.

I certainly hope you are successful in rallying Congressional support to your cause. After all, if the Congress will not look out for the nation's good, who will?

Sincerely yours,

CHARLES I. ODELL.

LANSING, MICH.,
November 30, 1976.

Representative SONNY MONTGOMERY,
House of Representatives,
Washington, D.C.

DEAR SIR: I applaude your efforts to block the amnesty for Viet Nam draft-evaders proposed by President-elect Carter.

It is the first duty of a country to help those who willingly served & NOT those who willingly fled; therefore, it is our moral obligation that the plight of our M.I.A.'s be resolved before any type of amnesty should even be considered. To allow these evaders to return to this country while 1,000 of our men are still unaccounted for is unthinkable & an insult to every person who has ever served in the armed forces of this nation.

Let us hope that you, in a position of great responsibility in the government, will do all that you can to stop this asinine amnesty & help our M.I.A.'s instead.

Sincerely,

MS. PATRICIA JO KENNEDY.

ONEIDA, N.Y.
December 20, 1976.

Representative G. V. MONTGOMERY,
Congressman from Mississippi,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MONTGOMERY: I want to thank you, on behalf of many war veterans I know, for circulating the letter to President-elect Carter against pardoning the draft evaders. I have written to my congressman, James Hanley, telling him that we hope that he was one of the 106 who signed this letter.

I believe that the greatest slap in the face that could be given veterans of all wars and conflicts is to pardon these draft dodgers.

Many of us do not believe in killing or wars but we did our duty as American citizens by answering when our country called us. Many of us came back disabled for life also by doing so.

What are we going to tell our children and grand children when we try to teach them to obey the laws when these law breakers are given pardons with no punishment for their crime? What will the foreigners who are applying for US citizenship think of the oath that they take, especially the part that says they will defend their new country when called upon to do so?

These draft evaders made a mistake and broke a law and they should be punished in some way if they want to come back and enjoy the privileges of the greatest country in the world that others fought for. This punishment could be in the form of serving in conservation work, government hospitals or other services, but they should not be pardoned without repaying their country for their mistake in some manner.

If they are pardoned, President Carter is saying that we who answered our country's call are in the same class as cowards, deserters and radicals who don't appreciate their country enough to be willing to fight for it.

Thanks again for your fine work and may I wish you and yours a Very Merry Christmas and a 1977 filled with lots of Good Health and Happiness.

Sincerely,

DON CONNELLY,
A Disabled World War II Veteran.

V.M.I.,
Lexington, Va., January 10, 1977.

Hon. G. V. MONTGOMERY,
House of Representatives.

DEAR MR. MONTGOMERY: I have read your interview in U.S. News and World Report (January 10, 1977) concerning a pardon of all draft evaders and agree with your opinions.

Any law is only as good as the backing it receives from the courts. To pardon those who violated the law by desertion or draft evasion is to say that the law is worth less than the paper it is printed on. I feel, as you do, that a pardon would certainly encourage others in future conflicts to desert or evade as they desired, fearing no punishment.

Perhaps I am bias, because I attend a military school and had an uncle killed in Vietnam. However, I feel sure many men shared similar convictions with deserters and draft evaders, yet went on to Vietnam and served honorably. I admire these men more than those who run away from an unpleasant situation.

I support your idea of handling each case individually on a trial by jury basis. It is the only fair way.

I hope you will continue your drive to defeat this proposal by President-elect Carter.

Sincerely,

JACK L. WRIGHT.

Today the former prisoners of war, that is the Vietnam war, held a press conference here in the Nation's Capital and they also state they are totally opposed to the granting of a pardon. These fellows have served as much as 6 or 7 years in Vietnam. They think the pardon is wrong and they so stated today.

Also they said they have tried to see Governor Carter and he has not permitted them to see him.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to my colleague, the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Speaker, I am pleased to join with my friend and colleague Mr. MONTGOMERY and other distinguished colleagues here today by participating in this special order to discuss the important matter of President-elect Carter's proposal to grant a blanket pardon or amnesty for Vietnam-era draft evaders and deserters. As a cosigner of the letter sent to Mr. Carter opposing his proposal, and as a sponsor of a House concurrent resolution reflecting the sense of the Congress that such a pardon should not be granted by the President, my sentiments on the subject are well known.

At the time I introduced the House concurrent resolution, I offered some remarks in the CONGRESSIONAL RECORD expressing my views in opposition to any blanket pardon by the President or the President-elect. As part of this special order, I include those remarks at this time:

AMNESTY OR PARDON SHOULD NOT BE GRANTED FOR PERSONS WHO COMMITTED DRAFT OR MILITARY ABSENCE DURING MILITARY INVOLVEMENT IN VIETNAM

Mr. HAMMERSCHMIDT. Mr. Speaker, I was shocked and dismayed last August upon learning that the President-elect had informed the American Legion of his intention to issue a blanket pardon to Vietnam draft evaders. I was even more surprised to learn that President Ford upon request was deciding whether to reconsider granting a blanket amnesty to draft evaders and military deserters.

Somehow or other, Mr. Speaker, I received the distinct impression that President Ford had already extended to each civilian and serviceman who had committed draft or military absence offenses during the conflict in Vietnam an opportunity to receive clemency and once again become a productive citizen when he issued his clemency proclamation of September 16, 1974. Basing his program on a "national commitment to justice and mercy * * *" and "the necessity for national reconciliation," draft evaders and military absentees could, according to the President, "earn their return to the mainstream of American society."

The proclamation created a Presidential Clemency Board which considered the case of each applicant on an individual basis. Clemency was not dispensed or denied automatically, by category, or by any rigid formula. The review was based upon the merits of each applicant's case, with full respect given to his rights and interests.

Despite this golden opportunity to again become productive members of our society, the vast majority of the offenders ignored the President's program. Of the 113,337 who were eligible for the clemency program, the Board tells us that 21,729—only 19 percent of the offenders—applied for clemency.

Mr. Speaker, these figures speak for themselves. They are appalling. They tell us that most of those who refused to enter service or fight in Vietnam because the United States was engaged in a conflict that was "morally reprehensible" were spurning amnesty or clemency. The clamor for unconditional amnesty or a blanket pardon appears with President-elect Carter's pronouncement to the American Legion. Let me share with you the views of some of the Nation's major veterans' organizations on this subject.

The Veterans of Foreign Wars said:

We sustain total opposition to both unconditional and conditional "amnesty" or "pardon" for draft dodgers and military deserters.

The American Legion stated:

"We reaffirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice."

The Disabled American Veterans reaffirmed its opposition to the granting of blanket amnesty, and that draft dodgers and military deserters be tried on an individual case-by-case basis.

AMVETS informed the President-elect that:

"We cannot condone a concept of special treatment for those who refused to obey the laws, designed by the people for the defense of our Nation and/or the promulgation of democracy abroad."

Mr. Speaker, I share the views of these organizations. The memory of the 56,000 American citizens who gave their lives fighting in the Vietnam war, whether that war was moral or immoral, is still fresh in my mind. The memory of the 1,100 servicemen still missing in action and unaccounted for cannot be erased. The granting of an unconditional pardon or amnesty would be an affront to all who served with courage and honor during that conflict.

In conclusion, Mr. Speaker, I want to commend the gentleman from Mississippi (Mr. MONTGOMERY) for initiating a petition to the President-elect calling upon him to reconsider his pledge to issue a pardon for all Vietnam era draft evaders. I was pleased to sign the gentleman's petition. While the action taken by the gentleman from Mississippi must be applauded, it is my view that a much stronger manifestation of congressional sentiment is necessary. I am, therefore, today introducing a concurrent resolution reflecting the sense of Congress that a general or blanket amnesty or pardon for persons who committed draft or military absence offenses during our Nation's military involvement in Vietnam should not be granted by the President. The text of the resolution follows:

H. CON. RES. —

Whereas President Ford in his Proclamation of September 16, 1974 created a program of conditional clemency for approximately 13,000 civilians and 100,000 servicemen who had committed draft or military absence offenses between the adoption of the Gulf of Tonkin Resolution (August 4, 1964) and the day the last American combatant left Vietnam (March 28, 1973), and

Whereas a total of 113,337 persons were determined to be eligible under the President's clemency program, only 21,727 or 19 percent of those eligible actually applied for clemency during the six and one-half months the privilege was offered, and

Whereas President-Elect Carter has declared his intention of issuing a "blanket pardon" to those who evaded or violated the draft laws of our nation, within one week after his inauguration, and

Whereas the nation's major veterans organizations have taken strong positions in total opposition to general or blanket amnesty and/or pardon as evidenced by Resolution #401 of the Veterans of Foreign Wars that "we sustain total opposition to both unconditional and conditional 'amnesty' or 'pardon' for draft dodgers and military deserters"; Resolution #434 of the American Legion that "we affirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice"; Resolution #349 of the Disabled American Veterans reaffirming "its opposition to the granting of blanket amnesty, and that draft dodgers and military deserters be tried on an individual case-by-case basis"; and by AMVETS Resolution #78 and 79 that "we sustain total opposition to both unconditional and conditional 'amnesty' for draft dodgers and military deserters" and

Whereas the Presidential Clemency Board said in its minority report, "We do not believe that a man who deserted his comrades on the battlefield in Vietnam or who refused to go to Vietnam when he was so ordered, should be given clemency," and

Whereas a member of the Board further stated, "A Presidential pardon must be viewed as a prized and relatively infrequent occurrence," and

Whereas this proposed action would be an insult to the memory of the 56,000 American citizens who were killed in Vietnam and the nearly 1100 who are still missing in action, as well as an affront to all who served with courage and honor during that conflict: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring,) That it is the sense of Congress that a general or blanket amnesty or pardon for persons who committed draft or military absence offenses during our nation's military involvement in Vietnam would represent a breach of faith with those who served honorably, particularly our honored war dead and their survivors and should not be issued or granted by the President of these United States.

There is justice and mercy in a clemency program which seeks to look at each case on an individual basis, to determine if compelling circumstances existed to cause a soldier or a citizen to evade military service, and there is justice and mercy in a program which provides an avenue for that individual to make restitution for his actions. But blanket amnesty, regardless of the circumstances, can only be viewed as inequitable and unjust, not only to those who did serve during the Vietnam era, but to all prior servicemen during this Nation's history.

and to those yet to serve with honor and pride.

I believe the majority of Americans share this view.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Arkansas.

Let me say that after my hour, the gentleman from Idaho (Mr. HANSEN) has 1 hour to talk about this subject and the gentleman from Virginia (Mr. DAN DANIEL) has an hour after the gentleman from Idaho (Mr. HANSEN), so we have plenty of time. Certainly we will get around to everyone.

Mr. BEARD of Rhode Island. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Rhode Island.

Mr. BEARD of Rhode Island. Mr. Speaker, I would like to say that in my opinion this should be on an individual situation basis. Everyone participated; some were conscientious objectors, some took off, because they were draft dodgers. I believe each person should be judged on his individual situation.

I have signed the letter as a cosponsor and I will oppose Governor Carter's proposal of this pardon. I do not go along with it. I think if we join the President at this point in time, in any future wars it will be easy for anybody to cop out or take off, with the hope that they will be pardoned later.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Rhode Island for those remarks. I certainly agree with the gentleman.

I would like to say that by sending this letter, there is no intention of myself or the signers of the letter to embarrass President-elect Carter in any way; but I think when we disagree with him, no matter who he is, whether he is coming into office or not, we have to stand up and let him know. I am sure many Members before this term is out will disagree with Governor Carter on many matters.

Mr. BEARD of Rhode Island. Mr. Speaker, if the gentleman will yield further, so that what is important is that we work with the President. We do not work for the President. I think that has to be considered.

Mr. SKUBITZ. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Speaker, I thank the gentleman for yielding.

One thing that troubles me is that if one has an honorable discharge from the service, the way I understand it, he is entitled to medical attention. He is entitled to a nonservice pension later on in life.

Now, if we have understood the gentleman that there are 300,000 men in this country that have received less than honorable discharges, they are not entitled to those benefits. Now, if the President by a blanket order would issue a pardon, would that erase the less than honorable discharge and entitle them to medical attention and pensions later on?

Mr. MONTGOMERY. That is correct. He has not done this yet; but, of course, he has not had time to yet. He has only said there will be a blanket pardon for draft evaders, but he did say he would look into the situation and maybe give pardons in those cases that the gentleman from Kansas has just mentioned. If he would do this and the discharges would be upgraded to honorable discharges, they would be entitled to medical and veterans' benefits.

Mr. MOTTL. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Ohio.

Mr. MOTTL. Mr. Speaker, first, I want to commend the gentleman from Mississippi, the Honorable G. V. "SONNY MONTGOMERY, for obtaining time to speak on the pardoning of persons who evaded the draft during the Vietnam-era conflict. Needless to say, I was shocked and dismayed when I learned that President-elect Carter had told the American Legion at its national convention last August that he intended to issue a blanket pardon for all Vietnam draft evaders. Since a person who has never worn the uniform, because of active duty in the Armed Forces is not a veteran under any of the laws administered by the Veterans' Administration, the issuing of a pardon to a draft evader will have no impact on entitlement to veterans benefits.

The major veterans' organizations whose membership includes hundreds of thousands of Vietnam veterans are vehemently opposed to the pardoning of those who broke the selective service laws or evaded the draft during the Vietnam war.

Actions which will help heal the scars of divisiveness remaining from the Vietnam war are highly commendable and desirable. However, we must never forget the sacrifice made by those who served, especially the 55,000 who were killed in Southeast Asia during that long conflict. I suggest a solution to the problem for which there is a precedent by one of our greatest Presidents who was confronted with a similar issue following World War II.

I am speaking of President Truman who, on December 23, 1974, pardoned 1,523 persons out of a total of 15,805 cases of those who had evaded or otherwise violated the Selective Service Act during World War II. However, President Truman did not issue a blanket pardon. To the contrary President Truman established in 1946 an Amnesty Board which called for the Board to examine and consider the cases of persons convicted of violating the Selective Service Act of 1940. The Board, therefore, reviewed each of the cases individually and made a recommendation to the President as to whether Executive clemency should be granted or denied; and in the case of about one-tenth of those involved, a pardon was recommended and granted.

While there is no way of knowing what the facts are with respect to present draft evaders, it would seem logical to conclude that many of them evaded the draft for reasons that had nothing to do with being for or against the war in Vietnam and under no circumstances would be entitled to a pardon for violating the draft laws.

Consequently, I strongly urge President-elect Carter to follow the example set by President Truman and establish a review panel to determine on a case by case basis whether the slate should be wiped clean by way of a Presidential pardon for those persons who evaded the draft for reasons of conscience.

Lastly, I join with many others in opposing the recommendations made by some that a Presidential pardon should be extended to include military deserters. Since the President has not indicated his reaction to such a recommendation, I want all to know that I am firmly opposed to any type of amnesty or pardon for persons who have been on active duty in the Armed Forces and run afoul of the military laws.

Mr. NICHOLS. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Alabama.

Mr. NICHOLS. Mr. Speaker, I am appreciative for this opportunity to address the House on the subject of blanket amnesty and I am pleased to be associated with the efforts of my colleague and good friend, the distinguished Representative from Mississippi, Congressman MONTGOMERY receives my compliments for his dedicated work in gaining this special order.

During the Presidential campaign, President-elect Carter received my support in Alabama's Third Congressional District. It was my belief that his philosophy and ideas were attuned to those of Alabama and as a Southerner and a Democrat, Mr. Carter was the best man for the job. This belief is unchanged.

On the issue of blanket amnesty for those who evaded the draft, however, he and I stand on opposite ends of the spectrum. Mr. Speaker, having served in this legislative body now for five terms I am well versed on the arguments pro and con relative to the involvement in Southeast Asia but no matter how right or wrong our efforts may have been, the flagrant abuse of our draft laws remain unlawful and unjustified.

I was pleased to note in this week's issue of Newsweek, Governor Carter's mention of military deserters. When asked how he would handle the cases of those who fled the military after induction or enlistment he said that each case "should be handled on an individual basis in accordance with our Nation's system of military justice."

I am in complete agreement with this prudent statement believing that our system of military justice, just as the civilian judicial system, is designed to weigh each case and each circumstance on its merits. It was George Washington who wrote, "The administration of justice is the firmest pillar of Government," and to circumvent this means of enforcing our laws is to abuse those ideals which have molded and formed our Nation.

The foundation of the argument by those who support blanket amnesty is that our Vietnam involvement was illegal and to grant unconditional amnesty would seem to support this misconceived claim.

Through five Presidents and numerous Congresses, the American presence in Vietnam was supported. The draft laws, though not always fair in application, were legally enacted. I would like

to note that where half a million men avoided the call of the draft, nearly 20 times that figure, 11 million men of draft age served in the military during the same period.

It is the prerequisite of all citizens to obey and follow our laws. If you desire change, there are legal channels to follow, but to snub your nose in the face of your Government, to openly flaunt the laws of this country and then demand forgiveness, unconditionally, is by no means honorable or responsible.

Is the blanket amnesty fair to those who fulfilled their obligations, who answered when duty called? Is this fair to the half million Vietnam-era veterans who are out of work? Is it fair to those 70,000 who received less than honorable discharges, or to the 270,000 veterans wounded in Vietnam? Is it fair to the 52,000 who lost their lives serving in Indochina? Of course, not.

But the crux of the question comes when you consider what will happen next time duty calls. The danger of this precedent is without bounds.

The amnesty programs of Lincoln and Truman were not blanket or unconditional. An action such as this would be unique and dangerous. It would lay open to suspect and ridicule future laws regarding military service and the moral obligations of our citizens to serve in times of need. What will happen if a blanket amnesty is granted this time and the need to raise a standing Army is presented to the American people? Will those who claim to answer to a higher standard than that set by our Government refuse to answer? If so, what do we do?

Mr. Speaker, we do not seek revenge nor are we seeking vengeance, but we do not want to see the honorable service of more than 2 million Americans, who served in Southeast Asia, equated on the same plane as the dishonorable service of those who openly refused to serve their country. We believe this is completely wrong. What we are seeking is justice. This can best be found through the proper channels of our courts on a case by case basis, equity tempered with mercy can be achieved in this manner.

Mr. MONTGOMERY. I thank the gentleman. He makes the point in his remarks that the way to handle this would be on a case-by-case basis, whether it is for the dishonorable or less than honorable discharges, or even for the draft evader. It should be done, in my opinion, case by case, if it is going to be done at all.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I want to commend the gentleman from Mississippi for taking the leadership in bringing this issue before the Congress and for initiating an appeal to President-elect Carter to reconsider his publicly announced position on this particular issue.

I certainly can understand the desire of wanting to put the bitterness of the Vietnam war behind us, and I think we all share that. I recognize also that the question of clemency or a pardon or amnesty is something that is exclusively an executive prerogative and not something in which the Congress has any legal responsibility. But, the fact of the matter is that, in my judgment, I share the view of the gentleman from Mississippi that the President-elect would be making a serious mistake in undertaking this action.

I think one thing is clear; that is, that we who are Members of Congress are as closely in touch with the thinking of the American people as is the President-elect. Certainly, my feeling—and I am sure that many Members of the House would agree with me—is that the American people are not in favor of this kind of action. Therefore, the action that the President-elect has indicated that he will take is going to create some serious problems. The gentleman from Mississippi has already indicated that an amnesty would not be fair to those who have fought bravely and valiantly in Vietnam. That was demonstrated, I understand, just this morning by a press conference which the gentleman held with some former POW's. It certainly would not be fair, as he has pointed out, to those who may have served the bulk of their time honorably and then gotten into trouble and ended up with less than honorable discharges.

It certainly will, in my judgment, undermine our ability and our deterrent power as a nation in any future military confrontation which we might have. Deterrent power is based not only on the guns and ships and planes we have, but on the enemy's interpretation of our will. I think this could do serious damage, so I would join with the gentleman from Mississippi in urging the President-elect to reconsider. I think we have already outlined an alternative, which the gentleman said that we did not have, which I am sure all of us would favor—clemency—going easy on these individuals in an effort to put the bitterness of the Vietnam war behind us.

But, as the gentleman from Rhode Island (Mr. BEARD) said, let them come back one by one. We should not be giving this to people who do not even express an interest in it. Let them apply and let their cases be considered individually, and I think when we can do the kind of thing the President-elect wants to do without creating all the problems the gentleman from Mississippi has indicated would be created.

Mr. MONTGOMERY. I thank the gentleman from New York for his remarks.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the minority whip, the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, I appreciate the gentleman yielding to me, and commend him for the action he has taken here to day in pointing up this issue.

Mr. Speaker, a week ago I came across some words that I believe are of importance in understanding the full dimensions of the current debate over President-elect Carter's plan to grant blanket amnesty to draft evaders. They were spoken by former prisoner of war and hero, Lt. Comdr. Michael D. Christian. He said:

> We are making heroes out of deserters. The price of honor seems pretty cheap this year.

He said these words as he placed two Purple Hearts, two Silver Stars, the Legion of Merit, three Bronze Stars, four Air Medals, and a Navy Commendation Medal on a soldier's grave in protest against the Jimmy Carter amnesty plan. Commander Christian said:

> I really don't want them anymore. They've lost any value to me.

Mr. Speaker, a nation that does not concern itself with the price of honor will soon find that it places no price on anything, not even its own survival. It is clouding the issue to state—as some do—that the Carter-proposed amnesty is demonstration of compassion and forgiveness and that it will heal the Nation's wounds. Mercy and compassion are necessities in any civilized society and I strongly support their application in cases where the public good will be served. But these virtues are not absolutes—they must always be balanced against other values and needs of society. If the blanket amnesty has the effect of doing permanent damage to the Nation's inherent duty to defend its values, then such amnesty will be seen by history not as compassionate but as an exercise in bad judgment.

Objection to blanket amnesty is therefore, not a stand against mercy or compassion. It is, instead, a defense of other central values of our civilization. If we have come to a time in our national life when, in Commander Christian's words, we are "making heroes out of deserters" we are doing something to our Nation that no enemy, no matter how strong, has ever done: We will be destroying our sense of honor and placing no value on devotion to duty. We will be turning cherished values upside down. No people, no nation, no civilization can do that and expect to survive. Sooner or later such a decision will come back to haunt us.

So, let us make clear just what the issues are in the amnesty debate. I believe that draft dodgers should take their chances before the courts. If, in individual cases, where all the facts are known, a decision is made by a judge to be lenient, the majority of Americans will not complain. After all, the essence of American justice is the recognition of the uniqueness and value of the individual. Each case can and should be tried on its merits. So the argument is not between those who are "for" compassion and those who are "against" it. The argument is, rather, between those who want to avoid the difficult decisions that have to be made on a case-by-case basis and those of us who do not want to see the price of honor, of service, of devotion, debased by a blanket amnesty.

I oppose blanket amnesty not because I am opposed to compassion, but because I recognize that here are forms of sentimentality and yes, of bad judgment that disguise themselves as compassion.

Honor, as well as mercy, has a part to play in our national life. A case-by-case handling of all draft dodgers will not

damage the national quality of mercy—but blanket amnesty will most certainly place a low price on honor and service, a price so low that we may one day find ourselves in the position of trying to explain to our children what the concept of honor means—and having them not understand.

I dread such a day, Mr. Speaker, and hope it never comes.

I therefore urge that any plan of blanket amnesty be rejected. The invisible bond that links together Commander Christian and the dead soldier upon whose grave he placed his medals—the bond of honor—must be publicly, officially, acknowledged as still having a high value in our society. It is a bond as strong as faith and love, but it, too, can be broken and once broken it is all but impossible to repair. Let us not place ourselves in the position of being judged by later generations as one which, having had to choose between honor and false compassion, chose incorrectly.

Mr. MONTGOMERY. Mr. Speaker, I might say that Lt. Comdr. Mike Christian and other former servicemen who were imprisoned in Vietnam are on Capitol Hill today opposing this. Servicemen who spent as long as 7 years in prison are totally opposed to this amnesty.

Mr. KOCH. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from New York (Mr. KOCH). I might say that the gentleman from New York also has an hour special order approving or agreeing with President-elect Carter.

Mr. KOCH. I thank the gentleman for yielding.

Mr. Speaker, I do have a special order that supports the President-elect's pardoning or amnesty provisions and my resolution urges him to expand their coverage. I will be speaking at length later so that I will not speak extensively now, but I would like to say this: Those of us who support pardoning or amnesty take that position because we believe that it is in the national interest of the United States to bring the Vietnam era to a close. For myself, that is why—and I speak for a number of people, not all—we are not hung up, if you will, on the question of whether it is described as a pardon or an amnesty. What we want to do is to bring everyone home, whether they are overseas as a result of desertion, whether they are draft evaders, or whether they are some of the people who never even registered and will never be caught but will go through life with that threat of being discovered over their heads as it were. I know the gentleman's position because he and I have debated this in a weekly magazine not long ago, and I will not summarize the debate we had there. But I would like to ask the gentleman this question: Is the gentleman aware that we have provided amnesties and full pardons in other wars that the United States has been involved in?

Mr. MONTGOMERY. Not a blanket pardon. I do not think the gentleman was here when I made the comments and I traced the war through. I did not cover the War Between the States, which the gentleman called the Civil War in the article.

Mr. KOCH. If the gentleman will yield further, I would like to cover the War Between the States. Again I do not care whether we call it "pardon" or "amnesty." I would like to cover that war because I know the gentleman is concerned about what took place at that time. I refer to the date of December 25, 1868, when President Johnson gave "universal and unconditional amnesty"—I am quoting now, and these are not my words, so the gentleman will forgive me if the language is not that which he and I might necessarily concur in—"universal and unconditional amnesty to all rebels of Confederate States."

Mr. Speaker, does the gentleman believe that this country is the lesser for it today that a President at that time, trying to bring the country together, granted universal and unconditional amnesty to rebels who had fired on the American flag?

Mr. MONTGOMERY. Mr. Speaker, I will be glad to answer the gentleman's question.

The gentleman had to go all the way back to the Civil War to find out where a possible precedent might have been set. The gentleman will agree that from World War I on, we have had nothing like this. My point is that certainly that was a civil war, that was not our Nation involved in another war with another country. Our country was split. The gentleman will agree to that.

As I understand it, President Lincoln or President Johnson did not give a blanket pardon to the Union Forces or to those in the Union who refused to fight for the Union. He did not have any records on the Southern Forces anyway. We did not have any good records on who served in the Confederate Forces, so we did not have to worry about giving them a blanket pardon. So I do not think we can compare it at all. I will be glad to discuss that point further on the gentleman's time, if the gentleman does not mind.

Mr. KOCH. Mr. Speaker, if the gentleman will yield for 1 further minute, then I will cease.

Mr. MONTGOMERY. I will be happy to yield to the gentleman from New York.

Mr. KOCH. Mr. Speaker, all I am saying to the gentleman is this: We really do have two periods of time that are very comparable. The divisiveness that existed at the time of the War Between the States is very comparable to the divisiveness that existed in our society in the 1960's and 1970's when brother was pitted against brother here in the United States. Just as President Johnson then brought the country together in 1868 I would hope that President Carter will do the same thing in 1977 with a comparable act of grace, compassion, and mercy.

Mr. MONTGOMERY. Mr. Speaker, I would try to refute that statement. I do not think it is possible to compare what happened in the 1960's and 1970's with what happened during the period of the Civil War.

Mr. BROWN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Speaker, I thank the gentleman for yielding.

I was interested in what the gentleman from New York (Mr. KOCH) had to say, and I hope that he remains on the floor because there is an issue I want to discuss with the gentleman from Mississippi.

I think we are looking at the issue of pardon or amnesty as though that would be a complete resolution of the problem.

I have had occasion to review a case, and this is a real live case. Let us call the gentleman involved John Doe.

John Doe served in the military. He served in Vietnam for 3 years and in the military for about 5 years, and then he was reassigned after Vietnam to Germany. In Germany he got into problems unrelated to his military duty, and so he deserted and went to Sweden. During the time he lived in Sweden he married a Swedish girl and had to go to work. Apparently when one goes to work in Sweden, he must say he is a Swedish citizen, so although he never took the oath as a Swedish citizen or anything of that sort, by the very fact of going to work he apparently signed papers saying that he was a Swedish citizen. As a consequence of that, under a Supreme Court case, he lost his American citizenship.

In January of this year John Doe decided to come back to the United States and make his peace with the military. He was assisted in that matter, and he went to Fort Leonard Wood and was incarcerated for a period of time, and the final disposition of his case was to give him a dishonorable discharge.

Immediately then the Immigration and Naturalization people got in touch with John Doe and said that he should be deported because he was a Swedish citizen, not an American citizen. So deportation orders were cut for him, and he was about to be deported when his mother, who is an American citizen, filed a fourth preference visa petition for him. Under that petition he was going to be able to become a permanent resident of the United States, not a citizen but a permanent resident of the United States.

Just today, when everything seemed to be going smoothly and John Doe was going to be allowed to remain in the country and get reunited with this country, although not as a citizen but as a permanent resident alien, I received word from the Immigration and Naturalization Service. I will read this in part.

The letter says:

* * * the processing of Mr. Doe's application has begun.

However, in view of information indicating that he was a military absentee and his subsequent acquisition of Swedish citizenship, it will be necessary to make a determination as to whether or not Mr. John Doe may be ineligible to receive a visa under Section 212(a)(22) of the Immigration and Nationality Act.

The letter goes on to say that they are trying to determine that information.

Section 212(a)(22) says: the "following classes of aliens shall be ineligible to receive visas and excluded from admission."

Under section 212(a)(22) it says:

* * * persons who have departed from or who have remained outside the United States to avoid or evade training or service in the armed forces in time of war or a period de-

cleared by the President to be a national emergency * * *.

Mr. Speaker, I quote that, and I bring this matter up merely because all the discussion of amnesty, pardon, and everything else indicates, as the gentleman from New York says, that we are going to bring people back here, get everybody back together, get them home.

I respectfully suggest that the whole issue of pardon and amnesty is being misrepresented to a good many of our youth who are in foreign countries and who very likely have acquired other citizenship and have automatically lost their American citizenship. They would be deportable under the immigration and naturalization laws, which cannot be abrogated by Executive pardon.

Mr. Speaker, I thank the gentleman for yielding.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman for bringing that point up.

In other words, the gentleman is saying that we will have to change the law to admit them under those circumstances. As he mentioned, even if these people are pardoned, they still cannot come back to the United States, and if they did come back, they would have to stay 5 years as a permanent resident before they could even apply for citizenship.

Mr. BROWN of Michigan. And it appears under section 212(a)(22), if the gentleman will yield further, that they cannot come back if they evaded military duty.

Certainly, the President, even the President, cannot abrogate a statutory law. I do not know what the precise situations will be, but what I have related appears to be the case. Even though, for instance, John Doe was pardoned, he still would not be able to regain immediately his U.S. citizenship, especially if he had lost it by acts making him a citizen of another country.

Mr. MONTGOMERY. Mr. Speaker, I think the point that the gentleman from Michigan (Mr. BROWN) is actually making is that this matter has not been thought out; all of its ramifications have not been thought out. This is very, very serious.

Mr. SIKES. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Speaker, I thank the gentleman for yielding.

I listened with considerable interest to the colloquy between my distinguished colleague, the gentleman from Mississippi (Mr. MONTGOMERY), and the distinguished gentleman from New York (Mr. KOCH) on the comparison between the pardon proposed by President-elect Carter for the draft evaders and the pardon, amnesty or pardon, issued by President Johnson to those who served in the Confederate Forces.

Mr. Speaker, there is absolutely no similarity in the situation. Those men who served in the Confederate Army were not draft evaders. They were men who served in uniform and served honorably, fighting for a cause in which they believed, fighting for a State and a nation of which they were a part, and which they felt deserved independence.

That is not at all comparable, Mr. Speaker, to the blanket issuance of a pardon for those who evaded the draft, in whatever country they lived.

Mr. MONTGOMERY. Mr. Speaker, my point was—and I saw the gentleman from Florida nod his head; apparently he thought I stated it wrong—however, I meant to state it in the way I did.

As I understand it, with respect to deserters and evaders from the Union forces, President Lincoln did not give a blanket pardon. They had to be handled case by case.

That is one of the points I wanted to make to the gentleman from New York (Mr. KOCH), that President Lincoln himself did not give a blanket pardon to his own troops.

Mr. SIKES. If the gentleman will yield further, Mr. Speaker, I compliment my distinguished friend, the gentleman from Mississippi (Mr. MONTGOMERY) for providing leadership for a strong expression of opposition from the Congress to President-elect Carter on his proposal to issue a blanket pardon for Vietnam-era draft evaders and deserters.

President-elect Carter's proposal is a very disappointing one. To issue a blanket pardon would set a dangerous precedent for future wars or military conflicts of any type. Such an act would hardly lessen the anguish suffered by families whose sons, husbands or fathers lost their lives in Southeast Asia.

A blanket pardon would damage, and in the minds of some, destroy the pride and honor connected with service to our Nation. It would doom a draft program in time of war from its inception. We would be inviting wholesale resistance with the obvious expectation of forgiveness once the fighting had stopped. Many more in the future would refuse to take their obligation for service seriously, knowing that there would never again be punishment for refusal. We cannot afford to allow this situation to come about.

We have already had a limited amnesty program under the present administration. Approximately 21,000 men have availed themselves of the Ford program. One-half of these have already earned their pardons and the others remain eligible. Is it wise to reward the lack of response to one Presidential clemency program by a pardon? There may be grounds for a new program or an expansion of the Ford program. However, the Carter proposal would surely short circuit these far more legitimate proposals.

The freedom which we as Americans are privileged to enjoy today could not have been possible without the dedicated efforts of those who served this country in war and in peace and, in all too many instances, sacrificed their lives.

Every citizen has a responsibility to our country. Those who refused to serve in a time of war should not expect to resume their place in society today with the same status as those who recognized and fulfilled their obligation to America. A pardon would be an affront to the millions of young men who answered their Nation's call and served valiantly in Southeast Asia, as well as to the families of those who gave their lives in Vietnam.

I sincerely hope that President-elect Carter will reconsider his announced plan and allow our ongoing system of justice to deal with all violators of the law.

Mr. Speaker, I wholeheartedly join in the opposition expressed to the blanket pardon.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding and want to commend the gentleman from Mississippi for taking the time by way of this special order to bring this important issue to the attention of the House and to the entire Nation.

I support the gentleman's opposition to amnesty and a blanket pardon and was pleased earlier in this session to join the gentleman's joint appeal to President-elect Carter in opposition to the Carter amnesty proposal.

Too many have given too much to permit a blanket amnesty to shield those deserters and evaders who have taken the law and their obligation to their Nation into their own hands.

I request unanimous permission to revise and extend my remarks.

It is by belief that justice—justice that accords an equal treatment of all citizens—requires that those men who deserted the service during a time of war must face a penalty for disobeying the laws of this Nation.

A blanket pardon would constitute a great injustice to the thousands of American citizens who faithfully served their country in Vietnam, and would be grossly unfair to the relatives of the 46,000 Americans who lost their lives during this war and to all those men who opposed the war but chose to stay home and pay the penalty for their opposition.

The leaders of this Nation cannot effectively direct its affairs if its citizens are allowed to decide for themselves which laws they will obey and which they will disregard. Any Federal policy that would grant blanket amnesty for those men who willfully defied the law of military service would not only be unjust to those thousands of young men who fulfilled their legal obligations in Vietnam, but would invite mass disobedience of our military laws in the future.

Compassion is a noble quality, but justice is of greater importance. I urge my colleagues to join our colleague, Mr. MONTGOMERY, in opposition to the Carter amnesty proposal.

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Texas.

Mr. ROBERTS. Mr. Speaker, I appreciate the gentleman's yielding.

As soon as the President-elect made his statement that he anticipated giving a general amnesty, I wrote him a letter, immediately before I checked with anyone else, on my personal stationery as chairman of the Committee on Veterans' Affairs, and asked him not to take that step. I have since rewritten on a similar basis.

Mr. Speaker, I appreciate the gentleman's taking this time. Of course, it would be the decision of the President-elect, and nothing we can do will have a great effect on what he decides to do.

However, Mr. Speaker, I am hopeful that the issues which the gentleman from Mississippi has raised here today will have weight and that the President-elect will decide not to take a general amnesty position.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Texas for his observations, and again I want to point out to my colleagues that the gentleman from Texas (Mr. ROBERTS) is chairman of the Committee on Veterans' Affairs. We have many problems pertaining to veterans, and I appreciate his position.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Speaker, I vigorously object to any blanket, unconditional or universal amnesty for Vietnam-era draft evaders and deserters for several strong and valid reasons. First, such a move is contrary to the treatment of evaders and deserters following all other periods of wartime during our Nation's history. There has never in our 200-year history been such an action. Second, it also disregards each specific crime committed and what if any punishment has been meted out for that offense. Third, equally important, if not more so, a universal pardon undermines our fighting forces and our ability to raise an army in a time of war. Fourth and last, there is no need for this unprecedented and unwise action as an existing program for evaders to earn this right to return has been successful.

More than 100 of our colleagues in Congress have officially voiced this viewpoint to President-elect Carter, who has repeatedly registered his support for a blanket pardon for draft evaders and may extend the same policy to deserters. Significant opposition to this ill-advised move is not only found in the Halls of Congress, it is widespread in the Sixth District of Louisiana and elsewhere in the country.

Mr. Speaker, no one can ignore the lessons of history. During the early years of this Nation, desertion was equal to "going over the hill" or AWOL status in present military jargon. Deserters could be shot on sight for any absence from duty. To temper this punishment, "full pardons" were given to deserters who returned to their duty station and were subject to military action at that time. History shows this was clearly not an unconditional or universal pardon. Military authorities ultimately "mustered out" some deserters while others were retained and still others were punished. In all instances, justice was applied on a case-by-case basis.

Following the Civil War, pardon for imprisoned Confederates were issued on a different basis than those for Union draft evaders or deserters. Reconciliation was allowed only after a pledge of allegiance was signed by each Confederate pardoned. Case-by-case decisions again formed the structure of justice.

Pardons for First and Second World War draft evaders followed the same historic precedent. In 1933, some 15 years after the end of World War I, President Roosevelt granted approximately 1,500 pardons to those who evaded the draft and served a sentence for this offense. Later, President Truman's three-member Amnesty Board, created to examine the cases of draft violators but not deserters, considered 15,805 cases and pardoned 1,523 men, about 10 percent. There is no record of a Presidential amnesty for draft evasion following the Korean conflict which parallels U.S. involvement in Vietnam more than any other period of wartime in modern history. Thus, a blanket amnesty or pardon has never occurred before.

Consistent with these long established guidelines for the administration of justice, President Ford announced a program of clemency for Vietnam-era draft evaders and deserters on September 16, 1974. As before, justice would be decided on a case-by-case basis. Offenders were provided the opportunity to "earn return to their country, their communities, and their families, upon their agreement to a period of alternate service in the national interest, together with an acknowledgement of their allegiance to the country and its Constitution. This "earn your return" clemency policy found more than 21,000 violators seeking to reestablish their good name under President Ford's program, amounting to 55 percent of all deserters and 16 percent of the draft evaders according to Army estimates. Some 7,500 accepted alternative civilian service and nearly 6,000 were granted outright pardons. Compared with the reaction to similar policies following World Wars I and II, participation in the "earn your return" program was significantly above that of the two previous pardon periods.

I believe the Clemency Board created in 1974 has been compassionate in applying justice tempered with mercy. It has honored policies of forgiveness in the past without demeaning the soldier who did his duty. No one got off scot free as they would under a blanket amnesty. Alternate service of up to 2 years worked. Proof of this point is found in statistics that reflect participation and policies that recognize an individual's obligation to family. As before, clemency is finally approved after an oath of allegiance to our Constitution is given. This program has worked well and there is no need for additional action.

Mr. Speaker, I fear universal amnesty will make it extremely difficult to raise a military force in the future and sustain military operations in the field. If laws can be flaunted and deserters forgiven without regard to the seriousness of their offense, our military will be unable to function. Desertion in the face of the enemy spells defeat. Blanket amnesty tells a soldier he will be forgiven if he deserts which will cause mass desertions jeopardizing the existence of our military units. Under the present all volunteer program or under the restoration of the draft, desertion with the expectation of forgiveness under a blanket pardon will gravely endanger our ability to raise an army and permit it to function under fire in the field. Under a draft system, forgiveness for draft evasion will seriously threaten such a system and, then, our ability to raise an army. This combination of threatening our troops in the field and our ability to raise an army endanger our very national defense.

Mr. Speaker, our Nation of 200 years was built around a framework of law. Justice must be given in keeping with those laws and changed only by orderly procedure. Blanket amnesty condones and encourages disrespect for important laws which in turn invites chaos.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman for his strong expression of support.

I might say, Mr. Speaker, that I have other colleagues who have 2 additional hours on this subject. I will be glad to step down in a few minutes and permit the gentleman from Idaho (Mr. HANSEN) and the gentleman from Virginia (Mr. DAN DANIEL) to use their time.

Mr. Speaker, I now yield to the distinguished gentleman from Texas (Mr. BURLESON).

Mr. BURLESON of Texas. Mr. Speaker, on December 17, 1976, I joined with more than a hundred of my colleagues in the U.S. House of Representatives in a letter to President-elect Jimmy Carter, expressing opposition to his proposal to grant blanket amnesty to all Vietnam war draft evaders. I now reiterate that position and more fully give my reasons therefor.

We hear the advocates of pardon say that our involvement in Vietnam was unjust and insupportable. Obviously, as things turned out, it was a mistake. The fact remains that we were at war and conscription was the law. If the day ever comes when each man and woman can decide on his or her own whether a conflict in which our country may be engaged is just or unjust, I shudder from what would result. In reality it would mean anarchy on which no nation can survive.

This seems to me, Mr. Speaker, to be the most fundamental point in this issue.

It is argued that draftees of the Vietnam era had no alternative of service and that the truly conscientious objector had no access to defense. True the machinery was different than World War II but the courts of this country were available for claims of this nature. Second, under President Ford's amnesty plan, incidentally about which I have doubts, there was opportunity for the evaders of the draft to clear themselves. Comparatively few took advantage of it.

Supporters of amnesty contend that there is precedent for such action and cite the policy of President Truman following World War II. Under that procedure, each case was handled separately on its own merits which is entirely different from blanket treatment. To the best of my knowledge, there was no amnesty or pardon for draft violators in World War I or in the Korean conflict. Blanket amnesty was issued to the Confederacy with the approval of Congress but even then there were limitations. So, it appears that what precedents there may be are rather vague and inconsistent with what I understand to be the view of the President-elect.

Should general amnesty be now extended to Vietnam draft evaders, there would be definitely established a prece-

dent which I fear would haunt this Nation in the future when it may be necessary to reinstate the selective draft system to defend ourselves.

There should be provision for anyone called up in a draft to present his case, either as a conscientious objector or for compassionate reasons. It is something else for each to decide whether a war is just or unjust and accordingly do his own thing.

My thoughts are for those veterans of Vietnam who sacrificed in numerous ways. How must they feel if complete forgiveness is granted those who ran away?

The evaders and deserters can still have their day in court. Let the case of each be heard and justice be done. Whatever we may have thought of Mao Tse-tung there is basic truth in his saying that,

> The pardon of the bad is to injure the good.

Mr. MONTGOMERY. Mr. Speaker, I yield to the distinguished gentleman from Texas (Mr. HALL).

Mr. HALL. Mr. Speaker, I rise to express my full support for the position taken by the distinguished Representative from Mississippi (Mr. MONTGOMERY).

The real issue involved here is embodied in the words chiseled into the stone of the Supreme Court Building, "Equal Justice Under Law." Both draft evaders and deserters have violated the law and should be brought before the bar of justice to answer for their actions and receive judgment. This is both a privilege and a responsibility incumbent upon them and upon us. They must explain their apparent violation of the law and we must listen with open minds to that explanation. We both must accept and abide by the impartial judgment of our judicial system.

What is important is that the system of justice be made to work. Each case is unique and must be judged for its merits. We are a nation of laws, not men. To establish a blanket pardon without regard for the circumstances of each case would be to substitute the whims of the moment for the tried and true system of justice that has served this country for over 200 years.

It is my duty to report to this body that over the last 9 months, by letter, telephone calls, and personal communications, the residents of my congressional district have indicated an overwhelming opposition to any scheme of unconditional or blanket amnesty for draft evaders. There is a depth of feeling involved here which goes to the very core of the relationship between a citizen and his country.

The word, "Amnesty" itself means forgetfulness. It is like a strange and dangerous ailment of the body politic; it is a selective amnesia. We are asked to forget distasteful incidents of the past and reflect only upon what is pleasant, forgetting that we live in a hostile world environment. More than a billion people on this earth are dedicated to the total destruction of our way of life. Draft evaders, in my opinion, are the epitome of selfishness. In the name of personal freedom, they undermine and threaten the only system that allows the human spirit to be free.

The United States of America is a republic in which the will of the Democratic majority is made effective through its elected representatives. In this context, amnesty is anarchy. It substitutes the willfulness of the individual for the lawful judgment of the majority.

Blanket unconditional amnesty would be bad for America. To me, it is as unthinkable as adopting for the State of Texas a new slogan, "Forget the Alamo."

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Texas for the very, very strong statement he has made and I certainly agree with what the gentleman has said.

Mr. Speaker, I am not sure that President-elect Carter realizes that, in my opinion, and in the opinion of many of the Members, that the great majority of the people in this country are opposed to any type of blanket pardon.

Mr. Speaker, at this time I yield to my colleague, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, first, I should like to commend my colleague, the gentleman from Mississippi, for taking the leadership on this issue in giving us the opportunity to express our opposition to this unconditional pardon of all draft evaders. I think it is the gentleman's position as chairman of the Select Committee on Missing Persons in Southeast Asia that gives us a unique insight into the type of injury and damage that a pardon can do to the people of this country whose loved ones served us so well. I oppose it not only because of the precedent it will set but, more importantly, what it will do to this country's needs when we have to fight wars in the future which may be unpopular in certain segments of our society.

I thank the gentleman for his leadership here.

Mr. Speaker, President-elect Carter has said that he will proclaim an unconditional pardon for all draft evaders of the Vietnam war within 1 week of his taking the oath of office.

Undoubtedly the Vietnam war was unpopular with many Americans; however, this is not at issue. What is at issue is whether those who blatantly broke the laws of the land should be welcomed back unconditionally.

Mr. Carter stated that "it is time for the damage, hatred, and divisiveness of the Vietnam war to be over." While we all share these sentiments, unconditional amnesty for draft evaders will neither bind the Nation's wounds nor will it heal the scars of divisiveness. Its first effect will bring about more bitterness among the millions of veterans who did their duty to the Nation whatever their personal feelings might have been, and among the many relatives of those 56,000 who gave their lives in Vietnam.

All the major veterans' organizations have expressed their adamant opposition to any kind of amnesty or pardon for draft dodgers and military deserters. In the words of AMVETS,

> We cannot condone a concept of special treatment for those who refused to obey the laws, designed by the people for the defense of our Nation and/or the promulgation of democracy abroad.

I certainly share this view fully and believe that an unconditional pardon would be a miscarriage of justice and an affront to our system of government under law. If we were to grant certain individuals the right to break one law with impunity, it would mean that we implicitly permit everyone to break any law he so chooses. The granting of unconditional amnesty would then be a revocation of all penalty for the violation of a law. Involved is not only a national sentiment for unity, but, just as important, a national imperative to maintain our traditional respect for equality before the law. The law must not be used as a political tool for special interests, or as a wedge to favor one group over another, as Mr. Carter's proposal would do.

No amnesty or pardon was given after World War I, World War II, or the Korean War. There was never any question then that unconditional amnesty could or should be granted. A case-by-case review did take place after the Second World War, but those who had broken the law still had to pay the penalty.

To grant unconditional amnesty now would create a dangerous precedent. What would happen should another war erupt, especially a war—like Vietnam—in which there is less than universal agreement and in which the issues are less than national survival? The hands of the Executive would be crippled and draft evasion on a widespread scale would surely be possible. To undermine the selective service system by extending pardons for draft evaders would seriously impinge upon the capacity of the United States to sustain an effective foreign policy or to wage a successful war. No other nation in the world would have this handicap, certainly none of the Communist countries.

The opponents of the Vietnam war, in any case, had the chance to once again become an active element in our society back in September 1974. President Ford, in the spirit of "national reconciliation," then declared a program by which draft evaders and military deserters could "earn their return to the mainstream of American society" by alternative civilian service. This was an excellent opportunity for those who truly wished to come back to do so. Yet only 21,729 of those eligible for clemency—or less than 20 percent—seized the chance given. It would seem to me then that those who had broken our laws really do not wish for pardon.

Some of those same draft dodgers that Mr. Carter propose to "pardon," in fact, have been quoted as saying that they will not accept the pardon, as it would be an admission of guilt on their part.

I strongly oppose, therefore, the granting of unconditional pardon for draft dodgers. We cannot, in all conscience or for the priorities of an effective foreign and defense policy, give special consideration to these people without weakening our system of justice and hurting national prestige.

Mr. MONTGOMERY. I should like to

thank my colleague, the gentleman from Mississippi (Mr. LOTT).

Certainly the Select Committee on Missing Persons in Southeast Asia was trying to close another sad chapter in Vietnam, and I would certainly hope that President-elect Carter would listen to somebody and consider this situation case by case. If he does not, he is getting ready to keep another chapter on Vietnam open for a number of years.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Pennsylvania.

Mr. MURTHA. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of the resolution offered by the gentleman from Mississippi (Mr. MONTGOMERY).

I had a fellow come to me the other day whose wife called me on the weekend, as a matter of fact. He had served in Vietnam honorably. He had been wounded seriously. He came home. He had 30 days to serve, and he just came home. His father was dying, and he never went back. Five years later this young fellow was married. His wife did not know that he had been by that time declared a deserter. He went on for 2 more years working, even though he had now been 7 years a deserter.

The FBI through some check of the files came to his door. They picked him up, took him away, and put him in jail. He went back into the service to serve 2 or 3 more months. He was given a less than honorable discharge.

Here was a fellow who had served honorably, been wounded, and under extenuating circumstances went back and got a less than honorable discharge. He had to serve a certain amount of time in the brig because of his very unfortunate experience. I believe he was a fellow who served honorably and, unfortunately, was emotionally upset and certainly had extenuating circumstances.

My point is that that fellow already served his time and was punished for what happened to him. He had served honorably. And we are allowing these people who did not serve 1 day in service to be let off scot-free. I think that is wrong. I think it is wrong for us to allow people like that not to suffer the consequences of their actions. If they want to go to another country, if they want to be citizens of another country, if they want to leave and not come back, I think that is a judgment they have to make.

I do not think it is going to bring together the American people or put behind the Vietnam era at all. I am convinced that the millions who served in Vietnam did not want to be there, but in many cases they served because their Government called.

When I saw those young fellows walking across rice paddies in water up to their necks, in sweat, and in mosquito-infested jungles, there was no question in my mind that they were doing it because their country called and not because they thought it was right.

Every war in the past has been cruel, and there have been people critical of that war. I think it is imperative that we have certain rules and regulations in the armed services, and I do not think there is any way that we can allow those rules to be broken.

We talk about this young generation. Most fellows fought with their hearts, and a lot of them stayed over there in Vietnam. Some of them are still missing, or certainly dead by now, as the gentleman from Mississippi (Mr. MONTGOMERY) has said. There is no question but what the families of those men have been dishonored by the proposal. Even though it is with good intention, I think it is going to have an extremely adverse effect on the military and on the future of our services. There is only one branch of the Government that can decide whether we are going to serve. The executive branch in conjunction with the Congress has got to decide whether we are going to have to go to war, and every person cannot decide whether that war is going to be good or bad. I think to pardon these people or to even propose amnesty without some sort of job punishment, or some sort of time in conjunction therewith, would be a mistake. If they want to serve as conscientious objectors, they can do that.

There are all types of methods of serving instead of going into the service if people do not want to fight. Many of these fellows were afraid to fight and would have deserted even if we had not had an unpopular war.

I think the proposed action will be a disservice to the country and a serious mistake.

Mr. Speaker, under the permission granted I insert in the RECORD at this point a very touching letter from a fellow who served in Vietnam who disagrees very strongly with the President-elect's position on the pardon.

The letter follows:

BROCKWAY, PA.,
January 1, 1977.

Re Your proposed pardon of all Viet Nam Era draft violators, military deserters and veterans with less than honorable discharges.

President Elect JAMES E. CARTER,
Plains, Ga.

SIR: Being of the generation who bore the brunt of that undeclared war, let me state that firstly, I did not support that political expenditure of life, limbs and minds. Because I did not support the war, nor believe the lies meted out to us by a government engaged in the twisting of its own people's minds, does not mean I support your stand on pardon for these violators of the law.

Do you not realize with this act of clemency you will be aiding in the breakdown of the military structure of the society? I have no love for the military—and believe all wars are an abomination. However, being pragmatic and knowing the world situation, a strong military is essential, at this point, to insure our own freedom. Many of us questioned our leaders policies in the 60's and received as answers—no surprises—only confirmation—of our darkest thoughts—in the 70's. If these men are welcomed back into this society—without having to pay the penalty for breaking the law, then you will have accomplished the feat of laying the last straw upon the camel's back. In other words, the next time you or any other president gives a war, maybe no one will come.

As a mother, though, I wait with baited breath your pardon of these criminals in exile and here at home. The pardon will rescind all guilt I may have had, if at some future time my son is called to war. I will cheerfully send him to another country to live and work for 7 or 8 years. I will at least know he is not dead or dying in some stinkhole of the earth but, instead, is a productive part of the human race with his body still intact. I will happily await the time until he can come home again—after all, the pardon will be setting a precedent good for all wars to come.

With your pardon you will also be giving a belated Christmas present to millions in this nation. The gift of playing the fool will be given to all those who went in good conscience to fight. Since they will receive such an unasked for present it seems to me you shouldn't overlook all the others. The gift of new legs, eyes, arms and minds to those who obeyed and were grieviously wounded. The gift of reincarnation to those who died slowly through torture or were blessed with a quick death. The gift of coffins or men to those who have waited all these years and wept the faith of their MIA's.

The greatest gift of all goes to the violators of the law. You will have given them the gift of laughter—all the way home.

Respectfully,

NANCY C. DESANTIS.

cc: President Gerald R. Ford.
cc: Hon. John P. Murtha, Armed Services Committee.
cc: The American Legion Magazine.
cc: Du Bois Courier-Express.

Mr. MONTGOMERY. Mr. Speaker, I might say we will have additional time under the special orders granted to my colleagues, the gentleman from Idaho (Mr. HANSEN) and the gentleman from Virginia (Mr. DAN DANIEL).

I would only like to add to the remarks made by the gentleman from Pennsylvania (Mr. MURTHA) for the benefit of our newer colleagues that the gentleman from Pennsylvania (Mr. MURTHA) was the first Vietnam combat veteran to come back and serve in the Congress of the United States. He knows his subject and what he is speaking about. I would like personally to thank the gentleman from Pennsylvania for that very strong statement.

Mr. McCLOSKEY. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from California (Mr. McCLOSKEY).

Mr. McCLOSKEY. Mr. Speaker, there is no Member of the House for whom I have greater affection and respect than the gentleman from Mississippi who has just spoken so eloquently.

I suspect that 115 years ago today, I would have had the same respect for him when he unquestionably would have been serving with General Hood and the Mississippi brigades in the finest army ever assembled on this continent, the Army of Northern Virginia.

Then, as now, our disagreement would hopefully have been deemed to be between reasonable men of viewpoints stemming from opposing philosophies, both of which are necessary ingredients of that accommodating system of government we are privileged to serve.

Our disagreement is similar, I trust, to that which once existed between Robert E. Lee and Stonewall Jackson on the one hand and Ulysses S. Grant and Oliver Wendell Holmes, Jr., on the other. The former felt that the "duty, honor, country" of their time required allegiance to their State, not their Nation. Lee and Jackson were once deemed traitors by the Congress of the United States. It

was not that they merely declined to fight in a war of the United States; they actually took up arms against the United States.

But we have long since pardoned Robert E. Lee and Stonewall Jackson, and they are rightfully now recognized as American patriots of the first rank.

As Justice Holmes put it, in a Memorial Day speech nearly 20 years after Appomattox:

> Not long ago, I heard a young man ask why people still kept up Memorial Day, and it set me to thinking of the answer. Not the answer that you and I should give each other—not the expression of those feelings that, so long as you and I may live, will make this sacred to memories of love and grief and heroic youth—but an answer which should command the assent of those who do not share our memories, and in which we of the North and our brethren of the South could join in perfect accord.
>
> So far as this last is concerned, to be sure, there is no trouble. The soldiers who were doing their best to kill one another felt less of personal hostility, I am very certain, than some who were not imperiled by their mutual endeavors. I have heard more than one of those who had been gallant and distinguished officers of the Confederate side say that they had no such feeling. I know that I and those whom I know best had not. We believed that it was most desirable that the North should win; we believed in the principle that the Union is indissoluble; we, or many of us at least, also believed that conflict was inevitable, and that slavery had lasted long enough. But we equally believe that those who stood against us held just as sacred convictions that were the opposite of ours, and we respected them as every man with a heart must respect those who give all for their belief. The experience of battle soon taught its lesson. Even others who came into the field more bitterly disposed, who could not stand up day after day in those indecisive contests where overwhelming victory was impossible because neither side would run as they ought when beaten without getting at least something of the same brotherhood for the enemy, that the North Pole, the magnet, had for the South—each working in opposite sense to the other, but each unable to get along without the other.

"Brotherhood for the enemy." Is this not the same thing the President-elect seeks to achieve?—Not between those who fought against one another, but between those who fought and those who believed that the fight should not be made at all.

The President-elect of the United States, honoring a commitment he made to the American people during his recent campaign for their support, proposes a blanket amnesty for those who declined to fight in Vietnam, and perhaps a readjustment of the discharge record of those who received less-than-honorable discharges during the conflict.

The gentleman from Mississippi opposes amnesty both for those who chose not to fight in Vietnam and those who, by virtue of their dismay, horror, or inability to cope with the demands of that war, committed some indiscretion which resulted in a less-than-honorable discharge and an accompanying stigma which may deny them full employment opportunities for the balance of their lives.

In his opposition, the gentleman from Mississippi concedes that there may be no such thing as a good war. I would agree. But might the gentleman not also concede that there could be a war so bad and so vicious that patriotic Americans would choose not to participate in it directly, or, for reasons that in their youth and idealism they might not understand, indirectly pursue a course of action that subjected them to a less-than-honorable record of service during that war?

"Duty, honor, country" are words that represent a sense of obligation all of us feel, not just those privileged to attend West Point. And as those words were revered by those we now honor even though they fought against the United States, they should certainly be broad enough to include those who carried their dissent from the Vietnam war to a nonviolent but illegal action.

Vietnam was not a war declared by Congress. From the earliest introduction of U.S. troops into Southeast Asia, our combat efforts there were accompanied by deception at the highest levels of our Government. The deception of the Gulf of Tonkin facts as related to Congress in July 1964, the deception of the "secret" war in Laos, the "secret" bombing of Cambodia, the direction to the White House plumbers to obtain evidence to discredit a prominent antiwar leader—these were causes in which even a George Washington or Patrick Henry might well have refused to participate.

Now, in 1977, we ascribe no lack of honor to those who opposed Vietnam, but who by reason of sex or age were not subject to military service. We do not suggest that peace marchers foreswore their duty to their country in expressing dissent to the Vietnam war. Only men of military age during the Vietnam era are subject to penalty because their dissent could only be expressed in conduct which was then by law illegal.

As I understand President-elect Carter's thinking, it is merely that he wishes to remove any governmental sanction or remaining official discredit pertaining to this single class of U.S. citizens—these men of military age during the 9 years of involvement in Vietnam who were guilty of some illegal act related to military service.

Except for this class of citizens, all the rest of us have had the privilege of believing in America, yet disagreeing, in various forms of act or word, with a national policy which, in retrospect, most U.S. citizens now believe to have been a national tragedy.

It is no great insult to those who fought honorably in Vietnam to grant a pardon years later to those who declined to do so. It is no judgment on the quality of morality or patriotism of either group. The pardon power was placed in the Constitution, I take it, not to make us a nation of men rather than of law, but in recognition that the law could best be upheld on occasion by an act of Presidential compassion and generosity.

Following the great Civil War which once divided this Nation, this Chamber heard hours of thundering oratory from northern Congressmen who were unwilling to forgive the actions of men who took up arms for the Confederacy. Ironically enough, the great bulk of the comments criticizing President-elect Carter today have come from representatives of those States whose citizens were similarly deemed unpatriotic over a century ago for their view that the "duty, honor, country" of their time required allegiance to States' rights, rather than Federal rights.

In an amnesty debate on March 17, 1866, Ebenezer Dumont, a Member from Indiana, opposing amnesty, used words remarkably similar to some we have heard today:

> And are we not violating the spirit, intent, and meaning of these clauses (of the Constitution) by admitting those who have so lately given every evidence of the most deadly hostility and undying hate?

Senator Sumner of Massachusetts, on December 20, 1865, said this:

> When I call to mind the attempt to whitewash the unhappy condition of the rebel States, and to throw the mantle of official oblivion over sickening and heart-rendering outrages, where civil rights are sacrificed and rebel barbarism receives a new letter of license, I feel that I ought to speak of nothing else . . . Sir, it is the duty of Congress to arrest this fatal fury. Congress must dare to be brave; it must dare to be just.

It was not until December 25, 1868, that President Andrew Johnson granted "a full unconditional pardon and amnesty to all persons engaged in the late rebellion," and it was not until August 5, 1976, that Robert E. Lee was restored to full citizenship by act of the 94th Congress.

In retrospect, Congress has never been proud of its vigorous opposition to Presidential acts of compassion following divisive conflict. There seems no need to congressionally prolong the debate over the proposed constitutional action of a President who seeks to honor a commitment he made to the American people in a campaign where the issue was fairly debated and the winner fairly elected, partly on the basis of that commitment.

I suggest we all retire with grace from this particular debate, accepting Abraham Lincoln's suggestion, "With malice towards none and charity for all."

Mr. WINN. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, I appreciate very much the gentleman from Mississippi yielding to me. I commend him for the work he has done and the effort he has put into making a very strong and important part of these hearings available to the President-elect.

Mr. Speaker, I rise today to state my objections to President-elect Carter's announced intention to issue a blanket pardon to Vietnam draft evaders.

Our involvement in Vietnam was long, confusing, and divisive, and we could argue the morality of it for hours. And because that conflict is still so clearly etched in our minds, the issue of amnesty or pardon, is a highly emotional and frustrating one.

Those who served might not have agreed with the morality of the war. In fact, they might have opposed it openly. But the morality of the war is not the

issue. Nor is it whether the draft evaders were right or wrong. The real issue is what to do about the 25,000 or more fugitives without creating further divisions here at home? When, and how, do we decide it is time to forgive the offenses rather than risk a continuation of the resentment and hatred from within?

I think there are several reasons why a pardon should be rejected. Let me list just a few.

First, even though we have come to accept the fact, as a Nation, that our involvement in Vietnam was well intentioned, but ill-advised a blanket pardon is not the best way to alleviate our Nation's hurt. On the contrary, I think it could well open up some deeper wounds.

Second, a blanket pardon, as proposed, would do a great injustice to the thousands of men who served their country honorably during our involvement in Vietnam and to the families of those who gave their lives.

Third, let us consider, for example, the case of a young man who served a year in Vietnam, took 30 days leave, was sent back for another year, took another leave, and at the end of his 26th day of leave was ordered to report back to a base in the Pacific to help arm the bombers heading for Vietnam. He refused and was court-martialed. Now he has a permanent blot on his record, a mark that will haunt him the rest of his life. Do we not owe him something? Does he not deserve consideration before someone who evaded the draft?

Now, let me give you another reason. I believe a blanket pardon would set a very dangerous precedent for the future. What incentive would young people have for obeying draft laws in the future if they thought there was a good chance for amnesty later on? In the case of Vietnam, one young man told the Chicago Tribune that he had evaded the draft for just that reason. Therefore, I think the net result of a blanket amnesty could seriously impair our ability to raise and maintain military forces in the future, especially in times of war or national emergency.

Certainly, President-elect Carter has a constitutional right to issue a pardon, and several Presidents before him have taken similar steps.

Nevertheless, if the pardon must be issued, I hope that Mr. Carter will take a further step, as well.

Yesterday, I submitted to the House a concurrent resolution urging the establishment of a Presidential Task Force on Prisoners of War and Missing in Action to propose courses of action to achieve the fullest possible accounting for all Americans listed as missing in Southeast Asia.

Today, I am asking you, my colleagues, to join me in urging Mr. Carter to make this gesture of good faith to the American public.

Mr. COCHRAN. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Mississippi (Mr. COCHRAN).

Mr. COCHRAN. Mr. Speaker, I thank the gentleman from Mississippi (Mr. MONTGOMERY) for yielding and I thank him for taking the time under this special order to bring this issue to the floor and to the attention of the American Congress.

Mr. HUGHES. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Speaker, I join with my colleagues in commending my distinguished friend, the gentleman from Mississippi, for taking the initiative on this issue. I stand with him 100 percent.

I think the President-elect is making a mistake. I think that it is unfair and it is not in the interest of this country to distinguish, as the President-elect is doing, between draft evaders and those who served and deserted and who have been discharged under less-than-honorable conditions. Under the latter situation, as I understand it, the President-elect proposes to deal with them on a case-by-case basis.

I do not consider that to be justice under the law. I think we are setting a bad precedent and the President-elect is doing a great disservice to those who have served honorably and those who lost a great deal in that unfortunate war.

Mr. Speaker, the subject of granting a blanket pardon or general amnesty to the young men who chose not to serve their country or deserted during the Vietnam conflict is dredging up the old divisions that rent the country so deeply in the 1960's and early 1970's. Arguments on both sides of the issue are compelling. The President-elect has announced his intentions of making this a priority issue, intensifying the debate surrounding the question of amnesty.

I believe President-elect Carter is most sincere when he proposes granting amnesty to those who would not serve and to those who deserted their posts after induction. It pains me to have to disagree with the moral and articulate President-elect, but on this occasion, my conscience dictates that I do so. I have read a great deal about the subject of amnesty—its historical background, what Presidents have done in the past when confronted with similar situations, the philosophy behind it, and its moral implications upon society as a whole. After I finished my reading, I listened to the mothers and fathers, the brothers and sisters, the children, and the friends of those who lost their limbs, their eyes, their futures, or their lives. I listened very closely to those young men who did not want to go because they felt it was wrong. I listened to those who served and served with dedication and enthusiasm. And then I thought about amnesty a long time. One recurring theme kept pounding away and repeating itself in both thought and conversation. The theme was accountability.

Accountability for one's actions is the very touchstone behind our Constitution and government. Granting a pardon to those young men who did not serve in the Vietnam conflict because they deserted or avoided the service because of questionable means tears at the basic principle of our way of life—responsibility for one's actions both on a personal level and again on a broader basis. That is why I feel it is absolutely imperative that we institute a case-by-case review for those young men who are interested in making their peace with America. In my judgment, we need to offer a forum for these individuals to make public their reasons for not wanting to serve. Those who choose not to serve for reasons of conscience will have the ways and means of letting the world know their reasons. A case-by-case review is consistent with our tradition of due process as well as allowing each individual the opportunity to account for his behavior. Long prison sentences are not necessary for those individuals whose cases might not strike the judge as being matters of conscience. It makes much more sense to put those men to work in some form of alternative service to the country. I feel that this approach will help us close the door on an unhappy and divisive period of our history as well as adhering to the principles of our constitutional and democratic form of government.

PROPOSED BLANKET PARDON

The SPEAKER pro tempore (Mr. RODINO). Under a previous order of the House the gentleman from Idaho (Mr. HANSEN) is recognized for 1 hour.

GENERAL LEAVE

Mr. HANSEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. HANSEN. Mr. Speaker, I certainly commend my colleague, the gentleman from Mississippi (Mr. MONTGOMERY), and my colleague, the gentleman from Virginia (Mr. DAN DANIEL), for their interest in putting this special order together today and to make it possible for Members of this body to express their wishes and their concern regarding this matter of a blanket pardon.

The campaign promise of President-elect Jimmy Carter to grant a blanket pardon to those who violated selective service laws during the Vietnam war, only promises to subvert our system of justice at a time when our country is struggling to rebuild its national strength and pride. Mr. Carter's distinction between a blanket pardon for draft evaders and a case-by-case evaluation according to military laws for deserters is simply inconsistent and unfair and will produce more injustices than it could possibly resolve.

The December 5 hint that Mr. Carter is considering broadening the pardon category definition, and the democratic platform he ran on that pledged clemency to anyone "in legal or financial jeopardy because of their peaceful opposition to the Vietnam war," could balloon the pardon cases from an estimated 4,500 to an astounding 800,000. Even if Mr. Carter settles for a compromise that would result in a figure some where in the middle of this vast range, such a blanket unconditional pardon would be

unprecedented in the history of our country.

Mr. KETCHUM. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, I greatly appreciate this opportunity to express my vehement opposition to President-elect Carter's proposed blanket amnesty for Vietnam era draft evaders, and I thank the gentleman from Mississippi and the gentleman from Idaho for providing us with this special order.

Last week, an article appeared in the Washington Post which struck me very sharply with its sadness and poignancy. I am referring to Lt. Cmdr. Michael D. Christian's announcement that he will retire from the Navy, leaving his many duly earned medals on the graves of fallen Vietnam veterans to protest this amnesty plan. He fought with honor in Vietnam, was highly decorated, and spent 6 years as a prisoner of war. Those of us who have fought in any of our Nation's conflicts—and I have participated in two—can surely empathize with the disgust this man must be experiencing. I totally concur with his views that we are turning the tables on honor, making villains of those who gave of themselves in the service of their country, and granting absolution without question to those who elected to serve only themselves. I personally feel that Mr. Carter's proposal makes a mockery of all that has made this country great. To me, it says loudly and clearly that we owe no debt to the Nation which has given us so much; that we need feel no responsibility to protect the freedoms handed down to us by our forefathers; and, perhaps worst of all, that over 50,000 young American men gave their lives in vain.

Some time ago, I received a most astonishing letter from a young man who felt very put upon when he learned that amnesty could be gained only if he performed some alternative form of public service. Not only did he have the unmitigated gall to tell me that he considered such a mandate to be an "imposition" and a "disruption" to his life—he also indicated that he felt he should be entitled to veterans benefits for the period of time spent in alternative service! I have never been known for my soft-spoken tolerance of outrageous suggestions, and my reply to this gentleman, while as restrained as possible, stated that he had no idea what "disruption" to his life could possibly mean. He had chosen not to obey his country's command; he had never spent a night in a cold, wet trench watching a friend and comrade die; he had never been concerned with whether or not he might be the next to fall, but, frankly, when one considers how much was given by our forefathers so that we might have our freedoms today, I doubt I would have agreed with him that even those horrors of war experience could be considered an "imposition."

I cite this example not to give myself a dramatic platform, but rather to illustrate by absolute fury at the now-proposed blanket pardons. I doubt that anyone present in this Chamber has not some chilling knowledge of the meaning of battle. Those of us who have fought ourselves surely know at least one individual whose life has been touched by the potential tragedy of war. If, by some miracle, any of our colleagues have been spared this knowledge, I ask them to consider this: in the years to come, suppose your own son, or grandson, had fought with distinction in the service of his country. Suppose that, upon his return, he was not greeted with respect, but reviled by his countrymen, while those who stayed at home growing fat and happy were heralded as innocent heroes. How would you feel? Probably about the same way Lieutenant Commander Christian is feeling today.

Speaking for myself, I find the idea of "blanket amnesty" abhorrent, and, as one who is proud to call myself an American, I find it embarrassing.

Once again, my thanks for the opportunity to present my admittedly vituperative views on this unthinkable issue.

Mr. CHAPPELL. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Florida.

Mr. CHAPPELL. Mr. Speaker, I thank the gentleman from Idaho for yielding. I want to commend the gentleman from Idaho (Mr. HANSEN) and the gentleman from Mississippi (Mr. MONTGOMERY) for giving us this opportunity to discuss this very serious matter. I have to join these gentlemen in most strongly urging President-elect Carter to reconsider his pledge to grant an unconditional pardon to Vietnam-era draft evaders. I make this plea on behalf of millions of Americans and in the name of freedom and justice for all.

The question of whether the U.S. role in the Vietnam war was right or wrong is beside the point. Our involvement in Southeast Asia may be debated endlessly on grounds of politics, morality, or national interest. However, the fact remains that, by any reasonable definition, the draft law was legally enacted.

Our forces in Vietnam were supported by a succession of congressional appropriations at the repeated requests of five Presidents. Our citizens, who either supported or opposed our elected officials and their Presidential and congressional actions, had both the opportunity and the knowledge to challenge and debate the wisdom of our country's involvement. No previous war in history has been brought more forcefully, extensively, dramatically, or intimately to the attention of the average citizen in the course of his daily life.

Obviously, the draft law was by no means universally popular. Designed to spread the obligations and burdens of bearing arms throughout our population, the draft law—like every other manmade law—embraced human imperfections both in its construction and administration.

Bearing in mind its inevitable shortcomings, let us ignore for the moment the particular law in question. Forget also that this law was fundamental to our country's system of national security. Nonetheless, it remains critically important that we acknowledge the military draft was law, and those who chose to ignore this Federal order were consciously breaking the law. Not only that, draft evaders were made fully aware of the consequences. Yet they decided to put their personal convenience and desires ahead of their country.

If we accept the protestations of the more avid supporters of a blanket pardon, we would come to believe that every violator acted out of conscience. Such a proposition is, to me, an overzealous absurdity. If there were some way of determining individual motivations—which of course there is not—I am sure we would find some who sympathized with our enemies along with others who acted out of poor judgment, selfishness, and a goodly measure of cowardice. On the other hand, I would expect that very few who evaded the draft or deserted our Armed Forces would qualify, solely on the basis of their motivations, as either moral heroes or innocent victims of an unjust war.

I find it difficult to distinguish between a deserter and an evader. I consider it a distinction without a difference. I believe they were both wrong and I find no basis for considering the evader any less wrong than the deserter.

As virtually every adult American realizes, those who opposed all wars on moral grounds—the conscientious objectors—were given the alternative of noncombatant service. Some 35,000 draftees requested and were assigned such service in the medical corps between 1964 and 1975.

Those who opposed only the draft law of the Vietnam war had the alternative of informing the authorities and accepting a prison sentence. About 9,500 men were convicted of draft violations between 1961 and 1975.

Eligible men who either refused to register or to be inducted numbered about 1 million. Most of these violators either went to Canada or Sweden or hid out in the United States. These are the men who rejected every alternative under the law—military service, civilian work, or imprisonment.

An across-the-board pardon for those who simply did not want to go would be an affront to the men and women—and their families—who honorably served this Nation—particularly those who sacrificed their lives. How can we simply dismiss those who answered the call and met the hardships, and say—in effect—that it is just fine for people to shirk their basic responsibilities as citizens if they happen to feel like doing so?

In addressing this mass commission of a felony by draft violators, we must carefully weigh and wisely apply the essential elements of compassion, national reconciliation, our country's security interest, and the rule of law. A blanket pardon would set a dangerous precedent, which could endanger the Nation. In any future crisis, people of military age—whether motivated by conscience or disloyalty—could choose to disobey the law on the well founded assumption that they would be pardoned.

Letting willful lawbreakers off scot-free would foster a general disregard for other laws and invite future lawbreaking. If draft violators are given no pen-

alty—not even noncombat or civilian service—this would further encourage self-indulgence, cowardice, and disrespect for the disciplines of freedom that are being challenged around the world.

We would not grant a blanket pardon to thieves or bunco-artists—or any other category of violators of written law, regardless of the circumstances at the time. What possible justification do we have for dismissing this far more serious disregard for one's country? If you see thousands of lawbreakers relieved of the responsibility to adhere to one law, why should you not assume that you do not have to abide by a particular law that you do not happen to like?

Justice demands much more. Instead of being swept away with sympathy for the draft violator, we should remember the privations endured by those Americans who fairly met their obligations. Among others are the soldiers, sailors, and airmen who did their duty. Then there are the conscientious objectors who worked in the medical corps and civilian services and also the men who forthrightly challenged the law and paid the legal penalty. And let us by no means overlook the vast majority of Americans who, despite their personal misgivings, found insufficient evidence—except, perhaps, in the perspective of historical hindsight—to declare our involvement as immoral or unjust—much less illegal. In short, in our search for justice let us not sacrifice our Nation's security nor lose sight of the vital best interests of our society.

Make no mistake about it, draft violations in time of war are not victimless crimes. Without any doubt, many a law-abiding American suffered pain or crippling injury—or even gave his life—in place of a violator. Pardoning draft evaders and deserters would make a mockery of patriotic service. I can think of no greater dishonor this country could pay its war veterans.

I oppose any fixed formula. I would never support a uniform punishment for violators. Similarly, it would also be an unthinking injustice to apply across-the-board amnesty.

Conversely, I maintain that all alleged lawbreakers should stand trial. The courts can then determine guilt or innocence and pass sentence according to the circumstances. Unless violators are handled on a case-by-case basis, fairness and justice will only occur by coincidence.

I am unable to find historical support for unconditional amnesty. Virtually all our war-related Presidential amnesties were neither unconditional nor universal in intent or application. In the programs of President Lincoln and President Truman, deserters were subject to military justice, other violators were examined by amnesty boards, and none were excused who sympathized with an enemy or rebelled against our Nation. Out of the 15,805 violator cases considered by the Truman Amnesty Board, for example, only 1,523, or about 10 percent, were pardoned.

There is no place in this great Nation for vindictiveness or revenge against the violator. But justice tempered by mercy requires that each man be judged on the merits of his own case, rather than given a blanket pardon.

Mr. ABDNOR. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from South Dakota.

Mr. ABDNOR. Mr. Speaker, I want to thank the gentleman from Idaho and the gentleman from Mississippi for bringing this subject before this body, a subject that is certainly one that is soul-searching.

Mr. Speaker, I join with my colleagues in this special order so that the American people might have an opportunity to voice their opposition to President-elect Carter's proposal to issue a blanket pardon for Vietnam-era draft evaders.

We have heard many supporters of this pardon refer to the etymology of the word "amnesty." They lecture to us that the word does not mean "to forgive" but it means "to forget." We would all like to forget the nightmare of Vietnam. We would all like to forget the turmoil and trouble in this country at the time. I remind my colleagues, however, that we must never forget the oath of office we took to uphold and defend the Constitution, and by extension, the country. That is the issue at stake. Its importance merits a few minutes of discussion.

Federal law concerning the draft and its evaders, as well as military deserters, was written to insure a strong and well-defended America. Legislators who enacted the laws stipulated provisions to exempt from combat and provide certain alternatives for Americans who conscientiously could not take up arms. It is significant to note that an Army survey of Vietnam deserters processed under President Ford's amnesty program showed that only 14 percent of those who deserted did so in opposition to American involvement in Vietnam. We also note that while some 55 percent of military deserters took advantage of President Ford's amnesty program, only about 16 percent of draft evaders did so.

Clearly, the issue at hand is not forgetting the wounds and turmoil of America's defense which so critically depends on a reliable manpower component. Critics will contend that the creation of the All-Volunteer Force and the emasculation of standby draft machinery obviates this criticism. Yet, I point out to my colleagues that the selective service system was designed for emergency contingencies. By giving a blanket pardon to Vietnam draft evaders we only augment the impotence of a selective service system for America's future. The world is no less hostile to America's survival or her interests. To mistake the current sufficiency of a volunteer force with adequate defense for the future is flatly wrongheaded.

I remind my colleagues that they must not forget their obligation to defend this country by making diligent and intelligent decisions. The question of amnesty is central to the future viability of America's defense. I know my colleagues join with me in urging Mr. Carter to reconsider his announced intentions to offer a blanket pardon. This country's defense depends upon reasoned and prudent actions. This we cannot forget.

Mr. ICHORD. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Speaker, I did not join with the gentleman in the well and the gentleman from Mississippi in the original letter to President-elect Carter asking him to reconsider his position on the very ambiguous term, "blanket pardon." The reason I did not do so was that I hesitated to pressure any candidate, whether he be the elected President or whether he be a Member-elect of this body, to change a position that he had taken during the campaign; in other words, to go back on a campaign promise.

But, I think that the gentleman in the well and the gentleman from Mississippi have performed a great service by asking for this special order. The things that have been spoken on the floor of this House today have clearly shown what a can of worms will be opened up if we go into this matter of blanket pardon, whatever it may well be.

The gentleman from Michigan (Mr. BROWN) and the gentleman from Pennsylvania (Mr. MURTHA) have given examples of just what kind of a can of worms it will be.

I ask the gentleman from Idaho to expound upon a statement made by the gentleman from Mississippi. As I understood the gentleman from Mississippi at the outset of his remarks, he said that the blanket pardon would apply to all draft evaders as well as those who had received less than honorable discharges, undesirable discharges or bad conduct discharges. The question I want to ask the gentleman from Idaho is, does he understand that it will cover cases that have not yet been decided in regard to desertion?

For example, I just received a case in my office the other day wherein a young gentleman had served honorably in the war in Vietnam. He had been wounded several times; he had served 5 or 6 months in very active fire zones; he signed up for another year under a program that they had in existence at that time; he came back to the United States on his 30-day leave, and never reported back.

Would this blanket pardon, or whatever it is, apply to the case of that particular individual? I certainly have more sympathy for that individual who served honorably for his time in Vietnam than I would have for someone who runs off to Canada and evades the draft.

Mr. HANSEN. I think there is an answer to this, and since the gentleman from Mississippi (Mr. MONTGOMERY) is at the microphone and the question is addressed to his statement, I will yield to him.

Mr. MONTGOMERY. I thank the gentleman for yielding. I would like to clear up this point because I probably did not make it as clear as I should have.

As I understand it, coming out of Atlanta from Mr. Kirbo, and also from Plains, Ga., President-elect Carter will issue a blanket pardon to those civilians who are draft evaders, who have been convicted; those who have charges pending against them will have these charges dropped; and anyone else who has any black mark against them in connection with draft evasion will receive a full pardon.

As to the point the gentleman makes,

the President-elect has not made a firm policy on that. As far as I know, no decision has been made on deserters and those with less than honorable discharges, but the only firm commitment I know he has made is the blanket pardon for evaders.

He will look into the situation at a later date.

But I totally agree with the gentleman's point; in effect, President-elect Carter has the cart before the horse. It would seem to me that before he takes care of these draft evaders, at least he should have looked at the case the gentleman talked about, and it should be handled on a case-by-case basis.

Mr. ICHORD. If the gentleman will yield further, I certainly agree with the gentleman from Mississippi and the gentleman from Idaho. The only equitable way we can handle this very difficult problem is to deal with each individual case on a case-by-case basis.

Mr. HANSEN. Mr. Speaker, I thank the gentleman from Missouri. I think he made a good point and allowed us to bring out some things that should be discussed.

Mr. TRIBLE. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. I thank the gentleman for yielding.

Mr. Speaker, I am today calling upon President-elect Carter to reconsider his decision to issue a blanket pardon to all Vietnam era draft evaders.

Although I have compassion for the plight of these young men and their families, I cannot agree with Mr. Carter's position. These young Americans failed to honor their legal and moral obligations to their country and they should be held accountable for their actions.

Early in his term, President Ford offered these citizens an opportunity to earn their way back, through alternative service, to their country. Many elected to return, admit their mistake and serve. Many more did not and now seek to be reaccepted into society. I do not believe we have a further responsibility to those who failed to take advantage of President Ford's clemency program. I say they should not be pardoned without serving.

This is not the time to absolve those who refused to honor their obligation. It would be unfair to the thousands who did serve—some of whom died and others who remain scarred or maimed for life, to permit these young men to have a free ticket back to America.

Instead of focusing our sympathy on the draft evaders and deserters, we should give our full attention to the problems of those who fulfilled their obligation to serve their country. To do otherwise would be to show these brave men disrespect and to dishonor their patriotic service.

Mr. HANSEN. Mr. Speaker, I appreciate the gentleman from Virginia, as a newcomer to this body, taking an early and firm stand on a matter of this importance.

Mr. TREEN. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Louisiana (Mr. TREEN).

Mr. TREEN. I thank the gentleman for yielding.

Mr. Speaker, perhaps our exercise here this afternoon is futile. Apparently our President-elect is going to proceed with his plan to issue a blanket pardon for all Vietnam-era draft evaders during his first week in office, despite the expressed objections of a majority of the citizens of this country.

If our speeches here this afternoon are futile in that they do not dissuade Mr. Carter from his announced plan of action, they will at least show the American people that there are those in Congress who refuse to sit back and acquiesce silently to a misconceived and disastrous course of action.

It is not my intent to argue the pros and cons of our military involvement in Vietnam. Rather, I want to talk about those who accepted military service, and those who did not; those who accepted the draft and went to war, either out of a sense of duty or fear of the consequences of not serving, and those who did not; those who did not break the law, and those who did.

The young men who refused to be drafted were not alone in their dislike of the war. I know of very few men who wanted to be drafted and sent to Vietnam. Yet the vast majority of those who were drafted went. How does Mr. Carter explain his pardon to them? For everyone who evaded the draft, someone else had to go to Vietnam in his place. How does Mr. Carter explain his pardon to them, or to the families of those who did not return?

There is another grave question raised by Mr. Carter's call for a blanket pardon. What are we going to do if we have to reconstitute the draft? How are we going to enforce another draft call when it comes? Are we willing to gamble that our country will remain at peace forever?

The enduring effect of Mr. Carter's pardon will be that those who may be drafted in the future will know that those who resisted the Vietnam draft were the beneficiaries of not one, but two Presidential pardon programs within 5 years of the end of that war. Is this the precedent Mr. Carter wants to set?

Of course the problem runs much deeper than Mr. Carter's proposed pardon. There is a segment of our society that considers it quite noble that these individuals unlawfully refused service in their country's Armed Forces. To be quite frank, what sickens me the most is the knowledge that once these draft evaders receive their Presidential pardon, they will return home unrepentant, and lauded by some spokesmen and members of the media as conquering heroes, rather than as the lawbreakers they are.

If our laws are wrong, they can be changed. If our involvement in Vietnam was wrong, history will decide that. But to grant an unconditional pardon to those who evaded the draft is too great a mistake for me to accept silently.

At this point I would like to place in the RECORD for my colleagues an editorial from the January 1977 edition of Army magazine on the subject of the Presidential pardon.

The editorial is as follows:

WHEN THE "OTHER JOHNNY" COMES MARCHING HOME

(By L. James Binder)

If President-elect Jimmy Carter lives up to a promise made recently by one of his spokesmen, sometime later this month those who evaded the draft during the Vietnam War era will begin coming out of hiding places and returning from foreign sanctuaries to heroes' welcomes.

Make no mistake: There *will* be heroes' welcomes when the newly inaugurated President issues his expected pardon—not from our people as a whole, heaven forbid, nor from the President himself, but from a vocal and highly visible smattering whose members consider draft resisters, deserters, and those those with less-than-honorable discharges to be the real medal-winners of the war.

POINTLESS TO ARGUE?

These—the draft evaders and their supporters, at least—are claiming victory. We who have opposed amnesty in any form ever since the prospect was first raised have lost.

A good soldier would let it go at that, and so perhaps would the sensible citizen who might well argue that it is pointless to contest a *fait accompli*. He or she might also argue that lashing out editorially in a publication [Army magazine] whose readers could largely be expected to agree with the writer's point of view doesn't add up to much in the way of opposition.

Whatever, the cause deserves better than to be sent to its grave without so much as a wake.

AWAITING THE EXPLANATION

Death came about ostensibly as a result of the professed desire of amnesty (nee pardon) advocates to "heal the nation's war wounds." a motive which might well be worth dying for but whose relevance to the forgiveness of wartime lawbreakers has never been adequately explained.

Even conceding that the country still suffers from grievous "wounds," it is difficult in the extreme to imagine they will be salved by returning to lawabiding society a few thousand unrepentant men, many of whom still maintain that the nation should be asking them for forgiveness, not the other way around.

Indeed, as we have repeatedly maintained in these columns, it is more likely that Mr. Carter's impending pardon will cause or exacerbate more wounds than it will bind up. I, for one, am outraged that people who thumbed their noses at beliefs and principles that are as basic to me as voting will soon be coming back to my community without so much as an "excuse me" to the nation they wronged. And I am not alone in my view.

THE MAJORITY OPPOSES AMNESTY

Military attitudes are not predictable, no matter what our many stereotypes believe, but it is safe to say that amnesty is not a popular cause among those who wear the uniform, have worn it, or are supporters of a strong defense establishment.

National surveys have shown that a majority of the citizenry as a whole oppose it. How, then, with so much negative feeling in the country, can the charters of this new course predict that it will heal wounds when reason shouts that it will have precisely the opposite effect?

If Mr. Carter's pardon program comes o without untoward turbulence, it will not b because of an outpouring of desire to hea wounds, but because the anger has gone out of the nation's antipathy toward what the draft evaders and deserters have done.

Antagonism in regard to those who have refused or fled service is bound to be high in the military, but it would not be surprising if it turned out that the public doesn't care much one way or the other any more.

This will be fine for the pardon program and the tranquillity of the pardoned, but balm it will not be—not if the Government

ignores the sensibilities of one of its most loyal segments.

Why is there so much vehemence on the subject of amnesty in the military services? There is a knee-jerk inclination among anti-militarists (and, almost by definition, amnesty advocates) to attribute military attitudes toward an issue like amnesty to blind patriotism, or to a hairy-chested contempt for anyone who isn't eager to pick up a gun and shoot people.

There is considerably more to this hostility than that, a position Army (magazine) has tried to outline repeatedly and in detail in the considerable number of editorials we have carried on amnesty since it became a topic for public discussion. (We have not presumed to speak for all military people, some of whom favor amnesty or have their own reasons for opposing it.)

There are many aspects to the amnesty issue, but the prime reason why the idea of amnesty is so abhorrent to many of us is that we and our forebears were raised in a country where the obligation to serve in the armed forces in time of war or when the nation calls is a major responsibiltiy of citizenship.

It is an obligation that does not permit the person being called up to choose the emergencies in which he wants to serve. Nor can it do so if the nation is to survive.

The spectacle of thousands of young men flouting the laws supporting the obligation came as a shock to the generation that fought in the two previous wars. To be a "slacker" or "draft dodger" in those conflicts was to be a social outcast, and there were not very many of them. A deserter was on a level with the lowest dregs of society.

THE ROAD TO RECOVERY

It is still a shock and it will not be lessened by a Presidential pardon which says, in effect, that what you boys did was not so serious that the country is going to hold it against you. If this is a step toward healing national wounds, then the patient is in for a rough time of it.

Repugnance toward crimes like draft evasion and desertion is not confined to older generations, something known by the recruiters who hear over and over that an eagerness to serve is a chief reason why young people join the armed forces.

But it is not nearly as important to the sons and daughters as it was to the fathers, thanks to the lightness with which these offenses are regarded in certain parts of our society.

How could it be otherwise when thousands of persons not only avoided any military service without being punished but within five years of the end of a war were the beneficiaries of not one but two Presidential amnesties? The ramifications in regard to raising an army for a future war are not pleasant.

We who oppose amnesty have been called unforgiving. How can anyone feel forgiving toward an arrogant crowd of self-exiles that scoffs at anything less than an unconditional pardon and contends that its members were the wronged parties, not the citizenry of the United States?

I have searched through numerous published interviews with draft fugitives and deserters in a futile effort to understand their point of view and have yet to read of any expressions of remorse that their places were taken by other men who died, were wounded, or otherwise had their lives disrupted by military service.

Instead, there is smugness that those who fled were "right" about our "immoral" war. There is defiance: If the nation is not sufficiently abject, they won't come back. It would not be surprising if the next demand is for reparations to compensate the pardoned for loss of wages and the companionship of relatives and other wears and tears on their well-being.

One measure of the amnesty movement's apparent contempt for the sensibilities of the majority is the current determination by some of its leaders in this country to persuade the next President to extend the pardon's scope to include deserters and persons with less-than-honorable discharges. One total-amnesty advocate has even gone so far as to blame the onus placed by the Government on transgressors in these categories for the difficulties the Vietnam veteran has had in returning to civilian society.

Forgiveness has not been a problem for some of us, as indicated by the number of pardon supporters in the press and in high places. It would be a beneficial capacity to have, because there is going to be considerable anguish in the land when the Johnny who didn't go to war comes marching home again, probably to a welcome the Johnny who did never got.

And without so much as an "I'm sorry."

Mr. MYERS of Indiana. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to my colleague, the gentleman from Indiana (Mr. MYERS).

Mr. MYERS of Indiana. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of those who expressed concern about what President-elect Carter has been proposing to do very soon after assuming office as President, and I congratulate the gentleman from Mississppi (Mr. MONTGOMERY), the gentleman from Idaho (Mr. HANSEN), and the gentleman from Virginia (Mr. DAN DANIEL) for their leadership this afternoon.

The Vietnam era, of course, terribly divided not only this body but our Nation for a number of years, and it seems to me that this consideration that President-elect Carter is proposing now will only open up another wound which apparently has been healing.

Mr. Speaker, I have given quite long consideration as to the position that this body, or, more particularly, the position that I should take on this question of how we handle the question of those who fled their responsibility during that period. I tried to analyze, first off, the authority being used by President-elect Carter. There is no question that the Executive does have the authority to use this authority of pardon. But in trying to go back to find why was this authority given to the Executive, we find that it was supposed to be used very cautiously and very guardedly, that it was to be used just as President-elect Carter says he is using it at this time, to alleviate or to somewhat lessen a serious condition in our country. But it seems to me that from the discussion here this afternoon and from all indications throughout the Nation, there is no serious problem today about the draft evaders or the others who are somewhere else in the world today who made that decision voluntarily rather than face their obligations.

Pardon should help not only the individual granted the pardon, but should help this Nation, also.

It appears that instead of really solving a problem, giving blanket pardon might cause a more serious problem.

Then, going further, what alternatives or remedies are there to the President or to the individuals, more particularly, who did choose to go someplace else and ignore their legal responsibility?

I think we would have to say that you and I as citizens, as well as any other citizen in this country, do not have the right under our system of government to really select, pick, or choose which laws we want to obey. That would result in chaos in a system where the governed have to give their consent to those who make the laws. We must obey the laws even though we may disagree with them. I can think of many laws we have passed that I do not agree with.

We have a procedure for changing the laws in the system that we have. If we do disagree with the law and we feel it is unconstitutional or wrong, we have a system under which we may change that law or at least have it tested.

Most of these individuals involved in this discussion have refused on a number of occasions to follow that course. First, if they were true conscientious objectors, they had the opportunity to give alternative service to their country, to go ahead and serve their country. But many chose to escape rather than to take a lawful course or to declare themselves as conscientious objectors and go ahead and contribute to the betterment of their country.

Second, if they could not really meet this test, if they were simply disagreeing with this war or they were cowards, whatever the reason might have been, they had another opportunity a year and a half ago to return when President Ford gave them a chance to work their way back. They chose not to accept this opportunity. They now want to come back with full honors without any responsibility for their wrongdoing.

This remedy of pardon is a case of last resort. Here again, these individuals have had many opportunities to make amend for their mistake.

I do not think that President-elect Carter or anyone else should be willing to grant a blanket pardon. The case has been made very well and fairly this afternoon. We have heard many, many very strong and compelling reasons why this Nation should not blanket general pardon to these individuals who ducked out in a time of this country's need. Right or wrong, this country needed them.

We have heard no argument that the country is still torn or divided because of the absence of these people.

What kind of contributions are we going to make by this action? What kind of precedents are we setting? More importantly, what are we doing to our Nation if we give a pardon of this type at this time?

Mr. Speaker, I hope that President-elect Carter will reconsider his campaign promise and his more recent pledge that he will take this action very early in his administration. I hope for the future of this country that he will think more seriously about this very, very serious move.

Mr. HANSEN. Mr. Speaker, I thank the gentleman from Indiana (Mr. MYERS) for his comments. I think he made some very cogent points.

Mr. LENT. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New York.

Mr. LENT. Mr. Speaker, I join with many of my colleagues in commending

the gentleman from Mississippi and from Idaho for their leadership and in reiterating my long-standing opposition to President-elect Carter's proposal for the granting of unconditional pardons to Vietnam-era draft evaders. Regardless of whether one calls the plan pardon or amnesty, the effect is the same, and it is a bad idea. I simply cannot see how the concept will have an overall healing effect on our Nation.

During the course of our long involvement in Southeast Asia, 2.5 million men served there, and 50,000 of them lost their lives. In fact, there are still hundreds of men whose status is so far unaccounted for. To grant pardons to those individuals who, for whatever reason, avoided service during that period, would be a grave injustice to the men who did serve, to their families, and to the families of the men listed as "missing in action."

Apparently, President-elect Carter plans to go ahead with the implementation of his pardon proposal once he takes office. Of course, I hope he reconsiders, because I believe he has grossly overestimated the support this proposal has. Even if he does go ahead with it, I hope he will carefully consider the impact it will have on the many individuals who fulfilled their legal obligations through their military service in Vietnam and also its effect upon those young men and women who may be called upon to serve their nation at some point in the future.

Mr. MOORHEAD. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from California.

Mr. MOORHEAD of California. Mr. Speaker, I wish to commend the gentleman in the well, the gentleman from Idaho (Mr. HANSEN), the gentleman from Mississippi (Mr. MONTGOMERY), and the gentleman from Virginia (Mr. DAN DANIEL), for taking the lead in these important special orders.

I also rise in opposition to a blanket amnesty. I think we must consider the future security of our country when we take any kind of action in connection with draft evaders and the deserters in this very unfortunate war that we recently went through.

Mr. Speaker, I have served in the Army. I have seen very few men who wanted to serve in time of war. Many of them are frightened, perhaps all of them, when they are going to go into battle. Some of them would find an outlet if they possibly could.

However, Mr. Speaker, if our country is to remain free, we must be able to draft people for future wars. We have to have somebody other than the individuals themselves make the final determination as to who is going to go to war, because if they make the decision for themselves that they are going to stay out, we may not be able to have the men that we need in important times for the security of our country.

Most men, when they get into battle, will do their job. They will carry out their function. They sincerely believe in their country and are willing to fight for it if they absolutely have to.

Mr. Speaker, I think that if we give a blanket pardon or amnesty at this point, we will find that many people in the future who are more cowardly than others will use that as an out or as an excuse and will say that they have a right to determine for themselves whether it is a lawful war or whether it is a war they believe in. Many will shirk their responsibility.

Mr. Speaker, I think we have to look at each case as an individual case. I think we have to remember that we want security for our Nation, for our people, for our men and women. We want each individual to take the responsibility, when it is necessary, for standing up and defending this great Nation of ours.

For that reason, Mr. Speaker, I think it is a mistake to grant amnesty or a pardon on a blanket basis, taking each and every case, even those that are flagrant in nature, and giving a blanket pardon. Our country will suffer in the future if we take that course.

For that reason, Mr. Speaker, I hope that President Carter, once he is in office, will reconsider this step and take the stand that is most important to build our country in the future and give us the sound and secure Nation that we need.

Mr. HANSEN. Mr. Speaker, I thank the gentleman from California (Mr. MOORHEAD) for his pertinent comments.

Mr. Speaker, I think it has been made very clear. As the effort to draw the line is discussed, the distinctions between the categories of offenders should be clarified for more accurate comparisons even though accurate figures have been difficult to arrive at and may vary considerably.

When the Ford clemency program began, about 10,000 individuals were under indictment for draft evasion who had fled to Canada or Sweden or were hiding out in this country. Of these, 2,500 remain unsettled.

One estimate of those who simply failed to register for the draft in the years 1964 to 1975 is as high as 1 million but no action has been proposed against them.

Of the 10,115 fugitive deserters still at large at the time of the Ford clemency program, 5,555 applied for and received dishonorable discharges.

Of the estimated 90,000 servicemen who received less-than-honorable discharges for desertion, only 13,589 asked to have their cases reviewed by the Clemency Board. Others have felt it was not worth the effort or are holding out for blanket amnesty.

Of the 113,000 total cases eligible for consideration by the Clemency Board, 21,734 requested review.

Although the motives prompting the action of the evaders and deserters differ widely within the groups, one survey reported that only 14 percent of the deserters opposed U.S. involvement in Vietnam and only 0.1 percent who sought review deserted under fire.

The activity of the Clemency Board was opposed mostly by the antiwar movement since it required alternate civilian service in many cases. However, this was the very provision that made the program palatable to citizens at large and especially the veterans groups, active military and family and friends of those who had served in the controversial war.

In contrast to the above actions already granted by the Clemency Board and the possible extent of Mr. Carter's proposal, it is interesting to note that no amnesty or pardon action was ever taken for resisters or deserters in the Korean war other than normal military justice procedures.

After World War II, 15,805 cases of draft violators were considered—but not deserters, and only 1,523 received pardons. Of the 21,734 deserters and violators reviewed by the Ford clemency board 7,500 accepted alternate service—5,000 were granted outright pardons. No one can rightfully deny the lenience shown.

From 1964 to 1975, 35,000 draftees who claimed conscientious objection status, chose and were given alternative civilian status, 30,000 were given noncombatant military service.

Unfortunately, there appears to be a hard core of fugitive deserters and resisters who will settle for nothing less than a full admission of error by the U.S. government and a hero's welcome home. "Our fight for universal unconditional amnesty will continue," vows Mike Powers of the American Deserters Committee in Sweden in the January 17, 1977 issue of Time.

These are the same individuals who can only explain the opposition to the pardon program as vindictiveness or vengeance. They do not mention the basic question of justice according to the laws of the U.S. Government. Since they voluntarily chose this illegal method of dissent they can hardly expect to return to bowed heads.

In Mr. Carter's own August 24, 1976, remarks before the American Legion in Seattle, Wash., and in his earlier March 1976 statements on amnesty the President-elect explains his motivating force behind a pardon proposal as follows:

> Where I come from, most of the men who went off to fight in Vietnam were poor, they didn't know where Canada was, they didn't know where Sweden was, they didn't have the money to hide from the draft college. Many of them thought it was a bad war, but they went anyway.

By his own words then, Mr. Carter commits himself to more action than allowing a full unconditional pardon only to those who evaded the war by evading the draft. The disparity exists for those who did not take the initially extreme action of the evader, but who deserted after induction or enlistment where Carter proposes a case-by-case review of the military which is not noted for its leniency.

Since Mr. Carter has recognized and reports have confirmed that the draft evaders are overwhelmingly, 87 percent, white and middle class—and the deserters are much poorer and disproportionately of minority races, the proposed remedy contradicts the claim for supposed social justice. If the reason for any further pardon at all is to be justified there should be no further unequal treatment of these cases. Above all, unconditional pardons should not be dispensed freely.

In his Seattle speech, Mr. Carter claimed his proposed action would allow this country to "come together and seek

a rebirth of patriotism in which all citizens can join." He said:

There is no one in this country * * * who does not want to heal our wounds and restore the precious quantities and the national strength we seem to have lost.

By possibly granting blanket pardons to up to 2,500 draft evaders, and possibly twice as many deserters and thousands with bad paper discharges, Mr. Carter is presumbly, but I believe futility, attempting to bind the wounds of: Next-to-kin to: 56,234 American dead from Vietnam war; 303,000 wounded; hundreds of missing in action; 591 returned prisoners of war; 2,500,000 who were honorable in Vietnam including 600,000 draftees, of whom 71,500 were killed or wounded.

How does Mr. Carter justify his binding of wounds/blanket pardons thesis to Air Force Col. George E. Day—an ex-POW who is one of two living ex-POW's to receive the Congressional Medal of Honor for "conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty." When Colonel Day learned that Carter's aides were consulting with an ex-POW, Col. Edison Wainwright Miller, whose treasonous conduct as a POW earned him a forced retirement from the service and a letter of censure from the Secretary of the Navy, Day is quoted in the January 8, 1977, issue of Human Events as follows:

If there is no reward for loyal service or sanctions against those who disobey orders in uniforms, how can we expect high standards of performance in future military conflicts? . . . . . If cowardice, disloyalty, rejection of duty and desertion are to be the new accepted standards of conduct. . . . God help this country.

Another reaction to Colonel Miller's visit to Carter aides drafting the pardon proposal came from a highly decorated former Vietnam POW, Lt. Cmdr. Michael D. Christian. "The price of honor seems pretty cheap this year." Christian has vowed to resign from his promising career with the Navy and emphasize his protest against blanket amnesty by putting his numerous medals on the graves of Vietnam veterans.

I cannot reconcile Mr. Carter's claim to heal the wounds of such totally opposite opinions by declaring previous disciplinary efforts null and void and restoring full civil rights to them as he stated in March 1967:

I'd just like to tell the young folks who did defect to come back home with no requirements that you be punished or that you serve in some humanitarian capacity or anything. Just come back home, the whole thing is over.

Mr. Carter ought to consult more closely with present military officials who have the data showing that desertion is not peculiar only to the Vietnam era. The desertion rate is continuing and in some cases increasing under the present voluntary services concept and makes discipline an ongoing problem. The reasons for the desertions by those who cannot or will not adapt to military life continues. This is more of an indication of eternal personal problems and general social and moral ills in the Nation than just an endless debate over the justification of the Vietnam war itself.

In conclusion, Mr. Speaker. I maintain that blanket pardons to resisters and/or deserters cannot by itself heal the wounds of those still remaining in foreign countries but will only serve to further alienate and degrade the sacrifices of those who did serve their country in this most controversial of wars. This is not a cry for vindictiveness or revenge, but a reasoned appeal for justice.

We must strongly encourage the President-elect to reconsider and restudy the total problem from all points of view before making any sweeping decisions final. Certainly, those who have paid the price of military service in defense of their country and to give us the peace and security we now enjoy should have some timely input. This is yet to be done.

PROPOSED BLANKET AMNESTY OF DRAFT EVADERS BY PRESIDENT-ELECT CARTER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. DAN DANIEL) is recognized for 60 minutes.

Mr. DAN DANIEL. Mr. Speaker, first of all let me note the absence of a quorum in the press gallery and to observe that perhaps if President-elect Carter has reached his decision as a result of what he has read in the national and international press he may very well have concluded that the majority of the people of this country do indeed support an unconditional pardon of draft evaders.

Mr. Speaker, the President-elect has stated that one of his first official acts following the inauguration will be to issue a blanket pardon to those who refused to serve in the military during the Vietnam war. There is also agitation for carrying this further, and upgrading all less than honorable discharges.

Of all the matters which have been discussed with me in the past several weeks, none has been the subject of such intense reaction as this. Most of the people with whom this has been discussed do not believe that this should be done. And I agree. There is simply no justification whatsoever for this action.

There are few people in this country whose lives were untouched, in one way or another, by military service in the Vietnam war years, whether they be the young men themselves or their kin.

A few men left the country, thereby avoiding military service entirely, and at the same time accepted knowingly the loss of all the rights and privileges of citizenship. Some—a much smaller number—went to Federal prison, rather than accept military service. Still others, possibly feeling just as strongly about this particular war, chose to meet their commitments to citizenship and were inducted into the military services. And finally, there was the majority of young men, motivated by a strong sense of citizenship and patriotism who honored their duty to this country and to the service such duty requires.

Of those who were drafted or who volunteered, many paid an awful price—some the ultimate price—their lives.

As decisions are made on pardon or amnesty, those who met the obligation are and must remain the ones against whom all consideration of the first group is measured.

It would be a fairly easy thing to grant general amnesty, to say that this group of deserters and defectors might simply return home, as if nothing had happened. After all, the Greek word from which amnesty is derived is defined as "forgetfulness." Or some form of amnesty might be designed which would provide varying degrees of pardon.

Historically, amnesty has been extended as long ago as 403 B.C., when the Athenians granted it to collaborators with their Spartan conquerors in the Peloponnesian War. As a general rule, it has been extended following civil wars, such as the British experience in the 17th century, and at the time of the second Jacobite Rebellion. Only rarely has it been applied following wars between nations.

In our own country, George Washington pardoned those who participated in the so-called Whiskey Rebellion. Andrew Johnson extended amnesty to Southern soldiers after the War Between the States, but over the strong objection of some Members of Congress.

In more recent history, President Harry Truman established an amnesty board 16 months after the end of World War II. Of the more than 15,000 cases considered, only about 1,500 were pardoned, most of them on religious grounds. Intellectual, political or sociological convictions against the war were not accepted as excuses, and clemency was not granted to those who, in the Board's words, "set themselves up as wiser and more competent than society to determine their duty to come to the defense of the Nation."

It has been said that this action should be taken because those who refused to serve and those who deserted were simply reacting to an "immoral" war. I do not know who among us has the right to decide which wars are moral, and which are not. But if it is moral to support another nation's right to free determination, this war was a moral one. If an immoral war is one in which selfish interest predominates, this was a moral one. For when American troops first went to South Vietnam there was no immediate threat to our country. We went in support of a people who wanted, above all, to be left alone to choose their own destiny, not have that destiny decided by a different kind of tyranny.

Nor can it be said that those who clamor for amnesty are merely reflecting the views of a majority of Americans. Five Presidents and many Congresses supported this war, the first category by ordering our involvement, the second by voting the funds to carry out this order.

It is said by those who have worked for this over a period of time that it is a matter of simple justice. Simple it may be—simple in the context that it applies across the board, irrespective of the circumstance or condition. Justice it is not. And the areas of injustice are many.

Is it just to pardon those who fled the country, when others who obeyed what they believed to be conscience rather than the law served time in Federal prison? Is it just to welcome those who ran away out of cowardice—and a blanket pardon would include these, as well as those who claimed to obey a higher law—and not make whole those who deserted under fire for the same reasons? Is it just to tell a man who has lost his sight, perhaps, or his limbs, that he must live out his days less whole, often in pain, while some of his contemporaries contributed nothing, suffered little? We should not welcome with open arms those who abandoned their country voluntarily in time of national peril, and often spoke and wrote to their homeland's detriment. No, justice this is not.

Except for subject background it really does not help much, to look at pardon or amnesty, or whatever you wish to call it, in historic terms. History can be a guide to the future, but not in this instance. For our Vietnam experience is not quite what our experience has been following other wars. Dissension cuts across regions and classes and categories. In some instances, it even split families into opposing camps. We can regret these things. We can wish they had never happened. But they did, and it is not realistic to think that an Executive order will bridge the rifts. Nothing but time can do this, and we would better serve the interests of the Nation and of individuals if we leave the matter alone, and let time do its job. To do otherwise might result in still another division of the Amercan people which will retard our progress toward domestic normalcy. I think, instead of attempting to satisfy one group at the expense of others, we should look to the future, and to the implications of what such an action can be.

Just last week, Lt. Cmdr. Michael D. Christian, U.S. Navy, who is a 6-year veteran of North Vietnamese prisons, declared that he was leaving the Navy, and placed his many medals on the graves of Vietnam veterans in protest of the blanket pardon proposal. He said:

Now we make heroes out of deserters and condemn ourselves. The price of honor seems pretty cheap this year.

And on the day I read of this, I received a letter from a young constituent who is on duty with the Air Force in West Germany. He wrote:

I have been seeing many articles lately on pardons for draft dodgers and deserters. I must say that this hurts me to no end and makes me wonder what we must be coming to. All those men who died and suffered handicaps because they did their duty and now we are considering a pardon for the men who might have been able to save someone's life if he had been there.

These are the views of just two who are presently in military service, but they reflect the views of many.

In an ideal world, we might afford to ignore the implications for the future in taking this action to erase our recent past. But this is not an ideal world. It is a very human one.

No thinking person will say to you that this is a peaceful world. Russia's military strength grows daily, and in her Eastern European satellites the capability for armed conflict is expanding.

Communist China also devotes a large part of its wealth and manpower to other than peaceful purposes. And that nation is so contemptuous of world opinion that it has taken to detonating nuclear devices in the atmosphere, thereby dumping atomic pollution on a defenseless world.

We in this Congress, as in all the Congresses before us, have had the responsibility of providing for the defense of the Nation. We can only do this by enticing or—in time of great emergency—requiring service by the youth of the land. How shall we meet this obligation in the future, if we encourage the granting of amnesty or pardon? Who will listen to our entreaties or orders? Who will provide for our defense?

We have always claimed, and with a justified pride, that ours was a land of laws, not men. How can we then call forth this respect for law, if we sanction the flaunting of law? Do we want the record to show that we believe that some laws can safely be ignored?

Whether you take the long or the short view of history, you cannot make a case for universal peace. War, abhorrent as it may be, has been with mankind from the beginning. And until such time as we find some miraculous way to establish and insure a peaceful world, we must acknowledge that the odds are against our Nation's knowing eternal peace.

In a world where potential enemies abound, and where these potential enemies regularly express hostility to those of us who do not share their ideology, who can truly say that the day will not come when the young men and women of America will be called upon once more to defend us? We have an all-volunteer service now, it is true. And it is our fervent hope that it is sufficient to meet any eventuality. But this is not guaranteed to us.

I have lived long enough to know that time does indeed heal most wounds. And in time, this matter can be put behind us. But for now, I cannot urge strongly enough that this proposal be abandoned.

It is unfair, unjust, and could jeopardize the future of our country.

Each case should be considered on merit.

Mr. FLYNT. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. Mr Speaker, I am happy to yield to the gentleman from Georgia (Mr. FLYNT).

Mr. FLYNT. Mr. Speaker, first of all let me commend my colleagues, the gentleman from Mississippi (Mr. MONTGOMERY), the gentleman from Idaho (Mr. HANSEN), and the gentleman from Virginia (Mr. DAN DANIEL), for having taken these special orders today so that we might discuss this very, very important matter. Further, Mr. Speaker, I would like to associate myself with the remarks of each of those three gentlemen, as well as the remarks of other Members who have preceded me during these three special orders today.

Mr. Speaker, I am certain that President-elect Carter will reconsider his announced intention to grant amnesty, or a blanket pardon, as I believe he has chosen to call it, of the draft evaders and will take into consideration what such an action might do to the future defense and security of our country.

Mr. Speaker, the thing that concerns me about this announced intention by the President-elect is that in the future, if there is ever again a necessity to enact the Selective Service law through which young Americans will be drafted or conscripted, whether or not they desire to serve in the armed services of this country or not, that with such a precedent being set now whereby an entire group of law violators, those who have evaded the draft, of those who have deserted, and of those who have fled to other countries or who remain fugitives in this country, that then there certainly can be no incentive in the future when the security and the defense of this country is at stake for such young Americans to honor the call to service that their country has issued.

Mr. Speaker, to me it is unthinkable that this matter would be considered by any President or any President-elect on a blanket basis. If any President or any President-elect is to consider a question of this magnitude surely the ideal way to do it would be on a case-by-case basis and not on an overall basis whereby blanket amnesty or blanket pardons would be granted.

I repeat, Mr. Speaker, that I am concerned about what such a grant of amnesty or a blanket pardon would do in the event this country ever again needs to mobilize its manpower, its industrial might and its economy in the defense of the security of the United States of America.

Again I commend and applaud the gentleman in the well, Mr. DAN DANIEL, of Virginia, the gentleman from Idaho, Mr. HANSEN, and the gentleman from Mississippi, Mr. MONTGOMERY, for taking the lead in this very important matter. I believe that they have performed a great service to the United States of America in taking this time today. I again applaud and commend them for so doing.

Mr. DAN DANIEL. Mr. Speaker, I thank the distinguished gentleman from Georgia (Mr. FLYNT) for his very meaningful contribution to this discussion.

Mr. WHITEHURST. Mr. Speaker, would the gentleman yield?

Mr. DAN DANIEL. I am happy to yield to the gentleman from Virginia (Mr. WHITEHURST).

Mr. WHITEHURST. Mr. Speaker, I thank my distinguished colleague, the gentleman from Virginia for yielding to me.

Mr. Speaker, there is a cemetery that is located in Belgium where over 5,000 Americans sleep. My brother rests among them. He died fighting for that flag in back of the gentleman almost 33 years ago.

Like many of my colleagues in this Chamber, I was also involved in that war. I recall it quite well. I very nearly lost

my own life there. That the President following that conflict would have considered granting a blanket pardon to those who elected not to answer the call to the colors would have been anathema to me. I will say that it is anathema to me today that the President-elect is considering granting a blanket pardon to those who did not answer the most recent call to the colors. It is not that these people have not been granted an opportunity to come back and serve. They have been in a way that is far less hazardous than the one that they would have been called upon to do. I think that that position was more than generous. I am just disappointed that more did not take advantage of it.

However, at this point that there should be no service required and no penalty required is, as the gentleman from Georgia just announced, a most dangerous precedent, and this flag that we all love so well would certainly be in jeopardy the next time this Nation is threatened. The next time there is an armed confrontation, the question might well be raised: Where will the young men be whom we will need to fill the ranks in order to defend that flag?

I think what is being embarked upon is wrong from a moral point of view, from an ethical point of view, and, I think, from a practical point of view. In defending this Nation it is dangerous.

I thank the gentleman in the well for yielding time on this.

Mr. DAN DANIEL. As usual, the gentleman from Virginia (Mr. WHITEHURST) has made a very substantial contribution to the debate.

Mr. Speaker, I now yield to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. I thank the gentleman for yielding and commend him and the gentleman from Idaho and the gentleman from Mississippi for offering their letter to President-elect Carter, and for asking for this special order today.

Mr. Speaker, on December 17, 1976, I joined 105 of my distinguished colleagues in the House of Representatives in requesting President-elect Carter to reconsider his decision to issue a pardon to all Vietnam-era draft evaders. Our request correctly stated that each of us has our own individual reasons for opposing what amounts to a blanket pardon for those who evaded the draft during the Vietnam conflict, although we are united in asking for President-elect Carter's reconsideration of the decision. At this time, I wish to elaborate upon my personal reasons for expressing such opposition.

Members of the House of Representatives were and are responsible for instituting or eliminating the Selective Service System law. Right or wrong, the Vietnam war created a need in our country for selecting individuals to serve in the Armed Forces. The selection process was instituted and governed by law and those selected were expected by law to abide by their selection and serve. Those individuals who evaded the draft or deserted our Armed Forces chose not to abide by the law. There is a great tradition in our constitutional system for civil disobedience. But the tradition calls for participants in civil disobedience to pay the legal penalty for the disobedience so as to call attention to the immorality of the law being disobeyed. The intentional disregard of our legal system will be forgiven in President-elect Carter's expected decision, whether it is labeled a blanket amnesty or a pardon, and it is an act that I cannot accept and join in. Civil disobedience without a penalty is not civil disobedience and is horribly destructive to our legal system.

Respect for the law is taught to our Nation's children by their parents in establishing boundaries of play, to our grade school pupils in attempting to guard their safety to and from school, in our high school government courses, and virtually throughout our lives on a day-in, day-out basis. As a law student, the same respect for the law was reinstilled in me with each day's reading of our common law, and as a lawyer, I constantly try to adhere to the law and to share my respect for it with my clients, my fellow lawyers, and the courts. In all of these capacities, including my present capacity as a legislator, I submit that respect for the law is the basis of our civilized society, without which our system of government cannot and will not continue to exist. It is within this context that President-elect Carter's pardon announcement must be judged, in my belief. The Selective Service System law established expectations in our young men who were notified of the draft or, in fact, drafted to serve. Those same young men respected the law, expected it to be enforced, and abided by it in serving us. Sadly, very sadly, thousands of these same young men died for it and in its defense and in defense of our system of government. Respect for the law, in their hearts and minds, was our strongest weapon with which to defend against the enemy.

In conclusion, I see no healing aspect available to the wounds of our country which were caused by the Vietnam war that will be healed by a pardon, should it come. Instead, I see a deeper, more lasting wound to our system of government, which John Adams so eloquently characterized as a system of laws, not men, if our laws are unilaterally and retroactively changed in this way.

Until our system is changed by some greater being than by this body known as the House of Representatives, I will continue to abide by this belief.

Mr. DAN DANIEL. Mr. Speaker, I would like to call to the attention of the House that the gentleman who just spoke is a freshman Member of the House. This was his first speech on the floor. I do not believe he could have made one more important to the future security of this country.

Mr. YOUNG of Missouri. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from Missouri.

Mr. YOUNG of Missouri. Mr. Speaker, as a new Member of the Congress I also signed the letter in November along with my colleague, the gentleman from Missouri.

I too want to thank the gentleman from Virginia (Mr. DAN DANIEL) and the gentleman from Idaho (Mr. HANSEN) and the sponsor of the special order, the gentleman from Mississippi (Mr. MONTGOMERY), for the opportunity for the American people to hear the special order of business that is going on today in the U.S. Congress.

For a variety of reasons, I am deeply opposed to President-elect Carter's proposal to issue a blanket amnesty for those who evaded the draft during the Vietnam war.

Most importantly, the proposal would severely undermine any effort to reestablish the draft in this country. If the time does come to reinstate the draft—and, who knows, the need could arise at any time—the precedent of the blanket amnesty now would make it easy for young men to avoid their duty to their country. They could opt not to serve, with knowledge they had nothing to worry about.

It would be nice to give young men carte blanche to decide whether to serve their country without fear of penalty. But in this imperfect world, our country, our citizens, cannot afford that luxury.

There are other reasons to avoid a blanket amnesty. Such an act would be seen by a majority of Americans as a blasphemous turning away from not only the 350,000 American dead and wounded in Vietnam, but all the 2.5 million of our young men who served there with distinction.

Amnesty would destroy much of the pride and honor attached with service in the Armed Forces—pride and honor that has been built up over many decades.

Amnesty would not bind our country together, but would cause more division at a time when our country is in need of unity.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman for his contribution.

Mr. DEVINE. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from Ohio.

Mr. DEVINE. Mr. Speaker, I thank the gentleman from Virginia for yielding.

I would like to add my voice very briefly to the remarks of the gentleman in the well as well as those of my colleagues on both sides of the aisle who have expressed their displeasure at any suggestion of amnesty or pardon for those who deserted this Nation or deserted the armed services or evaded the draft.

Of course there were a number of people in this Nation, including some who willingly served and some who died, who did not agree with our involvement in the Vietnam war.

The gentleman in the well knows well that we became involved in that war as a result of our original SEATO agreement. We became involved in fact during the Kennedy administration, and it ran through the Johnson administration and

the Nixon administration and was wrapped up and finally concluded during the Ford administration.

I would say simply, Mr. Speaker, that those young men who claim all the benefits of this great Nation also have certain responsibilities to the Nation and they cannot turn their backs back in time of need and then come home and ask for general pardon and general amnesty.

I think it would be a disservice to those who did serve. I think it would create a situation that would be almost impossible to obtain manpower for the military services in the event we should find ourselves, God forbid, in a situation where the services would need it.

Mr. Speaker, I support the remarks of the gentleman in the well, the gentleman from Virginia (Mr. DAN DANIEL).

I want to go on record clearly and concisely, as I did in the letter, that I am opposed to amnesty and pardon to those persons who did not serve in the Vietnam war.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman from Ohio.

Mr. Speaker, earlier today a group of former prisoners of war held a press conference over in the Rayburn Building. I would hope that some of them might perhaps be in the gallery in order that they may know there are some Members of Congress and the vast majority, in my judgment, who support the very strong position which they have taken and we that appreciate far beyond our ability to express the sacrifices which they have made.

Mr. McDONALD. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from Georgia.

Mr. McDONALD. Mr. Speaker, I rise in support of the gentleman from Mississippi. It is pleasing and gratifying to me that he has chosen to lead those of us who oppose the President-elect's plan to issue a blanket pardon for the Vietnam war draft evaders. As you all may know, 106 of us have sent a letter to the President-elect asking that he reconsider his plan. And, while 106 of us does not represent a majority of this body, my strong feeling here today is that those of us who are joining in this special order represent the majority of American thinking.

This blanket pardon that Mr. Carter proposes should not be granted for many reasons. The most obvious one being the insult to the 56,234 young men who went to Vietnam and died at their country's call and the 303,000 wounded, to say nothing of those missing in action and their families. How will their parents and wives and relatives ever be able to reconcile this? More than 3 million men and women served honorably during the Vietnam era, and they will not be pleased. Who will explain the action to our brave POW's who endured torture beyond belief in defense of the United States?

Second, how are we to be a nation if everyone is to decide which war is just and what laws he or she will obey? Are we to become a nation of anarchists? How and who will decide if the next war is just?

Third, a blanket pardon will not heal wounds, it will open them. Those who served honorably and obeyed the laws will not be served by this contemplated action. They will be disgusted and angry as they ought to be. The head of the U.S. Government issuing a blanket pardon to lawbreakers will set a dangerous precedent for the country. To cite just one statistic at this point, the President's Clemency Board found that less than 5 percent of the AWOL offenses that resulted in less-than-honorable discharges were as a result of disagreement over the Vietnam war.

Many have expressed the fear that those deserters and others who left the United States and took refuge in places such as Canada and Sweden will not return if this blanket amnesty is not issued, but I doubt this. They may or may not, but each case has to be tried on its individual merits and these persons have to face the judge and have their day in court. This is the only fair and just way to do the process. This is consistent with our history wherein other Presidents have taken such action.

But aside from all the other considerations I have mentioned, there is a more fundamental one. That is service to one's country—military service should be and used to be a fundamental tenet of citizenship for every able bodied male in this Nation. We now have a so-called All-Volunteer Armed Forces and we hope they fight well if the whistle blows, but if the average male in this country does not feel he has a duty to serve and defend his Nation in time of peril then we will not last long as a country. One can just imagine the challenges that might be mounted in the courts should we have to reinstitute the draft.

In my view the so-called blanket pardon proposed by President-elect Carter will go a long way toward further erosion of that concept. What will we do next, hire mercenaries to defend our shores? Will pride and honor become forgotten words in the United States?

Mr. Speaker, I want to commend the gentleman from Virginia (Mr. DAN DANIEL) for taking the lead, and also the gentleman from Idaho (Mr. HANSEN), and especially the gentleman from Mississippi (Mr. MONTGOMERY) for taking the lead in this whole matter.

Mr. DAN DANIEL. I thank the gentleman from Georgia.

Mr. Speaker, I think this observation should be made for the record: The gentleman from Georgia stated that these men who are now under consideration for pardon violated the law. That violation is a felony punishable by 5 years in prison, $10,000 fine, or both.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, I thank the gentleman for yielding to me, particularly since the gentleman from Virginia may know that I hold a position opposite to the one expressed by himself, as well as by most of the others of our colleagues who have addressed this issue today.

At the very outset, Mr. Speaker, I would like to state for the record that I not only do not question, but I fully recognize the sincerity and genuineness with which the gentleman from Virginia and the others who spoke on their side of the issue hold the views which they expressed today and have expressed at other times and in other places. I disagree with the position, nonetheless, because it seems to me that this country, in its finest traditions, has recognized in times past that there is a time to close the book; there is a time when it is appropriate to say, "Right or wrong, it is time to pull the Nation together."

Mr. Speaker, for us to continue to impose homeless, stateless, underground status on Americans who, acting upon the highest moral principles, decided that they could not follow that which was national policy at the time but which today is almost universally admitted to have been an unwise policy, seems to me to be wholly inappropriate.

Mr. Speaker, it seems to me that it took a great amount of strength for most of those who chose to go against national policy in response to conscience. They did not go without suffering for that decision. The hardships placed upon themselves and upon their families have been fully demonstrated.

Further, it seems to me that we pay no homage to those brave men who died by endlessly insisting that others who took a different path must continue to be punished by this Nation. It seems to me that, in line with President Lincoln's great statement, made at his second inaugural, we ought to act "with malice toward none, with charity for all" and be engaged in the great task of binding this Nation together. We have done it before; we ought to do it now.

Mr. DAN DANIEL. I thank the gentleman from New York.

Mr. Speaker, in response to what the gentleman had to say, and also the statement made by the gentleman from New York (Mr. KOCH), both of whom spoke of divisiveness, time is a great healer. I think the wounds of the Vietnam war are now beginning to heal. But, I would like to raise the question of whether or not a blanket pardon for war resisters and draft evaders will not reopen those wounds. I would like to ask if it will not, indeed, slow down the progress which is being made now toward the healing process.

Mr. Speaker, I intend to take about 10 minutes for my statement, but I would be pleased to yield to any other Member who desires to be heard at this time.

Mr. DEVINE. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. Mr. Speaker, last night I had occasion to have dinner with Richard Roudebush, the Administrator of the Veterans' Administration. I do not think I am betraying a confidence when I say to the Members that during the course of the evening he advised me that

he had received letters from the national commanders of each of the major veterans organizations in this country, the American Legion, the Disabled American Veterans, the Veterans of Foreign Wars and the Amvets, in which each of them took a position in opposition to amnesty or general pardon.

Mr. Speaker, I think that should be made a part of the record.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman from Ohio for his remarks.

Mr. BADILLO. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from New York (Mr. BADILLO).

Mr. BADILLO. I thank the gentleman for yielding.

Mr. Speaker, I want to commend my friend, a new Representative, the gentleman from New York (Mr. WEISS), for his statements. I want to associate myself with his remarks.

Mr. Speaker, I want to say to the gentleman that I do think that it would be a healing process if we were now to grant amnesty to those who were involved. The mere fact that we are discussing it now shows that this problem will continue to fester and will continue to be a devisive one unless we settle it. That is why I think that this would be an ideal time, at the beginning of a new administration, to settle it once and for all. That is why I associate myself with the remarks of the gentleman from New York.

Mr. DAN DANIEL. Mr. Speaker, in response to the gentleman's remarks, the only reason we are having this debate today is in response to an action contemplated by an incoming President.

Mr. MYERS of Indiana. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIELS. I yield to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS of Indiana. I thank the gentleman for yielding.

Mr. Speaker, in response to the remarks of the two gentlemen from New York, who seem to be two of only three here speaking in favor of this general or blanket pardon, where is this devisiveness we have been talking about? I have not been reading of it or hearing it talked about back home. They speak about this great devisiveness and this blanket pardon which is going to solve this devisiveness, but I do not know where this devisiveness exists.

Mr. DAN DANIEL. I think the gentleman makes a good point.

Mr. BADILLO. Mr. Speaker, if the gentleman will yield, I will be glad to answer.

Mr. DAN DANIEL. I yield to the gentleman from New York (Mr. BADILLO).

Mr. BADILLO. I thank the gentleman for yielding.

Mr. Speaker, this subject matter was debated during the Presidential campaign from one end of the country to the other, and I am sure that part of the debate took place in the gentleman's congressional district.

It is precisely for that reason that the successful candidate for President is going to take action now as his first priority, because as he campaigned throughout the land he found that there was a need to bring this matter to a close. That is why it is being proposed now, and it is clear that the reason we are having this debate, is because it was proposed by the successful candidate. The reason for it is, as we begin a new administration, a new Congress, we would like to put the problems of the Vietnam war behind us once and for all.

Mr. DAN DANIEL. The gentleman from New York (Mr. BADILLO) is not suggesting that if President-elect Carter had run on a platform of blanket pardon for draft evaders, he would have been elected?

Mr. BADILLO. If the gentleman will yield, I am certainly suggesting that the issue of amnesty was a very important one, not only in Governor Carter's campaign, but also in the Democrtaic Convention. I was a delegate to the Democratic Convention and a member of the Platform Committee, so I am very much aware of the process from the time we began to outline our party's platform.

Mr. MYERS of Indiana. Mr. Speaker, will the gentleman yield further?

Mr. DAN DANIEL. I yield to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS of Indiana. I thank the gentleman for yielding.

Mr. Speaker, my colleague, the gentleman from New York (Mr. BADILLO), says that it was a subject of debate during the campaign. Possibly it was. My definition of debate is at least two parties with different views discussing a subject matter back and forth. To my knowledge, there was at least one statement made by former Governor Carter, who was a candidate, that he was going to probably do this. The only debate I ever heard was further discussion in veterans' organizations opposed to it.

In my congressional district, it was just about the same proposition that we have here today, about one hundred opposed to it and three for it. If that is a debate, I think we have many things which are a lot more cogent that we should be debating here this afternoon, such as tax reform and energy, which are a lot more important to this nation than granting a pardon to the people who chose not to obey the laws our our Nation.

Mr. FOUNTAIN. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Speaker, I want to thank the gentleman for yielding.

I would like to say that although President-elect Carter was called upon on a number of occasions during the campaign to express himself on this subject, I am not quite sure just what total position he may have taken. I might say that I supported President-elect Carter, but I did not support him because of his statement on this subject. There were many other reasons.

Nonetheless, I would like to associate myself with the remarks of the gentleman from Virginia (Mr. DAN DANIEL), the gentleman from Mississippi (Mr. MONTGOMERY), and the gentleman from Idaho (Mr. HANSEN). I support their basic expressions of opposition to blanket pardon or amnesty for draft evaders or deserters.

In my opinion, we would be setting a dangerous precedent by this action. All of us have compassion for our fellowman and for those who are in trouble, but there are so many cases and there is such a variety of cases that in my opinion we would be setting a precedent which would endanger the security of this country at some future date. I would like to go on record to that effect.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman from North Carolina.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, WEISS is the name. It is perhaps a difficult name to pronounce. I thank the gentleman very much for yielding.

I simply want to respond to the suggestion that was made earlier by my distinguished colleague on the other side of the aisle to the effect that the present participation by Members in the discussion or colloquy in this special order is some indication as to how the people across this country feel and how the Members in this Congress for that matter feel.

In fact, on most occasions, as I understand it—and I do not want to seem like an expert, so I ask for a correction if I am inaccurate—the Members and their colleagues who ask for the time to participate in a special order and who do participate in it agree with the subject matter and the position. I suggest that because there happens to be only two or three Members on the other side who happen to wander in and take exception to certain remarks does not give a fair picture of national sentiment. I do not think that is the impression the gentleman would want to create.

Mr. Speaker, I thank the gentleman.

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman for his contribution.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. DAN DANIEL. I yield to the genman from Arizona.

Mr. RUDD. Mr. Speaker, I lend my unequivocal support to the gentleman from Virginia's opposition to amnesty or pardon for those who deserted or otherwise avoided the call of military duty to defend freedom in Vietnam.

It has been said that those who are unwilling to defend their freedom are destined to lose it. Freedom must be fought for, first to win it, then to preserve it. The saddest part of defending our freedom is the fact that those who sacrifice so that we may remain free are the ones with the most to lose: our young.

Our young, however, have not let us down. When called to their country's service, most of them served willingly,

with courage and endurance. They served knowing that they might be injured, and that some of them would not return. It is tragic that some of them did not return. There have been over 2½ million casualties in the various wars we have had to fight to preserve our freedom. Two and one-half million patriots to whom our Nation owes a debt of gratitude we can never repay.

There is one thing we can do, however, which will help to keep alive the memory of those who fought for our Nation. This is to oppose with every fiber of our existence the pardoning of those who unlawfully escaped their duty at the expense of those who loyally chose to discharge it. The concept of so doing, by whatever name it is called: unconditional amnesty, pardon, or clemency, is a moral outrage.

There are those who claim that the deserters, draft dodgers, and evaders were answering a "higher morality." If this were true, if they were, indeed, so opposed to the participation of the United States in the Vietnam war, why did they not stay here to fight it? Why did they not demonstrate their convictions by either signing up as conscientious objectors or by challenging their draft board in court?

What about those who did choose to serve, albeit after lengthy deliberations over their course of action? Were they answering to a "lower morality" because they chose to defend their country? I, for one, do not think so.

Several years ago, Pat Buchanan examined the question of the supposed higher morality of the draft evaders in Sweden. In his article, which appeared in the February 20, 1973, edition of the New York Times, he quoted William Lethe, the Swedish Director of Immigration, as stating that 20 percent of the draft dodgers in Sweden had been involved in major crimes, that 10 percent had been jailed, and that 6 percent had been deported. Thefts, drug-related crimes, and other offenses of a similar nature were included among those attributed to the deserters.

A May 26, 1975, editorial in the Washington Post pointed out that some 700 individuals who had been imprisoned or punished in some fashion for draft or military offenses were currently in jail for other offenses. While this is not to say that all draft evaders will immediately turn to a life of crime if allowed to come back, it should give us pause to think. Are we entirely sure that all of these individuals were sincerely opposed to the war on moral grounds? I, for one, do not think so.

Further, I think that it would be an offense to decency, an offense to morality, an offense to the memory of the brave Americans who fought and bled in Vietnam to even consider forgiving those who did not care enough for their country to do so.

It seems as though there are those who are ready to accept the concept that there should be no reward for loyal service to your country, or sanction against disobeying military orders. In short, cowardice, disloyalty, and the rejection of duty are being raised as the new standards of conduct.

If this is the case, how can we rationally expect our military leaders to maintain any sort of effective organization? If they are unable to discipline—or if individuals know that the only punishment for desertion will be a letter from the President saying that it is all right—how can they be expected to maintain an army?

How can we as a nation expect to field the citizen army to defend our country, our free people under our Constitution, or maintain that freedom—unless we treat service to our Nation with honor, and refusal of service with dishonor?

Mr. DAN DANIEL. Mr. Speaker, I thank the gentleman from Arizona (Mr. RUDD).

Mr. RHODES. Mr. Speaker, I join many of my colleagues today in urging President-elect Carter not to issue a blanket pardon to draft dodgers. To do so would set a precedent that would undermine the faith of our people in the integrity of government, and pose great difficulties should military obligations be required in the future.

To totally pardon those who shirked the duty of service to the Nation during the Vietnam war would mock the sacrifices made by every veteran, every family that has undergone the anxiety of war and the burden of losing those who perished in the service.

To decree that Federal laws regarding military obligations can freely be ignored is unjust. Our Government goes to great lengths to enforce its taxing authority—often down to the last penny. Over our history—service to the country in time of war has been one of the responsibilities of citizenship. To say that whoever decides not to meet that responsibility can ignore the draft law with impunity is to say that we never again can have an effective draft. The day may come when we will need national mobilization for our own survival. Selective observance of selective service is an aberrant application of the laws that should govern all Americans.

The President is Commander in Chief of the Nation's Armed Forces. I would suggest that Mr. Carter consider quite carefully the implications for the future inherent in establishment by Presidential decree of immunity to the draft. Allowing persons eligible for military duty to choose which emergency they will serve in—or not serve—is a threat to the security of our country.

I believe it is bad policy for any President to be the agent that endorses breaking Federal laws, and that is what draft evaders have done. Passage of time, or alteration of viewpoints on the relative importance of the military engagement do not wipe out the fact that we are a Nation of laws, and these people have chosen not to obey the law of the land. They have dodged the duty of citizenship of their own free will and should not be absolved of all penalties for doing so.

I join this bipartisan effort in hopes that the President-elect will reconsider in the light of its import his indicated intentions to issue a blanket pardon for those who ran out on America.

Mr. WAGGONNER. Mr. Speaker, I am pleased to be able to join the distinguished gentleman from Mississippi and our other colleagues to openly discuss President-elect Carter's highly controversial proposal to issue a blanket pardon for Vietnam era draft evaders. It is a question that deserves widespread public debate and consideration before any action is taken by the Executive.

This is a matter that evokes strong emotions on both sides of the issue. The lives of individuals and families scarred by the war in Vietnam, and those whose lives have been scarred by their decision to flee rather than serve in Vietnam, have all suffered deep emotional impacts. The country has been deeply divided. Only history can be the judge of our involvement in that tragic war—whether it was proper and correct or morally wrong, as some critics contend.

We are not here today to discuss the morality of war. Rather, we are here to discuss our opinions on what should be the course of action in dealing with those men who refused to serve in the military when called by their country.

My position has been consistently clear and often expressed. I have always been opposed to granting blanket and unconditional amnesty—the current terminology is "pardon"—for draft evaders. I have always felt, and continue to feel, that these cases should be judged and considered on an individual basis. There may be extenuating circumstances in some cases, and these should be weighed before judgment is made.

Amnesty, the official act of extending pardon, comes from the Greek word for "forgotten." The war in Vietnam may be over, but it is far from forgotten. The memories of the men and women who served there are still vivid. Their memories of coming home to a nation where many people had lost concern for them and the war they were sent to fight must be equally strong. The families of those who did not return alive have not forgotten. Nor should we.

I feel that a free society—if it is to remain a free society—must provide a way for an individual to pay his debts to that society. But I do not feel that any society should suddenly, because it may appear to be popular, disregard its laws and grant pardons to those who violated those laws. This is precisely what a blanket pardon would represent. A society based on laws cannot long function that way.

I hold no bitterness in my heart for those men who fled this country to avoid the draft. Many of them elected to serve their conscience, rather than their country. They made their decisions based on what they knew to be the consequences. We must have penalties for breaking the laws, just as we have privileges for adhering to them.

We cannot change facts by trying to forget—nor can the President-elect.

Mr. ASHBROOK. Mr. Speaker, one of President-elect Jimmy Carter's campaign promises was to pardon all those who evaded the draft during the Vietnam conflict. Since Mr. Carter will soon be assuming the duties and responsibilities of our Nation's highest elective office, I think it would be appropriate for him to carefully reexamine his position on this matter.

I firmly believe that a pardon for draft evaders would be a serious mistake. It would be unfair to those Americans who served honorably and bravely in the Armed Forces. It would be a travesty to the memory of every American who was wounded or died while fighting for this great Nation.

Gen. William C. Westmoreland, former Army Chief of Staff and the man who headed the U.S. forces in Vietnam, has urged that President-elect Carter reconsider his pardon proposal. In an article in the December 12 edition of the New York Times, General Westmoreland stated:

Such an act would be without precedent in our history and a degradation of our national moral fiber and military posture.

How will historians explain to future generations why the honorable service of 2.5 million young men and women was disregarded in the rush to placate the relative handful (about 4,000) who refused to serve in any capacity?

I agree wholeheartedly that there should be no pardon for draft evaders and I wish to bring to the attention of my colleagues the full text of the article by General Westmoreland:

[From the New York Times, Dec. 12, 1976]

NO PARDON FOR DRAFT EVADERS

(By William C. Westmoreland)

CHARLESTON, S.C.—If President-elect Carter is preparing to make good on an ill-considered campaign promise to pardon all who evaded the Vietnam-era draft, he should pause and reflect soberly. Such an act would be without precedent in our history and a degradation of our national moral fiber and military posture.

How will historians explain to future generations why the honorable service of 2.5 million young men and women was disregarded in the rush to placate the relative handful (about 4,000) who refused to serve in any capacity?

Under President John F. Kennedy, our involvement in support of South Vietnam was firmly established. Inspired by his Inaugural exhortation to "pay any price, bear any burden, meet any hardships, support any friend, oppose any foe to assure the survival and the success of liberty," more than 600,000 draftees served in Vietnam. Of those who accepted their duty in spite of any reservations, 11,500 were killed and 60,000 were wounded. These casualty figures include some who were replacing draft evaders and deserters.

Regretfully, we must assume that some future President will have to call for young men—and perhaps women, too—to be selected for service through the draft, possibly sooner than many suppose. We would hope that the future need would be better understood and more strongly supported than the Vietnam situation was, but the precedent about to be set by Mr. Carter would be a major impediment to the rational conduct of any future draft.

This denigration of the selective-service process comes at a very bad time. The all-volunteer force, born in the frustration of the Vietnam aftermath,) is proving to be inordinately expensive (almost 60 percent of the fiscal year 1977 defense budget will go for personnel costs), and the lack of draft motivation is squeezing the reserve components of all services to such low strengths that their ability to play their assigned roles in an emergency mobilization is being jeopardized. Furthermore, the forces that man our ramparts are not representative of our society.

In misguided euphoria over the viability of the volunteer regular forces, the Ford Administration and the Congress have even gutted the standby draft machinery, destroying its ability to provide manpower in a timely manner if mobilization is necessary.

And all these negative actions—the intended pardon, fixation on the costly volunteer force, which does not represent a cross-section of our society, and the emasculation of the draft machinery—tend to undercut one of the most basic principles of our Republic—the concept of the citizen-soldier. The idea that men would rally to the support of their country has been an American tradition.

Other facts should be kept in mind while considering this essentially emotional issue:

An Army survey of Vietnam deserters processed under President Ford's amnesty program showed that only 14 percent of those who went "over the hill" were motivated by objection to Vietnam involvement. The most common reasons given were personal problems and concern for their own safety.

Fifty-five percent of the military deserters took advantage of the amnesty program, but only about 16 percent of the draft evaders who had the opportunity to perform alternative service choose to make any effort to reestablish their good standing in our society. This would indicate that what these people were looking for is an apology, not amnesty.

We are a nation governed by laws, not by the passing whim of those who do not agreee with a particular law, nor by the desire of any man to gain easy relief from a vexing problem. We cannot afford to set aside such an important principle.

I suggest to Mr. Carter that before he takes this escape route to respond to an ill-considered campaign promise he should consider the precedent and research public attitudes. Public opinion, now that it is relieved of the daily news-media harangue about Vietnam, is shifting back to a rational view of the subject. A recent survey on the campus of Kent State University, where war resistance was so high, found that the students now rank the military Establishment in the "high-trust" category. I am now making campus visits myself and am encountering none of the bitter opposition I would have expected four years ago.

We should all remember that the rush to end the draft and to endure the expensive, nonrepresentative all-volunteer force was the result of another ill-considered campaign pledge, by former President Richard M. Nixon.

Mr. Carter should do himself and the nation a favor by allowing time for further contemplation of the pardon proposal after he takes office and feels the weight of leadership and the implications of his actions solidly and inescapably on his shoulders.

Mr. BAUMAN. Mr. Speaker. I thank by friend and distinguished colleague from Mississippi, Mr. MONTGOMERY, for arranging for this special order on the urgent matter before us. Like many other Members of this body representing both major parties, I signed a letter to President-elect Carter expressing my dissatisfaction with his proposal to grant a blanket pardon to anyone who evaded the draft during the Vietnam war.

I am sure that the President-elect is sincere in his conviction, and that his purpose is a charitable one intending to "heal our national wounds." I have yet to meet anyone who brightens cheerfully at the mention of Vietnam, certainly one of the sad pages in our national history. It was a sad period primarily because our national leadership remained indecisive, and our national interest so ill-defined. Hopefully, our Government will never again entangle our Nation in any form of military hostility without a clear policy of victory.

But the blanket pardon President-elect Carter proposes in order to mend the spirit will only further divide the national will. It will embitter, as it should, those men who served in Vietnam, who suffered there and who did so in large part to satisfy compliance with the law. Yet now, less than half a decade since Americans were being asked to risk their lives in Vietnam, an American President will formally acknowledge by his action that it was not really important. An Executive order will issue a blanket pardon, thus contending that the law is merely an option or a suggestion which we can accept or reject with impunity.

I join with my colleagues in warning the President-elect of the unfortunate effects his proposed action will have on a nation grown sensitive about politicians and the law. The law is not only the realization of a political ideal, but it is primarily the discharge of a moral obligation. To compromise the law, to say that part of it is important and must be obeyed while another part is optional, successfully weakens the authority supporting this moral obligation.

Mr. Speaker, I urge our new President to reconsider his decision. Hopefully it will never happen, but possibly it shall be that national trials as difficult as Vietnam will come upon us. Actions taken today which compromise the authority of the law may not so easily be reconsidered tomorrow when our very national self-preservation could be at stake.

Mr. McCLORY. Mr. Speaker, it is a privilege to participate in the special order which has been taken by our distinguished colleague from Mississippi (Mr. MONTGOMERY) and by our colleague from Idaho (Mr. HANSEN).

Mr. Speaker, the gentleman from Mississippi has given earnest and compassionate thought to the entire issue of our Vietnam war veterans and has assumed a prominent role in behalf of our beloved citizens who became prisoners of war and who were missing in action. The gentleman's speech today focuses on a different aspect of the Vietnam war—but one which is of deep concern to every man and woman who served during the Vietnam conflict as well as the families of those men and women—including, particularly, the loved ones of those who were gravely wounded or who lost their lives in the service of our Nation.

Mr. Speaker, we are all anxious to put behind us the dreadful and tragic experiences of Vietnam, but we cannot brush aside and ignore the sacrifices of the many who served by rewarding with

a blanket pardon the draft evaders, deserters, and others who deliberately flouted the law—and who by making a personal decision renounced a national commitment as well as our Federal statutes and regulations.

Mr. Speaker, I laud the gentleman from Mississippi (Mr. MONTGOMERY) and all of my colleagues who joined in a letter dated December 17, 1976, to President-elect Jimmy Carter and I hope that that letter, bearing more than 100 signatures, coupled with the statements that have been presented here today so eloquently, will persuade the President-elect to reconsider his proposal to grant a broad blanket pardon to all draft evaders and deserters—a statement which he made some weeks ago. I hope instead that equity and fairness to all will be the criteria—and that appropriate respect will be accorded to those who served honorably in Vietnam and at other periods when the Nation demanded their services.

Mr. BEARD of Rhode Island. Mr. Speaker, in registering my disapproval of the proposal of President-elect Carter to issue an Executive order providing a blanket pardon for those who evaded the draft during the Vietnam war, I must also note the fact of my strong opposition to the continuation of that war in 1974 as well as my votes against the appropriation of funds for military aid to South Vietnam in 1975. It was just not possible for me to vote any other way on that issue but the issue of a pardon for draft resisters is quite another matter. I fully appreciate the position of those who opposed the war on ideological grounds and went the full legal route to register their conscientious objection. However, a blanket pardon would place these people in the same boat with those who went off to Canada or some other place just to avoid military service or the legal means available to register their objection.

There are serious national divisions that could result from a blanket pardon. There are thousands of families whose sons or fathers were killed or grievously wounded in the Vietnam war. Many more thousands of families today have sons or fathers who served honorably in Southeast Asia. We are talking about several million people directly affected by this issue and rather than lessen the tensions that still exist, I believe Mr. Carter's proposal would only make the situation worse. Millions of veterans of the two world wars and the Korean war as well as the Vietnam war strongly oppose the Carter proposal.

I realize that many arguments against the blanket pardon proposal are based on emotions. I can well imagine the feelings of mothers, fathers, and wives, many of them not even knowing the fate of their servicemen in Vietnam's jungles. However, I think reason and commonsense should prevail here and the most reasonable and sensible thing would be to consider each case of draft evasion on its individual merits.

Finally, I do not believe that the draft evader himself should be calling any of the shots. In the face of what has happened since 1961, the last person in the world to decide the course of this issue is the person who skipped out of sight when his country called his name.

Mr. ROBERT W. DANIEL. Mr. Speaker, about this time last week, in the Tidewater area of Virginia, a former Vietnam prisoner of war retired a bit early from the Navy. Lt. Cmdr. Michael D. Christian, 36, was serving as a bombardier/navigator when shot down over North Vietnam in April of 1967, dooming him to 6 long years as a POW. Last week, Lieutenant Commander Christian said in retiring that he would leave his medals—two Silver Stars, three Bronze Hearts, two Purple Hearts, four Air Medals, the Legion of Merit, the Navy Commendation Medal, and several others—on the graves of Vietnam veterans, a personal protest of the proposed amnesty for Vietnam-era draft evaders. As he put it:

> We've kind of brainwashed ourselves into being the bad guys. Now, we make heroes out of deserters and condemn ourselves. The price of honor seems pretty cheap this year.

A vast number of my constituents share that sentiment, Mr. Speaker, as do I. An open-ended amnesty such as this, whatever we call it, is a unique and disastrous application of the constitutional "power to grant reprieves and pardons for offenses." Blanket amnesty is a distinct and deleterious precedent, damaging to morale both within and without the military.

Apologists for this amnesty proposal are quick, of course, to cite the examples of Presidents Lincoln and Truman. Yet the pardons issued by Lincoln or Truman were neither as broad nor as unconditional as the one proposed for Vietnam draft resisters. In fact, Lincoln was often quicker to pardon southerners than those disloyal to their own army in the North.

I would urge my colleagues, therefore, to use the means at their disposal to resist a precedent unknown to our Nation's history and repugnant to its sense of honor. Awarding a full pardon to those who fled, whether because of conscience or cowardice, is an insult to the memories of those who served in their place. Justice tempered with mercy, but justice, must be our guiding principle.

Mr. CRANE. Mr. Speaker, before President-elect Carter takes any precipitous action with regard to the pardoning of those who evaded the draft during the Vietnam conflict, it is essential that he understand the feelings of the majority of the American people.

It would be a serious mistake, for example, to overlook the deep concern felt by those families whose sons, husbands, and fathers lost their lives in the Vietnam war. Since 1965, more than 2.5 million men served our country in Vietnam. It is beyond doubt that many of these men did not wish to go to war. These men, however, accepted their responsibilities. To pardon those who rejected their duty, who did not accept their responsibilities, would surely be an injustice to the sacrifices made by those many who took the more honorable course, and their families as well.

Those who advocate a blanket pardon for those men who evaded the draft, and some who even advocate a pardon for military deserters, argue that such an action would serve to heal the wounds which have been left by the Vietnam war. President-elect Carter himself, for example, argues that his own action would serve such a healing process. More likely, it seems certain that a pardon for draft evaders or deserters or both would serve precisely the opposite purpose. Rather than healing the wounds, such an action would serve only to bring to the surface once again all of the passions the Vietnam war aroused.

The advocates of either an amnesty or a pardon approach to draft evaders and deserters, and the difference between the two is more semantic than real, argue that the United States has historically pardoned deserters and resisters in postwar periods. They argue, in addition, that conscience comes before all else, and that there should be no penalty for following it.

The historical arguments of those who support amnesty or a blanket pardon without an admission of guilt or a declaration of a future intention to obey the law are less than persuasive.

The first example often presented by such advocates is that of George Washington and his action with regard to those who participated in the Whiskey Rebellion of 1794.

The fact is that President Washington neither provided amnesty nor a blanket pardon to those involved in the rebellion. In 1794, rioting broke out against the Government's attempt to enforce the law. President Washington sent troops into Pennsylvania to put down the riot. Alexander Hamilton, the new Secretary of the Treasury, in order to establish the Government's power to enforce its law, ordered arrests of those involved in the riots. They were tried and convicted in 1975, the Government's position having been proved. Washington—only then—pardoned those who thereafter agreed to obey the law. Thus, the rebels were not given amnesty nor a blanket pardon prior to a trial. They were pardoned only after they had been found guilty and convicted of a crime.

George Washington's view concerning a citizen's obligations in a free society is far different from that which the advocates of amnesty and blanket pardon impute to him. He said, for example, that:

> It may be laid down as a primary position, and the basis of our system, that every citizen who enjoys the protection of free government owes not only a portion of his property, but even his personal services to the defense of it.

Or consider the next major example, that of Abraham Lincoln at the time of the Civil War. Most of the pardons granted by President Lincoln during wartime provided unconditional amnesty only for deserters who returned to their posts. An action in December 1863, giving full pardons to persons who had participated in the "existing rebellion" was an obvious political bid for more support for the Union cause.

Any comparison of President Lincoln's attitude toward the South and the cur-

rent question of Vietnam draft evaders and deserters is difficult to understand. Lincoln was clearly concerned with half a nation split away, and with soldiers who had made a hard decision to fight for one side or the other. He was not dealing with draft evaders and military deserters—men who fled to foreign countries to avoid service. In the Civil War, we often forget the punishment for desertion was death or, in the Army of Northern Virginia, imprisonment at hard labor, regular flogging, and being branded with a capital "D" in the palm of the left hand. No one who has evaded the draft or deserted from the Army faces such penalties today.

The fact is that there was no general amnesty after World War I, World War II, or the Korean war. Two years after the end of World War II, President Truman pardoned 1,523 men who had been convicted of draft evasion during the war. But this amounted to only about one-tenth of the 15,000 evaders who had been imprisoned during the war.

The "precedents" for amnesty do not seem to prove the point of the advocates of unconditional amnesty or blanket pardon today. Those precedents have dealt primarily with internal conflicts—the Whisky Rebellion, the Civil War, et cetera—not with foreign wars. Even there, the similarities between what was done and what is now advocated are difficult to see.

The real question, precedent aside, is whether real justice would be served either by amnesty or by a blanket pardon. The feeling of the majority of Americans, if public opinion polls are correct, is that it would not. This is also my feeling.

Our entire system of representative democracy would come to a halt if we accepted the philosophy of selective obedience to our laws, or ceased to enforce our laws. We enjoy the benefits of a free society, but we must also bear the burdens of a free society. The precedent which would be set by a blanket pardon or by amnesty would be the permission for individuals or groups to decide which laws they would obey, and which they could feel free to disobey.

Traditionally, as in the case of the Reverend Martin Luther King, Jr., individuals who decided to break the law in order to obey a "higher" law to commit civil disobedience in the name of conscience, have been willing to pay the penalties for their actions. In fact, their acts lose any bit of idealism they might otherwise possess if those who engage in them seek to escape the cost.

A free society must respect the idealism of those who take a lonely position in opposition to the will of the majority. Yet, if society itself is to continue and the rule of law to be maintained, a price for such opposition must be exacted. Those who, for reasons of principle, refused to be drafted and paid the price for it, must receive a modicum of respect. Those who left the country or deserted from the army—who would not take a moral stand which might cost them something—have little claim to such respect. Amnesty or a blanket pardon for such men would make a travesty of the sacrifice of others and of the rule of law.

The fact is that President Ford has provided the young men in question with an opportunity to return to the United States with a minimum penalty. They refuse to do so. What they seek, and what President-elect Carter appears prepared to offer, is exactly what they want most: a declaration which they can interpret as signifying no guilt whatever on their part.

The most militant among them declare that by evading the draft or by deserting the Army they have done nothing wrong. President Ford's generous proposal enables them to return to their country, but does not bestow upon them the Nation's approval for their actions.

President-elect Carter must understand that the question involved is not a formula to bring these men back and reintegrate them into the American society. This, President Ford has offered. This, they have rejected. To offer anything more is to offer approval of their acts. To do so, in turn, is to insult the memory of those who acted honorably and, in too many instances, gave their lives.

It is my hope that, before he makes his final proposal, Mr. Carter will take all of these factors into consideration. To proceed in the manner he has thus far indicated would fly in the face of the feelings of the overwhelming majority of Americans. Beyond this, it would set a dangerous precedent for the Nation.

Mrs. HOLT. Mr. Speaker, every Member of Congress concerned about America's military strength in a dangerous world should be alarmed by the intention of President-elect Carter to pardon Vietnam-era draft evaders.

If we ever again need a military draft, what will be the effect if people feel that evasion will ultimately be forgiven? That is the principal issue before the President-elect.

While thousands of Americans were dying or being maimed in Vietnam to prevent Communist aggression from overrunning an American ally, draft evaders clearly shirked the call of duty and the responsibility imposed on them by law.

If hindsight now tells us that Vietnam was the wrong place to fight; if wisdom now tells us that we cannot hope to contain communism in every corner of the globe, but must choose and defend only those areas of vital interest to our own national security; then so be it.

But in Vietnam our policy was to help an ally defend herself against a powerful and ruthless aggressor. Our motive was moral, and our men who fought and died there were engaged in a moral cause.

To pardon Vietnam draft evaders would be an intolerable affront to those Americans who did their duty, and those who died, in a cause that was endorsed by the President and the Congress of that time.

President Ford offered amnesty to those draft evaders who repented, and there were many who accepted his conditions. This was an honorable way to proceed, and it considered the circumstances of each case.

Mr. Speaker, I oppose a blanket pardon for Vietnam draft evaders.

Mr. WAMPLER. Mr. Speaker, since the end of the Vietnamese conflict, I have consistently spoken in opposition to the issuance of a blanket pardon for deserters and draft evaders.

The sadness brought upon this Nation by the loss or disfigurement of many of our fine young men at that time cannot be alleviated by pardoning those who refused to serve their country in its time of need on an all-inclusive basis. Whatever the reasons for the Vietnamese war, and whether history will prove it to be right or wrong, those who evaded the draft or deserted did break the law as it stood, and should accept the consequences of their actions.

Our prospects would be poor indeed for any possible future conflicts if we allow this dangerous precedent of offering a blanket pardon to be established.

With the initiation of this concept following the Vietnamese conflict, I have received communications from various veterans' organizations and interested citizens. This correspondence shows the majority of my constituents to be overwhelmingly opposed to amnesty on such a basis.

A favorite argument of those advocating a blanket pardon is that it will draw the people of this Nation closer together, and allow us to forget that bitter period in our history. I disagre with this idea. What of those families who have members still listed as MIA's, with no idea of where or how they are—or those families who lost their loved ones as they were serving their country. These groups, along with our veterans who have returned to us from the Vietnamese and other wars, are most likely to be disillusioned and alienated by having their Government issue a blanket pardon to those who refused to serve where they willingly fought.

In conclusion, consideration should be given those who wish to return and/or clear their record. This should be accomplished not by a blanket pardon, but by a jury of peers to evaluate the circumstances in each individual case and decide fairly on the disposition of such requests. Such action would be in keeping with our American system of justice and equality before the law for all citizens.

Mr. BOB WILSON. Mr. Speaker, I am very pleased to join with the distinguished gentleman from Mississippi (Mr. MONTGOMERY) in expressing to the President-elect the strong opposition by many Members of the House to the issuance of a blanket pardon for Vietnam-era draft evaders.

I want to emphasize, at the outset, that I can fully sympathize with the anguish and grief suffered by the families of many of these young men. But what about the grief and anguish of those families who lost a son, or a husband, or a brother in Vietnam. To grant a blanket, unconditional pardon to all who refused military service desecrates the memory of those who died. It makes a mockery of those who were wounded and those who served long years in enemy prison camps.

The passage of time has not dimmed the memory of the suffering of the waiting families of our servicemen held pris-

oner by the North Vietnamese and Viet Cong. Many of these men were in captivity for almost a decade; their families went for months and years at a time with no word as to whether they were alive or dead. It is difficult for any outsider to comprehend the loneliness and despair with which the POW/MIA families lived for so long. I had the privilege of knowing and working with many of the families; the memory of their bravery and determination in the face of such adversity greatly magnifies my basic opposition to a blanket pardon.

We must not forget that there is still a final chapter to be written to the Vietnam war. Many families still wait for a full accounting of the fate of their loved ones. In my view, our national attention is better focused on trying to effect such a full accounting, rather than on amnesty or pardon for those who refused to serve.

President Ford offered these young men a chance to clear their names and reenter American society. Few felt it was worth their time and energy. Perhaps there are additional individuals who deserve reconsideration on a case-by-case basis. But to a blanket pardon, I say no.

I urge the President-elect to consider the strong opposition being expressed by Members of the House today. While our parties and political philosophies differ, we are united in our request that Mr. Carter rethink his previous announcement relative to a blanket pardon.

Mr. DICKINSON. Mr. Speaker, there has been a great deal of discussion recently about different plans to relieve draft dodgers and deserters of the Vietnam conflict era from their responsibility to society through pardon or amnesty. Of particular concern at this time is a proposal by President-elect Carter to issue a blanket pardon to all Vietnam-era draft dodgers his first week in office.

Certainly, Vietnam was not a popular war and there were those who decided not to serve their country. However, very few of these draft dodgers had serious moral objections; they simply bolted like rabbits when they received the call.

But there are two other categories of individuals we must also consider when we are talking about pardons—the man who had the moral conviction to serve a prison sentence for violating the draft law and the person who initially answered his country's call and later deserted. Some of these deserters were highly decorated combat veterans and statistics show that 9 out of 10 left the service because of typical personal problems—money, family life, inability to adjust, et cetera—not because of the war.

Should we, while we are at it, not also issue a pardon to the man who went to prison for his beliefs? And the deserter who at least tried. Does he not deserve the same consideration as the individual who completely turned his back on this country and "bugged out"? Yet, President-elect Carter says he will only consider whether or not deserters should be pardoned on a "case-by-case" basis. No blanket pardon here, and there is no mention of the men who served prison terms for draft evasion. To me, it seems that Mr. Carter is giving preferential treatment to the men who least deserve it.

There are other reasons I am opposed to this unconditional pardon. It would be a sharp and official insult to the millions of men who served with distinction in Vietnam and other wars and to the widows and orphans of those who died in defense of this Nation. In putting the official Presidential Seal on the attitudes of those who refused to serve Mr. Carter would be saying: "I agree that what you did was right; come on home now."

Additionally, bringing these men back from Sweden, or Canada or wherever, would certainly do nothing to solve our unemployment problem. As far as I am concerned, these people can stay where they have been living since they turned their back on the United States.

Finally, issuing a general pardon to all draft dodgers could have a disasterous effect on the future physical safety of the United States. We now have no draft to bring qualified men into service in the event of an emergency and with the pardon precedent, it could be difficult to field an effective fighting force. If men of military age, both in and out of service, can personally choose the wars in which they will consent to fight, will we be able to defend this country when necessary? I think we all know that a nation with an unresponsive, undisciplined, and undependable military force could not long endure.

For these reasons, I do not believe President-elect Carter's plan is in the best interest of this country, and I would urge him not to follow such a course.

Mr. DERWINSKI. Mr. Speaker, as a cosigner of Mr. MONTGOMERY's letter to President-elect Carter opposing his proposal to issue blanket pardons or amnesty to those who deserted or evaded the draft during the Vietnam conflict, I am pleased to participate in his special order this afternoon to discuss this important and controversial matter.

I am sure that all Members, as well as most Americans, recognize that the clemency proclamation issued by President Ford on September 16, 1974, extended to draft evaders and deserters an opportunity to receive clemency and once again become productive citizens. The case of each applicant was considered on an individual basis by the Presidential Clemency Board and their review was based upon the merits of each applicant's case, with full respect given to his rights and interests.

However, the vast majority of offenders chose to ignore the President's program despite the opportunity it offered them of again becoming productive members of society. Although a total of 113,337 offenders were eligible for clemency under President Ford's program only 21,729 applied.

Mr. Speaker, I am convinced that a majority of the American people are opposed to Mr. Carter's proposal, as are major veterans' organizations such as the Veterans of Foreign Wars, the Disabled American Veterans, and the American Legion. I share the views of these organizations in the belief that blanket pardon or amnesty would be contrary to the best interests of our Nation and an affront to those who served and died in the service of our country during the Vietnam conflict.

In conclusion, Mr. Speaker, I wish to call to the Members' attention a "sense of Congress" resolution introduced by Mr. HAMMERSCHMIDT of Arkansas and which I cosponsored, expressing opposition to the granting of blanket pardons or amnesty. As a fitting tribute to the 56,000 Americans who gave their lives fighting in Vietnam and to the 1,100 still missing in action and unaccounted for, I would like to urge my colleagues to add their support to this resolution.

Mr. WALSH. Mr. Speaker, President-elect Carter's proposal to issue a blanket pardon to Vietnam-era draft evaders, while farseeing in its compassion, appears to be myopic in its justice. It would appear that Mr. Carter has overlooked a number of significant facts:

First. The motives for draft evasion and desertion differed widely. No one can ever know for certain which violators acted out of a conviction that the Vietnam war, undeclared as it was, was wrong, or that all war is wrong, or that the draft system was unjust; nor can anyone know for sure which violators acted out of cowardice, ignorance, or sympathy with the enemy.

Second. The purpose of the draft law was to levy the burden of military service fairly, and although it fell short, in some cases, of delivering perfect justice, it was legally enacted and therefore binding. Those who claimed to be conscientious objectors during all wars were given the option of alternative civilian service, or they requested and were accorded noncombat military service in the Medical Corps. In the years 1964 through 1975, some 35,000 draftees chose alternative civilian service while more than 30,000 chose to accept noncombat assignments.

Third. The individual draftee who did not oppose all war on moral grounds, but who opposed only the Vietnam war or the draft law in particular, was not eligible for alternative service. He could honorably dramatize his convictions, however, by informing the appropriate authorities of his opposition and accepting a prison sentence. And, in fact, between 1961 and 1975, some 9,500 men were convicted for draft violations.

Fourth. It is estimated that more than a million eligible men refused to register or to be inducted, refusing to accept their share of the burden of military service. Instead, they fled to Canada or Sweden, and in many cases, a fellow American died in their place. Of these violators, however, in excess of 21,000 attempted to take advantage of President Ford's clemency program in order to reestablish their credibility. This number included 55 percent of the deserters and 16 percent of the draft evaders. Some 7,500 of those who applied under the clemency program accepted alternative civilian service while more than 5,000 were granted outright pardons.

Aristotle defined justice as giving every man his just due. Justice should be accorded not only to draft violators and deserters, but to those who did serve in the Armed Services during the Vietnam era, those who accepted alternative civilian service, those who accepted prison

sentences, and the American people who did not consider the Vietnam conflagration to be immoral or unjust.

Though proponents of the blanket pardon often attempt to support their position by citing the pardons issues by Presidents Lincoln and Truman, a closer examination of those actions will reveal that their pardon programs were neither universal nor unconditional. A blanket pardon could set a dangerous precedent. It is conceivable that in any future crisis, each man of military age could ignore the draft law at will, having every reason to believe he would, in the end, escape scot free. Regardless of his motivation, our national security would be seriously jeopardized.

While I would support a pardon program on a case-by-case basis, allowing compensatory civilian service after the fact for those who honestly objected to war on moral grounds, I cannot sympathize with those who elected to run rather than accept their responsibilities. It is my contention that there was an honorable alternative for every draftee, and many decided to take advantage of these alternatives. I cannot, therefore, condone, nor can I support any proposal to issue a blanket pardon.

Mr. POAGE. Mr. Speaker, it seems that there is much misunderstanding in regard to the proposal to issue a blanket pardon for all those individuals guilty of draft evasion or of desertion from the military forces during the Vietnam operations. Surely, we all recognize that there are circumstances which may from time to time make the pardon of an individual charged with a crime a desirable and proper procedure. Our Constitution properly vests the decision in such matters in the hands of the President. I find no fault with existing procedure. Someone must make the decisions, and I think the Chief Executive is best qualified to do so.

On the other hand, a blanket pardon of a large number of individuals partakes very strongly of a change in the law. A blanket pardon, as I see it, is not based upon individual circumstances, but upon a decision that acts with which the individuals are charged should not be punishable under any circumstances. It seems to me that this is a decision that should be made by the legislative rather than the executive branch. The Congress decided that individuals who would not register for military service or who abandoned that service after their entry therein should be punished. That is and has been the law of this land.

Unquestionably at times that law imposed unduely harsh sanctions. The Chief Executive has had—and still has—the right to extend pardons in these circumstances. Sometimes individuals are convicted on what now seems to have been inadequate proof. The Chief Executive has the power and the obligation to correct erroneous sentences, but for the Chief Executive to extend pardons to all offenders because he considers an offense to be one for which there should be no punishment is to give the President alone the power to repeal the act of Congress. I believe that this is a dangerous approach. I think that the Government must have the right and the power to require the cooperation of its citizens in eras of emergency.

I would, therefore, expect to oppose the repeal of these laws should the matter come before the Congress; but certainly regardless of the propriety of the legislation, the Congress, not the Chief Executive, should enact any legislation or order which has the effect of repeal. To do otherwise is to change the very structure of our Federal Government.

Mr. HARSHA. Mr. Speaker, I have joined my distinguished colleague from Mississippi, SONNY MONTGOMERY, in signing a letter of bipartisan opposition to President-elect Carter's campaign promise to issue a blanket pardon to all the Vietnam-era draft evaders and military deserters before the end of his first week in office.

The fragile question of amnesty must be answered by the Executive. However, I feel I must, for the sake of all the patriotic veterans of this era who served this country, make a statement on their behalf during this special order today.

I find Mr. Carter's proposed pardon to these draft deserters unconscionable at best. The young men who several years ago left this country did so of their own free will rather than to serve their country in a time of need. They knew the consequences of their actions, and leaving the country only exemplified their own awareness of the severity of the crime.

An unconditional pardon is an insult to the young men who complied with the law, and especially to those who sacrificed and suffered severed personal losses during the Vietnam conflict.

Pardon implies guilt, and by allowing the "guilty" to return to the country on which they willingly turned their backs, Mr. Carter will not only make a fool of every veteran who did serve, but also a mockery of every veteran's assistance program implemented to thank them for their dedication.

Amnesty now will only create deeper wounds for the dedicated Americans in this country who lost family; and for the veterans who have already suffered it will create discontent.

Not only is this a sensitive emotional issue now, but it will set a precedent for future generations. Those who wish to undermine the selective service laws of their day will feel more inclined to refuse to serve their country.

I would also add that my office has been swamped with letters expressing outrage over Mr. Carter's position, and I have urged them to write to the President-elect to listen to the voices of the people of America and adhere to their wishes as he said he would do so often during the months of his campaign.

Such a pardon should not be granted.

Mr. HYDE. Mr. Speaker, I first want to congratulate my colleague, SONNY MONTGOMERY, for his forceful leadership on this issue. I am proud to support him in this effort to effect a reconsideration of what I believe to be a most unwise program with far-reaching consequences for our Nation as well as the individuals directly involved.

The wisdom of pardoning draft evaders—not to say the propriety of doing so—has a direct impact on those young men who complied with the law, were drafted and had their education and their lives interrupted. To those many young men whose sense of duty was superior to their regard for personal convenience and safety, and especially to those who endured the dangers of combat in a foreign land, this program of pardoning draft evaders is an insult.

Recently that television arbiter of national morals, "All in the Family," had a program wherein the parent of a soldier killed in Vietnam had Christmas eve dinner at Archie Bunker's house and also present was a friend of Michael's—Archie's son-in-law—who, to avoid the draft, was living in Canada. After Archie played his customary role of conservative buffoon, refusing to eat with the Canadian expatriate, the decision is finally left to the Gold Star father who, in the true spirit of Christmas, suggests that both boys did "what they had to do," and, the quarrel over, everyone finished their dinner.

In a spurious attempt to equate the conduct of the two draftees, the program misstates the moral issue: It is not doing what one has to do, but doing what one ought to do, and everyone ought to obey the law. How easy it is to rationalize a refusal to suffer the discomfort and danger of being drafted by appealing to a more convenient and self-serving higher law and saying "I had to do it."

If we are to have a "healing of the wounds" and a true reconciliation, let those whose moral codes required them to flee from their country's call to duty return if they so desire, and submit to the judgment of a court and accept whatever penalty is imposed. To equate their conduct with those who honorably served is an affront to justice.

The most serious consequences of wiping the slate clean, however, will be an erosion of respect for any future selective service law. If such a law is to be without effective sanctions, our national security will be threatened.

On the basis of respect for the law, our national interest and simple justice to those who served, I urge the abandonment of the pardoning program the President-elect now supports.

I also thank the gentleman from Mississippi for inviting me to participate in this special order.

Mrs. LLOYD of Tennessee, Mr. Speaker, I would like to take this opportunity to express my opposition to President-elect Carter's announced proposal to issue a blanket pardon for Vietnam-era draft evaders.

The Selective Service System was set up so that a person who did not wish to engage in military activities could obtain a deferment as a conscientious objector and serve in some type of a noncombat role. Those who chose not to take advantage of this option violated Federal laws. Therefore, I oppose a pardon for those people who admittedly violated the selective service law during wartime.

I cannot justify pardoning any young man who shirked his military obligation when so many others responded and paid the price with their lives. Such an action can only cause bitter feelings on the part

of families whose sons lost their lives or husbands whose lives have been lost in Vietnam or the millions of other Americans who went to Vietnam, many who came back with scars they will carry for the rest of their lives.

I firmly share the often expressed belief that we would be setting a bad precedent by giving a pardon to draft dodgers. We should not risk our country's safety in any future war by excusing those who would not do their duty in the last war.

One of the responsibilities of being an American citizen is to fight to defend his or her country and it is every citizen's duty to work for the freedoms he or she enjoys as a citizen. Those people who evaded that duty broke a Federal law. Unless that law is changed retroactively, they should have to come back to this country and stand trial.

I sincerely hope that President-elect Carter will decide to reconsider his position on this pardon. We should not excuse those who turned their backs on their country during a time when sacrifice was needed.

Mr. LAGOMARSINO. Mr. Speaker, the President-elect has stated that he plans to grant an unconditional pardon to all Vietnam-era draft evaders. If this proposed blanket pardon is invoked, I believe the people of our great Nation will suffer a grave injustice.

The history of our Nation is written in the blood of those who have died in defense of our freedom. When that freedom was challenged, our generation and the generations before us have taken up the call to arms; living, fighting, and dying so that our children and their children might share that precious freedom.

It has been said that the Vietnam conflict was different from other wars. What was not different, however, was the inevitable sacrifice by those thousands of men who fought in it. It is to these men, both living and dead, that this proposed pardon would do the greatest injustice. The Government of our Nation would be saying to those who died, to those who were wounded, and those who bore the heat of battle, that they should not have fought: That evasion or even cowardice is to be rewarded in the same manner as heroism. Mr. Speaker, I believe such an unconditional pardon would set a precedent, which could undermine our ability to defend ourselves. Those called to future combat, even in a national emergency, would remember that this Nation paid no deference to heroism; that there was no penalty for evasion. Our armies might not have won World War II believing that. We could not hope to win a future war with that belief.

I do agree, however, that there is a need to heal our Nation's wounds at this time. I do not agree that an unconditional pardon is the way to do that.

President Ford's clemency proclamation of September 16, 1974, allowed case by case consideration for deserters and evaders, with appropriate conditions and sanctions. This conditional amnesty retained the rightfully due honor for those men who died and suffered. It also allowed compassion and mercy for those men who had fled or deserted.

I believe that the President-elect could grant pardon on a case-by-case basis which would eliminate those shortcomings.

I could support the President-elect in his adoption of conditional pardons, with specific provisions for clemency on a case-by-case basis drawn up by the Department of Justice. Such pardons, with clearly delineated provisions and conditions would eliminate the shortcomings of the previous program while preserving the sanctity of our national honor.

It is that national honor which has preserved this country through many conflicts. It is only with that honor that we shall survive the future.

Mr. BEARD of Tennessee. Mr. Speaker, may I first express my appreciation to you for giving me the opportunity to present my views on this most important issue. Amnesty raises complex and emotional questions that necessitate serious consideration for they will have far-reaching effects on the very fiber of our society.

I only hope that President-elect Carter will reconsider his ill-advised campaign promise to grant an unconstitutional pardon to the draft dodgers of the Vietnam war. I say ill-advised, because I think that such an act would, in the words of one of our former senior military officers, "be a degradation of our national moral fiber and military posture."

Throughout the history of our Nation, there have been those who disagreed with the policies of our Government and chose not to participate in the wars in which our country has been involved. Certainly I respect their right to differ, but they must be willing to take the penalty that accompanies the breaking of a law of the land; for, make no mistake—no matter how unpopular the Vietnam war was; no matter what one's feelings about it had been—the fact still remains that draft dodgers are lawbreakers and therefore must stand trial, whether it be in a court of law or before a special commission such as the one set up by President Ford in 1974.

We have always prided ourselves on the fact that our system of justice is one of "all equal under the law." To unconditionally accept the draft evaders back into our society would be to accept a double standard of justice. It makes no difference whether one calls it unconditional amnesty or unconditional pardon—I personally do not see the differentiation in the term—Mr. Carter's plan to give these offenders a completely clean slate is an outrage to our sense of justice.

All of us share the President-elect's wish to put the war behind us, to heal the divisiveness and bring unity back to the country. A blanket pardon for the remaining 4,000 or so draft evaders, however, will neither lessen the bitterness nor bind the wounds. To placate a handful of lawbreakers, Mr. Carter will end up alienating the millions of men and women who served honorably and well and who suffered incredible mental stress and physical disabilities in fulfilling their duty to the Nation.

Never in the history of our country has an unconditional amnesty been granted to those who evaded the draft. Mr. Carter's will be the first of its kind. I need not spell out the danger that such an action would create. It is not unlikely that at some future time, we will have to once again call upon the young people of America for their services. Will they then be willing to risk life and limb in the interest of their country or will the majority of them back out and let others do the fighting, knowing that once it is all over someone will once again welcome them back "for the sake of national unity"?

I agreed with President Ford when he called upon the American people to join him in "rehabilitating all the casualties of the tragic conflict of the past," and I supported his earned reentry clemency program for draft evaders and military deserters. It was a compassionate gesture that enable those who had erred and who wished to return to do so. Over 21,000 came back under this program. If the others who were eligible did not do so, it was of their own choosing.

In my opinion, the opponents of the Vietnam war had their chance 2 years ago to once again be a part of the American scene. Those who refused to accept President Ford's clemency program will now have to face up to whatever penalty the courts may decide. In consideration of our respected veterans, in the interests of justice and national security, and in fairness to all those who had been willing to pay the price for their beliefs, I am going on record as being adamantly opposed to an unconditional pardon for draft evaders.

Mr. SHUSTER. Mr. Speaker, in the months ahead the topic of amnesty for Vietnam-era draft evaders and military deserters will be heavily debated. It is imperative that those of us involved at the decisionmaking level be aware of every component of the issue. All too often we have heard through the media a positive analysis while hearing little of the numerous detrimental effects such an action would have on our society. Therefore, I would like to take this opportunity to bring to your attention both the overt and subtle implications of a blanket pardon.

Discipline is, and will continue to be, fundamental to the effectiveness and morale of our Armed Forces. To issue amnesty to draft evaders and deserters would be to invite new violations of military and civil law. If draft age men come to feel they can flout the law and simply wait for a future amnesty to exonerate them conscription in time of need could prove impossible. Discipline is a prerequisite for a viable military, and any amnesty program would jeopardize it.

Those who calculated to deliberately evade the law must accept the consequences. The legal choice of conscientious objection was open to them and reflected. Intensive research has revealed that only ten to twelve percent violated the laws on moral or religious grounds. To group together those who left for self-centered reasons and those few who genuinely faced a moral dilemma is both shallow and unfair.

Historically, amnesties have only been

granted in rare and demanding circumstances. To allow an unconditional pardon would be an unparalleled precedence and could prove virtually impossible to reverse. We must not force future generations to live with an unrealistic and discriminatory precedent because of our willingness to jump on the band wagon of anti-Vietnam sentiment.

In addition amnesty is unfair to those who served honorably in Indochina and previous wars. It would be a monumental injustice to those who placed life and limb on the line in an effort to honor the American commitment to freedom in Asia. We must not present the millions of productive veterans with this moral and legal inequity in an effort to reincorporate those who avoided their duty.

Last, we must not forget the 1974 clemency offered by President Ford. In this relatively unsuccessful program violators were given the option to return to good standing through an alternative service in the national interest. We must keep in mind that the privilege of citizenship is one worth working for. Those truly interested in returning to their country have been given the opportunity.

It is our obligation to come to a conclusion which is just to all Americans both present and future and not a few who turned their back on their country during a time of need.

Mr. EDWARDS of Oklahoma. Mr. Speaker, it has been suggested by advocates of unconditional amnesty that this is the manner in which we can bring to a close, once and for all, the tragic chapter of Vietnam. It is said that we have the opportunity by granting such amnesty to end the divisiveness and bitterness resulting from our involvement in Vietnam.

This is a praiseworthy goal, Mr. Speaker, but hardly one that will be realized through a Presidential proclamation of unconditional amnesty for violators of Selective Service and military laws. Amnesty would create, not end, divisiveness. It might appease a few draft evaders or deserters, but at the cost of reopening the wounds of millions more Americans. No solution to any remaining divisiveness, if, in fact any does remain, is to be found in a program that fails to make a distinction between those who did not serve and the 56,234 dead, 303,000 wounded, and the more than 600,000 more Americans who carry emotional scars as a result of their service to their country during the Vietnam conflict. In fact, amnesty would be a statement that those sacrifices hold little value.

Moreover, it would be a statement that our Nation's laws and policies are subject to individual consent. I need not remind this honorable body that ours is a nation of laws, to be complied with uniformly, not selectively. Every reasonable concession has been made to make compliance with the law, and later to make reentry into society as easy as possible for those who chose not to serve. During the Vietnam era, alternative service was made available for those who could not, in good conscience, bear arms for their country. Two years ago, President Ford created clemency review boards to consider these cases individually. Now, those who chose neither alternative service nor individual review want the President to declare total amnesty.

Particularly offensive is the proposal contained in this resolution that honorable discharges now be granted to those who served dishonorably, as to remove any stigma that might impede their getting the best jobs. Vietnam's legacy should not be congressionally sanctioned precedent for lawlessness or as mockery of bravery. Nor should we now put a final seal of disgrace on the Vietnam era by allowing those who were dishonorably discharged to share in the many benefits duly earned by those who served the Nation so honorably and so well.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the proposed blanket pardon to all draft evaders by President-elect Carter.

The SPEAKER pro tempore Is there objection to the request of the gentleman from Mississippi?

There was no objection.

NEIGHBORS AND NEIGHBORS' SONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 60 minutes.

Mr. KOCH. Mr. Speaker, I am pleased today to nave the opportunity to present my views on the subject of amnesty. It has been nearly 4 years since American participation in the Vietnam War ended. Whether one was for the war or opposed to the war—and I fall into the latter category—I believe that it is time that we end the divisiveness which grew out of American involvement in Vietnam. The only way we can end that divisiveness is by granting amnesty to the large number of Americans whose lives were adversely, and often unfairly, affected by the Vietnam War.

President-elect Carter's proposal to extend a pardon to individuals who evaded the draft by refused or failing to report for induction is commendable. However, those cases represent a mere fraction of the problem, the dimensions of which are staggering. Here is how the numbers break down:

In addition to the 3,000 outstanding draft cases to be covered by the President-elect's proposed pardon, there are 9,000 persons who have draft conviction records and an estimated one-fourth million persons who failed to register for the draft at all. These figures represent only selective service violations, and the military offenders are even greater in number.

There are still over 5,000 military deserters living abroad or as fugitives in this country. These deserters, together with the 3,000 draft evaders mentioned above are cut off from the benefits of continuing their lives in their country of birth and cannot even come home to visit their families for fear of prosecution.

In assessing the responsibility these military offenders bear with respect to the war effort, it should be remembered that two-thirds of all draft eligible men never served at all.

Perhaps the most tragic aspect of the problem lies with the fate of the Vietnam veteran with the so-called "bad paper" discharge. There are an estimated 90,000 Vietnam era veterans with less than honorable discharges for AWOL and desertion offenses, and a half-million Vietnam era veterans with general and undesirable discharges. These two categories represent discharge by administrative procedure and during the Vietnam era were awarded under circumstances ranging from unfitness or the commitment of a minor infraction to AWOL offenses. Though not intended to be punitive, such discharges impose a severe stigma on a young person entering the job market. In response to a 1974 survey conducted by our colleague, JOHN F. SEIBERLING, 40 percent of the 74 corporations responding admitted to discriminating against veterans with general discharges—a type the Pentagon considers to be "under honorable conditions." Other studies have borne out those findings—see table 1. This is crucial in light of that fact that general and undesirable administrative discharges accounted for only 3.4 percent of all discharges awarded in 1968, but by fiscal year 1972 they amounted to 9.2 percent—see table 2.

The dramatic increase in administrative discharges, and the importance of this matter to the question of amnesty, is perhaps best understood when the manpower employment policy of those years is examined. Since the selective service system of deferments and exemptions favored the rich, the educated and the well-counseled, the fighting was often left to the poor, the uneducated, and the marginally qualified. Those servicemen also received a disproportionate share of undesirable discharges.

Startling is the fact that almost one-fourth of those with less than honorable administrative discharges had served honorably in Vietnam only to find themselves unable to readjust to military life back in the States.

I strongly believe that those draft cases still outstanding should be dropped and those with draft convictions who have served time should have their records expunged. But my belief is equally strong that we provide the same consideration to the veteran as we plan to provide to the nonveteran. Therefore, I would urge that in addition to a pardon for draft violators, all general and undesirable discharges awarded during the Vietnam era be upgraded to honorable discharges, and that punitive discharge cases—those arising from court-martial convictions—be evaluated on a case by case basis. Since the use of the administrative process reflects the military posture that an infraction was not serious enough to warrant a court martial, I believe a case by case evaluation of those discharges would be inappropriate, time consuming and expensive. However, I have recommended that punitive discharge cases be eval-

uated on a case by case basis so that those Vietnam veterans may also be given a chance to be reevaluated while assuring that those who committed serious offenses and were tried by court martial would be subject to a case by case review.

There are some who fear that granting amnesty would weaken our country's future military policy by serving as a precedent for future violators. Yet George Washington, who demonstrated a clear sense of America's proper direction by refusing the offer of kingship must not have feared precedent when he granted amnesty after the Whiskey Rebellion in 1794. Nor did Andrew Johnson fear precedent when he granted amnesty to deserters and opponents after the Civil War, conditional upon signing an oath of allegiance to the United States. In Johnson's own words from his 1868 proclamation:

A universal amnesty and pardon . . . will tend to secure permanent peace, order, and prosperity throughout the land and to renew and fully restore confidence . . . among the whole people, and their respect for and attachment to the national government.

Nor did Theodore Roosevelt, Woodrow Wilson, Calvin Coolidge, Franklin Roosevelt, or Harry Truman fear precedent when each of them granted amnesty in some form.

In fact, there have been 34 instances of amnesty in some form in American history, restoring citizenship and full rights to many thousands of Americans see table 3.

Somehow we survived and, I believe, were enriched by those humanitarian, compassionate responses, and I think we would have a better life for our country coming out of such a response today.

There are those who believe that an amnesty or pardon would somehow sully the records of those who served and died in Vietnam. I do not believe that it does sully those records. Many of those who served our country agree that it is time we brought this matter to a conclusion. Because for the draft and military offender, many of whom are still fugitives, and for the ex-servicemen who bear scars of their involvement in the Vietnam war on their discharge papers, the agony continues. Our Nation will never be truly at peace until we dedicate ourselves to a future where we will cease to judge those who have suffered as the result of their involvement in, or opposition to, the Vietnam war. That is what an amnesty is all about. It does not represent a judgment of right or wrong and, as such, brings no dishonor to those who fought honorably in Vietnam. Rather it is a commitment we can make together to place behind us the wounds caused by one of the most tragic eras in our history. If we do not, we shall continue to experience the pain caused by the divisiveness over that war.

I urge my colleagues to join with me in calling for an amnesty program which will be truly meaningful to the hundreds of thousands of Americans whose lives were affected by the Vietnam War. I have introduced a concurrent resolution reflecting the views I have set forth above, and I would urge those of our colleagues who have not done so already to join me in sponsoring that measure. Senator EDWARD W. BROOKE has introduced a similar measure in the Senate. The Senator and I, together with both House and Senate cosponsors, will be sending a copy of that resolution to President-elect Carter, commending him for his position thus far and urging him to expand his proposed pardon.

In conclusion, as we mourn the passing of a great and compassionate man, Senator Philip Hart, we should recall that, on the brink of death, he expressed the desire that a broad amnesty be declared. I can imagine no more fitting tribute to Senator Hart than to call for the fulfillment of his dying wish. For those in need of amnesty are indeed those who President Lincoln, in pardoning Civil War offenders, called "neighbors and neighbors' sons."

The tables referred to follow:

TABLE 1.—IMPACT OF LESS-THAN-HONORABLE DISCHARGES ON EMPLOYMENT OPPORTUNITIES

	Less likely to hire (percent)	Automatic reject (percent)
Bradley Jones' 1973 survey of businesses, colleges, and professional associations:		
General discharge	51	8
Undesirable discharge	69	20
Bad conduct discharge	75	27
Dishonorable discharge	77	34
William Pearman's 1975 study on the impact of the Ford clemency program on employment prospects:		
Honorable discharge	0	0
General discharge	39	5
Undesirable discharge	75	34
Dishonorable discharge	79	52
Clemency discharge	47	18
Clemency discharge with alternative service	40	12
Civilian draft offender with Presidential pardon, no alternative service	57	16
Civilian draft offender with Presidential pardon, with alternative service	41	12

TABLE 3.—*National Interreligious Service Board for Conscientious Objectors' Amnesty Information Service: a list of amnesties in American History, 1795 to date*

In this table amnesty is broadly defined to permit inclusion of several actions by the Executive that should properly be considered "pardons" as well as legislative actions by Congress.

The amnesties in American history, including date, issued by, persons affected and nature of action:

July 10, 1795, Washington, Whiskey insurrectionists (several hundred). General pardon to all who agreed to thereafter obey the law.

May 21, 1800, Adams, Pennsylvania insurrectionists. Prosecution of participants ended. Pardon not extended to those indicted or convicted.

October 15, 1807, Jefferson, Deserters given full pardon if they surrendered within 4 months.

February 7, 1812, October 8, 1812, July 14, 1814, Madison, Deserters—3 proclamations. Given full pardon if they surrendered within 4 months.

February 6, 1815, Madison, Pirates who fought in War of 1812 pardoned of all previous acts of piracy for which any suits, indictments or prosecutions were initiated.

June 12, 1830, Jackson (War Department), Deserters, with provisions: (1) those in confinement returned to duty: (2) those at large under sentence of death discharged, never again to be enlisted.

February 14, 1862, Lincoln (War Department), political prisoners paroled.

July 17, 1862 (Confiscation Act) Congress, President authorized to extend pardon and amnesty to rebels.

March 10, 1863, Lincoln, Deserters restored

to regiments without punishment, except forfeiture of pay during absence.

December 8, 1863, Lincoln, Full pardon to all implicated in or participating in the "existing rebellion" with exceptions and subject to oath.

February 26, 1864, Lincoln (War Department), Deserters' sentences mitigated, some restored to duty.

March 26, 1864, Lincoln, Certain rebels (clarification of Dec. 8, 1863, proclamation).

March 3, 1865, Congress, Desertion punished by forfeiture of citizenship, President to pardon all who return within 60 days.

March 11, 1865, Lincoln, Deserters who returned to post in 60 days as required by Congress.

May 29, 1865, Johnson, Certain rebels of Confederate States (qualified).

July 3, 1866, Johnson (War Department), Deserters returned to duty without punishment except forfeiture of pay.

January 21, 1867, Congress, Section 13 of Confiscation Act (authority of President to grant pardon and amnesty) repealed.

September 7, 1867, Johnson, Rebels—additional amnesty including all but certain officers of the Confederacy on condition of an oath.

July 4, 1868, Johnson, Full pardon to all participants in "the late rebellion" except those indicated for treason or felony.

December 25, 1868, Johnson, All rebels of Confederate States (universal and unconditional).

May 23, 1972, Congress, General amnesty law reenfranchised many thousands of former rebels.

May 24, 1884, Congress. Lifted restrictions on former rebels to allow jury duty and civil office.

January 4, 1893, Harrison. Mormons—liability for polygamy amnestied.

September 25, 1894, Cleveland. Mormons—in accord with above.

March, 1896, Congress. Lifted restrictions on former rebels to allow appointment to military commissions.

June 8, 1893, Congress. Universal Amnesty Act removed all disabilities against all former rebels.

July 4, 1902, T. Roosevelt. Philippine insurrectionists. Full pardon and amnesty to all who took an oath recognizing "the supreme authority of the United States of America in the Philippine Islands."

June 14, 1917, Wilson, 5,000 persons under suspended sentence because of change in law (not war related).

August 21, 1917, Wilson, Clarification of June 14, 1917 proclamation.

March 5, 1924, Coolidge, More than 100 deserters—as to loss of citizenship for those deserting since World War I armistice.

December 23, 1933, F. Roosevelt, 1,500 convicted of having violated espionage or draft laws (World War I), who have completed their sentences.

December 24, 1945, Truman, Several thousand ex-convicts who had served in World War II at least 1 year.

December 23, 1947, Truman, 1,523 individual pardons for draft evasion in World War II, based on recommendations of President's Amnesty Board.

Sources: All "military fugitive" statistics come from "The Vietnam Era Deserter: Characteristics of Unconvicted Army Deserters Participating in the Presidential Clemency Program," a study conducted by D. Bruce Bell and Thomas J. Houston for the Army Research Institute for the Behavioral and Social Sciences. Except when indicated by an asterisk, "military convicted" statistics come from the Clemency Board's survey of 1,009 participants in its program. Asterisked statistics are extracted from Leadership and Situational Factors Related to AWOL: A Research Report by Hamilton I. McCubbin, July 1971. "Draft convicted" statistics come from the Clemency Board's survey of 472 draft offenders who participated in its program.

Mr. CONYERS. Mr. Speaker, while the Vietnam war has ended there are still many wounds to be healed. We continue to face an inheritance of bitterness and divisiveness over our deluded involvement in that conflict. For many, the legacy is a harsh one—the loss of loved ones, crippled bodies, life as an invalid. These facts will be with us forever to remind the Nation of the consequences of the arrogance of power.

Many disagreed with that role, and far more than those physically injured became its victims. The additional victims of the war in Indochina, over a million men and women, include those who violated the Military Selective Service Act, certain Articles of the Uniform Code of Justice, and other Federal, military, and State and local laws out of conscience and in opposition to the illegal involvement of the United States in Vietnam.

The President-elect has stated that during his first week in office he will issue a "blanket pardon" to draft evaders. This proposed pardon program affecting only draft resisters, however, will reach at most 13,000 persons—primarily white and middle class. It is crucial that the program be broadened to reach out to the many other young Americans who need relief. In a word we must have just, broad, and uniform amnesty.

Over 700,000 Vietnam veterans were given less than fully honorable discharges. In 90 percent of these cases, such discharges were given administratively, without regard to due process that would have been routinely provided in civilian life. Many of the less than honorable discharges were given to servicemen suffering from medical or psychological problems which the military should have detected prior to induction. Others were denied conscientious objector status, punished for their dissent toward the war, or victimized by the racism in the military which even the Department of Defense admits was rampant during the Vietnam war years.

To grant amnesty to these young men and women—many of whom have suffered too for making anguished choices and who already have been punished through separations, inability to find work, loss of credit—is not without precedent in our Nation's history. For example, this very body in 1898 authorized a universal amnesty following the Spanish-American War in the belief that such an act of compassion and healing does not dishonor those who served. Mrs. Louise Ransom, whose son died in Vietnam, explained recently in an article:

> Why should a mother like me . . . want amnesty? I want complete amnesty because I saw the war through the eyes of my son . . . Amnesty in no way dishonors the service of my son—another Nixon myth. In all humility, I say that the dead have their own honor, and nothing we say or do here can detract from that.

We have too long avoided coming to terms in healing the divisions over Vietnam. An amnesty would actually strengthen the Nation's future by returning to productive life over a million living victims of a war conducted without their advice or consent. How long shall we inflict vengeance upon our own young, who like us were caught up in the harshest of moral dilemmas of being party to the death and destruction of innocent others.

THE NECESSITY FOR GENERAL AMNESTY

Mr. DELLUMS. Mr. Speaker, the bitterness of the war years lives on. More than ever we need comprehensive amnesty, so that we may—to use a current phrase—move beyond the obsessions of the past.

I came to Congress with opposition to our adventurism in Southeast Asia as my No. 1 priority, and it is obvious that the legacy of the war is still with us, and can be found behind so many of the major decisions of the day. It is therefore appropriate at this time to consider the question of amnesty.

Who needs amnesty? Not the politicians who led us into the war. Not the bureaucrats who consistently distorted the facts of the situation. Not any of the Congressmen and Senators who voted for the war. Not even the Presidents who authorized the destruction of another nation and its people. Not Lieutenant Calley who has been declared "useful to society." Not any of the thousands of young men with money or connections who evaded the draft in entirely legal ways—through higher education, the Reserves, exempted jobs, or conscientious objector status.

The people who need amnesty are not in a position to plea-bargain in return for suspended sentences. They could not claim "privileges" of any kind or demand immunity from indictment. They have few votes and little influence, and perhaps nothing much politically will happen to the President who makes these powerless people his enemy. They are the young men who were too unlucky or too principled to find an easy way of avoiding direct responsibility for the horrors of an insane war, horrors that the rest of us viewed and argued about from a distance—and still do.

For these reasons I urge President-elect Carter to broaden his amnesty proposal to include not only selective service violators but also those who joined the services and directly experienced the horrors of the war, and thus were too late to fall under the category of "selective service violator." Governor Carter must decide a basic question of purpose: Does he want to make sure that everyone worthy returns to society, even at the risk of erring on the side of generosity? Or does he want to make sure that everyone "pays their price" and that no one gets anything that they do not deserve?

Most amnesty proposals have this second purpose. Authors of these type proposals have greater confidence in the moral wisdom and inherent fairness of governmental processes than I have. They claim that the case-by-case approach is the only just one, because of the diversity of individual circumstances and motives. They tried this approach with the Presidential Clemency Board and failed miserably. Only the members of the Board felt it was a success. No one wins, everyone loses.

I am aware of the many distinctions among deserters and evaders. It is precisely for this reason that I advocate a general amnesty approach. It would require the wisdom of Solomon to give everyone exactly what they "deserved" in this complicated and controversial area, and the case-by-case approach has shown no greater success in achieving this goal. It should be clear that general amnesty does not imply that nonrelated offenses are forgiven or expunged from the record. If a person went A.W.O.L. to escape prosecution for murder or theft, provisions should be made to allow him to return but only to face these charges again. Although I believe that the more automatic amnesty is, the better it is for both the young men involved and ourselves, there should be some provision for handling special cases and exemptions.

I know that Governor Carter wants to do a thorough job and truly reinstate these people in society. But if this is what he wants, he must also pay close attention to the legal consequences of amnesty. If amnesty is to be meaningful, it must not only protect the individual from criminal prosecution, but include removal of any mention of relevant offenses from all records and the granting of honorable discharges where appropri-

ate—plus the nullification of any other legal consequences. In our complicated, competitive society, where a person is so much a prisoner of the records kept of his past, anything less would be a joke. I believe a general unconditional amnesty would be less expensive, would cause less bitterness, would be ultimately much more fair—in fact, would accomplish the aims of amnesty far better than any other approach.

I believe Governor Carter can best accomplish the aims he has eloquently expressed by adopting this approach.

Mr. EDWARDS of California. Mr. Speaker, I commend President-elect Carter's pledge to issue as a first order of business a pardon to certain categories of Vietnam war resisters. I would like to encourage Mr. Carter to make his announced program even broader—to include not only those who fled the country to evade the draft, but also those who were prosecuted for their activities against the war or for refusing to be drafted, and those who received less than honorable discharges as a result of their stand against the war.

Our country still suffers from the tragedy of its involvement in that awful war. It seems to me needless to debate any longer the wisdom of granting amnesty to all those who, for reasons of conscience, refused to participate in the Vietnam war. Such an amnesty or pardon would do much to heal the divisiveness which still pervades our country. With those who opposed the war brought back into the mainstream of our society, the country could turn its attention to other pressing needs, not the least of which are the readjustment needs of our Vietnam era veterans.

I hope that my colleagues will join me in supporting Mr. Carter's commitment to an amnesty/pardon program.

Mr. MIKVA. Mr. Speaker, although American military involvement in Indochina is now part of history, there are still many wounds which need to be healed.

There are still thousands of draft resisters and others who are still paying the consequences of their opposition to the Indochina War, opposition that reflected the beliefs of millions of other Americans here at home. Many of the young men who resisted the war effort now continue to live in foreign countries, far away from their families and friends.

Our colleague, Congressman ED KOCH, has assumed a leading role in the national effort to do what is fair, what is compassionate and what is just. His eloquence and sensitivity in calling for support of President-elect Carter's proposed pardon for those who evaded the draft during the Vietnam era are not only timely, but typify Congressman KOCH's commitment to do what is in the most enlightened tradition of a government that exists to serve its people.

More than 2 years ago, President Ford sought to heal some of the wounds of our country's tragic experience in Indochina by offering war resisters a program of clemency. However well-intentioned the President's program was, the results fell far short of what was needed to achieve a meaningful reconciliation.

Although there does not yet appear to be a national consensus for a program of unconditional amnesty, I do not believe that thousands of young men who opposed the war should be kept in legal limbo until such time that an unconditional amnesty becomes law.

The proposed pardon by President-elect Carter is a courageous and sensitive example of leadership which bridges the gap between a tragic, divisive part of our history and a future in which we as a people can once again regain our sense of community.

I am pleased to join Congressman KOCH in his tireless and critical effort to achieve the reconciliation that has alluded us as a nation for far too long.

Mr. MOFFETT. Mr. Speaker, last August, in a campaign speech promising to initiate a blanket pardon for Vietnam-era draft evaders, President-elect Carter remarked:

> We may not be able to agree about what was the right course for the nation to take in 1966. But we can now agree to respect those differences . . . It is time for the damage, hatred and divisiveness to be over.

I agree wholeheartedly and commend Mr. Carter on his proposed amnesty program. However, I join Mr. KOCH and others urging the President-elect to expand his proposed blanket pardon to include deserters, veterans with less than honorable discharges and those who never registered for the draft, as well as draft evaders.

If the wounds of the Vietnam war are to be truly healed, Mr. Carter's amnesty plan must embrace all those men whose lives were disrupted by their violation of military and selective service laws and regulations. Mr. Carter's current proposal would only affect about 12,000 draft evaders. Deserters and nonregistrants must also live on the run, separated from their families, in constant fear of prosecution. And although they need not fear prosecution, those veterans who have less than honorable discharges bear a stigma which makes it difficult for them to find work.

Further banishment and punishment of these men makes little sense. Their continued suffering will in no way compensate those who died or returned crippled from Vietnam for their service. The war is over and it is time to put it and the lingering bitterness it fostered behind us, to reunite thousands of young men with their families and restored their full citizenship.

Mr. RANGEL. Mr. Speaker, on January 4, 1977, our colleague Representative ED KOCH introduced a concurrent resolution calling for President-elect Carter to extend his proposed amnesty to Vietnam-era selective service offenders and Vietnam veterans who received general and undesirable discharges or who deserted or were absent without leave during that era. I would like to associate myself with my colleagues' efforts in this regard. It is essential that President-elect Carter expand his proposal if in fact the bitterness and divisiveness that currently exists is finally eradicated.

There were many young men who joined the service because they were unable to make use of a college deferment and were not employed in jobs which would have enabled them to obtain job-related deferments. These men were also not in a position to pay for legal advice which would have been helpful in their attempt to deal with the Selective Service System. As has been observed by the President-elect and others, most of these young men are either black or poor.

The problem with these class of individuals is that they joined the military and were dissatisfied. Thus most of these men were given less-than-honorable discharges for offenses ranging from military violations and civilian felonies to acts of political dissent and protest. If President-elect Carter is seeking to completely remove the last vestiges of the war in South Vietnam, then these individuals must be covered in any pardon proposal which he devises.

I urge that the President-elect take this action so that the young men who are currently on the run seeking to avoid prosecution, can finally end this constant uncertainty. Whether or not we agree with the action taken by those men who joined and refused to participate, or those who just refused to register is at this point irrelevant. What is crucial is that most Americans realize today that our action in Vietnam was politically and morally wrong. Thus in order to foster a spirit of forgiveness, President-elect Carter must take action. In taking this action, President-elect Carter must be governed by the concept of equality; for if we can forgive those who refused to register, then most certainly can and should remove the dishonor imposed upon those who went and found the battle too difficult to handle. I look forward to the new President's action.

Mr. SOLARZ. Mr. Speaker, for most Americans the war in Vietnam ended over 2 years ago with the precipitous withdrawal of American troops from the U.S. Embassy in Saigon. For those Americans who remain in exile or are denied job opportunities because of their criminal or military records acquired during the Vietnam era, however, the war continues.

I believe it is time the Congress addressed itself to the problems of those Americans who acted on the antiwar beliefs which the great many of their fellow countrymen ultimately came to share. That is why I support the granting of a general and unconditional amnesty for persons who violated the law in the course of protesting against the war in Vietnam. Specifically, I hope that the President will grant a complete amnesty to all those who violated any Federal, State or local law in the course of an essentially nonviolent antiwar protest. In addition, I believe that such a general amnesty should also wipe out the less than honorable discharges given to hundreds of thousands of Vietnam war era

veterans for nonviolent infractions of the Military Code.

A general and complete amnesty is, in my judgment, the best and most just way to heal the wounds of the war in Vietnam. There has been no war in our history which has so divided our Nation. During our involvement in Vietnam, many of this country's leaders urged our withdrawal from the country and denounced our participation in the war as immoral. It is, therefore, simply wrong to continue to punish those who, because of their age and sex, had to make moral choices which others more fortunate did not have to confront.

And, for similar reasons, it would be equally wrong to continue to penalize those who had the courage of their convictions and engaged in civil disobedience to end a war which most Americans came to realize was unwise, unjust and immoral.

Amnesty is not an alien concept in the United States. Since 1795 there have been 38 amnesties or general pardons with the most magnanimous one coming after our own Civil War. It would be morally duplicitous for the United States to have granted amnesty to those who fought to preserve slavery, but not to grant the same rights to those whose conscience would not allow them to kill in a war designed to protect a corrupt dictatorial clique.

In granting a complete amnesty, I do not believe we should investigate the motives of the individuals involved. Since there are tens of thousands of persons who deserted or refused to serve and there are hundreds of thousands of soldiers who received less than honorable discharges, there is no way we can accurately determine what motivated these people years ago. And even if we could make such a determination, I doubt that the effort would serve any valid purpose.

In closing the final chapter of the war in Vietnam, we would be wise to be guided by the words of Abraham Lincoln who in his second inaugural told a war-torn nation to bind its wounds by acting "with malice towards none and charity towards all." In that spirit, we should provide a general and unconditional amnesty for those who during the Vietnam era resisted military service or who violated civilian or military laws in the course of nonviolently demonstrating against participation in the war.

Mr. WEISS. Mr. Speaker, I wish to add my voice in support of the amnesty resolution introduced by Mr. KOCH and cosponsored by myself and 31 other Members of the House. I have the highest regard for those young Americans who served in the war, but I also believe that those young Americans who chose not to participate in the tragic war in Indochina and followed their consciences followed the highest moral traditions of our country.

Since the war ended, many Americans have come to realize that those young Americans were trying to warn us that involvement in that war was a great tragedy. In my judgment they were correct.

There is, however, no need to dwell on who was right and who was wrong. It is enough that as a nation we close this awful chapter in American history.

I believe that a broad amnesty is the best solution for achieving this end. At the start of his administration, President Carter will be performing a great healing act for the country by granting amnesty to those who refused to fight in the war in Vietnam.

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members may have permission to revise and extend their remarks, and to include extraneous matter, on the subject of the special order today by the gentleman from New York (Mr. KOCH).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

HUMAN RIGHTS IN UKRAINE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. FENWICK) is recognized for 5 minutes.

Mrs. FENWICK. Mr. Speaker, I think it is important to bring to the attention of the American people the activities of a brave group in the Ukraine, U.S.S.R., which is sincerely dedicated to the furtherance of human rights. The Ukrainian Public Group To Promote Implementation of the Helsinki Accord was formed on November 9, 1976. It consists of 10 charter members, including Mykola Rudenko, the group leader, and Pyotr Grigorenko who is also a member of the Moscow group formed for the same purpose.

The stated objectives of the group, as proclaimed in its declaration are:

1. To acquaint the Ukrainian public with the Declaration of Human Rights and to strive to have this international legal document become the basis of relations between the individual and the nation.

2. To promote actively the implementation of the Final Act of the Conference on Security and Cooperation in Europe, being convinced that peace among nations cannot be guaranteed without free contacts between peoples and the free exchange of information and ideas.

3. To strive to have the Ukraine, a sovereign European nation and member of the U.N., represented by its own delegation at all international conferences dealing with the implementation of the Helsinki Accord.

4. In order to promote the free flow of information and ideas, to strive for the accreditation in Ukraine of foreign press correspondents, for the formation of an independent news agency, and the like.

Feeling that it is important to inform the signatory nations and the general public about the violations of the Universal Declaration of Human Rights included in the Helsinki Accord, the group has these functions:

a. Accepts written complaints about human rights violations and does everything within its power to bring this to the attention of the governments that signed the Helsinki Accord as well as to the attention of the world community;

b. Compiles this information on the state of legality in Ukraine and, in full accordance with Article 19 of the Universal Declaration of Human Rights, disseminates this information without regard for national boundaries;

c. Studies instances of human rights violations with respect to Ukrainians living in other republics, in order to bring this information to light.

The group is guided by legal and humanitarian considerations only. They accept the Universal Declaration of Human Rights and the Helsinki Accord and are convinced that full understanding and implementation of these documents will bring a real relaxation of international tensions. To this end, this group is dedicated. They are represented in the United States by the Helsinki Guarantees for Ukraine Committee, Washington, D.C.

HIGHER EDUCATION TRUST FUND ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 30 minutes.

Mr. FISH. Mr. Speaker, along with everything else, the cost of higher education has risen each year, to where it is difficult for most parents to absorb it in one lump. If there should be more than one child in an institution of higher learning at the same time, the burden on family finances is almost unbearable. Often, this has led to children being denied the opportunity for higher education—be it college, a vocational school, or other—simply because the family cannot afford it. What is needed is an incentive plan for family savings—one specifically for the purpose of financing higher education.

Therefore, I have introduced the Higher Education Trust Fund Act that would allow parents to establish a tax-free higher education trust fund to cover expenses incurred as a result of their children attending institutions of higher learning.

In recent years, there has been an increase in the type and enrollment of specialty and vocational schools; for example, in the computer training and paralegal fields. This proposal is unique in that it would encourage the growth of these schools by allowing a tax-free trust to be applied to their tuition costs. Not everyone wants or needs a university-based education, and they should not be penalized, because they chose to pursue higher education elsewhere.

Under this bill, parents would be permitted to set aside up to $750 a year in a tax-free trust fund for each child—or the lesser of 15 percent of their gross income, not to exceed $7,500 a year. If, for any reason, the money was not used for such educational purposes, it would then become taxable when withdrawn from the trust.

There are two primary benefits to be gained from passage of this bill. First,

more of our Nation's youth will be given the opportunity to pursue a higher education, leading to the career of their choice. They will not be frustrated in their attempts by a lack of funding, and some of the pressure on tax-supported scholarships will decrease. Also, this bill will encourage parents to sensibly plan and build for their children's education over a number of years, keeping pace with increasing costs of education.

I urge my colleagues to join me in working for passage of the Higher Education Trust Fund Act so that more young people can be afforded the opportunities they deserve.

MORE ON THE BILL OF RIGHTS PROCEDURES ACT, H.R. 215

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, today I am reintroducing the Bill of Rights Procedures Act of 1977, H.R. 215, with the first 22 cosponsors for the 95th Congress. Most of these Members were cosponsors, along with me, of the Bill of Rights Procedures Act in the 94th Congress.

As you know, this legislation was first introduced in 1974 by Senator CHARLES McC. MATHIAS and then-Congressman Charles A. Mosher. In the 94th Congress it gained the support of a broad-based group of 75 cosponsors and many endorsing institutions. The legislation was marked up by the House Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice. Senator MATHIAS and I made some modifications in the bill and reintroduced it on January 4 of this year.

At this point in the RECORD, I would like to insert three items. The first is a list of those groups and institutions that endorsed Congressman Mosher's bill in the 94th Congress. The second is a brief overview of H.R. 215, the Bill of Rights Procedures Act as it was reintroduced in this Congress by Senator MATHIAS and me. The third is a brief summary of the modifications that we made prior to reintroduction.

The material follows:

EXHIBIT 1

ENDORSEMENTS

The following is a list of the major organizations and institutions that formally endorsed the Bill of Rights Procedures Act during the 94th Congress. This is not a complete list, but only a survey of highlights.

BUSINESS ORGANIZATIONS

American Bankers Association; American Express Company; Bank of America; California Bankers Association; Maryland Bankers Association; National Association of Mutual Savings Banks; National Retail Merchants Association; U.S. League of Savings Associations.

LABOR UNIONS

AFL–CIO; Brotherhood of Railway and Airline Clerks; Communications Workers of America; Retail Clerks International Association.

MISCELLANEOUS

Congress Watch/Public Citizen; Consumer Federation of America; House Republican Task Force on Privacy; National Newspaper Association; Reporters Committee on Freedom of the Press.

NEWSPAPER EDITORIALS

Akron Beacon-Journal; Buffalo Evening News; Christian Science Monitor; Cleveland Plain Dealer; New York Times; St. Louis Post Dispatch; Washington Evening Star; Washington Post.

EXHIBIT 2

A SUMMARY OF THE BILL OF RIGHTS PROCEDURES ACT, H.R. 215

CHIEF SPONSORS

Congressman Charles W. Whalen, Jr. (R-Ohio) and Senator Charles McC. Mathias (R-Md.)

HISTORY

First introduced in 1974 by Senator Mathias and Congressman Charles A. Mosher (R-Ohio), the bill underwent extensive hearings and markup in the 94th Congress. It was approved 5–0 by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, but proceeded no further in 1975. The bill had a bipartisan group of 75 cosponsors.

PURPOSE

H.R. 215 is intended to close several gaps in Federal privacy protection laws; it addresses several problem areas where American citizens reasonably expect protection of their privacy, but where Federal statutes currently are silent.

This legislation would not prohibit any law enforcement activity now considered to be legal and proper. Rather, it establishes by statute guidelines and procedures to be followed when there would be legitimate need for the invasion of a citizen's privacy in certain areas. Civil and criminal liabilities are established for those who willfully intrude upon those rights to privacy.

HIGHLIGHTS

Third Party Records—Financial institutions, telephone companies and credit card issuers keep detailed records of the personal transactions of millions of individuals. Presently, access to these records is unlimited by Federal law. H.R. 215 provides that Federal agents may gain access to these records only by one of the following means:

(a) Obtaining the written, express consent of the subject individual.

(b) Serving a subpoena or summons on the holder institution, with a copy to the customer. Opportunity and standing for a customer challenge is given.

(c) Obtaining from the courts a search warrant.

Mail Covers—Currently no statute governs the use of mail covers, the procedure in which a systematic record is made of information that appears on the outside covers of first class mail. H.R. 215 establishes strict standards of conduct and accountability, incorporating as much as possible features of existing internal guidelines of the Postal Service.

Service Monitoring—Clarifying a portion of existing Federal wiretap law, this bill establishes strict limits on telephone company "service monitoring" interceptions of customer-to-customer conversations. The bill also sets procedural safeguards for the monitoring of telephone conversations of company employees. H.R. 215 would make illegal the possession of so-called blue boxes and black boxes, devices used to defraud the phone company of long distance toll charges.

Non-Aural Communications—H.R. 215 extends the protection of the Federal wiretap laws to non-aural communications. This will prohibit the interception of telegraph and telex messages, computer data transmissions, etc. except by court order.

EXHIBIT 3

CHANGES MADE IN THE PROPOSED BILL OF RIGHTS PROCEDURES ACT

The Bill of Rights Procedures Act of 1977, introduced by Congressman Charles W. Whalen and Senator Charles McC. Mathias, respectively H.R. 215 and S. 14 in the 95th Congress, is a direct descendant of H.R. 214 in the previous Congress.

This legislation was first introduced by Sen. Mathias and then-Congressman Charles A. Mosher in 1974. It was marked up in 1976 by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice.

Using the marked-up version of the Mathias-Mosher bill as a base, Mr. Whalen and Mr. Mathias have made several improvements in the proposed legislation. Some of the modifications were first advocated by Reps. Robert Kastenmeier and Ned Pattison at the time that the legislation was scheduled for full Committee markup.

The following are notes on the difference between the Mathias-Whalen bill (H.R. 215 and S. 14 in the 95th Congress) and the Subcommittee markup of the Mathias-Mosher bill (H.R. 214 in the 94th Congress).

TITLE I—CONFIDENTIALITY OF . . . RECORDS

SEC. 2(a)(5)—New paragraph, intended to help avoid conflicts between the proposed new law and existing privacy protection provisions of the Fair Credit Reporting Act by assuring consistency between the two.

SEC. 3(a)—Technical amendment, to correct a minor drafting defect.

SEC. 5—Change made in first paragraph, provides that access to records covered by this title shall be obtained only if the inquiry is pursuant to other statutes. Previous language merely required the inquiry to be "as authorized" by law; a very ambiguous phrase.

New closing paragraph added, waiving the requirements of the administrative subpoena section specifically for the sole purpose of the Internal Revenue Service determining the present assets of a person who is subject to tax collection proceedings.

SEC. 5(3)—This section revised: a) to assure that the record-holding institution will have standing to challenge an administrative subpoena; and b) to clarify the mechanics of resolving a courtroom contest over an administrative subpoena.

SEC. 5(2)—Second paragraph revised to reflect changes noted above in Sec. 5(3) and also for purposes of clarification.

SEC. 7(1)—Revised to clarify in which cases judicial subpoenas of records are appropriate; Subsection (A) is intended to limit the use of grand juries for "fishing expeditions" and Subsection (B) provides that information subpoenaed must be relevant to the case in progress.

SEC. 12(a)(3)—Language modified to extend the scope of compensation for successful claimants for damages; assures reimbursement for all reasonable costs associated with the litigation.

SEC. 12(b)—Changes the standard for reimbursement in injunctive relief cases from "successful action" to the broader term, "substantially prevailed," thus better taking into account out-of-court settlements, etc. Definition of reimbursible expenses is changed, as above.

SEC. 13—New provision, gives reimbursement to third party recordholders for cost of complying with administrative or judicial subpoenas that would be required by this bill; this expands on precedent established in the Tax Reform Act of 1976.

TITLE II—MAIL COVERS

SEC. 1—Definition is modified, closing a loophole that might otherwise have per-

mitted unregulated use of mail covers initiated at the request of certain agencies that do not have "law enforcement authority," such as the CIA, NSA, DIA, etc.

SEC. 8(b)—Injunctive relief provisions modified to parallel changes made in Title I, see above.

TITLE IV—CRIMINAL PENALTIES

(a) Maximum fine for willful violation of third party records or mail cover titles is raised from $1,000 to $5,000; maximum prison sentence is reduced from twelve months to six.

(b)—New provision, makes it a crime for a federal agent to fail to report a known violation of the third party records or mail cover titles.

MISS HOPE OF PENNSYLVANIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, as you know, I have long been concerned about the inroads of cancer in the good citizens of the United States, and many times in the past I have advocated a strenuous effort to eradicate this threat to all of our families. Today the statistics are one person in every four, two families out of every three.

Back home in my own constituency, the American Cancer Society, along with all the units all over the United States, is working assiduously to raise sufficient funds to support the vital research programs, to offer necessary services to cancer patients, and to educate the population to be alert, aware, and vigilant of the first signs of the disease. Only in vigilance can there possibly be the hope of cure.

One of the brighter aspects of this unhappy area, is the presence in the State of Pennsylvania of a lovely young woman who represents the American Cancer Society as Miss Hope of Pennsylvania.

She is a product of the area university community, a graduate of College Misericordia in Dallas. And she hails from New Albany, a small town outside of Towanda. I would appreciate the opportunity of having read into the CONGRESSIONAL RECORD the material I hold here concerning Karen Lukowski, a beautiful and radiant young girl who epitomizes all the wholesome qualities of young American womanhood, a dedicated nurse with a vision of her own.

A beautiful young woman with an expressive face, large hazel eyes, and dark blond hair twisted behind her head is appearing throughout the State in the traditional white uniform, white cap, and white oxford shoes of the registered nurse, speaking at various State and county events, appearing on radio and television, and charming everyone she meets. What is different about this young lady is that she wears a red sash, symbolizing the hope of all society that the threat of cancer will some day be erased from our minds and hearts.

The young woman is Karen Lukowski, of New Albany, Pa., Miss Hope of Pennsylvania, representing the Pennsylvania Division of the American Cancer Society.

Her charm and grace have won her plaudits. Her sincerity and sweetness have won her friends. Her "realness" and honesty have won her love.

Karen was a senior nursing student at College Misericordia, Dallas, Pa., in January of 1975, when she sent in an application to the Luzerne County unit office in Wilkes-Barre, to compete as Miss Hope of Luzerne County. Two years earlier she had sent a simple, girlish letter asking for details on the Miss Hope program. It was that year that Karen's mother had died of cancer, a loss that Karen had felt very deeply. It was her mother who inspired her to be a nurse, and who has suggested to her while she was in the hospital that Karen try out for Miss Hope. But Karen was busy at school—busy learning and studying, working toward her degree in nursing.

When she finally made it to the competition in Hazleton, competing against 17 other girls, she won the title. The simplicity of her manner, her sweet sincerity, charmed the judges, and the undramatic, unpretentious unassuming speech she made on why it was important to her to fight cancer, won the audience.

All of them were lovely, pretty, intelligent young women—but what Karen said that touched them all was "I know what it means to lose someone you love. I lost my mother to cancer."

It was that same unadorned, unpretentious charm and beauty that won her the title of Miss Hope of Pennsylvania in Carlisle last April, putting her ahead of 40 other contestants from every county of the Commonwealth. Karen never thought she had a chance—but again, her quiet charm and sincerity put her in the forefront.

Karen is a bright young woman—intelligent, and with a shining future. Having graduated from College Misericordia, she is now working at St. Luke's Hospital in Bethlehem. She has appeared at countless events throughout the State of Pennsylvania, sent by the American Cancer Society Division Headquarters in Harrisburg, to convey the message that there is indeed hope in the battle against cancer. Every time she appears she is sought after by more and more organizations and groups who want to share the message: Get Rid of Cancer Now!

Cancer statistics keep rising. The hazards of modern life become greater. There is scarcely a family who has not suffered. And so beautiful young women like Karen Lukowski are carrying a very important message to all of us.

Karen is the daughter of Edward Lukowski of New Albany. She was graduated from Wyalusing Valley High School in 1972, and from College Misericordia in 1976. She was on the dean's list every semester, was named to "Who's Who Among College Students," carried a 3.85 cumulative average, was senior nursing representative, had poetry published in the college literary magazine. She was a judge for the Bradford County Junior Miss Pageant, was a church lector, and helped with Red Cross blood drives. During her tenure as Miss Hope of Luzerne County she spoke to thousands of high school and grammar school students about the hazards of smoking. She has appeared at hundreds of events throughout the State, such as the Penn National Race Against Cancer, Carbon County Fair, Bethlehem Kiwanis Club, Clarion County Fair, Miss Pennsylvania Pageant, Pittsburgh Pirates Ball Game, Bedford County Fair, Warren County Bicentennial Parade, Pocono 500, Penn State Laurel Festival at Wellsboro, the American Legion Girls' State Conference at Shippensburg State College, the Nanticoke Bicentennial Parade, the Tioga County Bicentennial Parade in Waverly; was principal speaker at the Youth Against Cancer forum at Penn State University. She has appeared on a variety of television stations, the Inside Clarion County Show in New Bethlehem, John Riley TV show in Altoona, the Six-O'Clock News with Tom Bigler and John Bendick, among others. She has represented the society at a variety of education meetings, such as a recent national volunteer meeting for education and crusade in Atlanta, Ga.

People throughout the State, and possibly the Nation, will have seen that familiar white uniform and red sash either in person or on television, and will have heard the gentle voice making the meaningful speeches, which incidentally, she writes herself. In addition to everything else, the young lady also has a sense of humor, and is able often to lighten the weight of the message.

But, Karen Lukowski is not there to be charming or to be beautiful. She is there to remind us all how important it is to ourselves and our families to be vigilant, to be watchful, to get those heath checkups, and heed those warning signals, and moreover, to be generous when asked for a contribution.

Cancer is a dangerous threat. It is important to do everything we can to stop it today. Tomorrow may be too late for someone.

DELINQUENT FOREIGN DEBTS CONTINUE TO INCREASE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, recent statistics issued by the Department of Treasury's Office of Debt indicate that the administration's professed efforts to collect delinquent international debts have not met with great success. As of December 31, 1975, the principal and interest due and unpaid 90 days or more on U.S. loans and credits to foreign governments and international organizations totaled $677,130,954, compared to delinquencies totaling $609,425,692, on June 30, 1975, an increase of 9 percent over the previous reporting period.

Of 178 nations and organizations that have been recipients of U.S. loans since World War II, 148 are delinquent 90 days or more in their repayment. Of these, 87 have fallen still further behind in repayment since the June 30, 1975, report.

I would remind my colleagues of the action taken in the 94th Congress to deal

with this situation. Both the fiscal year 1976 and 1977 foreign assistance appropriations bills enacted into law contain a provision which I sponsored that cuts off aid under those appropriations laws to those nations which are delinquent 1 year or more and which do not renegotiate, dispute, or otherwise make arrangements to clear their accounts.

While the Treasury Department is to be congratulated on the vast improvements it has made in the bookkeeping of delinquent international debts, the State Department has simply not exercised the zeal in securing repayment which I believe every American taxpayer expects.

I am optimistic that the new administration that will take the reins of Government in several days will focus greater attention on this problem.

I would like to share with my colleagues a country-by-country listing of delinquent international debts for the last three available 6-month reporting periods and would note that this excludes the indebtedness of foreign governments arising from World I:

PRINCIPAL AND INTEREST DUE AND UNPAID 90 DAYS OR MORE ON U.S. LOANS AND CREDITS TO FOREIGN COUNTRIES AND INTERNATIONAL ORGANIZATIONS, AS OF DEC. 31, 1974, JUNE 30, 1975 AND DEC. 31, 1975

LEGISLATION TO STRENGTHEN DISCLOSURE REQUIREMENTS FOR LOBBYISTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 10 minutes.

Mr. RODINO. Mr. Speaker, this week I introduced H.R. 1180, a bill to strengthen the disclosure requirements for lobbyists. This measure was introduced in the 94th Congress by the gentleman from Wisconsin (Mr. KASTENMEIER) and the gentleman from Illinois (Mr. RAILSBACK). The bill ultimately was reported by the Committee on the Judiciary and passed by the House. Unfortunately, procedural problems prevented its enactment by the full Congress.

I reintroduced the bill as passed by the House because I feel it is an important part of the effort to make Government more open and more responsible.

This bill in no way interferes with the cherished and essential right of citizens to petition their Government for redress. But it does insure that contacts by organizations which spend substantial sums of money in the process will be properly reported and made public. For it is vital that citizens know which groups and special interests are attempting to influence the policies and decisions of their Government.

The bill would require an organization to register with the General Accounting Office if 20 percent or more of an employee's time was spent influencing legislation or executive branch decisions, or if an outside person was paid more than $1,250 in any 3-month period for such purposes.

It would establish quarterly filings for organizations which must list lobbying expenses, the names of lobbyists, and the major issues involved.

It would create civil and criminal penalties for violations of the disclosure procedures and give the Comptroller General investigative and rulemaking authority.

Mr. Speaker, I know and share the interest of the Congress in strengthening the integrity and credibility of Government. I commend this bill to my colleagues as part of that effort.

COMMISSION ON SECURITY AND COOPERATION IN EUROPE TO HOLD HEARINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, I should like to announce that Secretary of Commerce Elliott L. Richardson, Deputy Secretary of State Charles Robinson, Assistant Secretary of the Treasury Gerald Parsky, AFL–CIO secretary-treasurer Lane Kirkland, and other experts on East-West trade will testify January 13, 14, and 17 at hearings conducted by the Commission on Security and Cooperation in Europe on Basket Two of the Helsinki accords.

Basket Two, the second section of the document signed by 33 European nations, the United States, and Canada, outlined a framework for expanding economic and commercial cooperation, including a reduction of obstacles to trade, freer flow of economic information, improved working conditions for foreign businessmen, and encouragement of joint projects.

The Commission's first hearings—to be followed by others on the human rights, emigration, information, and cultural exchange provisions of the 1975 agreement—will focus on the current status and prospects of U.S. commercial and economic ties with the Soviet Union and Eastern Europe; implementation of Basket Two thus far; efforts to promote better implementation; and the role of economic cooperation in furthering East-West human contacts.

Hearings will take place at room 6202, Dirksen, at 2 p.m. on Thursday, January 13, at 10 a.m. and 2 p.m. in Rayburn 2172 on Friday, January 14, and at 10:30 a.m. in Dirksen 6202 on Monday, January 17.

THE GREATER HARTFORD EMERGENCY FOOD BANK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER) is recognized for 5 minutes.

Mr. COTTER. Mr. Speaker, I would like my colleagues to join me in recognizing the Greater Hartford Emergency Food Bank, a project of the Community Renewal Team of Greater Hartford.

The food bank is designed to help persons in the greatest need, those whose public assistance checks are lost or stolen, for example, or who are the victims of a natural disaster.

Charles Parker, program director at WDRC Radio in Hartford, is the food bank's founder. Brad Davis, an investigative reporter for WFSB–TV, has worked long and hard to make the project a success.

I would like to share with my colleagues an article from the Hartford Courant on this subject:

[Reprinted From the Hartford Courant, Apr. 4, 1976]

FIRST FOOD BANK STANDS READY TO AID POOR IN EMERGENCY

(By William Cockerham)

Two years ago, a wild scheme by the kidnapers of newspaper heiress Patricia Hearst to force her parents to provide free food to California's poor ended up in complete chaos, with scores of people clawing each other like rats over a couple of jars of peanut butter.

That scene might never have occurred had the Hearst family approached the problem as it was in Hartford about a year later.

It all began one morning last March when Charles Parker, program director at WRDC–Radio, picked up The Courant and read about the plight of many Hartford welfare recipients who faced going hungry over a long weekend because their checks had not arrived on time.

"I couldn't believe these people had nowhere to go for help. It seemed to me that there should be some place where people could get help to feed their families during an emergency," Parker said.

There was no place, Parker found, and he decided to do something about it.

Parker contacted the Community Renewal Team (CRT) and convinced them to administer what was to become the first Emergency Food Bank of its kind in the nation and he then set out to get the necessary stockpiles of nonperishable groceries.

Within weeks, radio listeners began to hear of the WDRC Foodathon, an appeal for persons to search their consciences and cupboards for such items as tuna fish and powdered milk.

Parker's idea began to catch on, but he soon realized that he couldn't sustain it by

himself. He needed someone the public could identify with to help with the food-athon.

That person, it turned out, was Brad Davis, a former Marine drill instructor who worked his way through the ranks at then WTIC-Channel 3 pushing Connecticut fresh milk as a local Dick Clark type disc jockey and later as an investigative reporter on that station's "What's Happening" program.

"I took tuna fish. That was my pitch," Davis said with a smirk. "I got enough tuna fish to last for two years."

Davis got on the air at a portable WDRC microphone at the West Farms Mall in West Hartford and asked secretaries going to work at the Insurance companies to stop off on their way with a can of tuna fish.

"And bring $5, and I'll show you my Marine tattoo," Davis said over the air.

Women came by the scores, some carrying whole cases of tuna fish, Davis said. And some brought a $5 bill to see Davis unbutton his shirt and show his eagle, globe and anchor Marine tattoo on his right arm.

"Seventy-five secretaries were lined up, each with a can of tuna fish and each with a $5 bill," Davis said.

But while Davis was outside collecting tuna fish and money, Otis, a WDRC disc jockey, was inside the trailer telling other radio listeners that the ex-Marine would do almost anything to fill up the cupboards of the food bank.

Otis told the radio listeners that Davis would let them pull out a hair on his chest for $1. "Buck a pluck," the disc jockey was billing it.

"I couldn't believe it," Davis said, "But I couldn't get out of it. He was already on the air asking someone driving a Corvette to stop by with a check book. But I thought then that nobody would show."

Davis was wrong. Dead wrong. Within a half hour a guy pulled up outside the trailer in a Corvette and jumped out, checkbook in hand, wanting to take Otis up on his offer.

A young woman was selected to pluck out the hairs and the guy in the flashy car said he would pay $1 for each one.

Davis had only one choice, he said. Let her pluck them out one at a time, or all at once. He opted for the latter.

"Grab a handful and pull them out, I told her," Davis said.

There was one wince from Davis when the woman yanked at a tuft of hair and when they were all counted the guy in the Corvette wrote out a check for $160.

Davis can relate many tales like this. He got excited about the idea of an emergency food bank and put every spare hour he could cram into his busy schedule into raising money and collecting food items for the program.

Today, the food bank, located at CRT headquarters, contains 35,000 food items and a bank account of $9,000 to replenish supplies when they run out.

Paul Puzzo of CRT, who is in charge of the food bank, said some 8,000 people have received emergency food supplies since the program started.

Puzzo said the food bank carefully screens people to make sure that no one gets groceries except on an emergency basis, and everyone who is helped is expected to reimburse them when they get back on their feet.

He said most persons who have used the food bank are welfare recipients whose checks arrived late or were lost in the mails, although some are those who have been burned out of their homes or have met other misfortunes.

A five-day supply of food is all one family can receive at any given time.

The food bank is careful that each food package is nutritionally balanced.

The items include soups, baby food, canned vegetables, meats and fish, rice, powdered milk and beans. Puzzo said the bank also has such items as kansas snails, given by people who have cleaned out things in their cupboards they would never use themselves.

"We're always short on protein items, but we have so many cans of soup we'll never be able to use them up," Puzzo said.

Puzzo said the money collected for the food bank is used then to replenish the protein items.

He said the food bank "really filled a void in the Hartford community."

"People really had to scrounge and sometimes go hungry. If the bank was ever discontinued, I don't know where people would go," Puzzo said.

But it has not been just Hartford residents who have benefited from the emergency food bank, the bank for food.

The first selectman of East Granby, Frank Rothammer, has sent four or five of his residents to the bank for food.

Rothammer said the people he sent to the bank were those whose unemployment checks had arrived late or "for other unforeseen circumstances" had no food in their homes to feed their families.

One Hartford woman who recently used the bank said she didn't know what she would have done without it.

"It took just a couple of hours," she said. "The people there even took care of my kids while they drove to the welfare office to verify that my check was late. They were really helpful to me."

The woman said she called the welfare office for help but was told they couldn't do anything.

Of the half-dozen families contacted by The Courant who used the food bank, all said they had tried other agencies for help and were told there was nothing they could do.

All said they received food within several hours after applying for a voucher.

Parker and Davis have held two foodathons in the past year to keep the stockpiles of groceries replenished at the bank, but both know that the novelty will wear out soon.

"We can't expect the foodathons to continue to be so successful," Parker said. "We're going to need more help from the community to keep the bank going."

Davis said he will give all money he earns from speaking engagements this year to the food bank.

This past year, Davis addressed at least a dozen organizations and got each to donate either money or food to the bank.

In his preacher-like manner, Davis has talked Hartford company executives into helping out the food bank. One executive of Heublein, for example, gave Davis 20 cases of enchilada sauce to go with the rice at the bank. The Lions Club came up with 60 turkeys at Thanksgiving time and one general contractor dropped off 50 cases of dried milk at the bank.

Davis even talked one reputed Massachusetts mobster out of a $50 bill after preaching to him for a half-hour about the plight of poor people on fixed incomes.

In the next month, Davis is flying out to Detroit to help several radio station newsmen there to set up an emergency food bank.

"Every city in the country should have a food bank like Hartford's." Davis said.

FOOD BANK FACTS

Food is distributed by The Community Renewal Team, Hartford's largest anti-poverty agency, responsible for over $6.5 million of federal, state and local funds for programs to help the poor. CRT has been helping the poor for 14 years, seeking to erase poverty through programs in education, health, job training and job placement. It also works to solve problems that poverty brings.

Last year we collected over 100,000 items of food with the help of many individuals and provided food for over 7,000 families.

To date, CRT has distributed more than 80,000 items of food to the needy: meat, fish, fruits, vegetables, baby foods, dry and canned milk, etc.

The Food Bank is operated by the Food Bank Commission.

The Commission meets regularly to determine standards of food eligibility, establish distribution policy and initiate food bank drives.

Persons subsisting on incomes at or below Federal poverty guidelines are eligible for food under emergency situations. Hartford residents can apply for food through any one of eight CRT Neighborhood Centers; suburban residents can contact their town's Social Services Department and, in all locations, within three to five hours receive their food packages.

A dietician supervises the make-up of food bundles to insure nutritious meals including sources of minerals, vitamins and proteins.

A minimum supply of food for one person for one day is equivalent to two cans of food. Eight cans of food take care of the minimum day's needs for a family of four.

The Food Bank has been helped by the contributions and assistance of many agencies and businesses.

It is helped by you. By your generosity in helping to ward off hunger in Hartford.

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

Mr. WIRTH. Mr. Speaker, when the House voted last September to establish the Select Committee on Assassinations, I was among the 280 Members who supported the measure. At that time I felt there were many questions about the assassinations of President Kennedy and Dr. King that needed to be examined. I still feel that way. But now—unfortunately—it seems that the committee we created last fall is embarked on a course that is raising serious questions about its own operations.

The committee's inquiry is likely to be the final investigation of the slayings of John F. Kennedy and Martin Luther King. For that reason alone, it must be conducted carefully and thoroughly and properly in every respect. Otherwise, Americans will question the select committee's conclusions ten years from now, much as they question the Warren Commission's and FBI's findings today.

My colleague from California, Mr. EDWARDS, has already questioned some of the procedures that the committee has announced. I would like to associate myself with the concerns he has expressed. Procedures which protect individual rights are essential.

We must also make sure that the select committee investigation is kept free of anything that smacks of politics or publicity-seeking. Just about anything said about the Kennedy and King assassinations these days is news. Every precaution must be taken to insure that the investigation is not exploited for anyone's ulterior purposes.

Having made these observations, I must say that I have grave concerns about the way the select committee investigation has begun. In its first 3 months, there have been repeated leaks to the press. One such report had committee investigators going to Cuba to

interview Premier Fidel Castro. The story was later denied. My concerns were further aroused by the presentation made to the Democratic caucus last month by Staff Director and Chief Counsel Richard Sprague.

When the House voted to establish the Select Committee on Assassinations last September, we did more than create another House committee. By voting to establish the select committee we put the credibility and reputation of the House on the line.

Normally, I believe, the selection of a committee staff should be left to the chairman and members of that committee. But this is not a normal situation. This is an investigation of the assassinations of the President of the United States and one of the Nation's foremost civil rights leaders. Thus, the selection of the committee's chief staff person is a matter of legitimate concern to this body.

The person heading the investigation must have impeccable credentials. And he must also be objective in his approach to the subject matter of the investigation. He should not be an advocate or start out with any preconceptions. This is an investigation, an inquiry—not a prosecution.

Accordingly, I believe we have a right to know more about Mr. Sprague. How was he hired? Who recommended him? Who else was interviewed for the job? How did the committee make its final selection among candidates? To what extent was Mr. Sprague's background checked before he was hired?

Quite honestly, my own concerns about Mr. Sprague's background have been heightened by recent reports in the press, most notably the New York Times, which raise serious questions. The specifics are startling:

The Pennsylvania attorney general criticized Mr. Sprague's handling of a homicide case, known as the Applegate case, involving the son of one of Sprague's good friends;

In another case involving the husband of Sprague's girlfriend, the Pennsylvania Supreme Court said the proceedings lacked due process and the husband's later arrest was a "gross injustice";

An independent consultant operating under a Federal grant criticized Mr. Sprague's performance as Philadelphia's first assistant district attorney as distinctly deficient;

Mr. Sprague took 3 years to investigate what the Pennsylvania Crime Commission said was widespread political corruption in Pennsylvania's Delaware County—yet brought no criminal charges and Sprague issued no report, until chided by the commission;

Allegations of the "selective prosecution" by Mr. Sprague of a Philadelphia newspaper reporter for secretly recording his own phone conversations, while Sprague took no action against similar practices of the city's own police and fire departments;

The connection, if any, between Mr. Sprague's $2 million libel suit against the reporter and his newspaper, and publication of a series of articles on Mr. Sprague's handling of the Applegate case;

Questions by a newly elected Pennsylvania county comptroller that Mr. Sprague's spending habits in the Yablonski murder case were less than careful.

I think it is also appropriate to ask what arrangements Mr. Sprague made with his law firm when he took this job. And, I think it would be reasonable to ask Mr. Sprague to make a full financial disclosure to the select committee, if not to the House.

There are significant questions here that must be answered before the select committee is permanently funded. On the other hand, it would be unnecessarily disruptive to bring the committee's work to a complete halt at this time. Therefore, I would urge my colleagues to join with me in approving temporary funding on the condition that the select committee provide the House with answers to these questions by the 31st of March. If, at that time, answers and information have not been forthcoming which allay my concerns, I will oppose continuation of the select committee investigation.

NATIONAL COMMISSION ON NEIGHBORHOODS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHLEY) is recognized for 10 minutes.

Mr. ASHLEY. Mr. Speaker, I am today reintroducing my bill to establish a National Commission on Neighborhoods. This bill is similar to the bill I introduced in July of last year, H.R. 14756, which was reported by the Committee on Banking, Currency and Housing on September 17, 1976. The bill passed the Senate but, because of the lateness of the session, was unable to be considered by the full House. H.R. 14756 was strongly endorsed by Secretary of HUD Carla Hills and the Ford administration and received bipartisan support during its consideration by the Committee on Banking, Currency and Housing.

It is my hope that in reintroducing this bill that the Congress will act quickly to pass this legislation so that we can get on with the job of establishing important new urban policy directions for the new Carter administration. For too many years the Federal Government's housing and urban development policy has had the effect of favoring new construction and the new expansion of urban areas at the expense of preserving what our urban communities already have. From the careful review that the Subcommittee on Housing and Community Development has been undertaking over the past 2 years on our housing programs and policies, it has become quite clear to us that the preservation of our established urban neighborhoods has been a stepchild of Federal policy. There has never been an explicit recognition that the existing housing in established neighborhoods is the Nation's principal housing resource. As a number of witnesses testified before our subcommittee last year, existing housing is not only our main housing resource, it is the largest single component of this country's national wealth.

This bill would establish a National Commission on Neighborhoods to be composed of 20 members to be appointed by the President and the Congress no later than June 1, 1977. This Commission would have 2 years to make recommendations on existing policy, laws, and programs that impact upon neighborhoods and to recommend modifications in our Federal housing and community development policies. I would expect the Commission's attention would be directed towards the development of new mechanisms to promote reinvestment in existing city neighborhoods, more effective means of community participation in local government, and policies to encourage the survival of economically and socially diverse neighborhoods to prevent blockbusting, redlining, resegregation, and speculation in reviving neighborhoods. It would seek ways to promote urban home ownership policies to encourage better maintenance and management of existing rental housing and the maintenance and rehabilitation of existing structures. It would promote modifications of local zoning and tax policies, as well as the reorientation of existing housing and community development programs to better support neighborhood preservation.

Mr. Speaker, it is my intention to move quickly on this bill shortly after our committe is organized and to send it to President Carter for his approval as soon as possible, since I believe this is a vital element in the development of our urban policy in the new administration.

PART-TIME CAREER OPPORTUNITY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. BURKE) is recognized for 5 minutes.

Mrs. BURKE of California. Mr. Speaker, today I am reintroducing legislation which will significantly increase the employment opportunities in the departments and agencies of the Federal Government for those persons who are unable to work the standard 40-hour work week—such as women with young children, students, the handicapped, and retired persons.

The Part-Time Career Opportunity Act will encourage agencies of the Federal Government to make available part-time positions, not just at the lower levels where they are now concentrated, but in responsible positions up and down the career ladder and across the spectrum of Federal agencies.

At the heart of this legislation is the requirement that, except where an agency can show that converting positions to part time would either impair its efficiency or adversely affect current full-time employees, part-time positions in each agency be increased to 10 percent within 5 years. This would be accomplished by providing a 5-year phase-in period during which 2 percent of Federal jobs would be restructured each year by attrition until a maximum of 10 percent is reached.

The Senate passed part-time legislation in the 94th Congress, which was almost identical to the bill I am introducing today. The House Post Office and Civil Service Committee held hearings on my bill and others related to part-time

and flexible hours employment during the 94th Congress. While the committee did not report out a part-time bill, I am encouraged by the support and interest that many individuals and organizations expressed for the Part-Time Career Opportunity Act. I am hopeful that the committee will consider this legislation favorably so that it may pass the House early in the 95th Congress.

I am also encouraged by the remarks made by President-elect Carter before the National Women's Agenda Conference on October 2, 1976 when he stated:

Flexible hours and part-time work are important to the parents of school age children who need additional income but just can't be gone from home eight or nine hours a day. They are also crucial to help retired people and some disabled people who are not physically able to work full time.

Therefore, I will encourage—actively and aggressively—the adoption in the federal government and in the private business sector, of flexible working hours for men and women, and I will take action to increase the availability of part-time jobs, with proper provision for fringe benefits and for job security.

Mr. Speaker, at this point I am inserting into the RECORD part of my testimony presented before the House Post Office and Civil Service Committee, which discusses in greater detail the provisions and benefits of the Part-Time Career Opportunity Act:

TESTIMONY OF THE HONORABLE YVONNE BRATHWAITE BURKE

(Hearings before the Subcommittee on Manpower and Civil Service of the Committee on Post Office and Civil Service on H.R. 3925, the Part-Time Career Opportunity Act, September 29, 1975)

Mr. Chairman, I appreciate this opportunity to present a statement in support of HR 3925, the Part-Time Career Opportunity Act, which I introduced along with 54 cosponsors. I believe this legislation, by increasing part-time federal job opportunities, will have a significant, positive impact on the federal government and on the several hundred thousand people in this country who are unable to work standard hours.

Since these hearings are focusing on both part-time and flexible hours, I think we need to make clear the distinction between the two concepts, which I consider to be complementary. Flexible hours generally means breaking the basic working hour pattern while still working the traditional 40 hour week.

Under the classic definition, part-time employment is taken to mean "work, on a regular and voluntary basis, for a daily or weekly period of substantially shorter duration than current normal hours of work." HR 3925 specifically defines part-time as at least 16 hours but not more than 30 hours a week. This could mean five hours per day, hours that vary with each workday, job-sharing, or other similar arrangements.

This legislation would open up the federal government to men and women who desire to work on a part-time basis. It would make available part-time jobs at all but the supergrade (GS 16–18) levels, including many professional and technical positions. Part-time jobs would not be concentrated in just the lower grades as they are to a great extent at the present time. Expansion of part-time employment opportunities would be accomplished by providing a five-year phase-in period during which 2% of federal jobs would be restructured each year until a maximum of 10% is reached. An agency may receive a reduction in or waiver of the percentage target if the Civil Service Commission finds that compliance would substantially disrupt the agency's ability to perform its functions.

Part-time employees would receive the same fringe benefits as full-time workers, pro-rated to their hours of work. No full-time positions can be abolished for the purpose of creating part-time positions, nor may the employment rights or benefits of any full-time employee be impaired.

Part-time workers comprise an increasingly important proportion of the nation's workforce, supplying trained personnel needs. In a 16-year period (1950–66) the full-time U.S. labor force increased by 20 percent, and the part-time workforce by 69 percent. In 1967, the Bureau of Labor Statistics (BLS) estimated that by 1980 one worker out of every seven would be part-time.

But the rate of increase in part-time workers has been so great that the ratio of 1 to 7 was reached by the end of 1972, eight years ahead of the estimate. Between 1967 and 1974 the part-time labor force further increased by 34 percent. By the end of last year, more than 13.2 million American workers—14.5% of the U.S. civilian labor force—were voluntary part-timers, 5.7 million more than BLS found in 1963 when it began keeping these statistics. Women made up 64 percent of those persons employed part-time in 1974.

The need for this legislation is demonstrable on a number of grounds. First, it would increase the opportunity for the Federal government to employ the skills, resources, talent and brainpower of many segments of the population, which are presently denied that opportunity because of the current rigid system of employment practices.

Furthermore, the federal government has lagged behind the private sector in providing part-time opportunities, particularly in medium and high-level responsible positions. While part-timers comprised 14.5 percent of the U.S. civilian labor force in 1974, the Civil Service Commission submitted figures in 1973 to the Senate Post Office and Civil Service Committee showing that only 1.3 percent of federal workers, or 24.911 individuals, are permanent part-time employees. The federal government clearly has not responded to the demands for part-time jobs. Moreover, it has been even less responsive in utilizing the talents and skills of professionally trained women on a permanent part-time basis. As of November 1973, only 2,983 women were employed part-time at grades 5 through 18.

If we had a meaningful system of part-time employment, more women—especially women with children—as well as students, the handicapped, and the elderly would have a chance to work for the federal government. At the same time, the government would benefit considerably from utilizing these part-time employees. That part-time workers are "management bargains" has been the theme of most evaluations which the increase of part-time workers has generated. Employers benefit from the ability to choose from a larger pool of talent and from gaining access to a source from which they can fill shortages in fields requiring specialized skills. Other advantages to hiring part-time workers, according to the evaluations, include their low turnover rates, their high productivity, their greater maturity, and their stronger motivation.

Skilled professional part-time workers are usually women. Those men who presently hold part-time jobs are generally students or older men. Many more women want to work part-time but cannot find jobs. For example, in 1971, the unemployment rate for women with young children was almost 12 percent, close to three times the rate for other married women. Part-time employment is a solution for the woman who wishes to, or must, out of economic necessity, combine raising a family with pursuing a career.

While women would gain substantially from enactment of this legislation, there are at least four other segments of the working force population that could benefit as well. Among these are men who wish to assume a greater role in childrearing and family life. The handicapped, who may not be able to handle the strains of a long day or who cannot compete with the crush of people during rush hour traffic, could choose to participate in this program. Students could more easily work for the federal government and federal employees could more easily pursue advanced degrees or specialized training. Experienced, expensively-trained employees may prefer to stay on the job part-time rather than retiring early.

There have already been some experiments with part-time workers within the federal government—mostly women in the AEC, Department of Labor, HUD, Peace Corps, National Science Foundation and the Veterans Administration. Two bulletins issued by the Civil Service Commission in 1973 discuss part-time employment in a positive manner. However, federal regulations relating to part-time employment are still vague and subject to various interpretations. There are inherent impediments within the federal government's employment policies which have retarded the development of part-time positions and kept the government from moving ahead in this critical area.

The problem seems to lie in the budget process and employment ceiling controls which have created an artificial dichotomy between full-time and part-time employment—a dichotomy which need not persist if the facts are understood.

These controls have emphasized full-time employment and given little attention to part-time opportunities. The effect has been to focus management attention on full-time with no incentive to establish and maintain an optimum employment mix.

H.R. 3925 would eliminate the ambiguity and lack of incentive in regulatory policy by counting part-time employees on a pro-rata basis according to the percentage of hours each employee worked in a 40-hour week, rather than as the equivalent of a full-time permanent employee. In other words, an agency would count manhours rather than bodies or slots.

It should be made clear that those who work on a part-time basis should not be relegated to second-class status for that reason. We must attempt to ensure equality of benefits, opportunities, and employment conditions for part-time workers.

* * * * *

Mr. Chairman, with the adoption of this legislation, we can increase productivity and efficiency in government, serve as a model for private industry and other public employers, and lead the way in opening up the workforce at all levels to groups that are presently excluded.

PROPOSED DESIGNATION OF VA HOSPITAL IN TAMPA AS THE JAMES A. HALEY VA HOSPITAL

(Mr. IRELAND asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. IRELAND. Mr. Speaker, on behalf of the entire Florida congressional delegation in the House, I am introducing a bill today to name the Veterans' Administration hospital located in Tampa, Fla., the "James A. Haley Veterans Hospital."

From 1953 when Jim Haley was first elected to the Congress until he retired

on January 3d, he championed the rights of veterans. In 1955, Congressman Haley was assigned to the House Committee on Veterans' Affairs. As a result of his service on this committee, veterans throughout the Nation now have access to greatly improved medical programs and significantly improved facilities.

As a veteran, Mr. Haley sympathetically understood the problems of the Nation's veterans and their dependents. As a Floridian, he felt that Florida's rapidly growing veterans population should be represented on the committee responsible for upholding the Nation's commitment to her veterans for their military service.

He served on the Hospitals Subcommittee for 18 years and he was chairman of the subcommittee the last 8 years. This subcommittee has oversight over the 177 VA hospitals and the entire VA medical program throughout the United States.

In 1973, Mr. Haley became chairman of the House Committee on Interior and Insular Affairs and his responsibilities greatly increased. In his characteristic unselfish way, he relinquished his seat on the Veterans' Affairs Committee so that another Member with fewer responsibilities could devote more time to the needs and problems of the veterans and their dependents.

During his service on the Hospitals Subcommittee, Mr. Haley helped bring about the construction of three new Florida Veterans' Administration hospitals—the Gainesville VA Hospital, the Miami VA Hospital, and the Tampa VA Hospital which I feel should be renamed in his honor. Mr. Haley was also instrumental in the modernization of the VA facilities at Lake City and Bay Pines.

It should be noted that none of the above facilities were located in Congressman Haley's own congressional district. Instead, he felt they should be located near a medical school where they would be of most service to the veterans and where they could benefit from these established medical centers.

Mr. Haley also helped to increase the number of Florida VA hospital beds from 1,353 to 3,501 as so many veterans had moved to Florida and needed VA medical care closer to their new homes. Meanwhile, he helped build needed VA hospitals in other areas and was instrumental in preventing the closing of VA hospitals and regional offices which he felt were essential.

Mr. Haley is also known for his work outside of the Congress in behalf of the Nation's veterans. Prior to his election to the Congress in 1953, he served 4 years in the Florida House of Representatives where he was recognized as an outstanding member. He served as a member of the Committee on Military and Veterans' Affairs, and during his tenure, the State of Florida's Division of Veterans' Affairs was established.

For many years in his hometown of Sarasota, Mr. Haley was Sarasota County's unpaid director of civil defense, and he won recognition from President Roosevelt, the War Department, and the national organization for his work as chairman of the Sarasota Red Cross chapter.

Over the years, Mr. Haley has received commendations from The American Legion, the Disabled American Veterans, the Veterans of Foreign Wars of the United States, and the Veterans of World War I, U.S.A.

On September 29 of last year, the House of Representatives passed this legislation with amendment by unanimous consent. The bill, however, did not clear the other body before the 94th Congress adjourned for the year.

I feel privileged to be introducing in the 95th Congress this legislation to honor my distinguished predecessor, Congressman Jim Haley, who is now retired. I am hopeful that the House Veterans' Affairs Committee will again expedite a favorable report on this proposal and that during this session of the Congress, the Veterans Administration Hospital in Tampa can be redesignated the "James A. Haley Veterans Hospital." It will be a fitting tribute to a distinguished American who selflessly served the Nation's veterans for so many years.

BILL OF RIGHTS PROCEDURES ACT

(Mr. STEERS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. STEERS. Mr. Speaker, I am pleased to be a cosponsor of the Bill of Rights Procedures Act with my respected colleague from Ohio (Mr. WHALEN). The purpose of this bill is to provide protection for our citizens against unwarranted intrusions on their privacy. This bill is being introduced by Senator CHARLES MCC. MATHIAS in the other chamber.

Senator MATHIAS has long been a champion of the individuals' rights to privacy. I am sure that he takes as much pride as I do in knowing that Maryland is the only State that currently has a statute that protects its citizens against State government intrusions. In addition, the Maryland Bankers Association which recognizes the need to protect citizens from the Federal Government as well as the State government has endorsed the bill.

As recently as this past Sunday evening on the CBS show "60 Minutes," we have learned of the ease with which the Federal Government can accumulate information against innocent citizens. We constantly hear of domestic surveillance by Government agencies when there is no record of, or attempt to show, any criminal behavior by a citizen. This country's unique heritage stems from its Bill of Rights, and this legislation enacts procedures to assure maintenance of those rights.

The object of this legislation is to protect citizens where they have a reasonable expectation of privacy. Specifically, Federal officials would be denied access to private records maintained by financial organizations, credit card companies, or telephone companies without permission, subpena or summons, or a search warrant. The bill also provides protection from "mail covers"—keeping records of what appears on the outside of an individual's first class mail. The bill also clarifies or extends the Federal wiretap law protections in nonaural communications and service monitoring. This bill does not prevent law enforcement officers from doing their job; rather it institutes guidelines that establish areas where responsible investigatory activity can continue while not compromising an individual's right to privacy.

CONGRESSIONAL TRAVEL ABUSE

(Mr. STEERS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. STEERS. Mr. Speaker, congressional travel has been a source of scrutiny by the press and the public for a number of years and came into question again this year. Washington news services reported that congressional spending for foreign travel on official business was greater in 1975 than any year previously. State Department documents showed public funds had been used to finance congressional sightseeing trips, banquets in expensive restaurants, and even for rental of Rolls Royces.

This is not to dispute the fact that many foreign trips by Members are legitimate congressional business. It is clear, however, that in the past certain Members have at least misused the concept of "official" business while others have flagrantly abused it.

For instance, Scripps-Howard news service—in an excellent piece of investigative reporting—found that two retiring Members went on extensive overseas junkets, several of these trips occurred, after adjournment this past session.

One of these Members, the chairman of a prominent House Committee authorized himself an 18-day five-member "study mission" to Southeast Asia.

The other Congressman joined a congressional delegation on a tour of Europe and the Middle East. The group was composed of members of the Select Committee of Narcotics Abuse and Control, although the Member in question was not a member of that committee.

In the 94th Congress, well over 100 Members of the House joined in sponsoring legislation to curb foreign travel by retiring and/or defeated Members of the House. One of those who oppose lame-duck travel last session, was my predecessor Mr. Gude, who introduced a measure to prohibit Members defeated in the general election from traveling abroad at public expense. I am reintroducing the text of this bill with added provisions to bar foreign travel at public expense after adjournment by retiring Members or by Members defeated in a primary election.

As I stated to the House last week when I made a complete disclosure of my liabilities, assets, and net worth, the public's respect for the Congress has plummeted to the point where Members are thought by many to use elected office to line their pockets.

While this image is an age-old curse on the politician—sometimes deserved, sometimes not—we are in part responsible for the public's perception of it.

For instance, a 65-year-old widow who by law is prohibited from earning over $3,000 annually while receiving social security benefits, would find it difficult to see the fairness in allowing defeated Members to spend thousands of taxpayer dollars to travel overseas after Congress has adjourned.

Some Members have objected to abolishing foreign travel for lameducks because defeated Members, they say, should be privileged to travel abroad in order to assuage the "hurt" of defeat.

I cannot subscribe to this "deserved privilege" theory and am certain that the public would be outraged by it.

The House should not be an exclusive club. We must work to assure that it does not function as one.

NEA AND THE ELECTION

(Mr. ASHBROOK asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASHBROOK. Mr. Speaker, on September 22, 1976, in a speech entitled "National Education Association: Politics First, Education Last", I warned my colleagues that the liberal-oriented National Education Association was gearing up for a massive political effort in the 1976 elections. The goal was to elect NEA's friends and purge those who disagree with the legislative objectives of the organization.

The accuracy of my speech has been confirmed. In 1976 the NEA mounted a political effort unprecedented in its history.

The NEA backed 323 candidates for the House of Representatives. Eighty-four percent of these candidates—272 Representatives—were elected to office.

The NEA also supported 26 senatorial candidates. Nineteen of these were elected.

In addition, for the first time the NEA actively supported a Presidential candidate. This was in accord with former NEA President Helen Wise's statement:

> It is our intent to translate our successes in the Congressional elections of 1974 into a mandate to elect a friend of education to the White House in 1976.

Not surprisingly the choice was the Carter-Mondale ticket.

According to the December issue of the NEA Reporter, Carter Campaign Director Hamilton Jordan declared that:

> The massive support from teachers was critical to our winning this very close election. All over the nation, we turned to the NEA for assistance. We asked for their help, and they delivered.

It is instructive to take a close look at who the NEA—supposedly a nonpartisan organization—supported. The December issue of the NEA Reporter contains a listing of the candidates endorsed by NEA-PAC, including those who received financial contributions.

On the Presidential level, the NEA, as previously mentioned, backed the Democratic candidate. On the Senate level, 21 of the 26 candidates listed as receiving NEA support were Democrats. On the House level, the NEA came out for 291 Democrats, 1 independent, and only 31 Republicans.

This means that the NEA backed Democrats over Republicans by more than a 9 to 1 margin in congressional contests. In California 31 out of 31 NEA-supported House candidates were Democrats. Nine out of nine in both Indiana and Florida were Democrats.

When it comes to finances, the picture is equally distorted. Democratic House and Senate candidates ran far ahead of Republican candidates in receiving NEA dollars. Democratic senatorial candidates were the beneficiaries of $70,800 while Republicans got $11,900. Democratic House candidates received $424,737 while Republican candidates were given $28,200.

These statistics raise some important questions. Is the NEA really a nonpartisan organization? Does the NEA really reflect the views of its members? I believe that the answer to both these questions is a resounding "No."

GRAND JURY REFORM

(Mr. EILBERG asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. EILBERG. Mr. Speaker, during the 2d session of the 94th Congress, the Subcommittee on Immigration Citizenship and International Law of the Judiciary Committee held hearings on numerous proposals to reform the grand jury system. The subcommittee will continue its hearings during the 95th Congress and expects to report out legislation by the end of the first session.

For the purpose of discussion, and as a basis for considering testimony before our subcommittee, I am introducing today four proposed constitutional amendments and one grand jury reform statute.

The first proposed amendment would totally eliminate the indicting grand jury. This is the exact same amendment as House Joint Resolution 46. Procedures for the reform of the investigative grand jury, under this amendment, could be enacted by Congress.

The second proposed amendment would simply eliminate the constitutional requirement of an indictment in any case, and thereby allow Congress to enact appropriate legislation to require an indictment for certain types of offense or to allow a prosecutor to use the indictment in certain types of situations; or to authorize, and to provide procedures for investigative grand juries.

The third proposed amendment would eliminate the constitutional requirement of an indictment, but specifically states that Congress has the authority to enact appropriate legislation to require an indictment for certain classes of offenses or to enact appropriate legislation to authorize the attorney for the Government to seek indictments or use an information at his election; and that Congress would have the power to continue to authorize investigating grand juries.

The fourth proposed amendment would eliminate the constitutional requirement of the grand jury but specifically allows the Congress to enact legislation to require an indictment in certain cases, and to authorize investigating grand juries.

The proposed Grand Jury Reform Act of 1977 has 11 sections which can be analyzed as follows:

ANALYSIS

Section 1—Title—The Act is to be called the Grand Jury Reform Act of 1977.

Section 2—Recalcitrance—provides for procedures for an individual held in contempt for refusal to answer questions before a grand jury. A witness would have at least 72 hours to prepare for a contempt hearing, unless the attorney for the Government can demonstrate a need to dispense with such a period.

Confinement for contempt would be for a period of the life of the grand jury, until the witness testified, or a maximum of six months. Confinement is to be at a suitable federal correctional institution, if located within 50 miles of the court. Upon a special showing of hardship, the court could allow imprisonment at a suitable correctional institution near the place of residence or employment of the witness or his family.

This section would specifically preclude reiterative contempt—that is, holding someone in contempt for refusal to answer; imprisoning that person; and then subpoenaing the person again and holding him in contempt again. It would preclude such repeated contempt and imprisonment whether the first or the second proceeding was for civil or criminal contempt.

Bail emphasis is changed so as to provide that bail is to be allowed unless it affirmatively appears that the appeal is frivolous or taken for delay; and that the appellate courts have to act within 30 days.

This section also specifically allows for counsel to be appointed, if necessary, to represent the witness at a contempt hearing. Illegal wiretap usage is made a defense to contempt.

Section 3—Immunity—makes changes in the witness immunity law. Section 3 mandates a return to transactional immunity, and discontinues the use of "use immunity."

A witness is to receive at least one week's notice of the intent to grant him immunity, unless the court, upon a showing of special need, reduces the period of time.

The witness is to be specifically given reasonable and adequate notice of the nature and scope of the immunity; and his right to be represented by counsel at a hearing on the immunity.

The attorney for the government is to request immunity and the court can grant immunity, in its discretion, only when *the court* finds that the information is necessary to the public interest and the individual has refused or is likely to refuse to testify. Thus, unlike the present situation, where immunity is solely a prosecutor's decision, the court is to weigh benefits to law enforcement against the dangers to a witness, in determining whether the public interest is served by a grant of immunity.

The court is also to make certain findings in regards to a request of immunity, before the request can be granted. These findings include: that the grand jury investigation is authorized by law and that the application is in accordance with Justice Department procedures; that the testimony and information sought is within the scope of the investigation and is relevent; and that a summary of the evidence relating to the witness, and relating the need for immunity has been submitted to the court.

The court can consider as a possible defense to an immunity request, or a prosecution for contempt, a real threat of foreign prosecution if the witness testified. If the U.S. Attorney or the attorney for the government can demonstrate that adequate safeguards are made to minimize danger of foreign prosecution, immunity can nevertheless be ordered.

In order to protect the witness, and insure transactional immunity, the grand jury which considers the immunized witness' testimony cannot indict him under any circumstances.

This section also eliminates the 20-day waiting period for Congressional immunity and provides for an effective date of 60 days after enactment of the act.

Section 4—Size of Grand Juries—This section changes requirements as to the size of the grand juries, as requested by the Judicial Conference of the United States. A grand jury, under this section, can be constituted by membership of between nine and fifteen persons and only nine persons are necessary to conduct business. Six of the nine are necessary for an indictment.

Section 5—Secrecy—This section deals with unauthorized disclosure of grand jury information. Violations of grand jury secrecy are made an offense, divided in two parts. First, for knowing disclosure of evidence or a statement made, there is a fine of $500 or six months in jail. The crime is not applicable to a disclosure by the attorney for the Government in performance of his duties; disclosure directed and permitted by the court, disclosure by a witness or his counsel, or disclosure by a third party, not present at the grand jury proceeding.

Knowing disclosure of grand jury activities, in order to obtain money, to effect the actions or decisions of the jury, or to effect further legal proceedings is made a more serious offense punishable by a fine of $20,000 or imprisonment up to five years. This section does not apply to disclosures by the attorney for the Government in performance of his duties; disclosure directed and permitted by the court; or disclosure by a witness or his counsel. However, because this is the more serious offense, where it is demonstrated that there was a direct effect on the legal machinery, this provision *does* apply to third parties. The section makes it specific, however, that this more serious felony of obtaining or granting grand jury information for the payment of compensation does not apply to a newspaper or television representative, acting in his professional capacity.

Section 6—Independent Grand Jury—details the rights and duties of grand jurors and allows an independent inquiry.

a. Rights and Duties—Grand jurors are to be given adequate and reasonable notice of their various duties to inquire into the criminal law, to call and interrogate witnesses, to request a production of documents and are to be told of the subject matter of the investigation, criminal statutes known, the necessity of sufficient evidence to form an indictment, the obligation of secrecy, and other rights and duties as the court suggests.

An individual is given the right to make a written request to the attorney for the Government to appear before the grand jury and request to testify or present documents. The grand jury does not have to hear a witness, but the attorney of the Government is to forward the request, with a possible recommendation, to the jury, and the jury itself votes on whether or not to allow the person to testify. The attorney for the Government is to notify, unless special circumstances are shown, a potential defendant of the likelihood of indictment and tell him of his right to make a request to the jury to testify. Any person testifying would have to waive immunity and testify only as to relevant and competent matters, and would be subject to cross-examination by the attorney for the Government.

The attorney for the Government is required to advise the grand jury of the existence of exculpatory evidence against any potential defendant. The attorney for the Government is not permitted to bring before the grand jury any witness who has given written notice in advance of his intention to invoke the Fifth Amendment if he is called to testify, unless that person has been granted immunity.

b. Independent Inquiry—The grand jury is given the power to conduct an independent inquiry into violations of the criminal law. The grand jury is to generally utilize the attorney for the government in such an investigation; but when it finds a conflict of interest, or dilatory or improper activities, by the attorney for the Government, it can request the court to appoint a special attorney. Requests for a special inquiry, for a special attorney, and for the payment and compensation of special attorney and his staff, require the approval of the court. The grand jury can appeal to the circuit court if the district court disapproves any of their requests. The special attorney for the grand jury is given all the authority of a prosecutor.

Section 7—Rights of Witnesses—This section deals with the rights of grand jury witnesses.

a. Counsel—The witnesses are specifically granted the right to have counsel with them in the grand jury room; free if necessary. The role of counsel is only to advise and he is not permitted to address the grand jurors or otherwise take part. The court is given the power to remove an attorney for improprieties and to appoint a new attorney.

b. Subpoenas—Specific procedures are provided for subpoenas. Generally, unless a special showing is made, a witness is to have seven days' notice, through subpoena, of his requirement to testify or produce evidence. The subpoena is to include information advising a witness of his rights, including counsel, his privilege against self-incrimination; the subject matter of the investigation; whether he is a potential defendant; the substance of criminal statute or statutes; and other rights or privileges.

Challenges to a subpoena can be held either in the district which issues the subpoena, or in the district in which the person resides or is served, at any time up until the day of the appearance. A motion relating to a subpoena on the day of appearance can only be made in the district which issued the subpoena. The court is given the power to stay an appearance, if a motion is made prior to the day of appearance, until it has ruled on any motion to quash.

Upon proper motion, the attorney for the Government has to make a showing that the subpoena is not to obtain evidence for a case already scheduled for trial; that the witness has been told of his rights; that the evidence sought is relevant to the grand jury investigation and is properly within the grand jury's jurisdiction; that compliance with the subpoena would not be unreasonable or oppressive. The court can change the venue of the proceeding, quash the subpoena, or take other appropriate action.

The court *is to quash* a subpoena if it finds that this is an attempt at reiterative contempt, despite the preclusion; that the witness has indicated in writing that he is going to exercise his privilege against self-incrimination and no immunity order has been obtained; or the grand jury is inquiring into a similar transaction as it earlier inquired into, and there is no additional newly discovered evidence relevant to such inquiry.

This section also provides that grand jury venue is limited to where there is substantial conduct in a district and the district court is given the power to quash a subpoena or transfer any grand jury proceedings or investigation into another district where the grand jury's appearance in a particular district would cause unnecessary hardship. Standards are elaborate as to what might constitute hardship.

Section 8—Recording and Disclosure—This section details procedures for recording of grand jury proceedings and for the availability of grand jury transcripts.

a. Transcribing—All grand jury proceedings, except for secret deliberations and consultations between witnesses and counsels, are required to be transcribed, either stenographically or electronically.

b. Disclosure/Discovery—Any person summoned to testify or provide information is to receive a copy of any prior statement in the possession of the government which he has made, before he is required to testify.

In addition, a witness is ordinarily entitled to a copy of his own testimony, after he testifies.

The court would have the power, under appropriate circumstances, to limit or condition such release.

This section also makes appropriate changes in the Jencks Act, and adds a new provision, providing that within a reasonable time prior to trial and after the return of the indictment or the filing of an information, a defendant should be entitled to get the grand jury testimony of all witnesses that are going to testify against him; all statements to the grand jury by the court and the attorney for the Government relating to the defendant's case, any other grand jury evidence relating to the defendant's case; and all other material which the court finds material to the defense. The court is given the power, upon a showing of good cause, to limit such disclosure, and the government's showing of good cause can be made, if necessary, in camera.

Section 9—Requirement of Preliminary Hearing—Appropriate amendments require a preliminary examination, or a preliminary hearing, for every case, whether or not there is an indictment. The attorney for the Government has the option to provide the preliminary examination before or after an indictment. Thus, the defendant would not be able to challenge evidence in front of the grand jury; cross-examine witnesses in front of the grand jury; nor interfere with the deliberative function of the grand jury. However, he would have the opportunity, as in most states, to determine the nature of the evidence against him, whether it involves hearsay, whether it involves constitutional problems, and its strength, through a preliminary examination prior to his trial.

Section 10—Reports—would provide for periodic grand jury reports to be made to Congress as to the number of grand jury investigations; the number of immunity requests, the number of imprisonments for contempt; the number of no-bills; description of data banks and other information as necessary.

Section 11—Savings Clause—provides that enumeration of any rights or guarantees in this act should not take away rights or privileges guaranteed by other laws. Moreover, as changes are made, for example, in the number of grand jurors, the right to counsel and the requirement of a preliminary examination, this statute would overrule contrary provisions in the Federal Rules of Criminal Procedure.

H. RES. —

Joint resolution proposing an amendment to the Constitution of the United States with respect to grand juries

Resolved by the Senate and House of America in Congress assembled, (two-thirds of each House concurring therein), That the

following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution.

"ARTICLE —

"SECTION 1. No grand jury may present or indict or otherwise hold any person to answer for any crime against the United States. No presentment or indictment of a grand jury shall be required in order to hold any person to answer for any crime against the United States but no person may be so held except pursuant to an information signed by the attorney for the Government and stating the essential facts of the crime charged.

"SEC. 2. This article shall not affect the power of Congress to enact appropriate legislation to provide for the impaneling of, and procedures with respect to, any grand jury whose sole function shall be to investigate any crime against the United States."

H.J. RES. —

Joint resolution proposing an amendment to the Constitution of the United States with respect to grand juries

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution.

"ARTICLE —

"SECTION 1. No person shall be held to answer for a capital or otherwise infamous crime against the United States, unless upon an information or indictment of a grand jury, as Congress by appropriate legislation, may prescribe, but no person may be held pursuant to an information unless such information is signed by the attorney for the Government and states the essential facts of the crime charged.

"SEC. 2. This article shall not affect the power of Congress to enact appropriate legislation to provide for the impaneling of, and procedures with respect to, any grand jury whose function shall be to investigate any crime against the United States."

H.J. RES. —

Joint resolution proposing an amendment to the Constitution of the United States with respect to grand juries

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution.

"ARTICLE —

"SECTION 1. No presentment or indictment of a grand jury shall be required in order to hold any person to answer for any crime against the United States but no person may be so held except pursuant to an information signed by the attorney for the Government and stating the essential facts of the crime charged.

"SEC. 2. This article shall not affect the power of Congress to enact appropriate legislation to require a presentment or indictment of a grand jury to hold a person to answer for enumerated offenses, including classes of offenses, against the United States, or to enact appropriate legislation to authorize the attorney for the Government to seek indictments, or use of information, at his election.

"SEC. 3. This article shall not affect the power of Congress to enact appropriate legislation to provide for the impaneling of, and procedures with respect to, any grand jury whose function shall be to investigate any crime against the United States."

H.R. —

A bill to establish certain rules with respect to the appearance of witnesses before grand juries in order to better protect the rights and liberties of such witnesses, to require notice to a grand jury of its rights and duties, to provide for independent inquiries by grand juries, to require periodic reports to Congress, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Grand Jury Reform Act of 1977".

RECALCITRANT WITNESSES

SEC. 2(a). Section 1826 of title 28, United States Code, is amended to read as follows:

§1826 Recalcitrant Witnesses

"(a)(1) Whenever a witness in any proceeding before or ancillary to any court or grand jury of the United States refuses without just cause shown to comply with an order of the court to testify or provide other information, including any book, paper, document, record, recording, or other material, the attorney for the Government may apply to the court for an order directing the witness to show cause why the witness should not be held in contempt.

"(2) After submission of such application, and a hearing, at which the witness is entitled to be represented by counsel, the court may, upon a finding that such refusal was without just cause, hold the witness in contempt and order the witness to be confined.

"(3) No hearing under this subsection shall be held unless seventy-two hours' notice is given to the witness who has refused to comply with the court order, except that a winess may be given a shorter notice if the court, upon a showing of special need, so orders.

"(b)(1) Any confinement shall be at a suitable federal correctional institution, if one is located within fifty miles of the court ordering confinement, unless the witness waives this right. Upon a showing of need or hardship, the court ordering confinement may grant a request by the witness to be imprisoned at a suitable correctional institution near the place of residence or employment of the witness, or the witness' family or relatives or the attorney of the witness.

"(2) Any confinement for refusal to comply with an order to testify or produce other information shall continue until such time as the witness is willing to give such testimony or provide such information. No period of such confinement shall exceed the life of the court proceeding, or the term of the grand jury, including extensions, before which such refusal to comply with the court order occurred, and in no event shall such confinement exceed six months.

"(3) No person confined under this section for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events, may be again confined under this section, or under Section 401 of title 18, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events.

"(c) Any person confined pursuant to this section shall be admitted to bail or released in accordance with the provisions of Chapter 207 of title 18, United States Code, pending the determination of an appeal taken by him from the order of his confinement unless it affirmatively appears that the appeal is frivolous or taken for delay. Any appeal from an order of confinement under this section shall be disposed of as soon as practicable, pursuant to an expedited schedule, and in no event more than thirty days from the filing of such appeal.

"(d) In any proceeding conducted under this section, including all necessary appeals, counsel shall be appointed as provided in section 3006 A of Title 18, United States Code, for any person unable to obtain adequate representation."

(b) Section 2515 of title 18, United States Code is amended by adding at the end thereof the following new sentence:

"Any violation of this chapter shall be a defense in any action brought against a witness under Section 401 of title 18, United States Code, or Section 1826 of title 28, United States Code, if the interrogation or other request for information is based on or is directly or indirectly derived from such violation".

(c) Chapter 21 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 403. Grand Jury Proceedings.".

"No person who has been imprisoned or fined by a court of the United States under Section 401 of this title for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events in a proceeding before a grand jury (including a special grand jury summoned under Section 3331 of this title) impaneled before any district court of the United States may again be imprisoned or fined under Section 401 of this title or under Section 1826 of title 28, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events."

WITNESS IMMUNITY

SEC. 3(a) Sections 6002 and 6003, title 18, United States Code, are amended to read as follows:

"§ 6002. Immunity generally.".

"(a) Whenever a witness refuses, on the basis of his privilege against self-incrimination, to testify or provide other information in a proceeding before or ancillary to—

"(1) a court or grand jury of the United States,

"(2) an agency of the United States, or

"(3) either House of Congress, a joint committee of the two Houses, or a committee or a subcommittee of either House,

and the person presiding over the proceeding communicates to the witness an order issued under this part, the witness may not refuse to comply with the order on the basis of his privilege against self-incrimination; but the witness shall not be prosecuted or subject to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled under the order to testify or produce evidence, except that he shall not be exempt from prosecution and punishment for perjury committed in so testifying, for giving a false statement, or for otherwise failing to comply with the order."

"(b) No order under this part shall require any witness to testify or provide other information prior to the day one week after the day on which such order was communicated to the witness, except that a witness may be required to testify or produce such information prior to such day if the court, upon a showing of special need, so orders."

"(c) Upon communication to the witness of any order under this part, the person presiding over the inquiry shall give the witness reasonable and adequate notice of the nature and scope of the immunity from criminal prosecution provided by this section, and of the right of the witness to be represented by counsel in any proceeding challenging such order or confinement or fines pursuant to such order, and that, if he is unable to obtain adequate representation, counsel will be furnished for him as provided in Section 3006 A, title 18, United States Code."

"§ 6003. Court and grand jury proceedings

(a) In the case of any individual who has been or may be called to testify or provide other information at any proceeding before or ancillary to a court of the United States or a grand jury of the United States, the United States district court for the judicial district in which the proceeding is or may be held shall issue, in accordance with subsections (b) to (d) of this section, upon the request of the United States attorney for such district, an order requiring such individual to give testimony or provide other information which he refuses to give or provide on the basis of his privilege against self-incrimination, such order to become effective as provided in Section 6002 of this part.

"(b) In any proceeding under this section, the court shall not order any person to testify or provide information, if it finds that an individual is in danger of prosecution, or may be subjected to any penalty or forfeiture, by the government of any other country on account of any transaction, matter, or thing concerning which he may be ordered to testify or provide other information pursuant to an order under this part, unless the court also finds that such individual has been provided adequate safeguards to minimize such danger."

"(c) A United States district court may, at the request of the Attorney General, the Deputy Attorney General, any designated Assistant Attorney General, or a special attorney appointed under Section 3330, issue an order under subsection (a) of this section when it is established to the satisfaction of the court that—

"(1) in accordance with subsection (b) of this section, there is no danger of foreign prosecution or that adequate safeguards have been provided to minimize such danger;

"(2) the testimony or other information from such individual may be necessary to the public interest;

"(3) such individual has refused or is likely to refuse to testify or provide other information on the basis of his privilege against self-incrimination; and

"(4) with respect to an individual who has been or may be called to testify or provide other information at any proceeding before or ancillary to a grand jury,

"(A) the investigation being conducted by the grand jury is authorized by law and the application for the order is in accord with existing guidelines or other practice of the Department of Justice;

"(B) the testimony or other information sought to be obtained is within the scope of the investigation and is relevant thereto;

"(C) the testimony or other information sought to be obtained is relevant to the subject matter of the immunity order;

"(D) a grant of immunity under this part would be adequate for the purposes of the investigation; and

"(E) a summary of the evidence relating to the witness has been certified and submitted to the court.

"(d) Any individual required to give testimony or provide other information pursuant to an order issued under subsection (a) may not be indicted for any offense by the grand jury before which such individual testifies pursuant to such order."

(b) Subsection (c) of Section 6005 of such title is hereby repealed.

(c) No amendment or repeal of any provision of law made by this section shall affect any immunity, or the scope of any immunity, to which any individual is entitled under such provision by reason of any testimony or other information given before the sixtieth day following the date of the enactment of this Act.

SIZE OF GRAND JURIES

SEC. 4. Section 3321, title 18, United States Code, is amended to read as follows:

"§ 3321 Number of grand jurors; summoning additional jurors; return of indictment

"(a) Every grand jury impaneled before any district court shall consist of not less than nine nor more than fifteen persons. If less than nine of the persons summoned attend, they shall be placed on the grand jury, and the court shall order the marshal to summon, either immediately or for a day fixed, from the body of the district, and not from the bystanders, a sufficient number of persons to complete the grand jury. Whenever a challenge to a grand juror is allowed, and there are not in attendance other jurors sufficient to complete the grand jury, the court shall make a like order to the marshal to summon a sufficient number of persons for that purpose.

"(b) An indictment may be found only if at least nine jurors are present and two-thirds of those present concur.

UNAUTHORIZED DISCLOSURE OF GRAND JURY INFORMATION

SEC. 5. Chapter 73 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1512 Violations of grand jury secrecy

"(a) Whoever knowingly discloses any evidence introduced, statement made, or other matter occuring before any grand jury summoned or impaneled by a court of the United States shall be fined not more than $500 or imprisoned not more than six months or both."

"(b) Whoever knowingly discloses any evidence introduced, statement made, or other matter occurring before any grand jury summoned or impaneled by a court of the United States, with the intent to secure compensation therefor, to effect the actions of or any decisions by that jury, to effect further legal proceedings against any witness, or to effect further legal proceedings as to the subject matter of any investigation by that jury, shall be fined not more than $20,000 or imprisoned not more than five years, or both.

"(c) This section shall not apply to—

"(1) disclosure to or by an attorney for the Government in the performance of his duties;

"(2) disclosure directed or permitted by a court;

"(3) disclosure by a witness who has appeared before such grand jury, or by his attorney, of any matter concerning which the witness has testified, or produced other information, before the grand jury;

"(d) Subsection (a) shall not apply to disclosure by any person other than a person present at the grand jury proceeding.

"(e) Subsection (b) shall not apply to any representative of the press, broadcasting, or information media, acting in his professional capacity.

"(f) As used in this section—

"(1) 'attorney for the Government' includes the Attorney General, an authorized assistant of the Attorney General, a United States Attorney, an authorized assistant of a United States Attorney, and such other Government personnel as are necessary to assist the attorneys for the Government in the performance of their duties.

"(2) "disclosure by a witness" includes disclosure by others of matter the witness has previously disclosed when made as a consequence of such disclosure by the witness.

"(f) Nothing contained in this section shall be construed to affect the power of the court to punish any person for contempt for violation of any rule or order of the court.".

RIGHTS AND DUTIES OF GRAND JURORS; INDEPENDENT INQUIRY

SEC. 6. (a) Chapter 215 of title 18, United States Code, is amended by adding at the end thereof, the following new sections:

"§ 3329. Rights and duties of grand jury and and attorney for Government

"(a) Upon impanelment of each grand jury before a district court of the United States, the court shall give adequate and reasonable notice to the grand jury, and shall assure that the grand jury reasonably understands—

"(1) its duty to inquiry into offenses against the criminal laws of the United States alleged to have been committed within that district;

"(2) its rights, authority and powers with respect to an independent inquiry under Section 3330 of this title;

"(3) its right to call and interrogate witnesses;

"(4) its right to request the production of documents or other evidence;

"(5) the subject matter of the investigation;

"(6) the criminal statute or statutes involved, if these are known at the time the grand jury is impaneled;

"(7) the necessity of sufficient evidence to form the basis of any indictment;

"(8) the obligation of secrecy and that it is a criminal offense to disclose to any person any information concerning any grand jury proceeding; and

"(9) such other duties and rights as the court deems advisable.

"(b)(1) Any person, including a witness who has previously testified or produced books, records, or documents, may make a written request to the attorney for the Government, or a special attorney appointed pursuant to this title, and request to testify in an inquiry before a grand jury, or to produce books, records, or documents, or to appear before a grand jury and request that the grand jury proceed in accordance with its powers under Section 3330 of this title.

"(2) The attorney for the Government, or the special attorney:

"(A) shall forward any request under this subsection to the grand jury and may make a recommendation as to such request;

"(B) shall take reasonable steps to notify any person of his intention to present evidence against the person and request a presentment or indictment and of the person's right to testify or present evidence under this subsection and such notice shall be given a reasonable time in advance of any request for such presentment or indictment unless the attorney for the Government or the special attorney can prove to the satisfaction of the court that notice would result in the flight of the person, would endanger other witnesses, or would unduly delay the investigation and prosecution;

"(C) shall establish a public record of all requests and the action taken on each such request.

"(3) The grand jury shall not be required to hear any witness, or consider any book, record or document, but shall consider all requests forwarded to it by the attorney for the Government or the special attorney. Unless the grand jury, upon an affirmative vote of a majority of its members, refuses to hear the testimony, or consider the documents offered by, a person, under this subsection, the attorney for the government or the special attorney shall subpoena the evidence or witness offered. If the grand jury refuses to hear the testimony or consider the documents offered, the attorney for the government or the special attorney shall notify the person making such request, in writing, of the refusal.

"(4) Upon appearing pursuant to a subpoena, such person shall be permitted to testify, only upon submission of a waiver of immunity, as to relevant and competent matters under consideration by the jury and shall be subject to examination by the attorney for the Government or the special attorney.

"(c) The attorney for the Government and the special attorney shall periodically advise the grand jury of the nature and existence of evidence, as yet not received, which might tend to materially affect the credibility of any witness or tend to negate the guilt of any prospective defendant.

"(d) The attorney for the Government and the special attorney shall not bring before the grand jury any witness who has given written notice in advance of the witness' appearance that such witness intends to exercise his privilege against self-incrimination, nor bring to the attention of the jurors, in any way, the invocation of the privilege by such witness, unless such witness has been given a grant of immunity.

"(e) The attorney for the government or a special attorney shall not initiate, and a grand jury shall not conduct, an inquiry into a transaction or transactions, event or events, if another jury has failed to return an indictment based on the same transaction or transactions, event or events, unless the court finds, upon a proper showing, that additional evidence relevant to such inquiry has been discovered.

"§ 3330. Independent grand jury inquiry

"(a)(1) Any grand jury impaneled before any district court (including a special grand jury summoned under section 3331) may, after giving notice to the court, inquire upon its own initiative into offenses against the criminal laws of the United States alleged to have been committed within that district. Such grand jury shall, except as provided in this section, request the attorney for the Government to assist such grand jury in such inquiry.

"(2) The grand jury shall serve for a term of eighteen months after giving notice to the court under paragraph (1) unless an order for its discharge is entered earlier by the court. If, at the end of such term or any extension thereof, the district court determines the business of the grand jury has not been completed, the court may enter an order extending such term for an additional period of six months. No grand jury term so extended shall exceed thirty-six months from the date on which notice to the court was given under paragraph (1).

"(3) If a district court within any judicial circuit fails to extend the term of a grand jury engaged upon an independent inquiry under this section or enters an order for the discharge of such grand jury, the grand jury, upon an affirmative vote of a majority of its members, may apply to the chief judge of the circuit for an order for the continuance of the grand jury. Upon the making of such an application by the grand jury, the grand jury shall continue until the entry upon such application by the chief judge of the circuit of an appropriate order. No grand jury term so extended shall exceed thirty-six months.

"(b) In the event that the attorney for the Government is unable to impartially assist, refuses to assist, or hinders or impedes the grand jury in the conduct of any inquiry under subsection (a), the grand jury may, upon the affirmative vote of a majority of its members, request at any point in such inquiry that the court appoint a special attorney, in lieu of the attorney for the Government, to assist the jury in the conduct of any independent inquiry referred to in subsection (a).

"(2) The special attorney appointed under this section may, with the approval of the court, appoint and fix the compensation of such assistants, investigators, and other personnel as he deems necessary. The special attorney and his appointees shall be appointed without regard to the provisions of title 5 governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that the special attorney and any appointee shall be paid at a reasonable rate to be determined by the court. The special attorney shall be reimbursed for actual expenses incurred by him and his appointees in the performance of duties pursuant to this section.

"(3) Notwithstanding sections 516, 518, and 519 of title 28 or any other provision of law, a special attorney appointed under this section shall carry out the functions of an attorney for the Government and shall have the exclusive authority to—

"(A) assist in the conduct of independent grand jury investigations under this section,

"(B) prepare and sign any indictment returned by a grand jury pursuant to such inquiry in lieu of any attorney for the Government, and

"(C) conduct all other phases of any criminal prosecution arising out of such inquiry (including the argument of appeals in the United States Courts of Appeals and the United States Supreme Court).

"(4) A special attorney appointed under this section is authorized to obtain from any department or agency of the United States any files, records, documents, or other materials which he deems necessary or appropriate in the carrying out of his functions under this section."

(b) The Administrator of General Services shall furnish offices, equipment, supplies, and services to a special attorney appointed under section 3330 of title 18, United States Code, in the same manner as such items are furnished to agencies and departments of the United States.

(c) Section 524 of chapter 31 of title 28, United States Code (relating to appropriations for administrative expenses), is amended by adding at the end thereof the following new sentence: "Such appropriations shall also be available for payment of the compensation and other expenses of the special attorney appointed under section 3329 of title 18 to assist a grand jury in the conduct of an independent investigation."

RIGHTS OF GRAND JURY WITNESSES

SEC. 7. (a) Chapter 215 of title 18, United States Code, is further amended by adding at the end thereof, the following new sections:

"§ 3330A. Counsel.

"(a) Every witness subpoenaed to appear and testify before a grand jury impaneled before a district court or to produce books, papers, documents, or other objects before such grand jury shall be entitled to the assistance of counsel, including assistance during such time as the witness is questioned in the grand jury room.

"(b) Such counsel may be retained by the witness or shall be appointed as provided in Section 3006A of this title in the case of any person financially unable to obtain legal representation. Notwithstanding any rule contained in the Federal Rules of Criminal Procedure, such witness' counsel is authorized to disclose matters which occur before the grand jury while such counsel is in the grand jury room.

"(c) Such counsel shall be allowed to be present in the grand jury room only during the questioning of the witness and shall be allowed to advise the witness. Such counsel shall not be permitted to address the grand jurors or otherwise take part in proceedings before the grand jury.

"(d) The court shall have the power to remove such attorney, and order the witness to obtain new counsel, when it finds that the attorney has violated subsection (c) of this section or that such removal and replacement is necessary to insure that the activities of a grand jury are not unduly delayed or impeded. Nothing in this subsection shall affect the power of the court to punish for contempt or impose other appropriate sanctions.

"§ 3330B Subpoenas

"(a) In the case of any proceeding before a grand jury impaneled before a district court, except where the court finds special need upon a showing by the attorney for the government or a special attorney appointed under this title, or the consent of the witness, no subpoena may require any witness to testify or produce other information at such proceeding at any time before the expiration of the one-week period beginning on the date of service of the subpoena.

"(b) Upon the service of any subpoena requiring any witness to testify or produce other information at any proceeding before a grand jury impaneled before a district court, the witness shall be given adequate and reasonable notice of:

"(1) his right to counsel as provided in section 3330A of this title;

"(2) his privilege against self-incrimination;

"(3) the subject matter of the grand jury investigation;

"(4) whether his own conduct is under investigation by the grand jury;

"(5) the substantive criminal statute or statutes, violation of which is under consideration by the grand jury, if these are known at the time of issuance of the subpoena; and

"(6) any other rights and privileges which the court deems necessary or appropriate.

"(c)(1) The district court which issued a subpoena, or the district court for the district in which the person resides or is served shall have concurrent jurisdiction to hear, and take appropriate action with respect to any motion relating to, including any motion to quash, such subpoena.

"(2) A motion relating to a subpoena may be made at any time prior to, during, or when appropriate, subsequent to the appearance of any witness before a grand jury. Any motion made during or subsequent to the appearance of the witness before the grand jury may be made only in the district in which the grand jury is impaneled.

"(3) If a motion is made under this section before the day on which the person subpoenaed has been ordered to appear or books, records, or documents have been ordered to be produced, the appearance of such person, or the production of such documents, shall, upon appropriate application, be stayed until the court has ruled on such motion.

"(d)(1) Upon proper motion the attorney for the government, or a special attorney appointed under this title, shall make a showing that:

"(A) a primary purpose or effect of requiring such persons to so testify or to produce such objects to the grand jury is not or will not be to secure for trial testimony or to secure other information regarding the activities of any person who is already under indictment by the United States, a State, or any subdivision thereof for such activities; or of any person who is under formal accusation for such activities by any State or any subdivision thereof, where the accusation is by some form other than indictment;

"(B) the witness has been advised of his rights, as specified in subsection (b);

"(C) the evidence sought is relevant to the grand jury investigation properly conducted within the grand jury's jurisdiction;

"(D) compliance with the subpoena would not be unreasonable or oppressive, as such subpoena would not require unnecessary appearances by the witness, would not lead to testimony or other information that is cumulative, unnecessary or privileged, would not be primarily for punitive purposes or would not involve other like circumstances; and

"(E) such other information as the court deems advisable.

"(2) The court may impose appropriate sanctions, including the quashing of such subpoena to secure compliance with this subsection.

"(e) Upon proper motion, the court shall quash a subpoena and take other appropriate sanctions when it finds that:

"(1) the witness has already been confined, imprisoned, or fined under section 1826 of title 28, United States Code, or section 401 of this title for his refusal to testify before and grand jury investigating the same transaction, set of transactions, event, or events;

"(2) the witness has given written notice that such witness intends to exercise his privilege against self-incrimination, unless a grant of immunity has been obtained; or

"(3) the grand jury is inquiring into the same transaction or transactions, event or events, that was under consideration by another grand jury which failed to return an indictment based on such transaction or event and there is no additional, newly discovered evidence relevant to such inquiry.

"(f)(1) A grand jury impaneled to conduct an inquiry into offenses against the criminal laws of the United States may be convened only in a district, or districts, in which it is believed criminal conduct may have occurred which are elements of such offenses.

"(2) The district court may quash a subpoena or transfer any grand jury proceedings or investigation into any other district where it might properly have been convened if the court finds that a witness' appearance would impose a substantial and unnecessary hardship on such witness or his family because of the location of the proceeding. In considering whether such hardship exists, the court shall take into consideration all the relevant circumstances, including the distance of the grand jury investigation from the places of residence of witnesses who have been subpoenaed, financial and other burdens placed upon the witnesses, and the existence and nature of any related investigations and court proceedings."

(b) Section 3006A(a) of title 18, United States Code (relating to appointment of attorneys), is amended—

(1) by striking out "or," before "(4)" in the first sentence thereof; and

(2) by inserting before the period at the end of the first sentence thereof: ", or (5) who is a witness before a grand jury impaneled before the district court."

RECORDING, TRANSCRIBING AND AVAILABILITY OF GRAND JURY PROCEEDINGS

SEC. 8. (a) Chapter 215 of title 18, United States Code, is further amended by adding at the end thereof the following new sections.

"§ 3333. Recording of grand jury proceedings

"A complete and accurate stenographic or electronic record of all grand jury proceedings shall be kept, except that the grand jury's secret deliberations and consultations between witnesses and their counsel shall not be recorded. Such record shall include the court's notice to the grand jury of its rights and duties and all other comments or charges by the court to the jury at any time; all introductory comment, or other comments, directives, and other utterances made by attorneys for the government or special attorneys to the grand jury, witnesses and their counsels; all questioning of and testimony of witnesses; all interchanges between the grand jury and attorneys."

"§ 3334. Availability of grand jury transcripts and other statements

"(a) Any person summoned to testify or provide other information before a grand jury impaneled before a district court shall be entitled, prior to testifying or providing other information, to examine and copy any statement in the possession of the United States which he has made and which relates to the subject matter under inquiry by the grand jury. Such examination and copying may be made by the attorney for such person if such person gives his written approval. As used in this subsection, the term "statement" has the meaning provided by section 3500(e).

"(b) Any witness who testifies before a grand jury, or his attorney with such witness' written approval, shall, upon request, and under such conditions as the court deems reasonable, be entitled to examine and copy a transcript or electronic recording of the record for the period of such witness' own appearance before the grand jury, and if a witness is proceeding in forma pauperis, he shall be furnished, upon request, a copy of such transcript.

"(c) A reasonable time prior to trial, and after the return of an indictment or the filing of an information, a defendant shall, upon request and under such conditions and limitations as the court deems reasonable, be entitled to examine and copy a transcript or electronic recording of:

"(1) the grand jury testimony of all witnesses to be called at trial;

"(2) all statements to the grand jury by the court and the attorney for the government or special attorney, relating to the defendant's case;

"(3) all grand jury testimony or evidence which in any manner could be considered exculpatory; and

"(4) all other grand jury testimony or evidence which the court may deem material to the defense.

"(d) Upon a showing of good cause, the court may, at any time, order the disclosure of the recorded proceedings of a grand jury be denied, restricted or deferred, or make such other order as is appropriate. Upon motion by the government, the court shall permit the government to make such showing, in whole or in part, in the form of a written statement to be inspected by the judge alone. If the court enters an order granting relief following such a showing, the entire text of the party's statement shall be sealed and preserved in the records of the court to be made available to the appellate court in the event of an appeal by the defendant."

(b) Section 3500, title 18, United States Code, is amended—

(1) by inserting "or" before subsection (e)(2) thereof;

(2) by deleting "; or" and inserting "." at the end of subsection (e)(2) thereof; and

(3) by deleting subsection (e)(3) thereof.

PRELIMINARY EXAMINATION

SEC. 9. Chapter 217 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3368 Preliminary Examination

"(a) A defendant is entitled to a preliminary examination, unless waived, when charged with any offense, other than a petty offense, which is to be tried by a judge of the district court.

"(b) Such preliminary examination may be held prior to, or within a reasonable time following, the filing of an indictment or information in the district court."

REPORTS CONCERNING GRAND JURY INVESTIGATIONS

SEC. 9. Section 522 of title 28, United States Code (relating to reports of business and statistics), is amended by striking out "The Attorney General" and inserting in lieu thereof "(a) The Attorney General" and by adding at the end thereof the following new subsection:

"(b) The Attorney General, at the beginning of each regular session of Congress, shall report to the Congress and to the Administrative Office of the United States Courts with respect to the last preceding fiscal year on—

"(1) the number of investigations undertaken in which a grand jury or a special grand jury was utilized together with a description of the nature of each investigation undertaken;

"(2) the number of requests by United States grand juries to the Attorney General for approval to apply to the court for an order compelling testimony under section 2003 of title 18, and the number of such requests approved by the Attorney General;

"(3) the number of applications to district courts for orders granting immunity under title 18;

"(4) the number of applications to district courts for orders granting immunity under title 18 that were approved and the nature of the investigations for which the orders were sought;

"(5) the number of instances in which witnesses in the investigations enumerated in paragraph (1) were held in contempt and confined, and the dates and lengths of such confinement;

"(6) the number of arrests, indictments, no-bills, trials, and convictions resulting from testimony obtained under orders granting immunity, the offenses for which the convictions were obtained, and a general assessment of the importance of the immunity;

"(7) a description of data banks and other procedures by which grand jury information is processed, stored, and used by the Department of Justice; and

"(8) other appropriate information concerning grand jury activity during such year.

The matters contained in the report required to be made by this section shall be set forth according to judicial district.".

EFFECT ON OTHER LAWS AND RULES

SEC. 11. (a) The enumeration in this Act of any rights and privileges of grand jury witnesses shall not affect any other rights and privileges to which such witnesses may be entitled under any law or rule of law.

(b) Notwithstanding section 3771, no rule contained in the Federal Rules of Criminal Procedure shall apply to the extent that such rule is inconsistent with the provisions of this Act.

LEGISLATION TO INSURE THAT AMERICANS HAVE ADEQUATE SUPPLY OF SUGAR

(Mr. RONCALIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RONCALIO. Mr. Speaker, today I am introducing legislation designed to insure that American consumers have an adequate supply of sugar at a reasonable cost, and to help ease the plight of the depressed sugar beet growing industry by raising the import tax on low-priced foreign sugar.

The sugar beet industry is vital to Wyoming and many other States, but if the overabundance of foreign sugar continues, so will the hardship on our sugar beet industry. This could culminate in forcing many in the sugar growing industry out of business and in making the Nation more dependent on foreign sugar.

The bill I introduce today would impose a new, variable import tax on foreign sugar. The exact amount of the new tax, designed to equalize the price of domestic and foreign sugar, would depend on the average cost of producing beet sugar in the United States, and on the cost of foreign sugar. The larger the difference between the two prices, the higher the tax. There would be no import tax if the foreign sugar price rose

above the average domestic beet sugar cost.

Basically, the bill proposes a simple-to-administer import tax that would both protect American growers and assure an adequate sugar supply for consumers.

MAKING GOOD A GOVERNMENT WRONG TO AN OLD WYOMING HOMESTEADER

(Mr. RONCALIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RONCALIO. Mr. Speaker, I am today introducing legislation upon which I hope the House will take quick and responsible action.

Mr. Ted Gies is one of the old original filers for land on the third division of the Riverton reclamation project in Wyoming. He worked the lands and tried hard to improve them in order to make a good living.

In 1964, the Bureau of Reclamation told him that his lands were class 6, and he was therefore unable to obtain water rights. It then became inevitable that he had to sell his land, and reluctantly did so to the Bureau of Reclamation; a sale of 90 acres of land for $30 an acre. The following spring, that same land was leased by the Bureau, and the lessees were granted water. In 1972, the Bureau of Reclamation sold this land as class 4 land, at a price of $90 an acre.

The legislation which I am introducing is an attempt to make up for the glaringly unfair treatment this man has received. It provides for the payment to him of $5,400. This amount is based on the incremental differences in land value of 90 acres of land classified as class 6 rather than class 4 at the time of sale to the Bureau of Reclamation.

H.R. 1137—THE NATIONAL CONFERENCE ON LEARNING DISABILITIES AND DELINQUENCY PREVENTION ACT

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, on January 4, I introduced H.R. 1137, a bill to amend Public Law 93-415, the Juvenile Justice and Delinquency Prevention Act of 1974, to provide for a National Conference on Learning Disabilities and Juvenile Delinquency.

For the benefit of my colleagues, I include the text of this bill in the RECORD:

H.R. 1137

A bill to direct the Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a national conference on learning disabilities and juvenile delinquency, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Conference on Learning Disabilities and Juvenile Delinquency Act".

STATEMENT OF FINDINGS

SEC. 2. The Congress hereby finds that—

(1) the United States has achieved great and satisfying success in making possible a better quality of life for a large and increasing percentage of its citizens;

(2) the benefits and fundamental rights of American society are often denied those children with specific learning disabilities;

(3) there are eight million handicapped children in the United States, two million of whom are identified as learning disabled;

(4) it is of critical importance to the Nation that equality of opportunity, equal access to all aspects of society, equal rights, and greater justice guaranteed by the Constitution of the United States be provided to all children with specific learning disabilities;

(5) the primary responsibility for meeting the challenge and problems of children with specific learning disabilities often has fallen on the children themselves and their teachers;

(6) the symptoms of learning disabilities are subtle and often go unrecognized by teachers, parents, and health and law enforcement officials, and, more importantly, few understand that this handicap exists;

(7) learning disabilities that go undetected contribute substantially to the increased rate of school dropouts, failure to meet full potential, truancy, drug usage, and juvenile delinquency and such learning disabilities exacerbate unemployment among youths;

(8) learning disabilities are handicaps which must be approached from a multidisciplinary perspective in order that the full environmental field and configuration of events within which learning disabilities develop may be evaluated and points of intervention and prevention be identified;

(9) it is essential that all levels of Government must necessarily share responsibilities for—

(A) formulating a method of communication whereby existing knowledge and the results of ongoing research may be disseminated; and

(B) developing a coordinated plan of cooperation among disciplines in the delivery of all services to the learning disabled; and

(10) a national conference on learning disabilities and juvenile delinquency, preceded by State conferences, is the most suitable mechanism for coordinating an attack on the multifold problems of learning disabilities and juvenile delinquency.

NATIONAL CONFERENCE ON LEARNING DISABILITIES AND JUVENILE DELINQUENCY

SEC. 3. Title II of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5611 et seq.) is amended by redesignating part D as part E, by redesignating section 261 through section 263 as section 271 through section 273, respectively, and by inserting immediately after part C the following new part:

"PART D—NATIONAL CONFERENCE ON LEARNING DISABILITIES AND JUVENILE DELINQUENCY

"DUTIES OF COUNCIL

"SEC. 261. (a) The Coordinating Council on Juvenile Justice and Delinquency Prevention shall organize and convene a national conference to be known as the National Conference on Learning Disabilities and Juvenile Delinquency. The Conference shall be held in such place, and at such times during 1979, as the Council considers appropriate.

"(b) The Council, in carrying out its responsibilities under subsection (a), shall—

"(1) designate a coordinating committee in each State to organize and conduct a State or regional meeting under section 263 in preparation for the Conference;

"(2) prepare and make available background materials relating to learning disabilities and juvenile delinquency and related matters for the use of representatives to such State or regional meetings and to the Conference;

"(3) extend advice and technical and financial assistance, by grant, contract, or otherwise, for the organization and convening of State and regional meetings under section 263 in preparation for the Conference;

"(4) establish procedures for the provision of financial assistance to representatives to the Conference who are unable to defray their expenses;

"(5) designate such representatives to the Conference, in addition to representatives dsignated under section 262(a), as may be necessary or appropriate to carry out the provisions of section 262(b);

"(6) publish and distribute the report required by section 264(a);

"(7) provide for the production of a transcript of the proceedings of the Conference;

"(8) deposit the documents and records of the Conference, no later than 30 days after the President transmits the report required by section 264(b), with the National Archives and Records Service, where such records shall be available for public inspection and use; and

"(9) prescribe such rules as may be necessary to carry out the provisions of this part.

"COMPOSITION AND FUNCTIONS OF CONFERENCE

"SEC. 262. (a) The Conference shall be composed of—

"(1) representatives of local, State, regional, and national institutions, agencies, organizations, unions, associations, and any other groups which work to advance the rights and meet the needs of children with specific learning disabilities and juvenile delinquents;

"(2) representatives of the education, health, law enforcement, and social science professions and disciplines, and any other professions or disciplines as the Council considers appropriate, with special emphasis on the representation of children with specific learning disabilities and juvenile delinquents; and

"(3) representatives of individuals who have experienced learning disabilities, children with specific learning disabilities who have been institutionalized, and the parents of children with specific learning disabilities.

"(b) The Conference shall—

"(1) assess the progress which has been made in the private and public sectors of the Nation with respect to the development, promotion, and delivery of quality services to children with specific learning disabilities as such children come to the attention of education, health, law enforcement, and labor authorities;

"(2) develop a coordinated plan of cooperation, between and within appropriate professions, disciplines, and agencies, for the efficient delivery of quality services to children with specific learning disabilities;

"(3) broaden public awareness with respect to nature and symptoms of learning disabilities, the resources available to the learning disabled, and the special needs of children with specific learning disabilities;

"(4) identify barriers and problems which prevent the receipt of needed services by children with specific learning disabilities;

"(5) develop recommendations for the removal of such barriers and problems;

"(6) establish a time table for the carrying out of recommendations developed under paragraph (5); and

"(7) carry out such other activities as the Conference considers necessary or appropriate to assist in meeting the special needs of children with specific learning disabilities.

"STATE AND REGIONAL MEETINGS

"Sec. 263. (a) The Council shall be responsible for facilitating the organization and convening of meetings, during 1978, in each State in preparation for the Conference. The Council may, in its discretion, facilitate the organization and convening of regional meetings in any case in which the Council determines that meetings in particular States are impracticable.

"(b) Any State or regional meeting which

receives financial assistance under this part shall be conducted in a manner which seeks to carry out the requirements of section 262(b).

"(c) The coordinating committee in each State or region shall transmit to the Council a report no later than 30 days after the conclusion of the meeting involved. Such report shall contain a detailed statement of the findings and recommendations of the State or regional meeting.

"(d)(1) Representatives at each State or regional meeting shall select representatives to the Conference. Such selection shall be made under rules prescribed by the Council and shall be consistent with the provisions of section 262(a).

"(2) The total number of representatives selected under paragraph (1) shall be no less than 7 representatives and no more than 10 representatives from each State or region.

"REPORT

"SEC. 264. (a) The Council shall transmit a report to the President and to each House of the Congress no later than 120 days after the conclusion of the Conference. Such report shall be available to the public and shall contain a detailed statement of the findings and recommendations of the Conference in accordance with the requirements of section 262(b).

"(b) The President, no later than 120 days after receiving the report required by subsection (a), shall transmit to each House of the Congress recommendations with respect to matters discussed in such report.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 265. There are authorized to be appropriated not more than $5,000,000 to carry out the provisions of this part. Sums appropriated under this section shall remain available for obligation until expended."

DEFINITIONS

SEC. 4. Section 103 of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5603) is amended—

(1) by striking out "and" at the end of paragraph (12);

(2) by striking out the period at the end of paragraph (13) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(14) the term 'Conference' means the National Conference on Learning Disabilities and Juvenile Delinquency organized and convened under section 261(a); and

"(15) the term 'children with specific learning disabilities' has the meaning given it by section 602(15) of the Education of the Handicapped Act, except that, in the administration of part D of title II of this Act, changes in such definition recommended by the Commissioner of Education under section 5(b)(3) of the Education for All Handicapped Children Act of 1975 shall be taken into account.".

TECHNICAL AMENDMENTS

SEC. 5. (a) Section 206 of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5616) is amended by redesignating subsection (g) as subsection (k), and by inserting immediately after subsection (f) the following new subsections:

"(g) The Council may accept, use, and dispose of contributions of money, services, or property.

"(h) The Council may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the Federal Government.

"(i) The Council, to the extent it considers necessary, may—

"(1) procure supplies, services, and personal property;

"(2) enter into contracts;

"(3) expend funds appropriated, donated, or received under contracts in order to carry out its functions and responsibilities; and

"(4) exercise such powers as may be necessary to enable the Council to carry out its functions and responsibilities.

"(j) The Council may delegate any of its powers to any member or employee of the Council.".

(b) Section 206(e)(3) of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5616(e)(3)) is amended by inserting immediately after "personnel" the following: ", and procure the services of such experts and consultants,".

THE NEED FOR H.R. 1137, THE NATIONAL CONFERENCE ON LEARNING DISABILITIES AND JUVENILE DELINQUENCY ACT

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, as the former chairman of the House Select Committee on Crime, I found that over one-half of all our serious crime is youth-related, and although I believe the Law Enforcement Assistance Administration, on the whole, has made a saluatory contribution toward the suppression and punishment of crime in this country, an insufficient emphasis has been focused on the preventive aspects of juvenile crime. To this end, I believe the 95th Congress should adopt innovative proposals designed to head off the juvenile crime problem by attacking it in the schools where all our young people go and where many of the problems develop.

On January 4, 1977, I was pleased to introduce such a proposal, H.R. 1137, the National Conference on Learning Disabilities and Juvenile Delinquency Act. This legislation will amend Public Law 93-415, the Juvenile Justice and Delinquency Prevention Act, by directing its Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a National Conference on Learning Disabilities and Juvenile Delinquency. I believe a National Conference is the most propitious mechanism for broadening public awareness regarding the negative effects of untreated learning disabilities.

Of the more than 60 million Americans involved as students in our educational process, approximately 8 million are handicapped. One out of every four of these students are learning disabled. According to the Labor-HEW budget justifications for fiscal year 1977 over 87 percent of the learning disabled are not receiving an adequate and appropriate education. The learning disabled are the largest category of the handicapped not served, and are at greater risk to the law and custom if their handicap goes undetected.

Who are the learning disabled? Most people suffer from the inability to achieve in some discipline. For example, not all are able to identify and repeat a note played on a piano. For those of us who cannot, the solution is fairly simple. We can sing in the shower, underwater, in our car on the way to work, or, whatever. But certainly, the road to a successful future is not totally bypassed by one's inability to sing beautifully. So, who are the learning disabled and why must we be aware of their unique problem? Typical of a learning disabled child is one who has dyslexia. The child suffering from this disability is average, or above average in intelligence, but cannot, try as he or she may learn to do a simple thing like read. Reading in our culture is the key to learning. Unfortunately, the dyslexic, as well as all the learning disabled, do not suffer from a major impairment like retardation. Their impairments—that is, perceptual difficulties, hypertension, underdeveloped coordination skills—are so subtle, they go unnoticed by all around, even themselves. If throughout their learning years, the learning disability goes undetected it is likely several things will occur: some will simply never reach their full potential; others will drift and fail, suffer and be ignored, tagged lazy, or failing all else, eventually permitted to drop out of school. Lastly, there will be some who will exhibit a variety of norm-violating behaviors and act out their frustrations in delinquent ways.

In light of this, Mr. Speaker, it is scarcely any wonder then that their behavior with respect to custom and law put them at greater risk than youngsters not handicapped with learning disabilities. The literature in recent years has begun to reflect with increasing number of studies reporting very high correlations between learning disabilities and juvenile delinquency—specifically, the unsatisfactoriness of school experience and its causal relationship to deviant behavior. If we view schooling as the major occupation of children, it is not surprising that failure, underachievement, and frustration in school, can lead to dropping out, school phobia, hostility toward schooling, drug usage, and a variety of norm-violating behaviors.

Dr. Chester D. Poremba, nationally known researcher on learning disabilities, chief psychologist at Denver's Children's Hospital and former chief psychologist for Denver Juvenile Court. stated:

> The percentage of youths involved in crimes who have learning disabilities probably isn't rising. In my opinion the linkage has been there all the time . . . we just weren't smart enough to know about it.

According to Poremba, Colorado statistics show that 90.4 percent of juvenile delinquents have clinically provable learning disabilities. Informal statistics have shown that Oklahoma has a linkage of about 85 percent between youth crimes and disabilities, and the percentage in Minnesota is in the upper 80's. If these statistics are true we have certainly been doing a poor job of preventing delinquency. It is no longer adequate to say that a child did not do well in school and therefore became delinquent. Knowing why he did not do well can prevent duplication of failure.

Based on a study conducted by Dr. Robert E. Weber of the New Jersey Department of Education and Dr. Catherine Spears of Morristown Memorial Hospital, we know the nature of offenses committed by the learning disabled are usually impulsive and nonsensical—generated by the fury and frustration built up by years of failure, exploitation and ridicule. These offenses generally fall heavily in the "crimes against persons" area. Literature shows in excess of 50

percent of the offenses of institutionalized handicapped offenders have been involved in assaultive and homicidal behavior. They impulsively lash out against persons and property, venting their rage and frustration at the cruelties and injustices of which they have been the brunt. Thus, we find them assaultive, occasionally committing beverage control violations, larceny and shoplifting and status offenses, such as truancy and incorrigibility. As a rule, they do not commit offenses involving sophistication or planning.

As soon as the learning disabled offender enters the enforcement/judicial/corrections process a host of additional problems come into being. Once the handicapped offender is apprehended, his/her handicap might not be recognized by law enforcement officers who have not had special training in learning disabilities and therefore are unable to recommend an appropriate disposition for him/her at the police station level.

When the learning disabled offender enters the judicial system, court personnel and the judge may not recognize him/her as learning disabled—either because of lack of training or because he/she has never been diagnosed as learning disabled in the educational process.

Both juvenile delinquents and the learning disabled are handicapped by the ignorance surrounding their problem, as by the problem itself.

As I have stated, the symptoms of learning disabilities are so subtle, they go unnoticed by teachers, parents, health and law enforcement officials. But more importantly, few people recognize or understand that this problem exists. If efforts toward preventing delinquency and other negative effects of learning disabilities are to be successful, it is paramount that all facets of the community with whom the learning disabled interact are sensitized as to the existence and symptoms of this problem.

Knowing that over 75 percent of all serious crime in the United States is committed by youth under the age of 25; that over 61 percent of all sentenced prisoners never finished high school; and that the majority of those currently within our juvenile institutions are learning disabled—many would wish to view learning disabilities as a cause of crime. It should be noted that there is only a high correlation between undetected and untreated learning disabilities and its resultant criminal activity. If efforts to identify and treat the learning disabled population were successful—delinquency probably would not be eliminated altogether. However, a positive step forward would be made in preventing youth crime by reducing the number of known potential delinquents.

Mr. Speaker, the first legislation I introduced as a Senator in 1937 was a bill to provide for the education of all types of physically handicapped children; to make an appropriation of money therefor; and to regulate its expenditure, and in 1954 legislation was enacted providing funds to support research efforts along those lines. However, it was not until 1970 that the Congress enacted Public Law 91–230 providing Federal assistance for research related to the education of children with specific learning disabilities, the training of personnel, and the establishment of model centers for the improvement of educating the learning disabled. Just last year, Public Law 94–142 was enacted, and the definition of "handicapped" was amended to include the learning disabled. This same legislation directed the Commissioner of Education to establish the criteria for identifying a learning disability and diagnosing a child as learning disabled no later than November 1976. To date, these regulations have not been finalized. Recently, LEAA, the research arm of the Justice Department, granted $1.5 million jointly to Creighton University and the Association for Children with Learning Disabilities to study the incidence of learning disabilities among the institutionalized juvenile delinquent population. This study will not be completed until 1979.

So, Congress has recognized the need to assure all handicapped children a free, appropriate education to meet their unique needs. But, as research on identifying the learning disabled continues—preventive action can and should be taken, as the number of school dropouts increases each year and the incidence of crime committed by the educationally disadvantaged rises.

Therefore, I propose that a National Conference on Learning Disabilities and Juvenile Delinquency, preceded by State conferences, be organized and convened, to enable experts in many fields to focus on the learning disability problem. This conference will be action-oriented and provide the necessary complement to ongoing research. It will draw experts and concerned people from various institutions, educational, medical, psychological, social, and legal, and from the parents of the children involved. In the process, the conference will focus public attention on the learning disability problem and its relationship to school failure, dropouts, and juvenile delinquency and crime.

The major functions of the conference will be:

First, to assess the progress which has been made in the private and public sectors of the Nation with respect to the development, promotion, and delivery of quality services to children with specific learning disabilities as such children come to the attention of education, health, law enforcement, and labor authorities.

Second, to develop a coordinated plan of cooperation between and within appropriate professions, disciplines, and agencies, for the efficient delivery of quality services to children with specific learning disabilities.

Third, to broaden public awareness with respect to the nature and symptoms of learning disabilities, the resources available to the learning disabled, and the special needs of children with specific learning disabilities;

Fourth, to identify barriers and problems which prevent the receipt of needed services by children with specific learning disabilities.

Fifth, to develop recommendations for the removal of such barriers and problems.

Sixth, to establish a timetable for the carrying out of recommendations developed.

Seventh, to carry out such other activities as the conference considers necessary or appropriate to assist in meeting the special needs of children with specific learning disabilities.

The Coordinating Council on Juvenile Justice and Delinquency Prevention will be required to submit to the President and each House of Congress a report containing a detailed statement of the findings and recommendations of the conference. The President, no later than 120 days after receiving this report must transmit to each House of Congress recommendations with respect to matters discussed in the report.

Mr. Speaker, three people made a very special contribution in guiding the direction of this legislation; Jack Goldsmith, Ph. D., professor of criminal justice at the American University, who generated the proposal upon which this legislation is based, and who served as a consultant to my staff in the preparation of this bill; Sharon Goldsmith, adjunct professor of criminal justice at the American University, who read drafts of the legislation at various stages and offered criticism and suggestions; and lastly, Barbara Stolz, Ph. D., adjunct professor at the American University and formerly of the Harvard Center for Criminal Justice, who read it at all stages and gave invaluable advice about its organization. All are dedicated and outstanding authorities in the field of criminal justice.

Because I believe the time has come for Congress to utilize its knowledge of learning disabilities to prevent juvenile delinquent acts among millions of our youth, and to provide better educational opportunities for youthful offenders, I urge my colleagues to join me in support of this legislation.

EDUCATION: SPECIAL HEALTH PROGRAMS FOR STUDENTS FROM A DISADVANTAGED BACKGROUND

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, many of my colleagues in the House will recall that prior to the adjournment of the 94th Congress, I introduced H.R. 14917, "Special Health Education Programs for Students From a Disadvantaged Background." I was honored to be joined in the introduction by my able and distinguished colleagues, EDWARD R. ROYBAL, ANDREW YOUNG of Georgia, and several others.

I have revised H.R. 14917 and plan to reintroduce it within the next few days. The legislation provides for research and demonstration programs which will define mechanisms by which secondary students from deprived backgrounds can develop their reading, writing, math, cognitive, and communication skills. As you know, many youths with potentials for pursuing careers and productive lives are blocked from doing so because their cognitive and academic skills have not been nurtured or cultivated. Lacking such skills and abilities on the completion of

high school, all too many youths from disadvantaged backgrounds who clearly have the potential to become productive citizens end up unemployed, drug and alcohol abusers, or in prison.

I feel certain that if ways could be found to instill a goal orientation in such youths when they are still in junior high school and to offer these youths frequent positive academic and nonacademic experiences over a several year period, sizable numbers could be prepared to be competitive for college entrance and retention.

In other words, this legislation would establish a means by which large numbers of these potentially capable, but disadvantaged youths could emerge from the cycle of poverty, frustration and hopelessness which entraps them.

I was inspired, in part, to write this legislation on the basis of my own experience as a child. I was born in a rural area and attended a very small school during the early years of my formal education. I later transferred to a larger better equipped school, the Camp Hill School, at Christmas. The students were older than I, but the teacher told me that I could enter the fifth grade in every subject but math. Fifth grade math included many hard problems, and I had never had anything but "blue back" arithmatic. The teacher said I could take fourth grade math the rest of the year and in the summer study fifth grade math. If I learned it during the summer, the teacher would let me go on to the sixth grade in all my subjects. That summer, my mother and father, and my mother's father, helped me in my study and I took the exam and I passed it. I then went on to the sixth grade, but it was an embarrassing experience not to be able to take math in the fifth grade to which I entered.

It is my contention that many rural students are deprived of opportunities to pursue college and professional careers because their schools are often poorly equipped particularly in the sciences, good teachers are difficult to recruit and the level of academic competition between students is relatively low. My legislation will attempt to offset some of the disadvantages of attending small poorly equipped rural schools by offering students from such backgrounds opportunities to interact with students from other backgrounds and to be exposed to many different health and science role models, and to study and work in highly technical modern laboratories.

The legislation will offer similar advantages to inner city youths and in addition will involve these students in experiences and activities after school, on weekends and during the summer. It will attempt to maximize time expended in positive, nurturing environments and minimize the time spent looking at TV, or loitering aimlessly on the corner. Few of us could successfully compete without strong support out of school as well as in school.

Some of my colleagues may ask why I have written what is basically an educational program around a health theme? I would like to say a word on this point.

Since 1936, when I first became a Member of the U.S. Senate, I have been concerned about the health of our people which is the foundation of our Nation's strength, productivity, and wealth. While I was serving in the Senate, the Second World War came along and the Nation was shocked by the fact that over 40 percent of the U.S. selectees were found physically unfit for military duty, and at least a sixth of these had defects which were remediable. Many more had preventable defects. I became chairman of a Subcommittee on Health and Education in the Senate Committee on Education and Labor, and that Subcommittee published a report after an investigation of health care, which showed the gravity of our Nation's health problems in terms of human despair, wage and other economic losses, and medical costs.

The fact that we have not remedied these problems was evident at the Conference on Future Directions in Health Care, held in New York City in December 1975. The conference was sponsored by the Blue Cross Association, the Rockefeller Foundation, and the health policy program of the University of California. I want to share with my colleagues some of the comments of the president of the Rockefeller Foundations, Dr. John Knowles, at the conference. He said:

> We are on the eve or at a watershed in terms of the American concept of health and how we develop public policy in the United States will unfold before us during this decade.

Dr. Knowles advised that disease and illness can be prevented if Americans will eat less, take fewer pills, drive slower, submit to screening exams, obtain more rest and exercise more. Knowing this he queried, why then in 1976 did we spend less than one-half of 1 percent on health education out of $130 billion total public and private health expenditures?

Dr. Knowles further observed that there are over 45 million children enrolled in kindergarten through the twelfth grade in nearly 17,000 school districts, and there are 2.1 million teachers in these schools. He would like to see an effective system of health education in our school system.

I concur with Dr. Knowles' views and because of my long and continuing concerns about the health of the American people, I decided to stress health in this legislation. I believe health topics can be made relevant even to preschoolers. We know also that when information is relevant it is motivating and induces a desire to learn.

Mr. Speaker, I believe by using health as the stimulus or carrot to bring out the desire to learn and to be involved, several things can be accomplished:

First, the health related subject matter can be utilized to strengthen the academic and cognitive skills of disadvantaged students.

Second, students in the process of developing these skills will substantially increase their own health knowledge and awareness as well as that of their family and friends.

Third, the legislation will greatly increase the pool of disadvantaged students who will be qualified to pursue professional careers in health. It should be noted that it is these students who are thought to be most likely to be willing to serve in medically underserved areas as health professionals.

And, one other pragmatic and significant reason to focus on health is because of the real likelihood that this growing industry can absorb the many students that this legislation would make "qualified." It would be tragic to at long last make these youths qualified only to find no jobs available.

Mr. Speaker, I have gained many insights in the preparation of this legislation and received input from a number of distinguished citizens, especially from several who have worked extensively with programs designed to enhance the academic skills and career opportunities of disadvantaged students. Notable among this group are Arthur H. Hoyte, M.D., of the Georgetown School of Medicine; Vijaya L. Melnick, Ph. D., of Federal City College; Franklin Hamilton, Ph. D., of the Oak Ridge Graduate School of Oak Ridge, Tenn.; Cherrie Epps, Ph. D. of the Tulane School of Medicine; and Alice Miller, director of PREP—the premedical research and education program—New York City.

I shall further inform my colleagues of the purposes, scope and activities of these programs, and of recent developments in the academic field which support the need for this legislation.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. TEAGUE (at the request of Mr. WRIGHT) for an indefinite period on account of hospitalization.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. HANSEN), to revise and extend his remarks, and to include extraneous matter:)

Mr. CONABLE, for 60 minutes, on Thursday, January 13.

(The following Members (at the request of Mr. KINDNESS) to revise and extend their remarks and include extraneous material:)

Mrs. FENWICK, for 5 minutes, today.

Mr. FISH, for 30 minutes, today.

Mr. WHALEN, for 5 minutes, today.

(The following Members (at the request of Mr. GINN) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. FLOOD, for 5 minutes, today.

Mr. ALEXANDER, for 60 minutes, today.

Mr. RODINO, for 10 minutes, today.

Mr. FASCELL, for 5 minutes, today.

Mr. COTTER, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. ASHLEY, for 10 minutes, today.

Mr. RODINO, for 5 minutes, on January 12.

(The following Member (at the request of Mr. WEISS) and to revise and extend her remarks and include extraneous matter:)

Mrs. BURKE of California, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EILBERG, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $2,717.

Mr. ASHBROOK in two instances.

(The following Members (at the request of Mr. KINDNESS) and to include extraneous matter:)

Mr. LENT.
Mr. YOUNG of Florida in five instances.
Mr. KETCHUM.
Mr. WHALEN.
Mr. HORTON in two instances.
Mr. WHITEHURST in four instances.
Mr. DERWINSKI in two instances.
Mr. COHEN in six instances.
Mr. FREY.
Mr. FRENZEL.
Mr. STEERS.
Mr. CRANE.
Mr. SYMMS.
Mr. HANSEN in two instances.
Mr. KELLY.

(The following Members (at the request of Mr. GINN) and to include extraneous matter:)

Mr. CHARLES H. WILSON of California in two instances.
Mr. MURPHY of Illinois.
Mr. ROSENTHAL.
Mr. ECKHARDT.
Mr. HAMILTON in 10 instances.
Mr. RICHMOND.
Mr. BRODHEAD.
Mr. FISHER in 10 instances.
Mr. RODINO.
Mr. MAZZOLI in two instances.
Mrs. KEYS in two instances.
Mr. BROWN of California.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. RONCALIO in five instances.
Mr. MOAKLEY.

(The following Members (at the request of Mr. WEISS) and to include extraneous matter:)

Mr. AMBRO.
Mr. BEDELL.
Mr. HANNAFORD.
Mr. KOCH in six instances.
Mr. SEIBERLING.
Mr. GIAIMO in 10 instances.
Mr. BENNETT.
Mr. PEPPER.
Mr. BIAGGI in 10 instances.
Mr. EDGAR.

ADJOURNMENT

Mr. WEISS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 51 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, January 12, 1977, at 8 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

386. A letter from the Deputy Assistant Secretary of Agriculture, transmitting the annual report on the Cooperative State Research Service for fiscal year 1976 and the program of assistance to the States to provide additional facilities for research at the State Agricultural Experiment Stations, pursuant to section 10 of Public Law 88–74; to the Committee on Agriculture.

387. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of January 1, 1977, pursuant to section 1014(e) of Public Law 93–344 (H. Doc. No. 95–42); to the Committee on Appropriations and ordered to be printed.

388. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the selected acquisition reports and SAR summary tables for the quarter ended September 30, 1976, pursuant to section 811(a) of Public Law 94–106; to the Committee on Armed Services.

389. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–187, "To provide that the District of Columbia shall be responsible for the repair and maintenance of water service pipes and buildng sewers connecting lots with water mains and the public sewer and shall compensate property owners for such prior repairs under certain circumstances," pursuant to secion 602(c) of Pubic Law 93–198; to the Committee on the District of Columbia.

390. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MURPHY of New York:

H.R. 1614. A bill to establish a policy for the management of oil and natural gas in the Outer Continental Shelf, to protect the marine and coastal environment, to amend the Outer Continental Shelf Lands Act, and for other purposes; to the ad hoc select Committee on the Outer Continental Shelf.

By Mr. ALEXANDER:

H.R. 1615. A bill making supplemental appropriations for grants to improve museum services under the Museum Services Act, for payments to local governments based upon the amount of certain public lands within the boundaries of such locality, and for other purposes; to the Committee on Appropriations.

By Mr. ANDERSON of California:

H.R. 1616. A bill to establish in the Department of Housing and Urban Development a direct low-interest loan program to assist homeowners and builders in purchasing and installing solar heating (or combined solar heating and cooling) equipment; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1617. A bill to amend title 38 of the United States Code in order to provide mortgage protection life insurance to certain veterans unable to acquire commercial life insurance because of service-connected disabilities; to the Committee on Veterans' Affairs.

H.R. 1618. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. ASHLEY:

H.R. 1619. A bill to establish a National Commission on Neighborhoods; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEARD of Rhode Island:

H.R. 1620. A bill to amend title XIX of the Social Security Act to require the Secretary of Health, Education, and Welfare to conduct an annual audit of each hospital, nursing home, and other institutional facility participating in the medicaid program and each State or local agency distributing medicaid funds, and to amend title XVIII of such act to require annual audits of providers of services under the medicare program; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. BEDELL:

H.R. 1621. A bill to waive the penalty for certain underpayments of estimated tax attributable to the repeal of the sick pay exclusion by the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. BOWEN:

H.R. 1622. A bill to authorize the construction of the project for the enlargement of Greenville Harbor, Greenville, Miss., to the Committee on Public Works and Transportation.

By Mr. BRINKLEY:

H.R. 1623. A bill to amend chapter 49 of title 10, United States Code, to prohibit union organization in the Armed Forces, and for other purposes; to the Committee on Armed Services.

H.R. 1624. A bill to amend the Tariff Schedules of the United States to repeal the special tariff treatment accorded to articles assembled abroad with components produced in the United States; to the Committee on Ways and Means.

By Mr. BROOMFIELD:

H.R. 1625. A bill to amend the Internal Revenue Code of 1954 to repeal the excise tax on trucks, buses, and tractors and parts and accessories for such vehicles; to the Committee on Ways and Means.

By Mrs. BURKE of California:

H.R. 1626. A bill to establish a National Commission on Neighborhoods; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1627. A bill to provide increased employment opportunity by executive agencies of the U.S. Government for persons unable to work standard working hours, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. CARNEY:

H.R. 1628. A bill to establish uniform dates for the holding of Federal primary elections; to the Committee on House Administration.

H.R. 1629. A bill to establish a utility services stamp program to assist low-income and fixed income households to meet the rising cost of utilities; to the Committee on Interstate and Foreign Commerce.

H.R. 1630. A bill to abolish the U.S. Postal Service, to repeal the Postal Reorganization Act, to reenact the former provisions of title 39, United States Code, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1631. A bill to amend title 5 of the United States Code to make election day a

national holiday; to the Committee on Post Office and Civil Service.

H.R. 1632. A bill to amend title 38 of the United States Code in order to provide service pension to certain veterans of World War I and pension to the widows of such veterans; to the Committee on Veterans' Affairs.

H.R. 1633. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 1634. A bill to amend the Internal Revenue Code of 1954 to provide an income tax deduction for the performance by an individual of volunteer services for a Federal, State, or local governmental agency; to the Committee on Ways and Means.

H.R. 1635. A bill to amend the Internal Revenue Code of 1954 to provide a basic $5,000 exemption from income tax, in the case of an individual or married couple, for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

H.R. 1636. A bill to provide an income tax credit for savings for the payment of post-secondary educational expenses; to the Committee on Ways and Means.

By DON H. CLAUSEN:

H.R. 1637. A bill to increase and extend the authorization for the Federal-aid primary system, to increase the Federal share for Federal-aid primary system projects, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. COHEN:

H.R. 1638. A bill to amend the Social Security Act to direct the Secretary of Health, Education, and Welfare to develop standards relating to the rights of patients in certain medical facilities; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 1639. A bill to amend title XVIII of the Social Security Act to provide that payment may be made thereunder for hospital services (and related services) furnished outside the United States to an eligible individual, subject to certain limitations in cases where the hospital involved does not agree to comply with specified requirements; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 1640. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. COLLINS of Texas:

H.R. 1641. A bill to amend title II of the Social Security Act and the Internal Revenue Code of 1954 to provide that any individual may elect (on an annual basis) to contribute to a private retirement plan rather than participating in the social security program; to the Committee on Ways and Means.

By Mr. CONTE:

H.R. 1642. A bill to amend the National Labor Relations Act to provide that a labor organization is not required to provide legal representation to an employee in an arbitration proceeding if such employee is not a member of such labor organization; to the Committee on Education and Labor.

By Mr. CONTE (for himself and Mr. DINGELL):

By Mr. THOMPSON:

H.R. 1736. A bill to authorize the Federal Power Commission to allocate scarce supplies of natural gas; to the Committee on Interstate and Foreign Commerce.

H.R. 1737. A bill to assist the construction and operation of burn facilities; to the Committee on Interstate and Foreign Commerce.

H.R. 1738. A bill to provide certain benefits to State meat and poultry inspectors who are transferred to the Federal service; to the Committee on Post Office and Civil Service.

H.R. 1739. A bill to modify the restrictions contained in section 170(e) of the Internal Revenue Code in the case of certain contributions of literary, musical, or artistic composition, or similar property; to the Committee on Ways and Means.

H.R. 1740. A bill to amend title II of the Social Security Act to permit a State, under its section 218 agreement, to terminate social security coverage for State or local policemen or firemen without affecting the coverage of other public employees who may be members of the same coverage group (and to permit the reinstatement of coverage for such other employees in certain cases where the group's coverage has previously been terminated); to the Committee on Ways and Means.

H.R. 1741. A bill to amend titles II and XVIII of the Social Security Act to include qualified drugs, requiring a physician's prescription or certification and approved by a formulary committee, among the items and services covered under the hospital insurance program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. WHALEN (for himself, Mr. ANDERSON of California, Mr. ANDERSON of Illinois, Mr. COHEN, Mr. CONTE, Mr. CONYERS, Mr. COUGHLIN, Mr. GOLDWATER, Mr. HORTON, Mr. KOCH, Mr. LAGOMARSINO, Mr. MCKINNEY, Mr. MITCHELL of Maryland, Mr. MOORHEAD of California, Mr. O'BRIEN, Mr. PEASE, Mr. PRITCHARD, Mr. RICHMOND, Mr. SEIBERLING, Mr. SOLARZ, Mr. STEERS, Mr. STUDDS, and Mr. CHARLES WILSON of Texas):

H.R. 1742. A bill to protect citizens' privacy rights, establishing guidelines for access to third party records, regulating the use of mail covers, limiting telephone service monitoring, and protecting nonaural wire communications; jointly, to the Committees on the Judiciary, and Banking, Finance and Urban Affairs.

By Mr. WHITEHURST:

H.R. 1743. A bill to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office to prepare economic impact statements in connection with legislation reported by congressional committees and in connection with rules and regulations proposed by Federal agencies; to the Committee on Rules.

H.R. 1744. A bill to amend title 38, United States Code, to provide that remarriage of the widow of a veteran after age 60 shall not result in termination of dependency and indemnity compensation; to the Committee on Veterans' Affairs.

H.R. 1745. A bill to reorganize the executive branch of the Federal Government to eliminate excessive, duplicative, inflationary, and anticompetitive regulation; jointly, to the Committees on Government Operations, and Rules.

By Mr. YOUNG of Georgia (for himself, Mr. FRASER, Mr. BUCHANAN, and Mr. DIGGS):

H.R. 1746. A bill to amend the United Nations Participation Act of 1945 to halt the importation of Rhodesian chrome; to the Committee on International Relations.

H.R. 1747. A bill to establish a commission to study proposals for establishing the National Academy of Peace and Conflict Resolution; jointly, to the Committees on International Relations, and Education and Labor.

By Mr. CARNEY:

H.J. Res. 123. Joint resolution authorizing the President to proclaim the week beginning November 6, 1977, and ending November 12, 1977, as National Volunteer Firemen Week;

to the Committee on Post Office and Civil Service.

By Mr. CHAPPELL:

H.J. Res. 124. Joint resolution to authorize the President to proclaim the week of June 29 through July 5 as Why I Love America Week; to the Committee on Post Office and Civil Service.

By Mr. CONABLE:

H.J. Res. 125. Joint resolution proposing an amendment to the Constitution of the United States providing for the election of the President and Vice President; to the Committee on the Judiciary.

By Mr. CONTE:

H.J. Res. 126. Joint resolution designating Anne Sullivan Week; to the Committee on Post Office and Civil Service.

By Mr. EILBERG:

H.J. Res. 127. Joint resolution proposing an amendment to the Constitution of the United States relating to the election of the President and Vice President; to the Committee on the Judiciary.

H.J. Res. 128. Joint resolution proposing an amendment to the Constitution to provide for the prompt election of a Vice President in cases of a vacancy in the Office of Vice President by reason of the succession to the Office of President by a Vice President selected under the 25th amendment; to the Committee on the Judiciary.

By Mr. HANNAFORD:

H.J. Res. 129. Joint resolution to establish a National Commission on Housing for the Elderly; to the Committee on Banking, Finance and Urban Affairs.

By Mr. JACOBS (for himself and Mrs. KEYS):

H.J. Res. 130. Joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

By Mr. O'BRIEN:

H.J. Res. 131. Joint resolution to clarify and reaffirm Government purchasing policies, to the Committee on Government Operations.

By Mr. RICHMOND:

H.J. Res. 132. Joint resolution to authorize a special gold medal to be awarded to Miss Marian Anderson; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WALKER:

H.J. Res. 133. Joint resolution proposing an amendment to the Constitution of the United States with respect to abortion; to the Committee on the Judiciary.

By Mr. WHITEHURST:

H.J. Res. 134. Joint resolution calling for protection of international waters from further pollution; to the Committee on International Relations.

By Mr. HAMMERSCHMIDT (for himself, Mr. MONTGOMERY, Mr. HYDE, Mr. EMERY, Mr. NICHOLS, Mrs. LLOYD of Tennessee, Mr. KINDNESS, Mr. DERWINSKI, Mr. WAGGONNER, Mr. MITCHELL of New York, Mr. GUYER, Mr. MCEWEN, Mr. KETCHUM, Mr. WALSH, Mr. BROYHILL, Mr. ABDNOR, Mr. COCHRAN, Mr. DICKINSON, Mrs. SMITH of Nebraska, Mr. FLYNT, Mr. MCCLORY, Mr. LOTT, Mr. WHITEHURST, Mr. CLEVELAND, and Mr. BADHAM):

H. Con. Res. 54. Concurrent resolution expressing the sense of the Congress in opposition to the grant of blanket amnesty or pardon for Vietnam-related draft or military absence offenses; to the Committee on the Judiciary.

By Mr. HYDE:

H. Con. Res. 55. Concurrent resolution expressing the sense of the Congress in favor of eliminating the reduction in veterans' pensions which results when cost-of-living increases in social security or railroad retirement benefits occur; to the Committee on Veterans' Affairs.

By Mr. KETCHUM (for himself, Mr. ANDERSON of Illinois, Mr. BRECKINRIDGE, Mr. BROWN of Michigan, Mr. BURGENER, Mr. CLEVELAND, Mr. COUGHLIN, Mr. EMERY, Ms. FENWICK, Mr. FLOOD, Mr. ICHORD, Mr. KILDEE, Mr. LEGGETT, Mr. LOTT, Mr. MCEWEN, Mr. MCKINNEY, Mr. MIKVA, Mr. MITCHELL of New York, Mr. PRITCHARD, Mr. REGULA, Mr. RICHMOND, Mr. RINALDO, Mr. SIMON, Mr. SLACK, and Mr. WINN):

H. Res. 98. Resolution amending rule XXII of the Rules of the House of Representatives to remove the limitation on the number of Members who may introduce jointly any bill, memorial, or resolution, and to provide for the addition and deletion of names of Members as sponsors after the introduction of a bill, memorial or resolution; to the Committee on Rules.

By Mr. KETCHUM (for himself, Mr. ANDERSON of California, Mr. ARCHER, Mr. BLANCHARD, Mr. DEL CLAWSON, Mr. CONTE, Mr. DICKINSON, Mr. EDWARDS of California, Mr. EDWARDS of ALABAMA, Mr. FRENZEL, Mr. HAGEDORN, Mrs. HOLT, Mr. HORTON, Mr. JEFFORDS, Mr. KOCH, Mr. LENT, Mr. MCCLORY, Mr. MICHEL, Mr. MOORHEAD of California, Mr. O'BRIEN, Mr. PATTISON of New York, Mr. ROBINSON, Mr. RUNNELS, Mr. STEIGER, and Mr. WHITEHURST):

H. Res. 99. Resolution amending rule XXII of the Rules of the House of Representatives to remove the limitation on the number of Members who may introduce jointly any bill, memorial, or resolution, and to provide for the addition and deletion of names of Members as sponsors after the introduction of a bill, memorial or resolution; to the Committee on Rules.

By Mr. MOORHEAD of California:

H. Res. 100. Resolution in support of continued undiluted U.S. sovereignty and jurisdiction over the U.S.-owned Canal Zone on the Isthmus of Panama; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AMBRO:

H.R. 1748. A bill for the relief of Carmela Scudieri; to the Committee on the Judiciary.

H.R. 1749. A bill for the relief of Louis DeLucia; to the Committee on the Judiciary.

By Mr. HANNAFORD:

H.R. 1750. A bill for the relief of Abdelah Ahmed Chrayah; to the Committee on the Judiciary.

By Mr. JONES of Oklahoma:

H.R. 1751. A bill for the relief of Lucy Davao Jara Graham; to the Committee on the Judiciary.

By Mr. MITCHELL of New York:

H.R. 1752. A bill for the relief of Maria Anna Santoro; to the Committee on the Judiciary.

By Mr. MOORHEAD of California:

H.R. 1753. A bill for the relief of Marina Houghton; to the Committee on the Judiciary.

By Mr. RONCALIO:

H.R. 1754. A bill for the relief of Theodore H. Gies; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

29. By the SPEAKER: Petition of Bong Young, Kang, Seoul, Korea, relative to redress of grievances; to the Committee on the Judiciary.

30. Also, petition of Margaret Rush, Costa Mesa, Calif., and others, relative to the investigation into the assassinations of President John F. Kennedy and the Reverend Martin Luther King, Jr., to the Committee on Rules.

EXTENSIONS OF REMARKS

UTILITY IRREGULARITIES

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. OTTINGER. Mr. Speaker, it is likely that the 95th Congress will enact legislation to reform utility rates and pricing practices so as to bring them into line with a national policy to provide energy on an equitable basis to users and, at the same time, to promote conservation.

In New York State we have an interesting and troubling situation where there is a public power entity known as the Power Authority of the State of New York. This was created in the 1930's and was, in fact, the model for the Tennessee Valley Authority.

Now we find ourselves with the Power Authority having become truly a statewide utility, with the ability to build any kind of power facility anywhere in the State. Prior to 1968 it could build only hydroelectric projects only on the Niagara and St. Lawrence Rivers.

PASNY's rates, and here lies the irregularity, are set on a plant-by-plant basis, so that customers of the hydro power pay much lower rates than customers of nuclear or oil-fired plants. And PASNY is not regulated on its rates—either by the Federal Power Commission or by the State's Public Service Commission. It may be necessary to enact Federal legislation to bring an end to such irregularities. I recently had occasion to testify on the subject before the New York State Assembly Committee on Corporations, and I would like at this point to share that statement with my colleagues:

PASNY'S PECULIARITIES

(By Hon. RICHARD OTTINGER)

Chairman Kremer, members of the Committee, ladies and gentlemen, I am delighted to have the opportunity to appear here today on what I consider to be probably the single most important endeavor this Committee can undertake in the coming months: the rewriting of the Power Authority Act.

As your hearing announcement points out, there are many internal inconsistencies within the Power Authority Act. Many of these show up when one reads the act and tries to determine what PASNY'S mandates are. In some sections of the law, PASNY is

charged to serve the "people of the state;" in others it is to gain optimal benefit from the hydroelectric facilities and to serve "high load factory (sic) industry;" in another it is to serve industry as a "secondary purpose," with the primary purpose as "the benefit of the people of the state as a whole."

Similarly, in one section of the law, PASNY is supposed to provide for "the future needs of municipal electric systems and rural electric cooperatives;" in another it is to provide for "the future needs of the authority's *existing* municipal electric and rural electric cooperative customers;" in yet a third it is to "make provision so that municipalities and other political subdivisions of the state now or *hereafter authorized by law to engage in the distribution of electric power may secure a reasonable share of the power generated by such projects*" (the Niagara and St. Lawrence projects) (emphasis supplied).

As this Committee knows, PASNY has frequently argued that it cannot serve would-be new municipal or cooperative customers, but only provide for the future needs of existing ones, even though Section 1005, 5 still contains the language I just quoted.

The Declaration of Policy in Section 1001 refers several times to serving the people of the state; Section 1005 refers to serving "the people of the state as a whole." Nevertheless, PASNY has, until this year, refused always to serve any downstate customers with hydroelectric power, saying these areas "are not within economic transmission distance." This argument, I presume, has always been drawn from Section 1005, 5, which talks about serving "the people of the state as a whole and particularly the domestic and rural consumers *to whom the power can economically be made available.*" (Section 1005, 5; emphasis supplied). The change this year came with PASNY's agreement to serve three municipal electric companies on Long Island—Greenport, Freeport and Rockville Centre—with hydroelectric power.

I would hope that the Committee can set about to correct such inconsistencies in the Power Authority Act. Moreover, I would hope you will, in your deliberations, seek ways to bring the Power Authority into the energy realities of 1976.

There are, after all, many statements of purpose in the PASNY Act which, in my judgment, impact negatively on energy policies currently being set elsewhere—in New York and in the nation as a whole. The most obvious of these is the mandate for PASNY to provide power "for domestic and rural use at the lowest possible rates and in such manner as to *encourage increased domestic and rural use of electricity.*" (Section 1005, emphasis supplied). While this may have made sense forty years ago, surely it is inconsistent with stated national and state policy to conserve energy!

On the broad question of how PASNY should relate to overall state energy goals, the law is entirely inadequate, particularly with respect to the way in which PASNY charges for its power—it can set any rate it desires.

At the very time when the Public Service Commission is making major strides—leading the nation, in fact—in redesigning rates in the interest of equitable service and conserving energy, PASNY's rates are set on what must be regarded as the antithesis of where we should be going, not to mention that they are unique within the state.

For the time when the Power Authority was authorized to construct only hydroelectric power facilities, only on the St. Lawrence and Niagara Rivers, their plant-by-plant rate design may have made sense. But, since 1968 PASNY has been a statewide system, with a mix of different power facilities comparable to those of the private investor-owned utilities. The plant-by-plant rate setting was continued, however, even after the Power Authority began constructing nuclear and pumped storage plants and proposing other kinds—even though this results in grossly inequitable treatment of the customers of the newer plants.

Customers of the Niagara and St. Lawrence plants—regardless of the type of customer—pay a demand charge of $1.00 per month per kilowatt, and an energy charge of 2.67 mills per kilowatt hour. Customers of the Fitz-Patrick nuclear plant, on the other hand, pay $3.00/month/kw for demand and 5 mills/kwh for energy. That is three times more for demand and nearly twice as much for energy, as is charged to customers of the hydroelectric facilities.

The governmental customers of the Astoria No. 6 and Indian Point No. 3 plants acquired by PASNY from Con Edison in 1974, will be paying a substantially higher price than customers of either the hydroelectric facilities or the nuclear plant.

Also, the rate design approach being used for selling the output of Indian Point No. 3 and Astoria No. 6 is "average and excess demand." This might not be all bad, except that it is being done at a time when the Public Service Commission (and other enlightened rate designers around the country) has determined that "average and excess demand" rates are obsolete, and counter to the best interests of the citizens of the state.

The benefits of the cheap hydroelectric power produced by the Niagara and St. Lawrence plants "to the people of the state" are not, in fact, being realized by the people of the state.

Rather, a select few—largely industrial and investor-owned utility—customers of PASNY for the hydroelectric power, are receiving incredibly cheap power, while other PASNY customers are paying substantially higher rates. This is unlike virtually any other utility system in the nation.

It is time for PASNY to be recognized for what it is: a statewide electric utility which, as it happens, is public. All of its customers should benefit equally from the cheap hydroelectric power and from the more expensive pumped storage and nuclear power; that is to say that all of PASNY's costs and benefits and costs should be rolled in for all of PASNY's customers.

If this were done, then the governmental entities—such as the Transit Authority, the MTA and many Westchester municipalities—buying power from PASNY's newest acquisitions (Indian Point No. 3 and Astoria No. 6) would not bear the full costs of those plants in isolation from the rest of PASNY's system, but would benefit from a reduction in rates resulting from factoring in the savings from the hydroelectric power.

It may be necessary, in order to bring PASNY into modern times with respect to setting rates, to give some additional jurisdiction to the Public Service Commission. After all, PASNY currently produces 25 per cent of the state's electricity, and expects to produce 33 per cent upon completion of the Prattsville pumped storage project, the Cementon power plant, the Staten Island coal and garbage-fired plant and the 765-kilovolt power line from Canada, all of which PASNY now has in the planning or license application stages.

Any efforts the PSC is making to reform the rate design of the seven investor-owned utilities in the state are skewed by the lack of regulation of PASNY's substantial block of power, on which rates are set in a fashion entirely unrelated to the direction in which the PSC is going. The PSC should not be restricted to rate setting on only 75 per cent—or, later, on only 67 per cent—of the electricity produced in the state.

In summary, I urge the Committee to move ahead quickly to reform the PASNY Act, to conform it with other laws of the state, and to bring PASNY into the mid-1970's. The Authority should serve all of the people of the state, and it should serve them equally on the basis of all its facilities. PASNY should no longer be able arbitrarily to tell would-be public power entities that it has no power available because of long-term contracts with private utilities upstate. And it should not be able arbitrarily to set deadlines for applications for PASNY power—as it has done with dividing up the output of Indian Point No. 3 and Astoria No. 6 among governmental entities in the metropolitan area seeking to meet their municipal needs with Power Authority power.

As you know, Mr. Chairman, Westchester County is exploring the possibility of getting out altogether from the Con Ed system because our rates are so high. What this Committee does in the line of making PASNY more responsive to the needs of the people of the state will relate directly to how we proceed in Westchester. I must also wish you luck, because your redrafting of the PASNY act is a tall order.

As a final note, I would like to offer the Committee any assistance I can provide in Washington, particularly with regard to Federal law and administrative activities. I am exploring the possibility of Federal legislation to gain somewhat more control over PASNY's activities; such changes should complement the endeavors of your Committee.

Thank you.

TAX BILL INTRODUCED

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. CONABLE. Mr. Speaker, today I am introducing a bill to eliminate from the Internal Revenue Code that section approved in the Tax Reform Act of 1976 creating a cost-basis carryover for estate taxes. The House of Representatives rejected a straight cost-basis carryover when the Ways and Means Committee bill was being considered last year. This carryover was included by the conferees in the tax bill and approved by Congress in the last minute rush to see that bill enacted; our procedures at that time did not allow individual consideration of this section.

As of January 1, 1977, all heirs will be required to value inherited property as of the date of purchase by the decedent or its value as of December 31, 1976. Under previous law, heirs to property assumed the value as of the date of death; when the property was sold capital gains were paid based on this value.

The change approved in the Tax Reform Act of 1976—but never specifically approved by the House—will:

Produce complex, costly, time-consuming litigation between the Government and the taxpayer and will complicate the duties of every administrator or executor of a decedent's estate by making it difficult to distribute fairly in kind assets of differing cost basis;

Cause property to be held beyond the time when prudence would otherwise dictate its disposition; instead, it will be held solely for tax reasons.

Tax most heavily the small farm or family-owned business which in the future is handed down from generation to generation, whose assets are often illiquid, forcing executors to dispose of appreciated assets in order to meet estate tax liabilities.

Mr. Speaker, this section of the law does not hit the wealthy; its impact will be the greatest on middle-class people who own an appreciated farm, business, or home. We have been deeply concerned lately with actions that would tend to preserve the existence of family farms and small businesses in America. And, for this, as well as philosophical ones, I shall be working to see this repeal enacted.

UNION LOCKS MMA GRADUATES OFF JOB

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. EMERY. Mr. Speaker, last April I requested an investigation by the GAO of alleged employment discrimination by the Marine Engineers Beneficial Association—MEBA—a maritime union headed by Jesse Calhoun, against Federal and State maritime academy graduates. The report, which also includes a cost-effective analysis of the union school in Baltimore versus the Federal and State maritime academies, is due in March 1977.

The recent publicity surrounding the activities of MEBA, most notably a "60 Minutes" report on October 3, 1976, deserves our thoughtful consideration and concern. These alleged activities should not be taken lightly. The ideals of equal opportunity and the strength of the U.S. Merchant Marine are at stake.

MEBA's activities have prompted me to call attention to an article which appeared in the Maine Sunday Telegram. The article reviews some of MEBA's activities and asks some extremely important questions:

UNION LOCKS MMA GRADUATES OFF JOBS

(By John Lovell)

CASTINE.—There are 500 cadets enrolled at the Maine Maritime Academy here. When they graduate, almost none of them will get jobs aboard American freighters.

But they're paying the highest tuition and fees charged among the nation's six state maritime academies, only partly offset by federal student subsidies that haven't changed in at least a decade.

The reason for both problems is the same: a small maritime union called the National Marine Engineers Beneficial Association has locked maritime academy graduates out of the best seagoing jobs and is now trying to close down the academies.

The Maine Maritime Academy, like those of Massachusetts, California, Texas, New York and Michigan and the United States Merchant Marine Academy at Kings Point, New York, are dependent on the Congress for much of their financial well-being.

They are fighting a losing battle there with the Maritime Engineers Beneficial Association (MEBA), which feels its own economic survival and that of its 9,000 members depends on how well it can protect diminishing numbers of seagoing jobs from nonunion maritime academy graduates.

To do this, the MEBA operates its own federally-financed school to train merchant marine engineers—who, because they begin accumulating union seniority from the day they start attending classes, get the jobs denied to maritime academy graduates.

The MEBA also invests heavily in the campaigns of most congressional members who serve on the House and Senate committees which handle merchant marine legislation.

It also made large donations to the presidential campaign of Jimmy Carter. The union has made clear what it expects for its money.

The MEBA's president, Jesse M. Calhoun, wrote in the September issue of the union's monthly newspaper, "The American Marine Engineer," that the MEBA looks forward to "the discontinuance of financial aid to federal and state maritime academies, and placing reliance for training programs instead on maritime industry-supported schools."

There is only one "maritime industry-supported" school—the one that bears the name of the MEBA president, the Calhoun MEBA Engineering School in Baltimore, Md.

In a campaign speech to a "Maritime Management-Labor Salute" in Washington last June, Carter was quoted by the Washington Post as saying he believed that American ships "manned by American seamen, trained principally as they are now in the industry operated schools and on the ships themselves, can once again be the envy of the maritime world."

The Post noted that the MEBA and the other maritime unions and their members contributed $160,600 to Carter in the last two months of his primary campaign alone.

As of Oct. 1, according to Common Cause, the maritime unions had given $612,162 to candidates in this year's congressional campaigns.

The figure includes $78,332 contributed to 21 of the 26 Democrats on the House Merchant Marine and Fisheries Committee and $3,900 to four of the committee's 13 Republican members.

Of these amounts, $66,882 went to 14 of the 19 Democrats serving on the committee's Merchant Marine Subcommittee and $2,000 went to two of the subcommittee's eight Republican members.

The subcommittee has jurisdiction over legislation on most merchant marine matters, including government subsidies and assistance.

The Senate counterpart to the House Merchant Marine and Fisheries Committee is the Commerce Committee, six of whose members received a total of $58,650 from the maritime unions as of Oct. 1, Common Cause has reported. The figure includes $24,100 given to two members of the Senate Merchant Marine Subcommittee.

The citizens lobby figures show that the relatively small maritime unions ranked fifth among special interest groups contributing to congressional campaigns this year, behind the United Auto Workers, political action arms of the AFL–CIO, the dairy committees, and the American Medical Association.

One of the few Merchant Marine Subcommittee members who've never accepted maritime union money is Rep. David F. Emery, R-Maine whose efforts to increase federal subsidies to the maritime academies have been blocked by the subcommittee's Democratic majority, his staff say.

CBS News, in its Oct. 3 broadcast of "60 Minutes," reported an example of the apparent results of MEBA campaign contributions to Merchant Marine and Fisheries Committee members.

In an interview on the program, Rep. Paul N. McCloskey Jr., R-Calif., recounted how he had sent a routine letter to MEBA President Calhoun last January seeking further information following Calhoun's testimony in a committee hearing. McCloskey said the response to his request came in a letter from the chairman of the committee, Rep. Leonor K. Sullivan, D-Mo., saying she was allowing Calhoun to ignore McCloskey's questions.

In nine years in Congress, McCloskey said on the program. "I have never seen a member of Congress, let alone a committee chairman, permit witnesses before a committee to decline to answer another member's questions. You know, there's nothing mysterious about these questions. All these questions were inquiring into the financial operation of the MEBA school, which competes with the federal maritime academy."

The fact of the matter is that the Calhoun MEBA Engineering School not only competes with the taxpayer-subsidized U.S. Merchant Marine Academy and the six state maritime academies—but it does it with taxpayers' dollars.

Calhoun has repeatedly refused requests for details of the school's support, but a special congressional investigating committee issued a report last year briefly explaining the arrangement:

Since 1972, the Merchant Marine Act of 1936 has "permitted the inclusion of company contributions to the training funds of their respective employes' unions in wage costs in the calculation of operating differential subsidy.

"Thus, approximately 72 per cent of the current contributions of subsidized steamship companies to the training fund which completely supports the Calhoun MEBA Engineering School are federal dollars."

Thanks to the indirect federal subsidy, students at the Calhoun School pay no tuition or fees during their three years of study.

But cadets at the Maine Maritime Academy must ante up $2,000 in tuition and fees "before they can even start fall classes," says the academy's superintendent, Rear Adm. Edward A. Rodgers. "And $1,500 is due from each of them in January." And that's just for in-state students. The tuition for out-of-state students is $900 a year higher.

To help ease this burden, cadets at all six state maritime academies receive federal subsidies of $600 a year, initiated by the Defense Department a decade ago as an incentive to help maintain the nation's level of merchant marine officers.

As costs rose since then, Rodgers and the superintendents of the other state maritime academies sought congressional increases in the student subsidy, "but we never got anywhere because Calhoun was very, very, chummy with the Maritime Administration and the former chairman of the Merchant Marine and Fisheries Committee."

Last year's special congessional study, the work of an "ad hoc committee on maritime education and training" appointed by Merchant Marine and Fisheries Committee Chairman Sullivan, includes a recommendation that "the annual subsistance allowance from the Maritime Administration to students at the state maritime academies be increased from $600 to $1,200."

The report also urged that legislation to implement this and other recommendations "should be given early consideration by the Committee on Merchant Marine and Fisheries."

The increase was never made. Rodgers recalls that an amendment by Emery to double the student subsidies died after Mrs. Sullivan spoke against it.

The report, by Congressmen who've received MEBA campaign donations, also gave tacit support to Calhoun's claim that only his school should supply the nation's merchant marine officer needs.

"Acute shortages of licensed officers during periods of peak demand in the past—notably during war time—would indicate the desirability of maintaining a flexible source of supply of such personnel," the report said.

"Industry schools have a particularly well-suited capability to perform this function. In this connection, it is noted that the Maritime Administration's study has concluded that near term emergency needs of the U.S.-flag merchant fleet for licensed officers can best be met by industry schools."

Rodgers says this is nonsense. "The fact is," he claims, "we are quicker. We can double

our enrollment overnight, by using the training ship as a dormitory. And the Calhoun school didn't graduate a single man who assisted in Vietnam."

The Maritime Administration, a subdivision of the Commerce Department, is the agency through which most federal funds are disbursed to the maritime academies. In 1974, federal assistance to the Maine Maritime Academy totaled $3.43 million (including an annual $75,000 administration grant) or 16.7 per cent of the school's total budget.

The administration generally has been more sympathetic to MEBA needs than to those of the academies.

The Maritime Administration's recommendation that "industry schools" should be the principle source of merchant marine officers was made despite the agency's own findings a few years ago that "a shortage of deck and engine officers will probably occur by the end of the 1970's."

The administration has not publicly departed from this position, although it tacitly acknowledged last week that the MEBA appears to use federal subsidy money to practice employment discrimination against graduates of the maritime academies.

In a statement prepared for release over the signatures of Commerce Secretary Eliot Richardson and President Ford, the Maritime Administration noted that the MEBA's labor contracts with steamship companies representing about 83 per cent of the engineering officer posts on large American vessels provide for the training fund used to operate the Calhoun school.

"Graduates of this school, by virtue of their affiliation with the union during their training," the Maritime Administration statement continued, "have a higher priority in obtaining job assignments than do the graduates of the U.S. Merchant Marine Academy or the six state maritime academies . . . this job priority is the result of union seniority achieved during training."

Meanwhile, the Maritime Administration has begun a new study into manpower needs for merchant marine officers.

Sen. William D. Hathaway, D-Maine, wrote on Nov. 4 to the administration's top official, Assistant Maritime Secretary Robert J. Blackwell, reminding him of "allegations that the maritime unions are engaging in systematic employment discrimination against the graduates of the state and federal maritime academies. . . .

"I feel that a thorough investigation should be made to determine whether or not there is any substantial basis for these allegations. . . . If such an investigation has not been done, I request that it be undertaken as soon as possible."

A Maritime Administration spokesman subsequently told the Telegram that a reply to Hathaway's request was being drafted, "responding to his questions quite specifically," but the spokesman refused to say whether any inquiry would be launched.

With a new president taking office in January who has received large campaign contributions from the maritime unions, a member of Hathaway's staff said little was expected from the Maritime Administration.

Hathaway has demanded a similar probe by the Government Accounting Office, which is Congress' investigating arm.

In another Nov. 4 letter, Hathaway wrote to the GAO's comptroller general, Elmer B. Staats, calling his attention to the MEBA's alleged employment discrimination practices and asking that an investigation of them be included in a GAO study already underway of maritime training programs and employment needs.

One of the people in charge of this study, Morgan Matthews, told the Telegram that the GAO has received several other congressional requests, including one from Rep. Emery, to investigate the MEB. He said: "The discrimination allegations are one of the issues included in our review . . . It will be well presented in our report."

This GAO study is expected to be completed in March or April, Matthews said.

In anticipation of the GAO's possible findings, Emery and Rep. Glenn M. Anderson, D-Calif., a fellow member of the Merchant Marine Subcommittee, are considering sponsoring legislation "prohibiting federal money to any maritime school that directly or indirectly engages in employment discrimination," one of Emery's aides said.

The reasons for the MEBA's political activities are already well known, however. American shipping—and American shipping jobs—are on the decline, and only federal money can keep them afloat.

"Between 1969 and 1976," says the Maritime Administration's statement, "the number of licensed engineer officer billets on U.S.-flag oceangoing ships has declined from approximately 7,200 to approximately 3,300 as the active U.S.-flag fleet has declined from over 1,000 ships to 536 ships as of July 1.

"This job decline has had a major effect on the ability of new entrants to obtain seafaring employment."

Once No. 1 in world shipping, the American merchant fleet has plummeted to 10th place since 1945.

At the same time, new ships are being built that hold six times as much as the older vessels and need smaller crews, further reducing the need for fresh young officers.

So for the past half-dozen years, Rodgers said in an interview last week, "virtually no graduates of the federal and state maritime academies have gotten jobs on union ships."

More than 90 per cent of the Calhoun school students go directly to sea upon graduation, while just 62 per cent of Maine Maritime Academy's class of 1974 won sea posts.

And Rodgers said the jobs his graduates get, while they may pay as well as those on MEBA-controlled vessels, are on smaller ships and coastal tankers that do little intercontinental voyaging.

"It is incredible," he said, "that a maritime union can have so much power that it can dictate the outcome of congressional legislation, threaten the continued existence of the state maritime academies and deny jobs to their graduates."

Calhoun, who lives in Maryland and works from MEBA's Washington office, was unavailable for a telephone interview on Rodgers' charges.

ABOLISH AUTOMATIC FUEL ADJUSTMENT CLAUSES

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. GONZALEZ. Mr. Speaker, I am again proposing a bill that I originally introduced in the 94th Congress that calls for abolishing the automatic fuel adjustment clauses that have become a regular part of every American's utility bill. I feel that this practice is very unfair and unjust and should be halted immediately.

The fact that fuel costs have increased tremendously since the Arab embargo in 1974 is something we have all come to accept and every utility user is aware that these costs have to be paid for, but the automatic fuel adjustment passthrough violates the rights of the consumer.

Many of my constituents in San Antonio have been in contact with me both personally and through letters with regard to the hardships these automatic fuel adjustment charges have brought to them and their families, and it is indeed sad to see our citizens in such a predicament. The hardest hit have been the elderly who have found their retirement incomes, which were to sustain them through their golden years, eaten up by ever increasing food and medical costs and now the automatic fuel adjustment charge, which in some cases has been as high as 100 percent of their utility bill. They are finding that they can no longer afford even the necessities of life and this is, indeed, a sad and unfortunate fate.

Mr. Speaker, we have always been proud to say that the people in our great Nation can determine their fate, but the presence of an automatic fuel adjustment charge each month has caused many to wonder if this is still true. Consumers are shackled by a cost which they cannot control and cannot even attempt to figure out or rationally plan for until they receive their monthly utility bills.

The utility companies, on the other hand, are allowed to add the fuel adjustment charges to customers' bills each month without having to justify this charge and as a result have little incentive to economize. They have no great inducement to minimize their fuel costs or increase their fuel efficiencies. And in the hearings held in October of 1975, before the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce, it was brought out that fuel adjustment clauses are a disincentive for utilities to prepare for the future.

The bill I have introduced states that no utility charge can be ordered without prior public notice and full evidentiary hearings by the regulatory authority. This places the increases back into the hands of the regulatory commissions that have a direct responsibility to the public. With fuel adjustment charges the utility commissions have been rendered powerless while the utility management is allowed to pass through any cost increases completely unchecked.

It will not be an easy job for the commissions to keep up with the rate fluctuations due to the changes in the price of fuel but they should be able to carry out the responsibility entrusted to them by the citizens.

Mr. Speaker, every congressional district in the Nation has seen its share of problems because of the automatic fuel adjustment charges and as Representatives of the people we cannot ignore this situation. We must take positive action to give back to our citizens the ability to monitor their own utility bills and to know that the size of their bills will be directly related to the amount of fuel or electricity that they use.

The measure I am proposing will not solve the energy problem facing our country, but it will give the consumers the rights they deserve and place the responsibility for increases in utility

costs back into the hands of the regulatory commissions.

REMOVING EARNINGS LIMITATION FOR SOCIAL SECURITY BENEFITS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. McDONALD. Mr. Speaker, today I am introducing legislation to remove the outside earnings limitation on social security benefits.

Presently, eligible recipients under age 72 have their social security benefits reduced if they are earning an income greater than $250 per month or $3,000 per year. The rate of reduction is $1 for every $2 earned.

Thus if an individual becomes eligible for social security benefits and continues to work, he or she must pay what amounts to a tax of 50 percent of their income.

Mr. Speaker, this is grossly unjust on a number of grounds to those so penalized.

First, to deny the recipient his full benefits is to imply that social security is a welfare program—that if someone is earning outside income, he or she does not need the income from social security.

But this is not what those who have been paying social security have been told by their Government. The program was and is presented to them as a retirement program. And, although they are forced to pay into it "for their own good," the payments are earned income held in trust by the Government to be repaid at age 65.

In other words, social security beneficiaries are not welfare recipients or wards of the State, but self-respecting Americans who have paid for the benefits they thought they would receive at age 65. They are entitled to receive these benefits as a matter of right.

Second, the earnings limitation is discriminatory, hitting hardest those who have limited means and who wish to continue working to supplement their income. Not only are their social security benefits reduced or eliminated, but they are taxed on their outside income to finance the social security benefits which they are not receiving. A person of greater means, on the other hand, may receive his full social security benefits while drawing a large income from his investments.

Third, by punishing those who work, the earnings limitation punishes and discourages productivity. Every individual has an "unalienable right" to pursue his own goals in life and his own happiness, and thus to continue to be productive after age 65 if he so chooses, for whatever reasons be they financial or psychological.

Therefore, Mr. Speaker, I sincerely hope that the Committee on Ways and Means will give this bill early and favorable consideration.

HON. BOB JONES—"THE BRIDGE BUILDER"

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. DON H. CLAUSEN. Mr. Speaker, I was recently privileged to join with a number of our colleagues for the Bob Jones national appreciation dinner in Huntsville, Ala.

Nearly 500 of his friends joined Bob and Christine for the tribute to his 30 years of service in the Congress.

Many presented testimonials to his unique record of accomplishment in this House.

One of the most touching letters was written by one of his neighbors, a respected black leader in the Scottsboro, Ala., community where he and Bob had been friends since their youth.

His friend, Wiley T. Snodgrass, Sr., accurately equated Congressman Bob Jones to the bridge builder, a comparison I heartily endorse.

So that Bob Jones' many friends can share the thoughts expressed by Mr. Snodgrass, I include his letter as part of my remarks.

The Bob Jones I know, admire, and respect was a great visionary. His perspective of America was unmatched by any of his colleagues in the Congress—a fair, firm, and factual chairman, dedicated to building a better America, and at the same time humble enough to remember his friends back home like his talented friend, Mr. Wiley Snodgrass.

The letter follows:

SCOTTSBORO, ALA.,
November 24, 1976.

HON. ROBERT E. JONES,
The House of Representatives,
Washington, D.C.

DEAR MR. JONES: I am elated to have been informed that the Tennessee River Valley Association—on behalf of The 5th Congressional District—is sponsoring a National Appreciation Dinner in honor of you for the Honorable and Dedicated Services you have rendered to Your Country for the last three decades in The Congress of the United States!

Recalling your many Actions and Accomplishments which have been instrumental in building Economical Bridges of Prosperity across Chasms of Deprivation, I equate your entire tenure on Capitol Hill to the words of W. A. Dromgoole:

"THE BRIDGE BUILDER"

An old man traveling a lone highway,
Came at the evening cold and gray,
To a chasm vast, deep and wide.

The old man crossed in the twilight dim,
For the sullen stream held no fear for him,
But he turned when he reached the other side,
And builded a bridge to span the tide.

"Old man" cried a fellow pilgrim near,
"You are wasting your strength with building here;
Your journey will end with the ending day,
And you never again will pass this way.

"You have crossed the chasm deep and wide.
Why build you a bridge at eventide?"
And the builder raised his old gray head:
"Good friend, on the path I have come" he said,
"There followth after me today
A youth whose feet will pass this way.

"This stream, which has been as naught to me,
To that fair-haired boy may a pitfall be;
He, too, must cross in the twilight dim—
Good friend, I am building this bridge for him."

—W. A. DROMGOOLE.

Yes, Your Dedicated and Honorable Services have exemplified a chain-of-bridge-work; Bridging over waters of despair with Structural Hope in every facet of Our Government!

As you step down—at the end of the Transition Period—may Your Successor continue to move forward in the Proud Heritage established by you over the last thirty years!

I face the future with this Faith: I believe that The Honorable Ronnie Flippo will continue the process of being instrumental in Bridge-Building, for there are many National and International Troubled-Waters to cross!

I say to you as I said to The Honorable John T. Reid:

"You have fought a good fight! You have kept the Faith!—And now—It is time for you to take a well deserved rest; always remembering that True Peace is Peace with yourself and Peace With God!"

With Every Good Wish, I am
Yours through A Life-Span of Friendship and Trust!

WILEY T. SNODGRASS, SR.,
A Concerned Citizen.

IN MEMORY OF LT. THOMAS V. POINDEXTER, MISSOURI STATE HIGHWAY PATROL

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. SKELTON. Mr. Speaker, it was with a deep sense of personal loss that I learned last week of the death of Lt. Thomas V. Poindexter of the Missouri State Highway Patrol. Lieutenant Poindexter was a 23-year veteran with the highway patrol and one of the ablest officers it has been my pleasure to know. At the time of his death, he served as supervisor of enforcement for Troop A of the Missouri State Highway Patrol for Jackson, Clay, and Platte Counties.

I first had occasion to meet Tom Poindexter when I was elected prosecuting attorney for Lafayette County. As anyone who has served in such a position well knows, the success of a prosecutor's office is directly related to the competence of the law enforcement agencies in the field. Throughout the years that I served in that post I was impressed with the intelligence and integrity that Tom Poindexter brought to every aspect of his work. And, although our relationship began strictly in a professional capacity, I am proud to say that Tom Poindexter and I became close personal friends.

Tom Poindexter was first appointed to the Missouri State Highway Patrol in 1953 and assigned to Higginsville, Mo. In 1962 he was promoted to the rank of sergeant and assigned to Lee's Summit, Mo. Then, in 1971, he was promoted to lieutenant. During World War II he served as an aviation machinist mate third class in the U.S. Navy Air Force.

In addition to being a distinguished member of the highway patrol, Lieu-

tenant Poindexter was also a family man—a devoted husband and a loving father. He is survived by his wife, Hattie Ullery Poindexter; his mother, Georgia Howald and a brother, Clifford Poindexter. Also surviving him are his four children, Steven Poindexter, Mrs. Kaye Auclair, Mrs. Sue Guffey, and Mrs. Karen Bennett.

In these days when the words "law and order" have taken on an unpleasant connotation for many people, I am proud to say that Lt. Thomas V. Poindexter upheld the law and maintained order. No more can be asked of any public servant.

CONSPIRACY OF SILENCE ON MARIHUANA

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. McCLORY. Mr. Speaker, the misinformation concerning the damaging effects of the extended use of marihuana is most alarming. With the problem of drugs on the increase—particularly among younger Americans—it is a sad commentary on the media and, indeed, on our public authorities that the permanent harm which can come from extended use of marihuana appears to be either ignored or deliberately soft-pedaled.

Mr. Speaker, the distinguished news columnist Roscoe Drummond has presented a most telling article on this subject which deserves the prompt attention of every Member of this House—to be followed by effective action consistent with the true facts.

Mr. Speaker, the article by Roscoe Drummond has been inspired by a recently published book entitled "Keep Off The Grass" by Dr. Gabriel Nahas of Columbia University.

Mr. Speaker, I am attaching hereto Mr. Drummond's article which appeared in the Wednesday, December 29, 1976, issue of the Christian Science Monitor as follows:

CONSPIRACY OF SILENCE ON MARIJUANA

(By Roscoe Drummond)

WASHINGTON.—There is widespread ignorance concerning the grievous harm which marijuana is doing to young people today. The cause of that ignorance is almost unbelievable it is so pernicious.

It is evident that there is a pervasive conspiracy of silence about the findings by qualified scientists concerning the effects of marijuana on regular users. This certainly accounts, in part, for the fact that the regular use of marijuana by teen-agers is ominously rising.

Let me set out the facts explicitly:

Silence breeds use. Leading newspapers, network media, and many leaders of science, theology, and education are actively closing the avenues of publicity by suppressing the evidence of the expert findings.

Books which take a benign view of marijuana smoking and urge its legalization get quick and prominent reviews and the authors are invited to appear on major talk shows. But when books by prominent scientists are published which document how regular use of marijuana harms both man and society, they are not just reviewed unfavorably; they are often ignored.

Take the case of Dr. Gabriel Nahas, M.D., PhD., a Columbia University scientist. His book, "Marihuana—Deceptive Weed," was published several years ago. No reviews in any leading newspaper, no invitations to television shows as authors of opposite opinions always got.

Now Dr. Nahas has published additional findings based on his own and other researches around the world. Silence from all the media, and when a dozen of his distinguished colleagues at the Columbia University College of Physicians and Surgeons wrote separately to some newspapers asking why, they never deigned to answer.

What's happening to young people? A survey of 17,000 seniors in 130 high schools undertaken by the National Institute of Drug Abuse revealed that a significantly large number of teen-agers took up the steady smoking of marijuana this past year. This study showed that in the class of 1976 a high 53 percent were steady users compared to 48 percent the previous year. The projection is ominous.

Should marijuana be legalized? Many favor this course, including some leading law-enforcement officials. If legalization is desirable, it seems to me it should be limited to users, not to peddlers and drug traffickers generally. And it certainly should not be based on the false premise that marijuana is an innocent drug suitable for harmless pleasure.

To realize the lengths to which the legalization advocates are willing to go, let me quote an extract, cited by Dr. Nahas in his new book, "Keep Off the Grass," from a sermon preached by Canon Walter G. Dennis of the Cathedral of St. John the Divine in New York:

"The pressing question for us is: How should the church in the 1970s respond [to the mounting use of marijuana]? Perhaps the task of Christians is not to condemn marijuana use, but rather to find out what, if any, is the good use of marijuana." He added, quoting from the Bible: "And God saw every thing that he had made, and, behold, it was very good."

It seems to me that the canon is disserving both God and man. I offer the view of the great humanitarian, oceanographer, and ecologist Jacques Cousteau who wrote this in his introduction to "Keep Off the Grass":

"If we are concerned about external pollutants that threaten our environment, we should be equally concerned about internal pollutants—like marijuana products. For sheer survival, we must defend ourselves against both kinds of pollution. Furthermore, I believe we need to keep all our senses at their maximum keenness if we are to enjoy and take full advantage in our participation in the miracle of life."

Dr. Nahas opposes making harmful drugs readily available, but he does not favor "making criminals out of recreational drug users." Apparently much of the press wants to keep the public from knowing about Dr. Nahas's findings in "Keep Off the Grass." Parents, public officials, educators, and others would learn something by reading it. It is distributed by Thomas Y. Crowell Co., 666 Fifth Avenue, N.Y. 10019.

THE RECLAMATION ACT OF 1902

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. RONCALIO. Mr. Speaker, today I am introducing legislation which establishes the availability of an equivalency formula on Bureau of Reclamation land.

The Reclamation Act of 1902 limits ownership of federally irrigated land to 160 acres for any one landowner, and this bill does not change that basic limitation. What it does do is recognize that there are lower classes of land, in terms of productivity, than class I lands.

There is a need to address the problems posed by the differences in productivity from one farm unit to another, due to differences in soil quality and growing conditions. Such differences in production potential were not taken into consideration in setting the 160-acre limitation, but on occasion, authorizing legislation has made exceptions. The bill I am introducing today attempts to address this need by instructing the Secretary of the Interior to consider the quality of soil, crop adaptability, cost of production, and length of growing season in determining how large an "economic family-size farm" should be. Based on these facts, operators and owners of marginally productive lands could receive water for the amount of additional acreage required to achieve the same production as 160 acres of class I land.

SPEECH BY REPRESENTATIVE ROBERT McCLORY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. MICHEL. Mr. Speaker, I take pleasure in submitting a copy of a speech made last month by my colleague, Congressman ROBERT MCCLORY of the Illinois 13th Congressional District. In his address to the Waukegan-Lake County Chamber of Commerce, Bob analyzed with humor and insight the role of the Republican Party in the 95th Congress, and foresaw that President-elect Carter's major problems in Washington may, indeed, come from powerful Democratic leaders in the House and Senate. His remarks also refer to the protection our system of government offers the people when both the Presidency and the Congress are controlled by one political party. Congressman MCCLORY's remarks deserve a wide audience—and accordingly are reproduced here:

REMARKS OF CONGRESSMAN ROBERT MCCLORY

It is with great temerity that I come before this organization of business and industrial leaders—with an obvious need to discuss the two great national issues—unemployment—and jobs.

You see—Washington is not only the nation's capital. It is also the unemployment capital of the nation—since November 2nd. I've never known so many unemployed people—all Republicans. As a matter of fact, I didn't know I knew so many people—or that so many people knew me. And just at Christmas time.

I might say that I've got a most impressive collection of résumés in my Washington office. Earl Butz and Henry Kissinger haven't dropped theirs off yet—but I'm expecting them.

The good news is that Washington is also

the scene of more job seekers—all of whom have been supporting Jimmy Carter for President—ever since they grew up together in Plains, Georgia.

I'm told that all you need to do to get a job is to fill out the job application blank—correctly. Now some parts of this application might be hard for you to answer. For instance: (1) Where were you born? (2) When were you born? (3) When were you—reborn? or (4) Write down the second verse of—Dixie.

I guess you get the idea. Unemployment is very bad for some of my friends in Washington. Others are having quite a hard time filling out the applications for the many jobs that are available.

Many things have changed since November 2 when the American people went to the polls and elected a peanut farmer and former Governor of Georgia to become 39th President of the United States. While the election was close and it might be hard for some to consider that Carter received a national mandate, I don't think that view has been acquiesced in by President-Elect Carter.

As I say, many things have changed and there have been substantial developments since November 2. Also, there are many uncertainties. But there seems to be little uncertainty about one of Jimmy Carter's pre-election promises following his inauguration on January 20. He has promised to bring new "leadership" to our nation, and I am satisfied that he means just that.

Mr. Carter himself is a relative stranger in Washington, D.C. and it wasn't until a few weeks ago that he arranged a get-acquainted meeting with various members of the Federal Cabinet—and more particularly with Congressional leaders—principally Democratic Congressional leaders with whom Mr. Carter has had only the most casual acquaintance until a few weeks ago.

Now, when I say that many things have changed since November 2, I thing it would be well for us to be reminded that before the election 7 percent unemployment in Mr. Carter's view was unthinkable if not obscene. But, I seem to recall that in his press interview in Plains, Georgia, after the election, he indicated a willingness to experience 5 percent to 7 percent unemployment until 1980. Mr. Carter voiced strong opposition to the Ford Administration economic policies before the election and seemed determined to subject the economic policy makers in the Federal Reserve Bank to Administration and Congressional control. But after meeting with the Federal Reserve Chairman Arthur Burns in Washington after the election, it appears that the old economic policies which were helping to reduce inflation and improve the economy—will be continued. Another strong indication of Carter's moderate—or conservative—approach to the subject of the national economy is the naming of Atlanta banker Bert Lance to be the Director of the Office of Management and Budget—and Mike Blumenthal, Chairman of the Bendix Corporation, as Secretary of the Treasury.

The interests of consumers were prominent during the historic Presidential Debates. Indeed, consumer interests were the ostensible concern of the last Democratic Congress in mandating a price rollback of oil prices and keeping natural gas and oil production under strict Federal controls. But it looks like the consumers under the new Carter Administration will have to pay more for gas and more for gasoline and oil as Mr. Carter (after the election) has adopted a strong position in favor of deregulation of oil and gas prices which will lead invitably to higher gas and oil prices for consumers.

Before the election I seem to recall that Jimmy Carter assured Ralph Nader that Nader would approve of Carter's major appointments. So far, Nader seems to have expressed only—disapproval.

If you've got the idea that Jimmy Carter has neglected to consult George Meany—or Ralph Nader—in making some of his appointments—you're right.

Please understand that I am not expressing an opinion, I am merely reporting on recent political developments. I am not even speculating as to whether Jimmy Carter will be a good President or a successful one. In fact, I don't know much more than that he will be our 39th President when he is inaugurated on January 20 and then we'll just have to see.

Let me emphasize however that I agree with the statement in President Ford's congratulatory telegram to Carter the day after the election: "Although there will continue to be disagreements over the best means to use in pursuing our goals, I want to assure you that you have my complete and wholehearted support as you take the oath of office this January."

That would indicate that Republican leaders will be working with the Carter Administration to try to help solve the Nation's most critical problems. The disagreements occur should solely with regard to "the best means" to be used in pursuing our common goals.

I would suggest that the President has accurately set forth the tone and attitude insofar as our Republican position is concerned—as we await the official arrival in Washington of Jimmy Carter and his Administration team of some 75 major appointees and approximately 2,600 other policy-making Federal executive jobs which will be filled by political appointments.

I have no crystal ball which can lead me to envision the Carter Administration a year from now or even six months from now. However, I know my colleagues in the Congress quite well include the Democratic Congressional leaders headed by the man who will be the new Speaker of the House, Congressman Tip O'Neill of Massachusetts.

In forecasting President-Elect Carter's strengths and weaknesses in the year ahead, it would seem well to take a close look at the Congress—both the U.S. House and Senate. Obviously Mr. Carter's success or lack of success is going to depend on how he fares with the members of his own party—particularly Congressional leaders such as Tip O'Neill.

During the election campaign, when asked for his reason for supporting Carter, Tip O'Neill declared: "Just elect him, and we'll make him a good President." Tip O'Neill is a popular personality with his colleagues in the U.S. House where he has been the almost unanimous choice of the Democrats to become the Speaker or leader of the overwhelmingly Democratic-controlled House of Representatives. But Tip O'Neill does not have the kind of political persuasion with his Democratic colleagues on issues that he is able to muster by way of popular personal support for his candidacy for Speaker of the House.

There are other strong Democratic personalities in the House of Representatives with whom Carter will have to contend. Congressman Jim Wright of Texas—the new Majority Leader—and a moderate. Also, Congressman Phil Burton of California—who is the leader of that large bloc of ultra-liberal Democratic Congressmen who were elected in 1974—and an arch rival of Tip O'Neill—will be asserting his leadership and his liberal philosophy whenever possible. Likewise, Congressmen Dick Bolling of Missouri; Brademas of Indiana, and virtually every Democratic Chairman of the 21 House Committees will be giving expression to his particular brand of leadership—mostly acquired during long service in Washington where Congressional power has grown enormously during the last ten years.

Over in the Senate, there are national leaders such as Senator Hubert Humphrey of Minnesota, Senator Birch Bayh of Indiana, Senator Scoop Jackson of Washington and others, all of whom probably consider themselves better qualified to handle Jimmy Carter's job than Jimmy himself. I question that they are going to accept President-Elect Jimmy Carter's leadership without injecting some of their own leadership potential which to their dismay Jimmy curtailed during the Democratic Presidential primaries.

What I am suggesting is that Jimmy Carter's big problems with the Congress are not apt to be with the relatively small Republican minority in the House and Senate where we represent only one-third of the total membership. His big problems are much more apt to be with rival Democratic Congressional leaders most of whom opposed Jimmy Carter before his nomination in New York in July, and who may well question his capacity to assume a leadership role which is superior to their own.

When I went to the Congress in 1963, the late President Kennedy was our President. Serving initially on the House Government Operations Committee, I discovered that the on-going investigations and oversight activities of the Committee which had been widespread as long as President Eisenhower was in the White House diminished markedly during the Democratic Administrations of Kennedy and Johnson. During the Nixon and particularly during the last two years of the Ford Administration the Congressional oversight or investigatory functions directed at the Administration dominated the action on Capitol Hill to the point where legislative measures assumed a relatively minor position.

With the advent of a Democrat in the White House, I suspect that the Congressional oversight function will again lapse into relative obscurity. In other words, a Democratic Congress delights in investigating a Republican Administration. But there are no points to be gained by investigating activities of one's own party. This is important to keep in mind and a subject which deserves the most careful thought.

If the Republican minorities in the U.S. House and Senate are to fulfill a role of "the loyal opposition," the most careful preparation and determined efforts must be made. Few Committee investigations will be authorized by the Democratic majority and no hearings can be held without the approval of Committee or Subcommittee Chairmen. All of these positions are held by Democrats. Even research done by Republican Committee staff members may not be published as an official document unless the Democratic Chairman of the Committee gives his approval.

Now I don't want to suggest that we have abandoned the two party system or that Republican views or other minority views will be banned. I should call attention to the fact that we have an official organization in the Congress known as the Republican Policy Committee made up of 26 Members upon which I have been privileged to serve during the past two years and of which I expect to be a part during the new Congress. The Policy Committee formulates positions with respect to all of the major national issues and these are presented to the media and circulated among Republican Members of Congress and those interested in our Republican points of view.

Perhaps more critical than this apparent absence of a more vocal minority voice in the Congress is the great attention which will be given to Presidential statements. I expect that when he becomes President, Jimmy Carter—in fulfilling his vow to provide strong Presidential leadership—will have frequent occasion to mandate prime radio and television times for making policy statements on domestic and foreign issues. Unless these are responded to by recognized Republican leaders, it will give the appearance that Republicans are acquiescing in the Carter policy positions. Apparently, the Federal Communications Commission will not require the radio

and TV stations to provide equal time or an equal opportunity for a Republican response with the same facilities and the same potential audience as the new President will be voluntarily accorded by the networks. And you can be sure that the Democratic-controlled Congress is not going to amend the Federal Communications Act to compel the media to grant such equal time to the Republicans.

However, it is interesting to note that in the recent volume by Vice President-Elect Walter F. Mondale entitled "The Accountability of Power," subtitled "Toward a Responsible Presidency," he emphasizes the importance of this kind of a reply. In fact, on page 214 of this volume, he makes the point: "We should require by law that the major television networks give equal time for reply by Congressional opposition party leaders to any Presidential address, even if not in a Presidential campaign. And this right of reply should be given on the same terms as the Presidential address. If the President appeared on all three networks in prime time, the opposition should be accorded a similar right—within 48 hours of the time of the Presidential address."

Senator Mondale was making this strong statement in consideration of Democratic Congressional response to statements by a Republican President. I will be interested to see how forcefully he maintains this position now that we are to have a Democratic President—and a Republican minority in the Congress.

Finally on this point, it would seem to me that the media—television, radio and the press—have a greater responsibility than ever to investigate and test thoroughly actions and policies of an Administration which will be required to provide very little in the way of accountability to a Congress dominated by the same political party. The Freedom of the Press First Amendment to the U.S. Constitution may well turn out to be our greatest safeguard against uncontrolled power which a determined and aggressive leader may assert and which a Congress dominated by his own party may be unwilling to moderate or check.

One other move which will be made by the Republicans on the opening day of the new Congress will be a Resolution to establish a Select Committee on Effective Oversight. This proposal is intended to create a minority watchdog group empowered to investigate activities within the Executive Branch at any time when both the Congress and Executive Branch are dominated by the same political party—which assuredly guarantees the American people of a careful review of Executive Branch actions which affect the lives of all Americans.

In my view—and under the system of checks and balances this would be a vehicle by which the traditional "loyal opposition" could scrutinize and focus public attention on the actions of the majority party. Now don't hold your breath until this Resolution gets adopted. Indeed it has been tried before when similar Democratic majorities have been in control of the Congress. The measure failed then and it will fail again in the new Congress.

Without yielding—then—any responsibility or potential of the minority Republican "loyal opposition" in the Congress to participate in—and question major decisions of President-Elect Jimmy Carter's "new leadership"—let me reiterate the two other major safeguards inherent in our political system.

First, there is the leadership of Members of Congress of the new President's own party.

Second, there is a powerful—and I believe—responsible media capability—jealous of its constitutional prerogatives which will be covering and questioning the decisions and judgments of the Jimmy Carter "new leadership"—after inauguration day—next month.

In order to interpret what is going on in Washington next year we will all have to study Southern — I already understand Southern—but as a letter to Gene Shalit of NBC stated the other morning on the Today Show: "We know you understand Southern, but will you be able to stand—what you understand?"

Perhaps—working together—Republicans and Democrats in the Congress—the media—and, yes—the people (to whom Jimmy Carter made his principal campaign appeal)—we can help his new Administration to develop and implement policies that we can stand—and also understand.

Thank you.

LEAA PROGRAMS WORKING

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. SANTINI. Mr. Speaker, the following is a revealing demonstration of some very positive results from the expenditure of LEAA moneys. At a time when all revenue spending agencies are undergoing strenuous scrutiny, it is imperative that each agency demonstrate the justification for these continued expenditures. LEAA is certainly receiving an incisive review and is proving its worth.

I believe the following narrative demonstrates some very constructive expenditures by LEAA in our southern Nevada community:

$500,000 STOLEN PROPERTY RECOVERED—58 PERSONS CHARGED

George E. Holt, Clark County District Attorney; Ralph Lamb, Sheriff, Las Vegas Metropolitan Police Department; Jack Keith, Jr., Special Agent in Charge, FBI, today reported the recovery of approximately $500,000 in stolen property and contraband through the joint efforts of the District Attorney's Conspiratorial Crime Prevention Unit, Metropolitan Police Task Force and the Federal Bureau of Investigation. This trilogy of police agencies operated a covert fencing operation manned by undercover law officers in Las Vegas, Nevada. The location of this undercover operation is in a central business-industrial area of town.

The entirety of this investigation was operating under the code name "Switch", which started 6/15/75. Undercover agents spent $61,275 in the procurement of recovering the listed stolen property and contraband. This project was funded by a Grant issued to the District Attorneys Office by the Law Enforcement Assistance Administration (LEAA). This agency's assistance was invaluable in terms of financial aid and coordination.

Fifty-eight (58) suspects have been charged and several other suspects are still under investigation where arrests are imminent. Charges include Homocide, Burglary, Robbery, Embezzlement, Grand Larceny, Receiving Stolen Property, etc. Forty-eight (48) suspects have been charged with Felonies, Gross Misdemeanors and Misdemeanors; Eight (8) with Gross Misdemeanors; and two (2) with Misdemeanors.

On the evening of November 29, 1976, forty-one (41) individuals were arrested pertaining to this operation. Investigation is continuing to locate the other individuals who have been charged. Twenty-one (21) of these individuals were arrested at our undercover location after they had been invited to attend a party, and to participate in a raffle for a stingray automobile.

Unidentified property is still being investigated as well as ascertaining the identity of several victims who may or may not be aware of their property loss to date.

The following number of items have been recovered as stolen property:

Credit cards	222
TV sets	25
Motorcycles	4
Automobiles	15
CB radios	47
Radios	5
Firearms (24 handguns, 29 rifles and 15 shotguns)	68
Cameras	18

Other miscellaneous items of value: stereo, tape decks, car radios, saddles, silverware, guitars, coin collections, sewing machines, scuba gear, hotel master keys, power tools, musical instruments, cash register, and $19,990 in travelers checks, money orders and checks.

The primary charge of Possession of Stolen Property will entail a follow-up investigation concerning the perpetrating suspects.

The assisting agencies included:

Metropolitan Police Detective and Patrol Bureaus.

Nevada Parole and Probation.

Postal Inspectors Office.

Treasury Department—ATF Bureau.

North Las Vegas Police Department.

Secret Service.

Operation "Switch" facilitated an ultimate criminal goal, i.e., the conversion of stolen property and/or contraband into cash. Associated law enforcement agencies working together satisfied this goal with the final payments being arrests and criminal prosecutions.

ALABAMIAN BECOMES FIRST WOMAN LINE ADMIRAL

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. FLIPPO. Mr. Speaker, a native Alabamian has attained a landmark appointment in the history of the U.S. Navy. Adm. Fran McKee has become the first woman executing a nonmedical role to be promoted to the rank of rear admiral.

Highly deserving of this appointment, Admiral McKee had previously distinguished herself by being 1 of 10 women captains in the Navy, an honor she received in 1971. In that capacity her duties included commandeering all Naval personnel assigned to Fort George G. Meade and the National Security Agency.

In her new position, she supervises a wide range of Naval installations on shore because of the Federal law which restricts her from taking command of a combat ship. As a line admiral she is presently the Director of Naval Educational Development in Pensacola, Fla.

In the past, she has served the USN as a procurement officer, a personnel officer, and head of the Naval Women's Officer School in Newport, R.I.

Originally from Florence, Ala., her home State ties remain strong. Admiral McKee's sister, Mrs. Thomas (Bobbi) Pritchett, still resides there and is justly proud of her successful endeavors. The entire State, were they aware of her achievements, would likewise praise her.

Admiral McKee certainly deserves to be saluted for her numerous contributions to this country. Her extreme dis-

play of leadership as a naval offcer is most commendable.

I am proud that a former resident of our State and an alumna of the University of Alabama, through her skill, courage, effort, and endurance, has proved herself to be the epitome of a remarkable American. Admiral McKee has set an example to which every other member of the Armed Forces should address their attentions.

THE VIP'S VIP IN DALLAS

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. MILFORD. Mr. Speaker, the Adolphus Hotel, in Dallas, is the crossroad for the "Who's Who" of Dallas and the great Southwest. Industrialists, politicians, oil men, movie stars, and other notables constantly parade through the carpeted lobbies to clubs, meeting rooms, and the prestigious Adolphus Tower office suites.

Practically all of these famous people would be hard-pressed to tell you who is the general manager or the owner of the Adolphus complex. Yet, almost every one of the celebrities know Lloyd Johnson and are particularly proud that Lloyd knows them.

Lloyd Johnson, Jr., is an outstanding individual in Dallas, Tex., and a first-class citizen. Recently, Julia Scott Reed, an outstanding columnist for the Dallas Morning News, wrote an article about Mr. Johnson. Her great talent can best describe the attributes of Lloyd Johnson, Jr.

Mr. Speaker, I would like to include Miss Reed's column in the RECORD so that all Members of this Congress may come to know this Dallas VIP:

GARAGE MAN HAS LOVE FOR WORK

(By Julia Scott Reed)

Lloyd Johnson Jr. is a man with a genuine love for work and the job he does, who came from the cotton fields of Louisiana to the position of general manager of the Adolphus Hotel garage.

The oldest of 14 children of Mrs. Ollie Mae and Lloyd Johnson Sr., he grew up on a small farm at Opelousas and learned early in life that honest work was the road to success. "I never departed from it," he says.

Johnson came to Dallas 17 years ago, and by accident landed a job at the hotel as a parking attendant. Through dedicated and trusted service, he came up through the ranks to his present position.

"I love my job more and more each day," he said. "It really keeps me alive, and I hope to remain here until I'm too old to work. Then I will retire from this place."

Johnson said his bus ride from Louisiana brought him to Dallas, where he had a 2-hour layover and was "just shopping around" when he stopped to talk with the men at the Adolphus garage and was offered a job.

"I had become weary of picking cotton and digging potatoes, and told my mother I was going to travel a bit and started out for California, "he said.

"Dallas was a clean-looking city. I thought over the job offer and accepted a 12-hour night shift that paid 57c per hour plus tips, and stayed with it."

Johnson takes as much pride in being a handyman at the hotel as he does in being "boss" of his department.

While he assumes full responsibility of personnel floor management and payroll for his 16 employes, and is on 24-hour call at the garage, he fills in to help out in the Heidelberg Restaurant, sell newspapers at the desk, sweep the hotel lobby and mop the floors when help is short.

"I help out any place in the hotel where I'm needed," he said. "That's the only way to make an operation go, and we work together like a family."

Johnson has the same loyalty for his family. He quit school in the 10th grade and worked at various jobs to help put his eight brothers and five sisters through college.

He supports his 13-year-old daughter, Jeanette, whom he has had in private school since she was 3.

"I didn't have the opportunity to go to college, but I wanted to see my brothers and sisters make it, and my daughter must have the best," he said.

"She is a bright student, makes straight A's and I'm proud of it."

While Johnson never went to college, he made the best of what he had. He learned to drive an automobile at age 9.

"I had no dreams when I began driving a model T Ford, a truck and tractor, as a kid that someday it would be a start toward a career," he said.

Johnson is a member of the People Baptist Church, where he said he was invited by the Rev. S. M. Wright.

"He came into the garage one day and said he wanted to talk with me. He asked me to come to his church some Sunday, and I felt good about that, because he was the only black preacher that even spoke to me."

"Church attendance is a family tradition," Johnson said. "My father is a deacon in the Baptist church, my mother is an usher, and we were brought up in the church."

Johnson's activities, in addition to his church, include hunting and some golfing. "I don't get involved in many activities, because I want to be available if called to the job," he explained.

"That's the kind of loyalty that has gained for him the great respect of Leo Corrigan and Johnson's immediate supervisor, Grant (Papa) Baere," Ms. Stormy Meadows, public relations director for Hotel Adolphus, said.

APPELLATE REVIEW OF SENTENCES

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. RODINO. Mr. Speaker, the Advisory Committee on Criminal Rules of the Judicial Conference of the United States has drafted a proposed amendment to rule 35 of the Federal Rules of Criminal Procedure. The amendment would establish a new rule to deal with appellate review of sentences in Federal criminal cases.

This proposed amendment will be the subject of a public hearing on Thursday and Friday, January 13 and 14, in the eighth floor conference room of the Court of Claims Building here in Washington, D.C. Members of Congress who want further information about the proposed amendment or who are interested in testifying at the hearing are invited to contact the Judiciary Committee's Subcommittee on Criminal Justice (225–0406) or Bill Weller, the judicial conference's legislative liaison officer (382–1615).

PITT IS NO. 1

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, in a manner convincing enough to quiet the loudest skeptics, the University of Pittsburgh football team rolled over their Sugar Bowl opponent, Georgia, by a score of 27–3 on New Year's Day and wrapped up the national collegiate championship.

Both major wire services voted Pitt the Nation's best college team on the basis of their perfect 12-win season.

Pitt's rise to national prominence is all the more amazing since only 4 years ago their record was 1 win and 10 losses.

Much praise for Pitt's achievements must go to Head Coach John Majors, who came to Pitt when the school's football program was scraping the bottom. He turned that around by recruiting quality young men and produced four consecutive winning seasons, culminating with the current national championship team.

The sparkplug at Pitt during those 4 years was running back Anthony Dorsett, the man who holds more NCAA football rushing records than any player in history.

Dorsett was rewarded for his herculean feats this year by winning the coveted Heisman Trophy, symbolic of college football's outstanding player.

On behalf of Pittsburgh football fans, and fans everywhere, I want to salute each and every member of the University of Pittsburgh football team, the coaching staff, Athletic Director Cas Myslinsky, and Chancellor Wesley Posvar, for making this past year a joyous and exciting one for their followers.

I now wish to include in the RECORD newsstories from the Pittsburgh Press and Post Gazette on Pitt's final victory and Washington Post stories which announced Pitt's selection as the No. 1 team in the Nation:

[From the Washington Post]

PITTSBURGH NO. 1, MARYLAND 8TH IN FINAL AP POLL

As expected, the University of Pittsburgh was the runaway selection as college football's top team in the final Associated Press poll announced yesterday.

Maryland ended No. 8. The Terrapins finished the regular season unbeaten and ranked fourth and then were upended, 30–21, by Houston in the Cotton Bowl.

The national championship was officially settled in the bowl games, but it actually was decided in the season openers.

On Sept. 11, Pitt, ninth in the AP preseason poll, whipped Notre Dame, 31–10. A few hours later, Southern California, which started out No. 8, was trounced by Missouri, 46–25.

"I agree with that theory," said Pitt coach Johnny Majors, who is leaving to become head coach at Tennessee. "The Notre Dame game gave us a lot of impetus."

And Pitt's 27-3 Sugar Bowl triumph over Georgia climaxed a four-year rebirth, nailed down the Panthers' first national championship in 39 years and made them the first Eastern team to capture the No. 1 ranking since Syracuse in 1959.

Pitt officially was crowned national champion yesterday when the 12-0 Panthers re-

ceived 59 of 62 first-place votes and 1,234 of a possible 1,240 points from a nationwide AP panel of sportswriters and broadcasters.

[From the Washington Post]

TERPS 11TH IN UPI POLL; PITT No. 1

The United Press International board of coaches has rewarded Pittsburgh with final No. 1 ranking and punished Maryland with a demotion to No. 11 among college football powers for the Panthers' success and the Terps' failure after both took 11-0 records into the New Year's bowls.

Pitt becomes the first Eastern school since Syracuse in 1959 to be named national champion by UPI after capping its four-year renaissance under coach Johnny Majors by bombing Georgia in the Sugar Bowl, 27-3.

Houston, Maryland's 30–21 conqueror in the Cotton Bowl, supplanted the Terps in the No. 4 spot they occupied at regular season's end. And while Maryland was falling all the way out of the top 10, the Nos. 3 through 10 teams—Georgia was accorded 10th despite its walloping by already top-ranked Pitt—all had worse won-loss records than Maryland. Nebraska attained No. 7 despite three defeats and a tie.

Team:	Points
1. Pittsburgh (39) (12–0)	416
2. Southern California (3) (11–1)	376
3. Michigan (10–2)	258
4. Houston (10–2)	249
5. Ohio State (9–2–1)	163
6. Oklahoma (9–2–1)	158
7. Nebraska (8–3–1)	112
8. Texas A&M (10–2)	99
9. Alabama (9–3)	97
10. Georgia (10–2)	86
11. Maryland (11–1)	80
12. Notre Dame (9–3)	77
13. Texas Tech (10–2)	56
14. Oklahoma State (9–3)	22
15. UCLA (9–2–1)	20
16. Colorado (8–4)	17
17. Rutgers (11–0)	7
18. Iowa State (8–3)	5
19. (Tie) Baylor (8–2–1)	3
(Tie) Kentucky (8–4)	3

[From the Pittsburgh Press, Jan. 2, 1977]

PITT: HOW SWEET IT IS!—PANTHERS No. 1 FOR SURE AFTER JUNKING DOGS, 27–3

(By Russ Franke)

NEW ORLEANS.—Pitt left no doubt as to who is the No. 1 team in the nation yesterday when the Panthers completely outclassed fourth ranked Georgia, 27–3, before 76,117 fans in the Sugar Bowl.

The win gave Pitt a 12–0 record its best ever and no doubt the national also was the biggest win in the career of Johnny Majors, who coached Pitt for the last time after accepting the head job at Tennessee last month.

An overpowering defense and an explosive offense were convincing enough even to those who had been claiming that the winner of the Rose Bowl deserved greater consideration for the national title, and it was a stunning blow to the Georgia fans in the plush Superdome who felt that an upset over the slightly favored Panthers would earn their team consideration as No. 1.

Georgia's renowned Junkyard Dogs defense was not in the same league with Pitt's and Tony Dorsett and Matt Cavanaugh were at their best in putting the sting in the Pitt offense.

Dorsett broke the Sugar Bowl rush-record with 202 yards on 32 carries and Cavanaugh won the MVP award by completing 10 of 18 passes for 192 yards.

The Panthers established their domination early, intercepting four passes in the first half after shutting down the Bulldog running game.

There was no denying the Panthers on their second possession as they went to the air to burn the junkyard dogs defense twice on big plays. An 80-yard drive in 12 plays consumed more than five minutes and Matt Cavanaugh got the score when he stepped inside the left tackle on an option and went six yards.

With Georgia stopping the runs of Dorsett for short yardage, Cavanaugh passed 13 yards to Gordon Jones for a key first down at midfield and set up the touchdown with a 36-yard pass up the middle to wide open Elliott Walker.

Georgia was stumped by the Pitt defense for most of the first period, getting only a total of six yards in its first two possessions, and failing to make a first down until 1:34 was left.

Pitt penetrated across midfield early in the second period on Cavanaugh's 39-yard pass to flanker Willie Taylor, who broke a tackle at midfield and made it to the 38. The Panthers couldn't get a first down, and Carson Long's 54-yard field goal try was just short.

After Arnie Weatherington intercepted a pass at the 26, Pitt struck suddenly from deep in its own territory for the second score and it was Jones who flashed his speed and elusiveness for the big bomb. Cavanaugh hit Jones in the short secondary and Jones broke loose and skipped home on a 59-yard play. Long's kick made it 14–0.

Meanwhile, the Panther defense was showing up the Junkyard Dogs by keeping Georgia inside its own territory except for a personal foul penalty that gave the Bulldogs their first penetration in the middle of the second period. Pitt checked Georgia quarterback Ray Goff so effectively that he was replaced by Matt Robinson. Neither one was a puzzle to the Panthers, however.

Jim Cramer, Weatherington's partner at linebacker got the second interception and the Panthers turned it into another touchdown just before the end of the half. Dorsett finally cut loose on this drive, taking a pitchout for a 22-yard run to the Georgia 22, and after Cavanaugh hit Taylor on a 14-yard pass to the 13 and Walker dived for a first down at the 11, Dorsett swept around the right side for the TD. Long made it 21–0.

Georgia made it to the Pitt 39 on a penalty but Leroy Felder grabbed off the third interstole the fourth pass, his 10th of the season.

Georgia got its first break of the game just after the start of the third period when Walker dropped a handoff and Georgia's Lawrence Craft recovered on the Pitt. 25. The Pitt defense came through, however, holding the Bulldogs to two yards on three plays and overcame a face mask penalty and Georgia settled for Allan Leavitt's 25-yard field goal.

If Dorsett had been only mildly exciting up to the end of the third period, he was sensational in setting up Pitt's next score. Dorsett blazed through the middle for 67 yards to the 16 and would have gone all the way but for a saving tackle by Johnny Henderson. The Junkyard Dogs staged their best stand of the day and Long came in to kick an angled 42-yard field goal for a 24–3 lead.

The earlier fumble by Pitt was evened up in the middle of the fourth period when Goff dropped the ball and it was recovered on the Bulldog 23 by linebacker Al Chesley, subbing for the injured Cramer. The Dogs held for no gain on three plays and Long's 31-yard field goal increased the lead to 27–3.

With Tom Yewcic at quarterback, and all reserves on the field, the Panthers got to the Bulldog eight when time ran out.

[From the Pittsburgh Post-Gazette, Jan. 3, 1977]

THE PARTY LINE: ONE CHAMP, IT'S PITT

(By Marino Parascenzo)

NEW ORLEANS.—They gave a No. 1 party, and no one came. Not Woody, not Bo, and not John. Some said not Georgia and its Junkyard Dogs, either. And wouldn't you know it?—no champagne, either.

Not much of a party spirit, for that matter. The Pitt Panthers trotted back to their dressing room, to nothing wetter than a hot shower, wearing so-whats on their faces. Could this be the football team that had just won the national championship?

Well, it truly was all over, but the election. The landslide had already taken place. Georgias Bulldogs had just been buried on the Superdome turf, 27–3, in the 1977 Sugar Bowl. It hardly mattered that on that crisp Saturday New Year's afternoon, the Orange and Rose Bowls still had to be played.

Woody Hayes of Ohio State, angry at something, deduced that Pitt chose the Sugar in order to avoid playing the Colorado team he would meet. And in Pasadena, B Schembechler of Michigan and John Robinson of Southern Cal proclaimed that their Rose Bowl game would decide the national title, no matter what the rest of the country said.

Al Roama, Pitt middle guard, had his solution. "Did the Rose Bowl start yet?" he said bending to cut the tape from his ankles. "No? Well, go tell them to call it off. Tell them not to bother."

Pitt entered the Sugar Bowl No. 1 in both wire service polls. And when you've stepped out of the Sugar like a puppy coming out of a card house, and you've left No. 5 Georgia 10–2 and gasping in their own wreckage, why, all you need then is for the National Broadcasting Company to anoint you.

The official word on the unofficial national championship should be forthcoming shortly from the wire services. Meanwhile, the question remains, which play worked best—Dorsett off tackle, Cavanaugh-to-whoever, or a sweep through the French Quarter?

They've quit telling ethnic jokes in New Orleans. Now it's Pitt jokes. "The Georgia players are now in bed," said one television guy on the 11 p.m. news, "and Pitt is just getting dressed to go out. "Majors posted a curfew," another gag went. "He told them to be in by February.

It all began when Southern media people went pale when they learned that Johnny Majors, author of Pitt's success and now officially the Tennessee coach, let his player maintain their on-campus life style. Which meant no curfews until a couple of days before the game, and freedom to roam. At the same time, Georgia's players were being bed-checked something like 10:30 or 11.

Contrary to popular belief, both Biloxi, Miss., site of the first week's drills, and the French Quarter were still there at last look.

The Panthers, at first surprised by the reaction, missed few chances to embellish the notion they were the biz partying team out of the effete East.

Defensive tackle Don Parrish, for example, was limping toward the locker room on his sprained ankle. Someone wanted to know whether it was serious. "Oh, it will be all right," Parrish said, "soon as I have a couple drinks."

After the game, a Georgia fan at the Pitt hotel headquarters, noting the Georgia curfew, lifted his hands and sighed: "So much for clean living."

The game was over quickly. Pitt struck for a 21–0 lead in the first half—quarterback Matt Cavanaugh trotting six yards for the first touchdown, hitting receiver Gordon Jones on a 59-yard pass play for the second score, and Tony Dorsett swishing 11 yards for the third. Then, aside from two field goals by Carson Long, Pitt sat in the second half. "We wanted to eat up the clock," Majors said. Get it over with he meant.

The Panthers had to survive not only the nightlife, but also a bout of virus that put down about eight players and 4 chil-

dren accompanying the teams as well as the boisterious nagging of Georgia fans.

A large contingent lodged at the Marriott where the Pitt team stayed. What started as good fun degenerated into harassment Pitt players found barely bearable. One night, a lobby mob refused to part and let Dorsett and tight end Jim Corbett reach the elevators.

At the Superdome, it was Pitt's turn. While Dorsett was rushing to a Sugar Bowl record of 202 yards and Cavanaugh was picking up Most Valuable Player Award, the Pitt people joked.

The jokes were perfectly awful. "It's a dog's life." "Their bark is worse than their bite." "They're more bull than dog." Like that. But they had a kind of healing effect on the sores of that pre-game abuse.

What was happening was that Georgia's 1,000-yard rusher, Kevin McLee of Uniontown, Pa., was kept busy getting 48 yards in his 14 carries. And quarterback Ray Goff, the Southeastern Conference's player of the year, who had 724 for the year, got 76. Goff and three other Bulldogs quarterbacks got off a total of 22 passes. Three were completed to Georgia guys and four to Pitt guys. Pitt also took in two fumbles, improving on its average of four turnovers per game.

The tale is complete in the Sugar's profit-and-loss statement. The Georgia offense had averaged 336 yards and 29 points per game. It got 181 and 3. The Junkyard dog defense had allowed averages of 271 yards and 10 points. It gave up 480 and 27.

One of Georgia's quarterbacks was Tony Flanagan, 6-3 sopohomore, who is also a standout on the Georgia basketball team. Dooley called on Flanagan midway through the fourth quarter to get something started Anything. Flanagan dropped back to pass on his first play, and was crushed for an eight-yard loss by Pitt defensive tackle Randy Holloway.

It was a clumsy social moment for Holloway. He and Flanagan had become friends playing together in an all-Star basketball tournament in Sharon, Pa., some years earlier. What do you say to an old friend you just planted?

"Well, uh . . ." Holloway paused, embarrassed. "I said, well, uh, 'Hello Tony.' "

Flanagan wasn't invited to the post-game party. It wasn't a farewell party thrown by Majors, who left early yesterday for Hawaii and the Hula Bowl with Dorsett, Romano, and Corbett. It was a welcome party thrown by Jackie Sherrill, the new Pitt coach. Well, at least he was off to a right start.

TWO BERLINS CONTRAST FREE ENTERPRISE PRINCIPLES

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 10, 1977

Mr. FLIPPO. Mr. Speaker, one of the Nation's most active textile manufacturers, Mr. J. Craig Smith of Birmingham, Ala., recently received the Free Enterprise Award sponsored by the Farm-City Committee of Alabama and Alabama District, Kiwanis International.

His acceptance remarks vividly contrast the advantages of democracy and free enterprise as observed in West Berlin and East Berlin.

Because his observations point out so clearly the value of an open system of government in West Berlin, I include Mr. Smith's comments as part of my remarks at this point:

REMARKS OF J. CRAIG SMITH

A few days ago, I returned from a visit to West Berlin. While there, I made a one-day visit to East Berlin. The contrast between the two cities must be seen to be believed.

West Berlin, dedicated to the principles of democracy and free enterprise, is bustling with activity. Its citizens have a standard of living equal to ours. There is complete freedom of speech and of the press. The night life is glamorous. Their money has appreciated in value compared to all other money in the world, including ours. The city is surrounded by one hundred miles of wall built by the Communists. No one in West Berlin wants to be on the other side of the wall. Nearly every day, some East German risks his or her life in an effort to escape communism. A few are successful.

Visitors to East Berlin must pass through "Check-Point Charlie." No visitor can bring in any newspaper or other printed matter. All money must be declared and accounted for at time of exit. The inhabitants of East Berlin seem listless and hopeless. Their standard of living is low, although the government heavily subsidizes both housing and public transportation.

Luxuries such as tea, coffee, and alcoholic beverages are priced far beyond the reach of the average citizen. There are queues of people at most stores and restaurants waiting to buy scarce goods. No one wants the East German money. It is easy to understand why foreign money has to be accounted for at the time of leaving. I have never seen automobiles more thoroughly searched than the ones going back to West Berlin. Mirrors are placed under the cars to detect any East German who might be trying to escape. The guards even probe the gasoline tanks.

I mention the differences between West Berlin and East Berlin in some detail because the contrast is accounted for entirely by their two systems of government. When the Russians took charge of East Berlin and the Americans, British, and French took charge of West Berlin, there was only one city, with the same people. Thirty years later, we have the two situations I have briefly described.

Early in his administration, I hope that President-elect Carter and his Secretary of State will find time to visit the two Berlins. I believe they will conclude, as I did, that until the wall around West Berlin is removed, and until the fortified barbed-wire fences which stretch across the continent of Europe and which we call the Iron Curtain are torn down, talk of détente is somewhat ridiculous.

It is impossible for any of us to have any true appreciation of what we have in this country resulting from competitive free enterprise and the form of government bequeathed to us by our forebearers unless and until we see what other people have around the world.

I commend each of you for the tremendous effort you have made and are making to educate the American people in respect to the priceless value of what we have. I have been trying to think of an award I would rather receive than the one you have given me. Nothing has come to my mind. I am deeply grateful.

UKRAINIAN INDEPENDENCE DAY

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. BRODHEAD. Mr. Speaker, the people of the United States feel a close moral kinship to the people of the Ukraine, who continue to maintain their unique cultural heritage in spite of the Soviet Union's efforts to suppress their national character and freedoms. January 22 marks the 59th anniversary of Ukrainian independence, and I wish to salue the indominable spirit of the Ukrainian people.

The fall of the Russian Czar was the signal for bursting enthusiasm throughout the Ukraine. Despite the systematic attempts of the Russian Government to suppress Ukrainian ideals and aspirations, the goal of freedom has survived. Since its formation in March 1917, the Ukrainian Central Rada, through a series of important acts, led Ukraine through a turbulent period, establishing first an autonomous state and then proclaimed a full-fledged independent and sovereign state of the Ukrainian people.

However, the Ukrainians enjoyed their long-awaited fredom only briefly. The invading Russian troops forced the government into exile and established the Ukrainian Soviet Socialist Republic in 1923 which immediately surrendered Ukrainian independence in favor of the Union of the Soviet Socialist Republics.

The Ukrainian people in the free world have since commemorated January 22 as a Ukrainian Independence Day and used this opportunity to keep the flame of hope burning in the hearts of the enslaved Ukrainians who long for their denied but God-given rights of national, individual, cultural and religious freedom.

TAX PENALTIES RESULTING FROM ELIMINATION OF SICK PAY EXCLUSION

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mrs. KEYS. Mr. Speaker, the implementation of the Tax Reform Act of 1976 has placed an unexpected burden upon many Federal retirees and other taxpayers. Changes made by the Congress in the treatment of sick and disability pay, foreign income, and child care expenses among others has retroactively increased the 1976 tax liability of many individuals.

The largest group of taxpayers affected are Federal retirees who previously took advantage of the $100-a-week sick pay exclusion. The exclusion of up to $5,200 a year has now been limited to those under 65 who have retired on a permanent and total disability. Thus, retirees who expected to utilize the sick pay exclusion in 1976 may find they have failed to withhold sufficient funds to cover their new tax liability. Without remedial legislation, those who have failed to withhold adequate taxes may be subject to the imposition of a penalty by the IRS.

The legislation which I am introducing would assure that no taxpayer is assessed a penalty as a result of changes in the tax law.

Section 1 of the bill would allow individual taxpayers until April 15, 1977—corporations until March 15, 1977—to pay their full 1976 income tax liabilities

without incurring any additions to tax on account of underpayment of the estimated tax, if the underpayment is attributable to the Tax Reform Act of 1976.

Section 2 would relieve employers of any liability for failure to withhold, during 1976, on sick pay and other types of remuneration which were made taxable by the 1976 act.

Section 3 would relieve taxpayers with short taxable years or with fiscal years ending before December 31, 1976, from any interest through April 15, 1977—corporations through March 1977—on underpayments attributable to changes made by the 1976 legislation.

The bill I am introducing does not alter the actual tax liability of any taxpayer under the Tax Reform Act. It simply provides equitable treatment for those taxpayers affected by the recent changes in the law. I hope it will receive your support.

WAIVER OF CERTAIN TAX PENALTIES

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. BEDELL. Mr. Speaker, I wish to focus the House's attention on an unintended problem created by the Tax Reform Act of 1976.

The section in question has to do with the repeal of the sick pay exclusion which means that under the new law, people receiving sick pay have to pay tax on it. Laying aside any problems one may have with this provision, I wish to draw attention to the effective date, January 1976. In other words, this is a retroactive tax.

Furthermore, under the new law, people who fail to make proper estimated tax payments on their sick pay by January 15, 1977 are technically subject to penalties.

I would like to waive those penalties for the 1976 tax year. Accordingly, I have today introduced legislation to do this and I hope it will get prompt attention from this body.

Specifically, my legislation would work as follows. Under current law one must pay quarterly estimated tax payments on sick pay. The last payment is due January 15, 1977. If your estimated tax payments add up to less than 80 percent of your final tax you are subject to a fine. Since the sick pay provision was changed late last year, a lot of people who received sick pay will not have paid the proper estimated tax and will therefore be subject to these fines. I think this is unfair since these people have not had adequate time to make the proper payments. I would simply waive these penalties for 1976 only. Recipients of sick pay will still have to pay tax on it but they will not be subject to the penalties this year.

I have received mail on this retroactive date problem from people who tell me that it will work a real hardship on them to suddenly have to pay taxes on sick pay retroactive to last January.

While I sympathize with this problem, I understand that in order to change the effective date, Congress would have to revise the budget resolution and I do not think we ought to do that.

It seems to me that a retroactive tax is highly undesirable and it tends to further undermine people's confidence on our Government. The least we can do is to waive any penalties which would accumulate because of this unfortunate situation.

The Internal Revenue Service has deferred collection of any penalties until April 15 in order to give Congress time to enact legislation such as I have proposed. Hopefully we can move quickly on this matter.

H.R. 952—THE MINIMUM INCOME MAINTENANCE ACT

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. KOCH. Mr. Speaker, for the last 6 months, I have been preparing the Minimum Income Maintenance Act, H.R. 952, which was introduced on January 4, 1977.

I have prepared a summary of that legislation and have shared that summary with my colleagues in the Congress, the Governors of the 50 States, many welfare experts and President-elect Carter. Much interest in this legislation has been expressed, and I have received many requests for actual copies of the legislation. Therefore, today I would like to place a copy of the text of the bill in the RECORD and would like to invite comments on its content and the cosponsorship of my colleagues. A copy of the bill follows:

H.R. 952

A bill to amend the Social Security Act to replace existing Federal public assistance and welfare programs with a single program under which all residents of the United States are guaranteed an adequate minimum income, with incentives to work for those who are able to do so, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Minimum Income Maintenance Act".

SEC. 2. (a) The Social Security Act is amended by adding at the end thereof the following new title:

"TITLE XXI—MINIMUM INCOME MAINTENANCE BENEFITS

"PURPOSE; APPROPRIATIONS

"SEC. 2101. For the purpose of establishing and implementing a national program to guarantee a minimum adequate income for all qualified residents of the United States, there are authorized to be appropriated sums sufficient to carry out this title.

"BASIC ELIGIBILITY FOR BENEFITS

"SEC. 2102. Every individual residing in the United States who is determined under section 2103 to be an eligible individual for purposes of this title shall, in accordance with and subject to the provisions of this title, be paid minimum income mantenance benefits by the Secretary of Health, Education, and Welfare (hereinafter in this title referred to as the 'Secretary').

"ELIGIBILITY FOR BENEFITS

"SEC. 2103. (a) Subject to subsection (b), every individual who is a resident of the United States and—

"(1) who is either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 203(a)(7) or section 212(d)(5) of the Immigration and Nationality Act), and

"(2) whose income (as determined under section 2106) is at a rate of not more than the applicable guarantee level (as determined under section 2105), shall be an eligible individual for purposes of this title.

"(b) Only one member of a family may be an eligible individual for purposes of this title. Benefits paid to any eligible individual who is a member of a family consisting of two or more persons shall be deemed paid to such individual for and on behalf of all of the members of such family.

"(c) The Secretary (in the regulations prescribed under section 2111) shall define the term 'family' for purposes of this title, in a manner sufficiently broad to promote the preservation of the typical family unit to the maximum extent while appropriately recognizing the family relationships of other groups of related individuals who are living together or are mutually dependent, and shall in any event include within such term single individuals who are not dependents of other persons. The Secretary (in such regulations) shall also provide for the determination of the particular member of a family consisting of two or more individuals who is to be the eligible individual in such family for purposes of this title.

"AMOUNT OF BENEFITS

"SEC. 2104. The benefit under this title for any eligible individual shall be payable, for months in any calendar year (unless section 3(c)(2) of the Minimum Income Maintenance Act applies), at a rate equal to—

"(1) one-half of the applicable guarantee level (as determined for such calendar year under section 2105), reduced by

"(2) one-half of the amount of such individual's income (as determined for such year under section 2106).

"GUARANTEE LEVEL

"SEC. 2105. (a) For purposes of this title, the term 'guarantee level' with respect to a family of a given size and composition residing in a particular political subdivision (as determined for purposes of this section under subsection (c)), in any calendar year, means the amount of the lower budget for a family of that size and composition in that subdivision as established for such year by the Bureau of Labor Statistics in the Department of Labor and promulgated by the Secretary as provided in subsection (b). In establishing such amounts the Bureau shall utilize the most recent information and data which may be available on costs, incomes, budget levels, and consumption patterns, and shall take fully into account variations in consumption patterns as between different areas and regions and as between families of different sizes and compositions.

"(b) The Bureau of Labor Statistics shall establish and certify to the Secretary on or before October 1 of each year, for purposes of and in accordance with subsection (a), the lower budget for families of various sizes and compositions within each political subdivision in the United States (as determined for purposes of this section under subsection (c)); and the Secretary shall, on the basis of such certification, promulgate the guarantee levels which are to be applica-

ble for purposes of this title during the succeeding calendar year.

"(c)(1) For purposes of this section, the term 'political subdivision' means—

"(A) a standard metropolitan statistical area as established by the Office of Management and Budget, and

"(B) any other area designated as a political subdivision for such purposes under paragraph (2).

"(2) The Secretary, in cooperation with the various States, shall designate all of the areas within each State which are not included in any standard metropolitan statistical area as a single political subdivision for purposes of this title or shall divide such areas into two or more parts and designate each of them as a political subdivision for such purposes. In determining the number, size, and location of the political subdivisions to be designated in any State under the preceding sentence, the Secretary shall endeavor to include within the same political subdivision all of the areas in such State in which the cost of living is approximately the same and other economic conditions are substantially similar.

"INCOME

"SEC. 2106. (a)(1) For purposes of this title (subject to paragraph (2) of this subsection and to subsections (b), (c), and (d)), the term 'income' with respect to any individual for any period means all earned and unearned income attributable to that period which is received or derived by or furnished to such individual in cash or kind from any source (public or private), including all such income which is received or derived by or furnished to other members of such individual's family, without regard to whether it would constitute or be included as income of such individual for any other purpose or under any other law. Such term includes the cash value of all support, maintenance, assistance, benefits, subsidies, rights, and other items which are furnished, provided, or made available directly or indirectly to such individual (or any other member of his or her family).

"(2) The term 'income' does not include (A) any benefit or assistance payable to or on behalf of any individual under a State plan approved under title XIX of this Act, or (B) any lump-sum payment of periodic cash benefits or assistance, under any law or any public or private plan or program, to the extent that such payment represents benefits or assistance due for periods prior to the month in which it is made.

"(b) The amount of an individual's income as otherwise determined under subsection (a) shall be reduced by any costs incurred for day care which is necessary in order to permit such individual (or any other member of his or her family) to obtain or perform employment, by taxes, and by any other work-enabling expenses (as defined in the regulations prescribed by the Secretary under section 2111).

"(c) The amount of the income of a family as otherwise determined under subsections (a) and (b) for any year shall be increased by $100 for each full $10,000 by which the aggregate value of the assets and resources of such family (other than assets and resources actually producing income which is counted under subsection (a) without regard to this subsection), as determined in accordance with the regulations prescribed under section 2111, exceeds $10,000.

"(d) The Secretary may prescribe circumstances under which—

"(1) the gross income derived by an individual or family from one or more trades or businesses, will be sufficient to render such individual or family ineligible by reason of his, her, or its income (or the availability of such income) for benefits under this title; and

"(2) payments in kind, vendor payments, and charitable payments may be excluded from the income of an individual or family because of the small amount of such payments or the administrative difficulty of determining the value of the items or services involved.

"WORKS REQUIREMENTS

"SEC. 2107. (a) Under and in accordance with the regulations prescribed by the Secretary under section 2111, every eligible individual not specifically exempted under subsection (b) (and every member of his or her family not so exempted) shall be required, as a condition of such individual's entitlement to receive benefits under this title, to register for services, training, and employment in a work incentive program established by part C of title IV and to make all possible active efforts to secure and hold employment.

"(b) The requirement in subsection (a) that every eligible individual register and seek employment shall not apply to any individual who is—

"(1) a child under age 16 or attending school full time;

"(2) ill, incapacitated, or of advanced age;

"(3) so remote from a work incentive program that his or her effective participation is precluded;

"(4) a person whose presence in the home is required because of the illness or incapacity of another member of the household; or

"(5) a mother or other relative of a child under the age of 6 who is caring for such child.

"(c) Notwithstanding any other provision of this title, no benefits shall be paid to any eligible individual under this title during any period in which such individual (or any member of his or her family), unless specifically exempted under subsection (b), is not registered and actively seeking or performing employment as required by subsection (a).

"ADMINISTRATIVE, PROCEDURAL, AND MISCELLANEOUS PROVISIONS

"SEC. 2108. (a)(1) This title and the program of benefits established by this title shall be administered by the Secretary wholly through the personnel and facilities of the Department of Health, Education, and Welfare.

"(2) An individual's eligibility for benefits under this title and the amount of such benefits shall be determined for each calendar quarter, and in the case of any such quarter (to the extent that income is a criterion) shall be based on such individual's income as reported for the preceding quarter. Eligibility for and the amount of such benefits for any quarter shall be redetermined at such time or times as may be provided by the Secretary.

"(3) Every application for benefits under this title shall be processed and finally acted upon by the Secretary within a period of 30 days after it is filed. If any such application is not finally acted upon within such period, the application shall (at the close of such period) be deemed to have been approved; and any benefits paid pursuant thereto prior to the Secretary's final determination shall in no event be considered overpayments for purposes of subsection (c) solely because the individual or family involved is ultimately determined not to be eligible for such benefits.

"(4) For purpose of this subsection an application shall be considered to be effective as of the first day of the month in which it was actually filed.

"(b)(1) Benefits under this title shall be paid at such time or times and in such installments at will best effectuate the purposes of this title, as determined under regulations (and may in any case be paid less frequently than monthly where the amount of the monthly benefit would not exceed $10).

"(2)(A) Subject to subparagraph (B), payments of the benefit of any eligible individual shall be made to such individual or to another member of his or her family, or partly to each.

"(B) If the Secretary deems it appropriate in the circumstances of a particular case, such payments may instead be made in whole or in part—

"(i) to any other person (including an appropriate public or private agency) who is interested in or concerned with the welfare of such individual (or family), or

"(ii) directly to one or more persons furnishing food, living accommodations, or other goods, services, or items to or for such individual (or family).

"(3) The Secretary may make to any individual initially applying for benefits under this title who is presumptively eligible for such benefits and who is faced with financial emergency a cash advance against such benefits in an amount not exceeding $100.

"(c) Whenever the Secretary finds that more or less than the correct amount of benefits has been paid with respect to any individual, proper adjustment or recovery shall, subject to the succeeding provisions of this subsection, be made by appropriate adjustments in future payments to such individual or otherwise. The Secretary shall make such provision as he finds appropriate in the case of payment of more than the correct amount of benefits with respect to an individual with a view to avoiding penalizing such individual who was without fault in connection with the overpayment, if adjustment or recovery on account of such overpayment in such case would defeat the purposes of this title, or be against equity or good conscience, or would (because of the small amount involved) impede the efficient or effective administration of this title.

"(d)(1) The Secretary is directed to make findings of fact, and decisions as to the rights of any individual applying for payment under this title. The Secretary shall provide reasonable notice and opportunity for a hearing to any individual who is or claims to be an eligible individual and is in disagreement with any determination under this title with respect to the eligibility of such individual for benefits, or the amount of such individual's benefits, if such individual requests a hearing on the matter in disagreement within sixty days after notice of such determination is received, and, if a hearing is held, shall, on the basis of evidence adduced at the hearing affirm, modify, or reverse his findings of fact and such decision. The Secretary is further authorized, on his own motion, to hold such hearings and to conduct such investigations and other proceedings as he may deem necessary or proper for the administration of this title. In the course of any hearing, investigation, or other proceeding, he may administer oaths and affirmations, examine witnesses and receive evidence. Evidence may be received at any hearing before the Secretary even though inadmissible under the rules of evidence applicable to court procedure.

"(2) Determination on the basis of any such hearing shall be made within 60 days after the individual requests the hearing as provided in paragraph (1).

"(3) The final determination of the Secretary after a hearing under paragraph (1) shall be subject to judicial review as provided in section 205(g) to the same extent as the Secretary's final determinations under section 205.

"(e) The provisions of section 207 and subsections (a), (d), (e), and (f) of section 205, and the first, second, third, fourth, and seventh sentences of section 206(a), shall apply with respect to this part to the same extent as they apply in the case of title II.

"(f) The Secretary shall prescribe such requirements with respect to the filing of applications, the suspension or termination of assistance, the furnishing of other data and material, and the reporting of events and changes in circumstances, as may be necessary for the effective and efficient administration of this title.

"(g) The head of any Federal agency shall

upon request provide such information as the Secretary needs for purposes of determining eligibility for or amount of benefits under this title, or verifying other information with respect thereto.

"(h) The Secretary may make such administrative and other arrangements as may be necessary or appropriate to carry out his functions under this title.

"(i) For purposes of this title, the term 'United States', when used in a geographical sense, means the 50 States and the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

"(j) Whoever—

"(1) knowingly and willfully makes or causes to be made any false statement or representation of a material fact in any application for any benefit under this title,

"(2) at any time knowingly and willfully makes or causes to be made any false statement or representation of a material fact for use in determining rights to any such benefit,

(3) having knowledge of the occurrence of any event affecting (A) his or her initial or continued right to any such benefit, or (B) the initial or continued right to any such benefit of any other individual in whose behalf he or she has applied for or is receiving such benefit, conceals or fails to disclose such event with an intent fraudulently to secure such benefit either in a greater amount or quantity than is due or when no such benefit is authorized, or

(4) having made application to receive any such benefit for the use and benefit of another and having received it, knowingly and willfully converts such benefit or any part thereof to a use other than for the use and benefit of such other person,

shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned for not more than one year, or both.

"FUNCTIONS AND RESPONSIBILITIES OF INSPECTOR GENERAL

"SEC. 2109. In addition to the functions specifically vested in him by title II of Public Law 94-505 and in connection with the performance and execution of those functions, the Inspector General in the Department of Health, Education, and Welfare shall have responsibility for—

"(1) conducting all audits and investigations relating to the program under this title which may be necessary or appropriate,

"(2) developing and coordinating measures and activities designed to promote economy and efficiency in the administration of this title,

"(3) preventing and detecting fraud and abuse in the program under this title, and instituting such legal and administrative actions as may be necessary to enforce the provisions and requirements of this title and to prosecute persons engaged in such fraud and abuse or in other violations of such provisions and requirements; and

"(4) keeping the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of this title and the necessity for and progress of appropriate corrective action.

"PROHIBITION AGAINST STATE SUPPLEMENTATION

"SEC. 2110. (a) It is the policy and purpose of the United States that the program of benefits under this title is to be the exclusive source of public assistance and welfare payments for needy and indigent individuals and families within the United States, and that no State or political subdivision thereof should be required or permitted to supplement the payments provided for under this title.

"(b) If any State or any political subdivision of a State, on or after the effective date of this title, provides assistance to individuals or families on the basis of their need or measured by their income, regardless of the form of such assistance and whether or not it is specifically designated as being provided in supplementation of the benefits payable under this title, the amount or value of such assistance shall (subject to subsection(c)) be deducted from any amounts to which such State (and its political subdivisions) would otherwise be entitled under title XIX of this Act or under other programs established pursuant to Federal law.

"(c) In accordance with the regulations prescribed under subsection (d), the Secretary may waive the application of subsection (b) with respect to specifically designated types of assistance and particular classes of individuals upon a determination that the provision of such assistance to those individuals (by a State or political subdivision) is appropriate and desirable, and in the public interest, notwithstanding the policy and purpose set forth in subsection (a).

"(d) The Secretary, in consultation with the Secretary of the Treasury, shall prescribe such special regulations as he may deem necessary or appropriate to carry out this section and achieve its purpose.

"REGULATIONS

"SEC. 2111. The Secretary, after giving reasonable notice and opportunity for hearing to interested organizations, groups, and individuals, shall from time to time prescribe such regulations as may be necessary or appropriate to carry out this title. The regulations so prescribed may include such special provisions relating to qualification for benefits, computation of benefits, administration, and enforcement, not inconsistent with the specific provisions of this title, as the Secretary finds will promote the achievement of the objectives of the program under this title."

(b)(1) Part A of title IV of such Act (relating to aid to families with dependent children), and title XVI of such Act (relating to supplemental security income benefits), are repealed.

(2) Titles I, X, XIV, and XVI of such Act (relating to State plan programs of aid or assistance to the aged, blind and disabled), to the extent otherwise applicable, are repealed.

(3) The Food Stamp Act of 1964 is repealed.

(c)(1) Subject to paragraph (2), the amendment made by subsection (a) and the repeals made by subsection (b) shall become effective on the first day of the first month beginning more than one year after the date of the enactment of this Act.

(2) Notwithstanding such amendment and such repeals, in any case where—

(A) an individual who is determined to be an eligible individual under section 2103 of the Social Security Act, for any month qualifying as an alternative computation month under paragraph (3), was receiving (or was a member of a family or household receiving)—

(i) aid to families with dependent children under a State plan approved under part A of title IV of the Social Security Act, or a supplemental security income benefit under title XVI of such Act, and

(ii) assistance under the Food Stamp Act of 1964,

for the month immediately prior to the month referred to in paragraph (1), and

(B) the amount of the minimum income maintenance benefit to which such individual is entitled for such alternative computation month under title XXI of the Social Security Act (without regard to this paragraph) is less (as determined in accordance with the regulations issued under section 2111 of such Act) than the aggregate amount of the aid or benefit and assistance which he or she (or the family or household of which he or she is a member) would be receiving for such alternative computation month under the provisions of law referred to in clauses (i) and (ii) of subparagraph (A) if such provisions of law, as in effect for the month immediately prior to the month referred to in paragraph (1) had continued in effect until the close of such alternative computation month,

the minimum income maintenance benefit to which such individual is otherwise entitled under title XXI of the Social Security Act for such alternative computation month shall be increased to the extent necessary to make such benefit equal to the aggregate amount referred to in subparagraph (B).

(3) For purposes of paragraph (2), a month qualifies as an alternative computation month with respect to any eligible individual only if such month is—

(A) the month referred to in paragraph (1), or

(B) a subsequent month included in a continuous period of months, beginning with the month referred to in paragraph (1) and ending with the twenty-fourth month thereafter, for each of which such individual's minimum income maintenance benefit under title XXI of the Social Security Act was increased under paragraph (2).

SEC. 3. The Secretary of Health, Education, and Welfare, in consultation with the Secretary of Labor and the Secretary of Agriculture, as soon as practicable but not later than 120 days after the date of the enactment of this Act, shall submit to the House of Representatives and the Senate a draft of any technical, conforming, or other changes in the Social Security Act, the Food Stamp Act of 1964, and related laws which are necessary to reflect the changes in substantive provisions of law made by this Act.

ZORA NEALE HURSTON: AUTHOR, FOLKLORIST AND ANTHROPOLOGIST

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. BENNETT. Mr. Speaker, the Citizens for Community Action from my district have asked that the following statement about Zora Neale Hurston be included in the RECORD. In honor of her fine accomplishments for humanity I am glad to do this.

ZORA NEALE HURSTON—AUTHOR, FOLKLORIST AND ANTHROPOLOGIST

Zora Neale Hurston was one of Florida's and the Nation's greatest literary giants. She was the author of four novels, two collections of folklore, and an autobiography. She published over fifty short stories and essays in magazines as dissimilar as Stylus, Opportunity American Folklore Society Magazine, Journal of American Folklore, Story, The World Tomorrow, Survey-Graphic, John O'London's Weekly, Saturday Evening Post, The American Mercury, Negro Digest and she was once featured on the cover of the Saturday Review.

Ms. Hurston was born January 7, 1901 in Eatonville, Florida, the first all black town to be incorporated in America. She was one of eight children born to John and Lucy (Pots) Hurston. Her father was a Baptist Preacher, Carpenter and Mayor of Eatonville for three terms. Zora's mother was a woman devoted to her children and their education and always admonished them to "Jump for the Sun".

The formal education of Ms. Hurston began in the public school at Eatonville. At the age of nine, she enrolled in the Florida Baptist Academy at Jacksonville, Florida (now the Florida Memorial College at Miami, Florida). She completed her high school education at the Morgan Academy at Morgan College in Baltimore, Maryland.

The college career of Ms. Hurston was com-

menced at Howard University where she was influenced by the Harvard trained Dr. Lorenzo Dow Turner, head of the English Department.

She studied under the overpowering E. C. Williams, Librarian and head of the Romance Language Department. But the person that made the lasting impression on Zora Neale Hurston was Dr. Alain Leroy Locke, who headed the University Philosophy Department.

Zora Neale Hurston joined the Stylus, (the literary society at Howard), which was limited to nineteen members including two faculty members of which Dr. Alain Leroy Locke was the presiding genius. She joined the Zeta Phi Beta Sorority; wrote for the school paper which she named The Hilltop and she wrote short stories for the Stylus.

Later, two of her short stories; "Drenched in Light" and "Spunk" were published in the Opportunity Magazine which was edited by Charles S. Johnson. She won a prize for the latter article and because of that article she was offered a job by Fannie Hurst as her Secretary and Annie Nathan Meyer obtain her a scholarship to Barnard College at Columbia University.

She changed her major from English to Anthropology. Her teachers consisted of the leading scholars in the Nation: Dr. Gladys Reichard, Dr. Ruth Benedict and Dr. Franz Boas of the Department of Anthropology of Columbia University. In 1928 Ms. Hurston graduated from Barnard College with a "B" average.

In that same year, Ms. Hurston became a member of the American Folk-Lore Society. Later, she was invited to become a member of the American Ethnological Society and shortly thereafter, she became a member of the American Anthropological Society.

Two weeks after she obtained her degree, Ms. Hurston received a fellowship to go to the South to collect black folk-lore and to begin her career as a Folklorist.

The years between 1930 to 1940 were the most productive years of Ms. Hurston's career. In the Winter of 1932, she produced a program of Negro Spirituals and work songs at the John Golden Theatre in New York. She gave three folk concerts at Rollins College at Winter Park, Florida. In August of 1933, the Story Magazine published one of her short stories entitled "Gilded Six-Bit". In October of that same year, she wrote her first book, a novel, "Jonah's Gourd Vine" in Sanford, Florida.

In 1935 she published her second book, "Mules and Men," a study of Negroe folklore of Florida. This material was gathered while Ms. Hurston had a Rosenwald Fellowship.

In 1937 Ms. Hurston published her second novel, "Their Eyes Were Watching God." She obtained two Guggenheim Fellowships and went to Haiti and the British West Indies to study Voodoo. As the result of this study, she published her book, "Tell My Horse" in 1938. Also in 1938 and 1939, she worked for the W.P.A. in Florida doing Folklore and Field work. Ms. Hurston wrote her third novel, "Moses, Man of the Mountain" in 1939 and Morgan College awarded her a Litt. D. that same year.

Ms. Hurston worked as a writer at Paramount studies in Hollywood. While at this job, she wrote her autobiography, "Dust Tracks On A Road" in 1942. After this time, she wrote drama for a time at North Carolina College in Durham. In 1948, she wrote her last novel "Seraph On The Suwanee."

During the first part of the 50's, she was a free-lance writer. She worked for awhile as a librarian at Patrick Air Force Base. Her last employment were with the Chronicle Newspaper and Lincoln Park Academy in Fort Pierce, Florida.

Zora Neale Hurston died on January 28, 1960 as the result of a stroke.

In the 59 years of her life she became in fact what one reads on her grave marker: Zora Neale Hurston, "A Genius of The South" 1901–1960. Folklorist, Anthropologist.

INCIDENTS INVOLVING OIL TANKERS

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. EDGAR. Mr. Speaker, we are all aware of the recent rash of incidents involving oil tankers in or near U.S. waters. Of particular concern to me has been the grounding of the *Olympic Games*, and subsequent oil spill, in the Delaware River on November 27th. This occurred in precisely the same place as the collision between the tankers *Corinthos* and *Queeny* in 1975, which resulted in a catastrophic explosion and much loss of life. Fortunately, no one was injured in last month's incident, but the *Olympic Games* did spill some 134,000 gallons of oil into the Delaware River, some of which has spread and caused significant ecological damage despite the best efforts of cleanup crews.

Mr. Speaker, the series of tanker accidents over the past month is the clearest possible proof that we are living on borrowed time. We must discover whether the already broad regulatory authority vested in the Department of Transportation and Coast Guard is being used to the best advantage.

We must investigate the possibilities of traffic control using electronic means and provide for better advance cleanup preparations in likely oil spill areas. We must take steps to further research and development efforts in the area of oil spill cleanup in general and cleanup on the open sea in particular. It has been reported in the press that a 100-ton ocean-going cleanup vessel being built for the Gulf Oil Co. is about to be launched in Massachusetts. Such a ship might have been of great help in controlling the massive spill resulting from the wreck of the *Argo Merchant* off Nantucket last December 15.

The technology for these ships appears to be available and it seems to me logical in the light of recent events to speed their development. We should also immediately reconsider legislation introduced in the last Congress which would establish the liability of shipowners for the damage caused by spills from their ships and set up a fund to pay for damages in cases where liability was either not found or was insufficient.

A great deal has been said recently about the fact that most of the tankers involved in the incidents of the last month have been registered in Liberia. It is undoubtedly true that Liberia's standards for the regulation of its ships are less stringent than our own. But it is also true that Liberia operates about 30 percent of the world's tankers, or approximately 1,000 ships, and it is to be expected that her vessels would be involved in more accidents. The Coast Guard, after investigating the recent accidents, has concluded that the circumstances differ sufficiently in each case so that the fact of Liberian registry seems coincidental.

The United States, of course, has great latitude in regulating shipping in its waters and could tomorrow impose severe restrictions on tanker operations if it chose. I believe that this issue of regulation is the most sensitive arising from the recent accidents and that we must carefully consider the diplomatic and economic effects on the United States of any stricter regulation of foreign ships in our waters.

Mr. Speaker, the problems associated with the transport of oil by sea grow more serious daily. The dependence of the United States on imported oil continues to grow and soon we will also be faced with the problems arising from shipping oil from the Alaskan North Slope to the west coast of the continental United States. I strongly believe that the 95th Congress can and must assume a position of leadership on the critical issue of the regulation of oil tanker operations, and that it should be a priority issue for our consideration.

VETERANS' PASS-THROUGH BENEFITS

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. MOAKLEY. Mr. Speaker, Congressman HAROLD FORD of Tennessee has pinpointed a serious malfunctioning in our fixed income programs with his bill on veterans' benefits. Presently, over 3 million veterans and 2 million dependents of deceased veterans receive pensions or compensation from the Veterans' Administration. Of these 5 million, a majority, also merit social security payments. Unfortunately, however, our system works against a proper integration of these two programs.

As our system now works, veterans' compensation amounts are determnied as a function of the recipients' "countable income." Social security payments are included as a part of this "countable income." The problem arises when a cost-of-living adjustment increases social security payments, and these increases are recorded as part of the veteran's "countable incomes." The result is that compensations from the Veterans' Administration are reduced by the amount the social security payments rose, and the veteran is left with the same amount of aid he was receiving before, even though the Government has determined that a cost-of-living increase is in order. In "real money" terms, then, the veteran is the loser. Inflation continues to undermine his income, but no Government recompense is available to him.

The Veterans' Affairs Committee tells us that approximately 80 percent of our veterans receiving pensions or compensation, are also on social security. In an urban community, such as in my district, the percentage is even higher. Many of these poeple rely primarily, or even solely, on their social security and veteran payments as their means to

survive. This game of reducing veteran benefits when social security payments increase is not only detrimental to the ability of these people to subsist on fixed incomes with growing inflation, but it also constitutes a demeaning insult to those men and their dependents who so courageously and loyally served their country in times of need. When citizens meet the call of their country, it is only fitting that this country return their aid. I urge support for the Honorable Congressman FORD'S bill on veterans' benefits and social security.

TRIBUTE TO MRS. DEBRA STERN, PRESIDENT-ELECT OF THE UNITED VETERANS ORGANIZATION OF SUFFOLK COUNTY, N.Y.

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. AMBRO. Mr. Speaker, on Saturday, January 8, the United Veterans Organization of Suffolk County, N.Y., will install Mrs. Debra Stern as the organization's third president. For those of my colleagues who are not familiar with the UVO of Suffolk County, it is a liaison group for several veteran's organizations; including the VFW, DAV, American Veterans Organization, Marine Corps League, Jewish War Veterans, Masonic War Veterans, Veterans of World War I, and the World War II Submarine Veterans.

Mrs. Stern served as a WAC during World War II, and worked in transportation while in uniform. In the ensuing years she has been active in the Jewish War Veterans, engaging in a variety of activities. A former commander of the Huntington, N.Y., Post of the Jewish War Veterans—1971–72, Mrs. Stern is presently the vice commander of the Suffolk County Jewish War Veterans, and next year will be junior vice commander of Nassau-Suffolk County district. Ever active in community and veterans affairs Mrs. Stern is also currently the historian for the New York State Jewish War Veterans, and while married with three children, still finds time to perform volunteer service work at the Northport VA Hospital.

Among the many successes for which Mrs. Stern is singularly responsible, she worked to establish a rare blood index of available donors, which is available to the community at large. This endeavor was precipitated by her first-hand experience in assisting a past JWV post commander who was undergoing open heart surgery, and has since been adopted by the State Jewish War Veterans, to be administered on a statewide basis.

I have nothing but high praise for Mrs. Stern, who has given unselfishly of herself toward improving the lot of our veterans and the community at large, and as a Korean-era veteran myself, I salute her. It is only through the voluntary, untiring efforts of enthusiastic individuals such as Mrs. Stern, that strong institutions are woven into the fabric of these United States of America, and endure in perpetuity.

NURSING HOME PATIENTS' BILL OF RIGHTS

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. COHEN. Mr. Speaker, one of the first pieces of legislation I introduced after being elected to Congress was the nursing home patients' bill of rights. Reintroducing this legislation today, I am pleased that much has happened since that time to draw attention to the need for patients' rights in nursing facilities.

Probably the most shocking and disturbing event was the report of the Subcommittee on Long-term Care of the Senate Select Committee on Aging entitled "Nursing Home Care in the United States: Failure in Public Policy." I am sure we have all visited enough of these facilities and received complaints about them to know the potential for neglect and abuse. Nonetheless, the report and its supporting papers are brutally instructive.

For example, a visiting relative found a patient tied to a chair and suffering a 106-degree temperature. She died the next day. A patient's cut foot went unattended, despite the condition being reported to the staff by a family member, and it finally developed gangrene and had to be amputated. A patient who was difficult to handle was held down in bed and a washcloth stuffed in her mouth. Morphine shots were given to keep her continually subdued. In a short period of time the patient sank into a coma and subsequently, her chest filled with fluids and she died.

Such cases, unfortunately, are not isolated horror stories. They have occurred and can reoccur in facilities throughout the country. In fact, the Senate report concludes that over 50 percent of the nursing homes in this country are substandard in their treatment or facilities. Among the most common problems listed were: Lack of human dignity in patient care; a lack of activities; untrained and inadequate numbers of staff; ineffective enforcement and inspections; lack of control on drugs; unnecessary reprisals against those who complain.

Solutions to these problems will not be easily or quickly achieved. What is needed is not just more inspectors, but a national policy for treatment of the infirm elderly which evokes a personal concern and commitment among all of us for the well-being of our older citizens. In the past 20 years advances in medical science have enabled more and more of our older citizens to live well into their 80s or 90s. At the same time, however, our changing style of life has made it increasingly difficult for the elderly to receive the care and assistance they need within the family setting. The result has been a growing demand for long-term care facilities. Congress and the Federal Government have become actively involved in the spawning of these institutions through financial assistance first in construction of nursing home facilities, and then through direct support for medical treatment under the medicare and medicaid programs. Within the next several years, the establishment of a national health insurance program will extend and deepen that involvement still further.

The time has come, therefore, to fulfill the responsibilities we have assumed for the proper care and treatment of our elderly and other citizens in long-term care institutions. A first but vital step in the development and exercise of a national policy is contained in the legislation I am introducing today. We must provide the patients and their families, the facilities and their staff, with the means and encouragement to help themselves in improving conditions and treatment.

This measure requires simply that long-term care facilities which are certified for medicare and medicaid patients shall adopt, give to their patients and implement through appropriate staff training a statement of patients' rights. These rights include but are not limited to:

First. A guarantee that the patient's civil and religious liberties—including the right to independent personal decisions and knowledge of available choices—will not be infringed and that the facility will encourage and assist in the fullest possible exercise of these rights;

Second. A guarantee of the patient's right to have private and unrestricted communications with his physician, attorney, and any other person;

Third. A guarantee of the patient's rights to present grievances on behalf of himself or others, to the facility's staff or administrator, to governmental officials, or to any other person without fear of reprisal, and to join with other patients or individuals within or outside of the facility to work for improvements in patient care;

Fourth. A guarantee of the patient's right to manage his own financial affairs, or to have a monthly accounting of any financial transactions in his behalf, should the patient delegate such responsibility to the facility for any period of time;

Fifth. A guarantee of the patient's right to receive at least adequate and appropriate medical care, to be fully informed of his medical condition and proposed treatment, and to participate in the planning of all medical treatment, including the right to refuse medication and treatment and know the consequences of such actions;

Sixth. A guarantee of the patient's right to have privacy in treatment and in caring for personal needs, confidentiality in the treatment of personal and medical records, and security in storing and using personal possessions;

Seventh. A guarantee of the patient's right to receive courteous, fair, and equal treatment and services and a written statement of the services provided by the facility, including those required to be offered on an as-needed basis;

Eighth. A guarantee of the patient's right to be free from mental and physical abuse and from physical and chemical restraints, except those restraints authorized in writing by a doctor for a specified and limited period of time;

Ninth. A statement of the facility's regulations and an explanation of the patient's responsibility to obey all reasonable regulations of the facility and to respect the personal rights and private property of the other patients; and

Tenth. A guarantee that, should the patient be adjudicated incompetent in accordance with State law and not be restored to legal capacity, the above rights and responsibilities shall devolve upon a sponsor or guardian who shall see that the patient is provided with adequate, appropriate, and respectful medical treatment and care and all rights which he is capable of exercising.

As has been pointed out by the American Hospital Association and other groups involved with health care and the elderly, a bill of rights would benefit not only the patient, but also the institution. A patient who is confident in the care he is receiving, understands his medical condition and participates in the planning of his treatment is generally far more cooperative and more responsive medically to the care he receives. For the predominantly elderly population in most nursing homes, the guarantees can help forestall the confusion and lack of orientation often initially experienced by the patients, and counteract the sometimes stupefying atmosphere of apathy and despair of patients who believe themselves consigned to nursing homes only to await death. Such an atmosphere can defeat the efforts of the most understanding and hard-working staffs and frustrate the entire purpose of the nursing home, which is to maintain and improve the physical and mental well-being of their patients to the greatest extent medically and humanly possible. We should not forget that despite the many problems with nursing homes, there are also thousands of such facilities whose administration and staff are truly dedicated to and concerned about providing quality care for their patients. Such officials, I might add, consider a bill of rights to be "just good sense" and do not feel it would work any hardship for good nursing homes.

At the same time, however, a bill of rights can be helpful for patients in danger of substandard medical treatment or personal care. For one it makes it clear to both the individual and the staff that patients retain the rights of other citizens of this country and should be treated with dignity and respect. It encourages the patient—or their sponsors—to bring problems and concerns to the attention of the staff or others without fear of reprisal.

It underscores the rights of patients or other individuals to alert Government officials to substandard conditions and to work for improvement with other concerned people, including the patients. Even under unfavorable circumstances, the reassurances and protections these guarantees would provide could do much to help sustain a patient's mental and emotional integrity.

As I have mentioned, much has happened with respect to patients' rights since my legislation was first introduced. I am pleased to report that HEW has issued patients' rights regulations for skilled nursing facilities and intermediate care facilities. Preliminary feedback suggests that the regulations are having a positive effect on patient treatment. However, I—and many others concerned about nursing home conditions—are convinced that having a bill of rights established in law is essential to assure thorough and effective enforcement of these guarantees. A Federal law would also provide the States, which presently have the bulk of the responsibility for inspecting and licensing health institutions, with model legislation they could adopt for facilities not now under Federal control. A few States, my own included, have enacted such guarantees. But more concerted action is necessary.

Last year well over a billion Federal dollars went to nursing homes under the medicare and medicaid programs. We can anticipate that with the enactment of national health insurance, even larger amounts of Federal funds will be committed for such care. It is my sincerest hope that when national health insurance is established it will contain as a minimum the guarantees provided in the "nursing home patients' bill of rights." I intend to make every effort to see that this is accomplished. But we should not and cannot wait for NHI. Our medicare and medicaid patients need and deserve the basic help and protection provided by a bill of rights. I urgently request therefore the support of all my colleagues to see that this legislation is promptly and favorably considered.

EULOGY FOR MAYOR RICHARD J. DALEY

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. MURPHY of Illinois. Mr. Speaker, with the recent death of Mayor Richard J. Daley we have all lost a great leader of the people and a true friend of the cities. For almost 22 years Richard Daley served the people of Chicago as mayor of their city. He was untiring in his efforts to make the city a better place for everyone to live. His vision of urban America made Chicago the one modern city that could truly be said to work at a time when other cities were falling into ruin.

Mayor Daley took an interest in everything that affected his city. It is fitting that his last official act as mayor of Chicago was dedicating a new gymnasium and field house to serve one of Chicago's neighborhoods. His concern for the youth of our city is well-known. The Mayor Daley Youth Foundation has been instrumental in helping many young people in our city over the years.

Daley was a strong mayor and a brilliant political leader. He governed with a firm hand but always with a real concern and love for the city of Chicago and the people who lived there. Mayor Daley was intensely proud of his city. His favorite quotation which was always kept on his desk reflects this great pride. It read:

I believe that a man should always be proud of the city in which he lives and that he should so live that his city will be proud that he lives in it.

The outpouring of public sentiment since his death is a living testament of the high esteem in which he was held not only by his fellow Chicagoans, but by national leaders as well.

Truly Mayor Daley will be missed. His achievements and his spirit will live on in our city. I feel it a great privilege to have worked closely with the mayor and I extend my deepest sympathy to his wife Eleanor and his family. Chicago will sorely miss its favorite son.

NEW CITIZENS AT HICKEY-FREEMAN CO.

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. HORTON. Mr. Speaker, for the fourth consecutive year, a large group of Hickey-Freeman Co. employees has been sworn in as U.S. citizens at a single special court session. On November 9, 1976, in the Rochester Hall of Justice, 46 future citizens stood before the Honorable Supreme Court Justice Austin W. Erwin to recite the U.S. oath of allegiance. Speaking to the group of candidates was Justice of Town Courts, Hon. Thomas E. Goldman. This special single court session was made possible through the cooperation of Immigration and Naturalization Service Buffalo District Director Benedict Ferro.

The citizenship training for Hickey-Freeman aliens was operated under the auspices of New York State continuing education for adults program under the direction of Stephen D'Agostino. Classes were held on Mondays and Wednesdays from 4:30 to 6:30 p.m. in the Hickey-Freeman cafeteria. By holding the classes in the plant, candidates were able to complete their full day's work without the need for extra travel to an evening school. Teachers for this year's program at Hickey-Freeman were Mrs. Louise Schrot and Mrs. Joan Pedzich. Their primary objective was to provide the new citizens with a good knowledge of the English language and an understanding of the democratic process of the Government of the United States, to meet the Immigration and Naturalization Service requirements for citizenship.

The names of those persons who were sworn in at the special ceremony are: Giuseppe Cottone, Rosalia Cottone, Lucia Cottone, Stefa Bliudnikas, Frank Vella, Natalia Vella, Rose Tosto, Antonino Tosto, Ekaterini Dardaganis, Orlando Molinaro, Fortunata Molinaro, Gino Stolfa, Angelo

Maria Maiola, Mary Ann Woyt, Maria Antonia Mastroberardino, Carmela Parrinello, Ilda Lopes Pereira, Antonio Mastroberardino, Maria Di Gennaro, Giuseppe Biagio Lo Savio, Filomena Miale, Gina Maria Pietrosanto, Araksi Bannayan, Paola Gentile, Stella Elias.

Mario Francesco Gentile, Rosa Biodolillo, Calogera Di Salvo, Giovanni Lo Savio, Esperanca Cruz Santos, George Waheibi, Kateryna Balko, Vito Nicolosi, Vittorio Bisciotti, Luigia Trobia, Raffaela Cordaro, Galogera Proto, Agostino Geraci, Rosario Irti, Vincenzo Corbelli, Francesco Alessio, Paula Hecht, Bruno Russo, Steve Koumoutsos, Maria Koumoutsos, and Zina Morello.

Mr. Speaker, Americans must never forget that our land grew to greatness by being the land of hope and opportunity for peoples from around the globe. It is heartening to me that the melting pot process continues today in my home community of Rochester. I am certain that my colleagues will join me in congratulating these fine new citizens on their achievement, and in welcoming them to full participartion in our American system of free and democratic government.

ECONOMIC IMPACT ACT OF 1977

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. WHITEHURST. Mr. Speaker, I am today introducing legislation directing the Congressional Budget Office to prepare an economic impact statement for each bill reported in the Senate or House of Representatives and for each rule or regulation proposed by any Federal agency. These statements will contain an analysis of the direct and indirect costs of the bill or proposed regulation on employment, production, and the rate of inflation. They will be appended as a part of each bill and made available to each Member of Congress.

The severe inflation which we have experienced over the past several years and the recession which has resulted from this inflation has caused officials in the public sector as well as many business leaders to examine the pressures on our economy which have resulted in this unprecedented inflation. I have become convinced that a major root cause of our current economic difficulties is excessive Government regulation which has become particularly pronounced over the past decade. Several economists have begun to highlight the impact of Federal regulation on inflation in recent writings. A particularly good analysis is contained in the book entitled "Government-Mandated Price Increases, a Neglected Aspect of Inflation" by Murray Weidenbaum.

Mr. Weidenbaum uses many examples to dramatize the point that the consuming public is paying an extremely high price for the protection received from Federal agencies. "Worthy objectives," he points out, "such as a cleaner environment and safer products, can be attained without the inflationary impact that regulation brings, and public policy should be revised to this end. But . . . we need to examine more closely the phenomenon of Government-mandated price increases. It is likely that this unwanted phenomenon will be with us for some time—at least until consumers and their representatives recognize the problem and urge changes in public policy."

During my tenure in the Congress, I have become increasingly concerned over the actions of the Occupational Safety and Health Administration. There is no question that the Federal Government has a legitimate role to play in attempting to cut down on industrial accidents. However, the extremely complex OSHA regulations go far beyond what is necessary for improved industrial safety. The complexity of the regulations requires even very small businesses to retain their own attorneys to insure that they are complying with the OSHA rules.

In addition, the planned industrial investments in health and safety equipment will rise from $2.5 billion in 1972 to $3.4 billion in 1977. If we go to the stiff noise standards supported by the Environmental Protection Agency, the compliance cost is expected to rise to $31.6 billion.

Other examples abound on the cost of Federal regulations. One classic example is that the cost of a commercial airline flight from Boston to Washington is more than double the cost of a flight from San Francisco to Los Angeles. The only discernible reason for the disparity in cost is that the Boston to Washington flights are regulated by the Civil Aeronautics Board. The CAB does not regulate the San Francisco to Los Angeles flights, of course, because they are intrastate.

Mr. Speaker, I am hopeful that the legislation I have introduced today will serve to heighten the consciousness of the Members of Congress concerning the impact of our actions and the actions of the Federal agencies on our economic conditions. In my judgment, we would be less inclined to approve many measures if we had a clearer understanding of their impact on inflation and unemployment. I urge my colleagues in the House to act promptly on this measure.

OSHA INSPECTIONS

HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. KETCHUM. Mr. Speaker, I am sure we are all aware of the landmark decision made by three Federal judges in Idaho concerning OSHA. Our enlightenment is due in great part to our friend and colleague from Idaho, Mr. HANSEN, who informed us that, on December 30, the panel of Federal judges termed OSHA's inspections without warrants unconstitutional in a suit involving an Idaho businessman. Obviously, the fur has been flying ever since that remarkable decision, and not even the Department of Labor appears to be too certain about how far reaching the effects of that decision will be.

It is my understanding that the Department of Labor will appeal this decision to the Supreme Court. In the interim, pending the hearing of that appeal, the Department hopes to gain a stay of injunction, so that OSHA's business may continue as usual.

As one who has opposed what I refer to as the judge-jury-and-executioner mentality of OSHA since its inception, I wholeheartedly applaud the Idaho decision. Further, I sincerely hope that it will be upheld, if and when the appeal is heard. Nonetheless, we are all well versed in the convoluted machinations of bureaucracy, and until OSHA is either firmly repealed or at least meaningfully reformed, I will continue to consider it an invasion of our citizens' constitutional rights. Therefore, I am today introducing legislation to repeal the Occupational Safety and Health Act of 1970.

GASOLINE DECONTROL MUST BE PREVENTED

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. MOAKLEY. Mr. Speaker, tremendous energy problems confront this Nation, urging us to quick and forceful action. Yet, for all its urgency, the energy question is a complex, human issue with few easy solutions. Always, we must remember the people behind the problems we seek to solve.

President Ford has offered us an administratively easy solution to our energy problems, entailing the removal of allocation and price controls presently affecting gasoline in the United States. This proposal constitutes a significant change in our energy policy and it requires thorough consideration in terms of both its implications for our future energy position and our more immediate consumer concerns. Yet President Ford has introduced the proposal at a time in which Congress is still reorienting itself to Washington, and the President-elect has yet to acquire the power to affect proposals with significant implications for his administration.

Gentlemen, the energy problem is not an issue devoid of human impact. Gasoline prices are higher than ever, imposing a serious monetary burden on many Americans. We saw the average selling price for leaded fuel in the New England area hit 59.1 cents per gallon last September with no sign of slack. Prices are even higher now. Surely, we cannot allow a proposal to decontrol gasoline prices to become law without careful study of its many economic and energy implications. Thus, I must heartily support the Subcommittee on Energy and Power in its Resolution of Disapproval and in its call for hearings on the President's decontrol proposal. We must act responsibly—not merely quickly—to meet our energy needs.

POSTCARD REGISTRATION FLOPS IN WASHINGTON, D.C.

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ASHBROOK. Mr. Speaker, postcard voter registration is an idea that has been floating up and down the halls of Congress for the past several years. Inasmuch as President-elect Jimmy Carter has previously endorsed registration by mail, we will probably see new life given to this proposal in the months ahead.

I am strongly opposed to postcard voter registration. The cost of such a program would be prohibitively high. It would also constitute another Federal intrusion into local affairs. In addition, it would create an administrative nightmare for State and local elections officials. Finally, I simply do not think it would be very effective in getting new voters.

Many of my doubts were confirmed by the mail registration program recently conducted in Washington, D.C. Advocates of the program predicted a cost of about $45,000 and that 110,000 additional voters would be signed up.

Both predictions were far off base. According to the November 13, Washington Star article, headlined "Mail Registration in D.C. Costly and Far Short of Goal":

About 35,000 people, a third of the number predicted—have registered, election officials report, and the cost is running upward of $75,000. When all the figures are in, the total may be close to $100,000.

The story went on to state:

But members of the City Council—who were deluged with complaints by constituents who did register by mail but still had to use a challenged-ballot form on election day because their registration cards hadn't arrived in time—are planning to take a hard look at the new system.

The Washington, D.C., fiasco provides one more example of why Congress should defeat legislation to establish a voter registration program by mail. We should learn from past failures and not institute this highly questionable program on a national level.

MAIL REGISTRATION IN D.C. COSTLY AND FAR SHORT OF GOAL

(By Philip Shandler)

Last spring, when the D.C. Elections Board began getting edgy about the costs of a pending mail-registration program, citizen advocates of the unprecedented approach scoffed.

The mass mailing of applications to every home—the first in the nation—could be done for about $45,000, said representatives of the Young Lawyers Section of the D.C. Bar. And they predicted that 110,000 more voters would be signed up.

But the register-by-mail advocates—who included the local Common Cause chapter and the Federation of Civic Associations—have turned out to be wrong on both counts.

About 35,000 people, a third of the number predicted—have registered, elections officials report, and the cost is running upwards of $75,000. When all the figures are in, the total may be close to $100,000.

This isn't to say that using the mail to register people—which Congress is considering on a national scale—has proven to be a bad idea:

The elections board here had first-time troubles that may not recur.

The value—new voters per dollar spent—of the mail approach can only be pinpointed through comparison with the in-person registration costs of past years, which are uncertain.

And quality may be more important than quantity, some feel. The mail effort, still being analyzed, may turn out to have enrolled voters not reached by past registration efforts.

Nonetheless, the initial returns from the mass-mailing experiment already are giving District election officials and political theorists misgivings about the approach.

"It may be that a selective mailing to the non-registered, or a massive coalition registration drive, would be more effective than the mass mailing to 'occupants,'" Elections Board Chairwoman Shari Kharasch told a City Council committee recently.

And Albert Gollin, a veteran political scientist who was deputy director of the national Democratic campaign in the District this fall, said in an interview:

"I'm not persuaded that mail registration is where it's at, given the circumstances of the District.

"There has to be motivation, and without complete home rule, many citizens continue to feel they do not have much of a stake in the election process."

Registration figures, he said, are at best only part of the story: "Even registering people doesn't assure they'll vote."

And both registration and voting in the District—traditionally among the lowest in the nation—will not substantially increase through any method until the city's citizens feel they have complete autonomy, he suggested.

District citizens have been allowed to vote for president only since 1964, and for local officials only since 1972. There were 219,687 persons registered in 1964.

Between 1968 and 1972, registration jumped by half, from about 202,000 to 305,000. But the new total was only about 58 percent of those eligible to register. And the percentage of those registered who voted was only 54 percent.

For several years officials across the country have been complaining about a declining citizen interest in registering and in voting. That concern led to the discussion of mail registration in Congress, and to legislation by the D.C. City Council last year mandating the mass mailing this summer.

The council directed the elections board to send two registration applications to each of the city's 285,000 "households." They were sent out in July. (Some forms were distributed during the spring to libraries, firehouses and other public places, but officials believe they produced few new voters.)

The mail effort produced about 14,800 new voters for the September primary and another 19,800 for the Nov. 2 general election, officials said yesterday. That brought total registration to 267,509, they said.

That's more people registered than in two of the three previous presidential elections in which D.C. citizens could vote. (And there is some unofficial skepticism about the bloated 1972 total.)

Moreover, the latest figure looks especially good set against the city's population decline of the past decade. And the percentage of the registered who voted was better in November than it had been four years ago—63 percent compared to 54 percent.

On the other hand, officials say the percentage of those who could have registered is down to 51 percent of the 18-and-over population from about 58 percent in 1972.

In 1972, between May and November—the peak registration period—38,287 new voters were enrolled, compared to the estimated 34,600 registered during the same period this year. Four years ago people either had to go to the District Building to register or to tables set up in public buildings, offices and stores.

The major cost then was for the hiring of "intermittent" workers to serve as registrars. Elections board officials recalled that cost was about $7,000.

On the other hand, Marshall Lichtenstein, a Young Lawyers official who was a leader of this year's effort to get mail registration legislated, said he understood the 1972 registration had cost about $150,000.

In any case, the elections board this year spent about $18,000 to print the mail registration forms and for envelopes; $29,700 for postage; $4,300 for a company to handle the mailing; $5,800 to notify voters by mail they had been registered, and $14,400 for applications for computerization. (The latter was an unscheduled cost incurred when it became clear that the processing couldn't be done entirely by machine.)

That totals nearly $75,000—as of the end of September. It doesn't include the costs of processing applications received in October, which one official says may be additional $20,000.

The officials caution against misinterpreting the dollar figures. Because the mail registration cards also allowed voters to change their names and addresses, a small part of the total cost may be attributable to those functions and not to registration.

Moreover, the board is projecting a cost for the next mail registration—the law says one must be conducted every two years—of under $59,000. It believes it can save money primarily by getting an earlier start.

Thus, the officials say, the per-voter cost of registration by mail may turn out to be cheaper than by in-person enrollment.

And if the mailings bring in voters from, say, Anacostia, who walked by regulation tables in the past, that will be a qualitative gain.

Lichtenstein believes the board also needs to better publicize the mail process to encourage more of it.

But members of the City Council—who were deluged with complaints by constituents who did registeer by mail but still had to use a challenged-ballot form on election day because their registration cards hadn't arrived in time—are planning to take a hard look at the new system.

THE PACKAGING CONSERVATION ACT OF 1977

HON. BOB ECKHARDT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ECKHARDT. Mr. Speaker, from 1958 to 1971, per capita consumption of packaging materials increased nearly 44 percent. This increased consumption is not simply attributable to necessary packaging; it is largely attributable to wasteful overpackaging.

Excess packaging often increases consumer prices, depletes valuable natural resources, deceives consumers, and compounds solid waste disposal problems. Overpackaging costs American citizens millions of dollars each year.

If excess packaging were reduced by even 15 percent, 7 million tons of solid

waste would be eliminated annualy. It has been estimated that this reduction in solid waste would result in savings to municipalities and hence to taxpayers of aproximately $54 million annually.

Therefore, I have reintroduced the Packaging Conservation Act which I first introduced in January 1976. This legislation amends the Fair Packaging and Labeling Act to provide authority to prevent excess packaging of consumer goods.

Under the terms of the legislation, the Food and Drug Administration would regulate the packaging of drugs, cosmetics, and foods. The Federal Trade Commission would regulate other consumer items, such as housewares and toys. Meanwhile, the proposed legislation does not interfere with packaging necessary to prevent breakage or pilferage or to keep consumer products sanitary.

A copy of the Packaging Conservation Act of 1977 follows:

H.R. —

A bill to amend the Fair Packaging and Labeling Act to provide for the regulation of oversized and excessive packaging of consumer commodities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Packaging Conservation Act of 1977".

SEC. 2. The purpose of this Act is to reduce the amount of oversized and excessive packaging of consumer commodities and thus to reduce the waste of natural resources, the increase in solid waste, the cost of consumer commodities so packaged, and the deception of consumers engendered by such packaging.

SEC. 3. Subsection (c) of section 5 of the Fair Packaging and Labeling Act (15 U.S.C. 1454(c)) is amended by—

(1) inserting after "necessary to prevent the deception of consumers" the following: "to reduce oversized and excessive packaging of consumer commodities,";

(2) striking out "or" at the end of paragraph (3), striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or", and inserting immediately after paragraph (4) the following:

"(5) prevent the oversized or excess packaging of consumer commodities."; and

(3) adding at the end of such subsection the following: "For purposes of this section, a package shall be deemed to be oversized or excessive if, considering the possible needs for sanitization, unitization, commodity protection, or prevention of theft of the consumer commodity contained in such package, such package is larger or more extensive than is reasonably necessary to enclose such commodity.".

TAX EQUITY FOR RENTERS

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. KOCH. Mr. Speaker, the advent of a new administration affords us an opportunity to review the Federal Government's treatment of urban areas. There are a number of areas that need to be addressed, including welfare reform and mass transit. We must develop more equitable formulas to help the cities. However, today I would like to speak about the Federal tax discrimination under which apartment renters now suffer. As tax reform will be a major issue in the coming Congress, we must resolve the discrepancy in tax treatment between homeowners and renters.

Since 1954 homeowners have been able to deduct from their Federal returns property taxes paid by them to State and local governments. The tenant, however, is required to pay the property tax without receiving a comparable deduction. Certainly, a portion of the rent which the tenant pays the landlord flows from the landlord to the local taxing authority to pay property taxes. Property taxes can amount to as much as 25 percent of the tenant's rent. But since the renter cannot claim this deduction, he or she is forced to pay Federal taxes on income which has already been used to pay local property taxes.

This tax policy is obviously unfair to the renter. But time and again efforts to correct the law have failed. Most recently, last August, an amendment to allow the property tax deduction for renters failed on the Senate floor. I believe if we are ever to attain tax equity for renters, it is necessary to analyze the reasons for that defeat, respond to the objections raised and alter the reform proposal so as to make it more attractive.

Let me list the objections that have been made against the tax deduction proposal:

First. Opposition was voiced to this amendment because it would create what is termed a "double deduction": that the tenant and landlord could each take a deduction on the same tax paid. Frankly, I consider this a spurious argument. This type of "double deduction" is now found throughout the tax code. For instance, under the present city sales tax, retail stores deduct from their gross receipts the amount of sales tax collected and remitted to the state. However, individual taxpayers who itemize deductions can deduct the amount of sales taxes paid, also. The retail store is not really receiving a deduction, but rather acting as tax collecting agent of the State. Such is also the case for the landlord.

The "double deduction" concept is of dubious validity. To end "double deductions" would radically change our tax system. The business expense deduction would be thrown into turmoil. When a furniture manufacturer, for instance, builds a chair, he is allowed to deduct the costs—wood and so forth—in the production of that chair. If another businessman then buys the chair for use in his business, he can also deduct the costs of the chair to him. Certainly, no one would suggest that these "double deductions" be ended. Passage of legislation allowing the renter to take a deduction against property taxes paid in the rent would not be violating any principle of taxation.

Second. A somewhat more valid objection to this deduction for renters concerns the revenue loss which would be sustained by the Treasury were this legislation enacted. To be sure, it would be costly; $811 million per year. But what is never pointed out is the tremendous revenue loss caused by the present property tax and mortgage interest deduction now taken by homeowners. The Senate Budget Committee estimated an annual revenue loss of $8.5 billion. If those who oppose a deduction for renters because of the revenue loss wish to cut down tax expenditures by the Federal Government, I would suggest that they turn their attention to that deduction. What is clear is that the present situation amounts to a massive subsidy for homeowners, and a penalty for those who choose to rent or who cannot afford to buy a house. What business is it of the Federal Government to distort the choice between owner-occupied and rental housing? It is not only unfair, it interferes with economic efficiency in the allocation of housing, retards urban development and probably even reduces energy efficiency by spurring low-density single family homes.

Third. Tax relief for renters is an important tax reform issue. Ironically, the effort to allow tax relief for renters faltered in the other body because opponents charged that a tax deduction would not help low- and middle-income taxpayers, and wanted to avoid another loophole in the tax code. I understand their concern generally. What is wanted here, however, is equal treatment, not special preference.

The fact is that tax equality for renters would be an important step forward in making our tax system more fair. The present homeowner deduction is regressive in two ways. First, a deduction by its nature confers greater benefit to higher income individuals. For instance, a $100 deduction for a person in the 50 percent tax bracket represents a tax savings of $50, while a $100 deduction for a person in the 20 percent bracket is worth only $20 in tax savings. Second, renters as a group are, by a greater proportion, middle and lower income taxpayers. In 1974 over 79 percent of household rental units were occupied by families with incomes under $15,000 income. The median rental unit family income was $9,400, compared to a median owner-occupied family income of $15,400.

Clearly, any kind of tax relief for renters would make the tax system more progressive, but arguments against the deduction approach have merit. There is a serious question of whether the deduction, even if available, would benefit the mass of renters who do not itemize their expenses. (For example, 85 percent of taxpayers with incomes of less than $10,000 did not itemize deductions.) Many who should be expected to sympathize with the plight of the renter have opposed the tax deduction proposal for "tax reform" reasons. We need and deserve their help in alleviating the problems of urban areas.

An alternative approach is warranted and now available. I have introduced H.R. 441, a tax credit equal to 25 percent of the property taxes and mortgages interest paid in the rent. I have also cosponsored with HERB HARRIS of Virginia legislation to allow the tax credit for property taxes alone. The credit would

be available to middle and low income renters who do not itemize deductions because the credit is computed by taking 25 percent of the property taxes paid in the rent and subtracting that figure from actual taxes owed. I want to point out that all renters will gain equally from this proposal. I readily understand that higher income renters should not be penalized as compared to higher income homeowners.

The Federal Government should be encouraging middle income families to stay in urban areas and occupy rental housing if they so choose. But presently, for instance, New York City residents lose $150–$200 million per year because we choose to rent instead of own a home. That is simply wrong, and I believe we have to move imaginately and aggressively to find a solution. The tax credit legislation is one that needs to be looked at by the House Ways and Means Committee as it again takes up the issue of tax reform in the current Congress.

OSHA LOSES ATTEMPT TO CONTINUE INSPECTING

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. HANSEN. Mr. Speaker, the Occupational Safety and Health Administration has lost another major court skirmish in Federal court in Idaho which is clearly stated in the following January 11, 1977 article from the Idaho Statesman newspaper:

OSHA LOSES ATTEMPT TO CONTINUE INSPECTING

A three-judge panel Monday refused to allow impromptu federal safety inspections of Idaho businesses while the panel's decision barring them is appealed to the U.S. Supreme Court.

The Occupational Safety and Health Administration (OSHA), in asking for the stay of the inspection ban, had said it will have "devastating effects on the employes for whose benefit the (OSHA) Act was passed."

Assistant U.S. Atty. Paul Westberg said he expected the government would appeal by the end of the week to the U.S. Supreme Court for a stay.

Part of the act, allowing inspections without cause, was ruled Dec. 30 to be unconstitutional by a panel composed of U.S. Circuit Judges Oliver Koelsch and J. Blaine Anderson and District Judge Ray McNichols.

As a result, OSHA has suspended all safety inspection in Idaho.

"The inspection and investigation provision struck down by the court is at the heart of the act," Westberg wrote in a motion to the panel to stay the ban.

OSHA is "almost totally powerless to require employers to remedy hazardous conditions which endanger the safety and health of employes," to the extent the law has been overturned by the judges, the motion says.

But the court is not faced with a "bloody" emergency if the inspections are stopped during the appeal, wrote John Runft, the attorney for Barlow's, Inc., of Pocotello which filed the suit leading to the decision.

OSHA can only inspect a small per cent of Idaho's working environments during the appeal, Runft said, adding that there is a question of how effective OSHA is in preventing on-the-job injuries. The appeal is expected to take several months.

The panel apparently agreed, saying OSHA's showing irreparable harm would result if the inspections were not allowed was "conclusory and insufficient."

The denial noted the panel did not dismantle the whole OSHA law.

The three-judge panel determined part of the law violated the due process right of the Constitution's 4th Amendment.

But other federal courts have either "flatly rejected" that constitutional attack, or have refused to strike down the same section, according to the motion to stay.

Barlow's filed suit after refusing to obey a federal court order that he open his plumbing, heating, electrical and air-conditioning firm to an OSHA inspector.

Mr. Speaker, recently OSHA stopped all inspections in Idaho pending legal appeal to the Supreme Court and a motion to stay the court order pending this appeal. This motion to stay has now been rejected by the court and it is now proper that inspections should be stopped in all other areas of the Nation under OSHA's jurisdiction. This is especially fitting in the sense of equal justice for all Americans which is guaranteed every citizen by the U.S. Constitution.

Mr. Speaker, I deem it my responsibility to advise my colleagues and their constituents that under section II of the Idaho court's summary judgment—

The Secretary of Labor of the United States of America, and all other defendants and their successors in office, and all other persons acting by, through or under them, are hereby forever and permanently RESTRAINED and ENJOINED from acting or attempting to act pursuant to or in furtherance of Section 8(a) of OSHA (29 U.S.C. 657 (a)).

This appears to me as an injunction against the Secretary of Labor, wherever he may be, and not simply in the Idaho district. Further inspections of a nonuniform nature violate the equal protection of the laws guaranteed by the Constitution was well as being in contempt of the Idaho Court's decision. It is in this respect which I offer for the record as well as the benefit of my colleagues the contents of a House concurrent resolution which I introduced on January 6 and which I hope will receive support from the majority in this body.

The contents of the resolution follows:

H. CON. RES. 48

Resolved by the House of Representatives (the Senate concurring), That in view of the fact that a recent decision of a Federal three-judge court has declared that the inspection authority contained in section 8(a) of the Occupational Safety and Health Act of 1970 is unconstitutional and that inspections under such section within the jurisdiction of that court have been caused to cease pending appeal of such decision, and in view of the principle of equal justice and the dictates of legal reality, it is the sense of the Congress that all inspections under such section in all areas of the Nation should immediately cease until the Supreme Court of the United States has determined the question of whether or not any inspections under such section are constitutional.

SOVIET OPPRESSION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. DERWINSKI. Mr. Speaker, Jack Mabley is a feature columnist of the Chicago Tribune, whose interests range far beyond local and metropolitan matters. In his column of January 3, he dramatically points out the oppression, typical of the Soviet Union, that Pastor Grivans of the Evangelical Lutheran Church of Latvia, must face in his efforts to leave Latvia.

Jack Mabley also points out that Latvia, along with the other Baltic States, Lithuania and Estonia, were forcibly subjected to Soviet rule, and continue to remain victims of Soviet bondage.

The article follows:

HOMELAND A JAIL FOR LATVIAN MINISTER

[By Jack Mabley]

It is good for us Americans to get periodic reminders of what it's like to live under a totalitarian government.

Several thousand Chicagoans of Latvian descent are engaged in an effort to persuade the Communists to allow a Latvian minister to leave that country. Pastor Maksimilians Grivans, 75, was ordained by the Evangelical Lutheran Church of Latvia in 1928.

When the Red army was advancing in 1944, Pastor Grivans' wife and two sons escaped to Sweden in a fishing boat. He chose to remain and serve the people of his congregation.

In 1948 he was arrested and sentenced to 10 years hard labor in Siberia. He served 8 years, returned to his religious work in Ventspils, was arrested and sent back to Siberia for 8 years.

At the end of the second term, he returned home, but the Communists refused to grant him a minister's license. He was unable to get work of any kind. The government gave him a pension of 9 rubles a year. That's about $12. He subsists on the charity of former parishioners.

Pastor Vilis Varsbergs of the Chicago Latvian Zion Lutheran Church is a leader of the fight for Pastor Grivans.

"He has repeatedly applied for exist visas," said Pastor Varsbergs. "According to the Helsinki agreements, he should have no trouble leaving. But of course the Russians don't live up to those agreements.

"We're trying to publicize his situation because our own means of helping are very limited.

"I think chances of getting him out are pretty slim unless there is a great deal of noise out here. They want him to die there.

"As fas as I know, he has no personal ties there. The authorities may think he'll write and talk about his experiences.

"Most people who do get visas out don't say much. They have friends and relatives in Latvia, and they're afraid of reprisals. But they don't have anything to hold over Pastor Grivans.

"When the Baptist minister, Janis Smits, was kicked out, he said letters written by people in the United States did some good.

"The letters may not reach the pastor, but at least the KCB will know someone is interested. It's a little dangerous for members of the Latvian community here to do much. Most still have relatives in Latvia.

"It's interesting. Many people who go there as tourists come back and are very, very quiet. The Communists can say you can't get a visa to go back there again, or they can threaten repercussions against family there.

"The Siberian prison camp hasn't been dismantled. And there are a lot of local repressions available.

"You can lose your job, or get a bad report. Technically, there is no unemployment. But people who get kicked out of a job have real trouble.

"They can block your kids' schooling, especially when it gets to the university level.

"Within the last year they've put new restrictions on sending packages into the Soviet Union, including Latvia. It used to be import taxes were 100 per cent. Now they're 135 per cent.

"You can't send in medicine, which is one of the most ridiculous things. The medical system there is free, but letters we get say there are no drugs available . . . not even relatively simple ones.

"By and large people are better off than they were, but the old people in particular are the ones that suffer.

"There is a lot of graft, a lot of bribery. It's pretty difficult to exist without something other than your wages.

"Pastor Grivans is a quiet, gentle minister. We don't know what the charges were against him that sent him to Siberia. Most pastors who were in Latvia before 1944 have been sent to Siberia at least once."

Pastor Grivans' birthday is Jan. 14, and Chicago Latvians are asking people to send him cards or letters. His address is Ventspils, Belaru iela 16, Apt. 1, Latvia 229911.

COURT DEALS OSHA A CRIPPLING BLOW

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. SYMMS. Mr. Speaker, on December 30, 1976, a panel of three Federal judges in Idaho declared the inspection provisions of OSHA unconstitutional and void, and restrained and enjoined the Department of Labor from conducting further inspections of private business premises with or without a search warrant.

I would like to congratulate my colleague from Idaho, Mr. HANSEN, for his diligent work and persistence in bringing OSHA to a halt. His efforts have reflected the views of most Americans. There has been a rapidly growing concern over the erosion of individual rights and it is very gratifying to see this concern being translated into judicial remedy. I would hope that the Congress follows the court's lead in defending the constitutional rights of all Americans.

The following is a reprint of an article that appeared in the January 15, 1977, issue of Human Events. I highly recommend the article to my colleagues:

COURT DEALS OSHA A CRIPPLING BLOW

A three-judge federal court decision filed December 30 in the U.S. District Court for Idaho ruled that Section 8(a) of the Occupational Safety and Health Act of 1970 (OSHA) is unconstitutional because it allows federal inspectors to enter businesses and farms without a search warrant. The clause authorizing such warrantless inspections—which have resulted in harassment and fines for businessmen who could not possibly be expected to comprehend, much less remember and act upon, all of the 3,400 separate OSHA regulations—was found by the judges to be "unconstitutional and void in that it directly offends against the prohibitions of the 4th Amendment of the Constitution of the United States of America."

Interestingly, the Idaho ruling, which has all the earmarks of a landmark case, would not have taken place except for the courage and determination of one small businessman who decided to make a stand. That businessman is F. G. (Bill) Barlow, owner of a plumbing, heating and electrical subcontracting business in Pocatello, Idaho, a community of about 45,000 people in the southeastern part of the state.

Barlow, who works with his four sons and has a total of 35 employes, explained last week that he had expected OSHA to show up sooner or later since they had been inspecting other businesses in the area. So, with encouragement from Rep. George Hansen (R.-Idaho), who has been providing a clearinghouse of information on the OSHA law, Barlow began to study the issue.

"What is unconstitutional about it," he told Human Events, "is that the government can come in—with a program that we didn't want in the first place—and decide on the safety of your building, and if you're found guilty, serve as judge, jury and executioner since they can issue a fine."

So, said Barlow, "when they came to my door and asked to inspect the building, I simply said no. They claimed to be entitled to do so by law, and I said they must first produce a warrant."

OSHA refused to get a search warrant, but they did get a court order commanding Barlow to allow the inspection since it was in the statute passed by Congress. But, convinced that the OSHA statute violated his constitutional rights, Barlow ignored the original court order—for which he was cited for contempt—and petitioned for the empanelling of the three-judge court to determine the law's constitutionality.

It was that course of action that resulted in the December 30 ruling. And though Barlow still faces the contempt citation, he is hopeful that it will be dismissed on appeal, especially if the unconstitutionality of the OSHA law is upheld.

Clearly, then, Barlow's decision to fight OSHA rather than surrender what he saw as his rights as a citizen was not an easy one to make. That he took the stand anyway drew strong praise from Rep. Hansen, who said of Barlow: "He is just a small businessman with limited means, but his strong feelings about our rights as American citizens and his willingness to spearhead such an effort marks him as a patriot in the tradition of our founding fathers whom we hail in this Bicentennial era. Barlow's victory shows that the Constitution is still a bulwark for human rights in this nation and we do not have to bow down to oppressive rulings and acts of government no matter how well intended they may be."

For businessmen, farmers and their supporters who have been working to put a leash on OSHA, the judge's decision was a greater New Year's present than most had dared expect. For the bureaucrats at OSHA and their chief non-governmental champion, the AFL-CIO, on the other hand, the decision was seen as a grave threat not only to OSHA but to numerous other agencies that routinely conduct random inspections of business establishments without "probable cause" for a search.

Though the court's decision was handed down in far-off Boise, Idaho, its reverberations were not long in reaching Washington, D.C. Morton Corn, the assistant secretary of labor who heads OSHA, quickly announced that the agency would appeal the decision to the U.S. Supreme Court. "We consider the right of inspection to be absolutely vital. We will take whatever legal steps are necessary to vindicate that right," he said.

OSHA spokesman James F. Foster told Human Events that the agency planned to seek a stay of the ruling, pending a decision by the Supreme Court. In the meantime, he said, OSHA was suspending all further inspections in the state of Idaho.

But in the view of some OSHA opponents, the suspension of OSHA inspections in Idaho, though a start, is still not a sufficient response from the agency, considering the vital constitutional right that is at stake.

Thus Rep. Hansen, who is chairman of a congressional task force working to limit regulatory agencies and head of the American Conservative Union's "STOP OSHA" project, fired off letters to Corn, Secretary of Labor W. J. Usery and Atty. Gen. Edward Levi, commending OSHA for ceasing inspections in Idaho. "However," Hansen wrote, "under the concept of equal justice for all citizens, such OSHA inspections should also immediately be terminated for all other areas under OSHA's jurisdiction." Hansen was planning to introduce a House joint resolution to that effect later in the week.

Meanwhile, Hansen noted that, in the wake of the Idaho ruling, it is a relatively simple and inexpensive legal procedure for businessmen in other states to refuse OSHA inspectors access to their property, citing the Barlow precedent.

The Barlow ruling was not the first judicial decision to suggest that warrantless OSHA inspections should not be allowed, but it was certainly the most significant. Other courts, for instance, had ordered OSHA not to conduct inspections without having a search warrant. But the Idaho court went a step further, declaring the inspection provisions of the law unconstitutional and void, thus depriving the Department of Labor of any authority to conduct OSHA inspections, with or without a warrant.

Should the High Court uphold the Barlow ruling, therefore, OSHA would be completely out of the inspection business, unless Congress first rewrote the legislation to conform to the requirements of the 4th Amendment.

Given the enormity of the stakes involved, it is not surprising that groups on both sides of the issue were already mobilizing their forces last week for the legal and legislative battles that lie ahead.

Joining OSHA in opposing the Barlow ruling, for instance, is the AFL-CIO. George Taylor, executive secretary of the labor organization's Standing Committee on Safety and Occupational Health, said it would be a "calamity" if the Supreme Court upheld the ruling.

According to Taylor, such a decision would not only deprive OSHA of the authority to make routine inspections without first obtaining a search warrant, but it would also "affect every federal regulatory program and even the city and state inspection programs where heretofore the right of entry has been assured by statute or local ordinance or state law without the need of a warrant." He then proceeded to rattle off a long list of areas, from "fire and hospital inspections all the way up to clean air, clean water, Coal Mine Safety Act, Metal and Non-metalic Mine Safety Act, Food and Drug Act," and on and on that he maintained would be affected.

(In point of fact, the union operative seemed to be exaggerating. It is true, as Rep. Hansen pointed out, that the Barlow ruling would affect more than OSHA. But it is not accurate to say, as Taylor did, that "every federal regulatory program" would be barred from making inspections without "probable cause" that a violation existed. For in its written opinion accompanying the Barlow decision, the three-judge panel noted that some heavily regulated industries, such as those dealing with explosives, food and drugs, and so forth may be required to agree to such warrantless inspections as a condition for obtaining their licenses, and that this is consistent with the Constitution.)

Taylor said the AFL-CIO's lawyers were looking into the Barlow decision and that the union would probably "join with OSHA as friends of the court when it gets up before the Supreme Court." In the event that the High Court upheld the December 30 ruling, he said union lobbyists on Capitol Hill "would try to get an amendment, if we had to, to Section 8(a) of the act, which would narrow the area as much as possible where you had to get a warrant."

While organized labor was lining up behind OSHA, others were preparing to argue for Barlow's position before the Supreme Court. Hailing the rulings in favor of Barlow as a "triumph for individual liberty," Idaho Atty. Gen. Wayne Kidwell (R.) announced that he had discussed the case with Barlow's attorney, John Rumft, and that, if the Department of Labor appeals the decision of the three-judge panel, he will ex-

plore joining the case and trying to uphold their decision.

Spokesmen for the U.S. Chamber of Commerce and the National Association of Manufacturers also expressed an interest in the case. Both organizations indicated they might enter *amicus curiae* briefs when the issue reaches the High Court. Moreover, both groups said that, if as a result of the Supreme Court decision, the legislation goes back to Congress for revision, they would work to get numerous improvements in the measure, including a requirement that economic feasibility be considered when safety and health standards are set.

What happens now, of course, is up to the Supreme Court. But the ruling of the three-judge panel in Idaho indicates more than ever before that, for the thousands upon thousands of small businessmen and farmers in this country, relief from OSHA finally may be on its way. And for this, men like Bill Barlow and Rep. Hansen deserve a great deal of thanks.

THE BALANCE(S) OF POWER: INTRODUCTION FOR THE 95TH CONGRESS

HON. JOHN BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. BRECKINRIDGE. Mr. Speaker, during the last session of Congress I was privileged to insert a series of articles in the CONGRESSIONAL RECORD detailing in part the major shift in "The Balance(s) of Power" underway between the Soviet Union and the United States. The purpose of "The Balance(s) of Power" series is to present to the Congress, and to the American people through the libraries throughout the Nation containing the CONGRESSIONAL RECORD, a carefully documented discussion-provoking set of views prepared by current leading thinkers in the field of national defense, so designed as to stimulate thinking about military trends and where we are headed if the Congress, the administration, and the people do not take the necessary steps to turn us around. In every major area of national defense Soviet momentum is directed at achieving superiority. We are told by various military, intelligence, and political leaders that our Nation is slowly sinking into second place in military capability and that soon we will be unable to respond to any international crisis provoked in whole, or in part, by Communist nations. Not since the German rearmament of the 1930's has the world witnessed such a rapid peacetime expansion of military might by one nation.

A list of "The Balance(s) of Power" series, from March 17, 1976, to October 1, 1976, detailing the number, author, date, page reference in the CONGRESSIONAL RECORD, subject matter and title is provided at the conclusion of this introduction. This 94th Congress listing provides a ready reference guide to previous issues. The first part of the series was divided into four parts, each of which contain major articles related to that topical heading: "The U.S. Strategic Situation, Part I"; "A Panoramic Perspective, Part II"; "The Strategic Offensive Balance, Part III"; and "The Strategic Defensive Balance, Part IV."

At this time, I wish to express my deep appreciation to John M. Collins, Senior Specialist in National Defense for the Library of Congress, for his guidance, assistance and advice in the preparation of selections for the series for the 94th Congress, and to say that I continue to look forward to working with him to the extent that his demanding schedule and important duties permit.

As the 95th Congress begins consideration of legislation effecting our national security and defense posture, I shall conclude the strategic defensive and offensive sections of the series by inserting a two-part article on military strategy by Mr. Henry S. Bradsher of the Washington Star. These articles invite a complete revaluation of strategic thinking by the American people, the Congress and the Pentagon; they challenge this generation's approach to conceptual thinking and dare it to face the realities of today's world.

After the publication of these two articles, I shall continue the "Balance(s) of Power" series concentrating on the conventional forces of both the United States and the Soviet Union; parts V, VI and VII will review the ground, tactical Air Force and Naval force balance between the super powers. A series will focus on the major weapons systems, the training and effectiveness of combat personnel; ship building programs and the size and expansion of Soviet naval armed forces; and, the corresponding decline of American military conventional power and other areas related to conventional forces. It is anticipated that the series will focus on one major area each week the Congress is in session.

As the series progresses, we shall look into the balances of the Soviets and the United States in the areas of strategic mobility, geographic factors, budget, scientific and technological advances, agriculture and industrialization, and the broader perspectives of the balances in Europe, East Asia, Middle East, Indian Ocean, Africa and Latin America. In each case, the series will relate coverage to the crucial U.S. security interest of survival, physical security, peace, national creditability and freedom of action.

During the course of the past "Balance(s)" insertions, I was encouraged by comments from military, academic, professional, business and private citizens interested in the basic premise of the articles, and hopeful that the alarming trend which this Nation's defense posture is taking will be reversed before a major confrontation occurs.

The "Balance(s) of Power" series for the 94th Congress is to be found as follows in the CONGRESSIONAL RECORD:

VETERANS' WIDOWS OVER AGE 60

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. WHITEHURST. Mr. Speaker, I am introducing today a bill to amend title 38 of the United States Code to allow veterans' widows over the age of 60 to remarry without losing their survivors benefits. As the law now stands, a veteran's widow who remarries must accept with her marriage the loss of all the benefits she had been receiving. While this is an equitable law when it is applied to a fairly young widow, it is especially hard on an elderly widow who is living on a fixed income and relies on her dependency and indemnity compensation to make ends meet. In all probability, she will marry someone who also receives only a small pension each month. In this day of rampant inflation, it is unthinkable to force an elderly couple to live on the man's pension alone.

I have received letters from veterans' widows across the country who find themselves in the most difficult position of trying to decide whether to remarry. In considering the consequences, most of them decide to remain single. Our National Government has always pursued the policy of encouraging marriage and family life, yet this law has the opposite effect on elderly widows.

This amendment would not constitute a drain on the U.S. Treasury because it is unlikely that there will be a large number of remarriages among the over-60 age group. However, the number of remarriages is certainly significant enough to warrant congressional action.

I urge my colleagues in the Congress to join me in supporting this legislation.

NATIONAL COMMISSION ON HOUSING FOR THE ELDERLY

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. HANNAFORD. Mr. Speaker, today I am introducing legislation to create a National Commission on Housing for the Elderly. The Commission would investigate the feasibility of rehabilitating central city housing and establishing senior citizen communities. One of my constituents, Mr. Ben Nicholas, originally proposed this idea. Mr. Nicholas resides in Leisure World, a planned senior citizen community.

Leisure World in Seal Beach, Calif., is 15 years old. There are 6,500 units, and approximately 10,000 residents. Studies of the community indicate that retired residents live approximately 8 years longer and spend less time in hospitals than other senior citizens.

Mr. Nicholas believes that other seniors should have the opportunity to experience the advantages of community life. Rehabilitating already existing housing units, instead of constructing new and impersonal high-rise structures, would be less expensive and more beneficial to older Americans. Central cities would be able to provide many of the facilities and services which communities such as Leisure World contain. Transportation is available, as are libraries, hospitals, and shopping facilities. The Commission created by my bill would be composed of housing experts, city planners, and senior citizens themselves. They would study already existing communities and determine whether or not a similar use of central city housing would be feasible.

"BALANCE(S) OF POWER" SERIES SCHEDULE: PTS. I–IV.

INTERNATIONAL PORTABILITY OF MEDICARE BENEFITS ACT

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. COHEN. Mr. Speaker, I am reintroducing a bill today that, while costing little, would remedy a serious defect in the medicare program. The proposed legislation would amend title XVII of the Social Security Act so the medicare beneficiaries living or traveling outside the United States could receive benefits for hospital care and related physician and ambulance services received abroad.

Under the existing medicare statute, hospital care and related physician and ambulance services furnished abroad are covered only when provided in Canada or Mexico, and even then only under very limited circumstances. First, benefits can be paid when the beneficiary is hospitalized in those two countries as the result of an emergency that arose in the United States. This coverage applies only where the foreign hospital is either nearer to, or more accessible than, the nearest suitable U.S. hospital. Social security legislation enacted in 1972 added two more exceptions to the general exclusion of services rendered abroad. One permits payment to be made for a U.S. resident in a border State who lives nearer to a suitable foreign hospital than to the nearest U.S. hospital that is adequately equipped to meet his needs. For these beneficiaries, benefits can be paid without regard to whether an emergency existed or where the illness or injury took place. The 1972 amendments also provided benefits for U.S. residents who are forced by a medical emergency to be hospitalized in Canada while traveling from Alaska to another State.

The various provisions for paying medicare benefits abroad are very important to the relatively few aged and disabled U.S. citizens who are involved. However, they meet only a part of the problem. For those who lose their medicare eligibility because they do not meet the narrow limitations of the law, hospitalization abroad could lead to financial ruin.

Of the 30 million people eligible for medicare benefits in the United States, authorities estimate that nearly 150,000 would be reenfranchised by my bill—a relatively small, but important group of American citizens.

There is ample precedent for continuing the health insurance protection of insured persons while they are absent from the United States. This is generally provided for in private health insurance plans. The Veterans' Administration has also demonstrated that health benefits can be made available abroad. It provides health services to veterans with service-connected disabilities in countries where there are no U.S. military facilities—as in France.

In light of the seemingly uncontrollable budget of Federal health care programs, we are all concerned with costs. Yet, bear in mind that these people have previously established their right to these services through their contributions into the medicare system. Furthermore, costs of health care in the United States are higher than in almost every other country. In any event, limitations in my bill assure that costs will not exceed what is paid in the United States. As a result, extension of medicare abroad will be less costly than if those eligible were taken care of at home, as they are entitled to be.

The problems faced by the elderly and disabled in need of health services while abroad is probably more a concern to me and the other Members whose congressional districts border on Canada and Mexico. Nevertheless, all my colleagues are potentially faced with the risk of this problem if their elderly and disabled constituents travel or live abroad. In this regard, I was pleased to see that Congressman ROSTENKOWSKI, Chairman of the Health Subcommittee of the House Ways and Means Committee, introduced comparable legislation late last session on this subject. His recognition of the need in this area represents a victory on the part of those affected.

In summary, the bill I am offering would affect relatively few individuals. It would, however, protect those individuals from medical bills that could wipe out a lifetime of savings and lead to the very dependency that social security and its medicare program are intended to prevent. I urge that the Congress act soon to close this gap in medicare protection.

A TRIBUTE TO JOE McCAFFREY

HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. VAN DEERLIN. Mr. Speaker, one of the benefits of my years in Congress has been my close association with Joe

McCaffrey, the veteran and knowledgeable Capitol Hill observer for the WMAL stations.

Surely, Joe has few peers in or outside the press corps in understanding what makes Congress tick.

Often, I have turned to him for insights into the House of Representatives, the directions it is heading, and the time it will take to get there. I must say the formal counsel proffered by Joe is usually far more valid and valuable than the expertise from higher blown sources.

As a former news commentator for radio and television, I feel a natural kinship with Joe and his work. And based on long observation, I can tell you that Joe is one of the ablest practitioners of our mutual profession. It is with distinct pleasure, therefore, that I rise to pay formal tribute to Joe on the occasion of the 20th anniversary of his nightly radio program, "Today in Congress."

Joe is going so strong he should be good for at least another 20 years; I certainly hope so.

UNCONSTITUTIONAL OSHA INSPECTIONS SHOULD CEASE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. HANSEN. Mr. Speaker, I make available to my colleagues the contents of a news release which I released to the media on January 10 regarding OSHA legal maneuvers:

OSHA'S BURDENSOME BUREAUCRATIC MANEUVERS

WASHINGTON, D.C.—U.S. Rep. George Hansen today blasted Occupational Safety and Health Administration efforts to stay a court order blocking OSHA inspections which have been declared unconstitutional by a federal court decision.

"The Department of Labor is attempting a legal maneuver in order to continue their unconstitutional searches of private business premises during the pendency of the appeal," Hansen said. "This is just another burdensome bureaucratic act in the face of a unanimous decision by a Constitutional panel of judges declaring OSHA unconstitutional which can only further encumber our judicial system as informed citizens everywhere continue to reject OSHA inspections on sound Constitutional grounds," Hansen stated.

"OSHA should cease inspections pending a ruling from the Supreme Court," Hansen asserted. "Not only is this a matter of justice, but it is a matter of legal reality since necessary precedent exists for individual rejection warrantless searches or inspections by any citizen in the nation."

OSHA inspections have stopped in Idaho and they should be stopped in all other areas under OSHA jurisdiction as well. The court's decision directly enjoins the Secretary of Labor, his agents and their successors from acting pursuant to Section 8(a) which authorized inspections under the Act of 1970. Hansen urged anyone who becomes subject to an OSHA inspection anywhere in the U.S. to consult legal counsel about the possibility of bringing contempt proceedings against the Secretary of Labor for violation of the injunction.

Accordingly, I have written the Secretary of Labor, OSHA Administrator Morton Corn, and U.S. Attorney General Levi asking that all inspections cease. Certainly government activities of this nature should not be enforced only against the acquiescing citizen who is either not informed of his basic rights or who is without the means or determination to protect such rights," Hansen said.

"I have introduced a resolution in the House of Representatives which demands that all OSHA inspections be discontinued pending action by the Supreme Court and I will continue to use every method at my disposal to help educate Americans everywhere of the unconstitutional actions of OSHA," concluded Hansen.

Mr. Speaker, for those who are unduly concerned as to the effect of stopping all OSHA inspections across the Nation, I would like to offer the following pertinent contents of a letter which I received from California State Senator Newton R. Russell:

NEWTON R. RUSSELL,
CALIFORNIA LEGISLATURE,
January 4, 1977.

Hon. GEORGE HANSEN,
Washington, D.C.

DEAR CONGRESSMAN HANSEN: I read with interest in the recent edition of Battle Line that you have been named Chairman of the project, "Stop OSHA".

As one who has been somewhat involved in OSHA in California, I thought that some factual data from this State might be of interest. The Department of Finance's Program Evaluation Unit in January, 1976, put out a paper, " A Review of the Implementation of the California Occupational Safety and Health Act". In that report on page 20, they refer to recent research in Wisconsin and California which indicates that "most injuries are momentary or behaviorial in nature and do not involve hazards which an inspector could be expected to perceive in the course of his inspection". The Wisconsin Study concludes that perhaps 25% of all industrial injuries are inspection preventable. The California study is less optimistic, estimating that roughly 18% are inspection preventable. These two reports are "Inspection Effectiveness Report", State of Wisconsin, Department of Industry, Labor and Human Relations, 1971 and "Development of Inspection Value Index", State of California, Department of Industrial Relations, Management Analysis Unit, 1973.

The report by the Department of Finance also examines injury rate data for California for the years 1969 through 1974 and for the second quarter of 1975. They state that "the injury rate increased in the nine months following the January 1, 1974 date of the initial Cal-OSHA inspections". They do indicate, however, that the injury rate decreased in the second quarter of 1975 and that they believe the decrease is attributable to external factors and not to Cal-OSHA. While they do not want to draw a firm conclusion based upon the history of the program, they do state categorically that "data do not support any contention that Cal-OSHA has reduced occupational injuries and illness."

While there were problems in California's industrial safety program prior to OSHA, it was probably, nevertheless, one of the best programs in the country. With the advent of Cal-OSHA, however, we find that costs have risen almost four times, and we have only about one-fifth as many inspections and that over 98% of all inspections deal with the citing of nonserious violations, and I could go on.

The above information was obtained by personal research in late 1975 and early 1976. There has been a change in the thrust of the OSHA programs with fewer citations being given for nonserious electrical violations and a greater attempt to adopt a "worst first" philosophy. I am personally concerned that if the Cal-OSHA program does not improve, there will be an attempt to repeal it and then we will be covered only by Fed-OSHA which will be even more impossible to deal with. I believe you are on the right track in trying to stop OSHA, or perhaps more practically to modify it, because since the Federal Government has preempted the field leaving very little flexibility at the state level, the only effective changes can come through congressional action.

Good luck!

Sincerely,

NEWTON R. RUSSELL,
Senator, 21st District.

Mr. Speaker, it should be noted that when multiplying the statistics which were developed in the California and Wisconsin studies against the 2 percent of all businesses which OSHA is capable of inspecting annually you will find that less than one-half of 1 percent are meaningful. This statistical amount would be considered inconclusive by most mathematicians and is certainly borne out by the conclusions of the California study cited in the Russell letter and by many findings on the national level.

OSHA is expensive and unproductive. We can do better for the Nation's work force and through ways not destructive of our basic rights.

CHALLENGES OF THE 1980's

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. MURPHY of New York. Mr. Speaker, recently the General American Investors Co. held a 50th anniversary seminar titled "Challenges of the 1980's," during which it forecast revolutionary changes in biology, in energy sources, and a dramatic growth in the health care industry. These were only a few of the many positive visions for the next decade of life on this increasingly complex Earth. Although the entire text of the proceedings is fascinating, it would be far too long to present in this fashion. I therefore urge all of my colleagues who have a stake in the future of this Nation to read this brief account of the results of the seminar, and to take note that such advances only skim the surface of our improving technology and our understanding of the world around us:

CHALLENGES OF THE 1980'S

NEW YORK.—The coming decade of the 1980's will be characterized by revolutionary changes in man's ability to utilize existing forms of solar energy; a burgeoning health care industry, monitored but not controlled by the Federal government; and by developments in biological research which may change the course of human history.

These were a few of the long-range projections of forces already underway in laboratories and pilot programs, as outlined today by some of the nation's most outstanding scientists and economists at a spe-

cial seminar on "The Challenges Of The 1980's", sponsored by General American Investors Company, Inc., a leading closed-end investment company celebrating its 50th anniversary.

Dr. Gerald M. Edelman, a 1972 Nobel laureate, who is the Vincent Astor Distinguished Professor at The Rockefeller University, and an authority on immunology and protein chemistry, said, "The long-range developments of biological research, based upon the molecular understanding of inheritance, may radically change the direction of human history and beliefs."

Dr. Edelman said, "For the first time, we now begin to understand the basis of individuality at the level of molecules. Thanks to these developments we are now in a position to understand how one cell recognizes another to make an organ such as the brain. We are almost ready to try to understand experimentally how our brains might classify, remember and generate new possibilities."

The general outcome of all of this, the Nobel prize winner said, "is likely to be the largest single intellectual revolution in human history. During the course of development of this knowledge, much that is of extraordinary practical value will emerge. We will develop new information processing machines, new chemical industries, new ways of preventing birth defects, of protecting against disease, and of dealing with aging and psychological disorders."

A CHANGE IN BASIC ENERGY SOURCES FORESEEN

The challenge facing the United States chemical industry in the 1980's, according to Dr. Augustus B. Kinzel, former vice president of Union Carbide Corporation, "will come from the change in our basic energy supply, petroleum and the change in our approach to life, safety."

Dr. Kinzel said that while the chemical industry has always been based on solar energy stored in the past, such as coal, tar and oil, "in the decade of the 1980's, we must base it on present rather than past solar energy—to use solar energy available in regenerable raw materials from forestry and agriculture by means of modified standard processes.

"I am predicting a revolution in the chemical industry," Dr. Kinzel told the General American seminar audience. "The timing will be determined by the price of petroleum and coal. The philosophy of the industry must change. It must produce its own raw materials instead of having them delivered. The investment in land will be great, but the total investment will be less as the investment in process equipment will be less."

Dr. Kinzel said the final challenges of the 1980's has to do with safety of the end products, specifically flammability and health impairment.

"The attack on pollutants involved in ingestion by breathing or eating is well along, but there is a whole new area on which attention will focus, namely ingestion of pollutants through the skin. The cosmetics industry in particular would seem to be ripe for a shock," Dr. Kinzel stated.

HEALTH CARE INDUSTRY SEEN REACHING A TRILLION DOLLARS BY THE YEAR 2000

"Regardless of when, or even whether, National Health Insurance is enacted, the U.S. health care industry will grow at a rate significantly greater than the economy as a whole," Marvin A. Asnes, executive vice president of Becton, Dickinson, told the General American audience of leading business executives and members of the press.

Noting that total health expenditures have increased 7 times in the last 20 years, Mr. Asnes said that if this trend of an approximate annual growth rate of 11 per cent continues, health care could consume over one trillion dollars by the year 2000.

During the 1980's Mr. Asnes noted that because of the complex structure of the health industry and the enormity of the control task, "it is inevitable that the Federal government will have a major role in monitoring the growth of the health care industry, in the area of setting standards of care, mediation and subsequent monitoring of expenditures."

Although 1984 obviously occurs in the 1980's, Mr. Asnes said, "We believe that George Orwell's vision is not appropriate for the health sector. Rather than a repression of private initiative, monitored growth of the health industry will continue to provide significant opportunities in an essentially free market environment but will require a redirection of effort to capitalize on such potential."

ALREADY HIGH MEDICARE COSTS TO BENEFICIARIES SHOULD NOT GO HIGHER

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. PEPPER. Mr. Speaker, when medicare was enacted in 1965, those of us favoring its passage were intending to provide major relief to older Americans from the heavy burden of health care costs.

It is ironic, therefore, that medicare beneficiaries pay more now for health care than they did the year before medicare became law — 2½ times more. Health care costs have risen so steeply that, of every $8 spent by an older person covered by the program, medicare pays only $3.

As ranking majority member of the House Select Committee on Aging, therefore, I was particularly disheartened last fall when the Social Security Administration proposed increasing the so-called deductible amount that medicare beneficiaries have to pay for hospital care, from $104 to $124. That represents a 19-percent jump in the amount the elderly or disabled person must pay personally, before medicare pays a single dollar. Because of the lateness of the session, there was no chance for Congress to consider legislation to deal with this increase, and it went into effect on January 1, 1977.

But the new Congress brings with it a new opportunity to act. I am today introducing legislation that would roll back the deductible payments under part A—hospitalization—of medicare to their 1976 levels.

This legislation is being introduced today in the Senate by Senator FRANK CHURCH, who chairs the Senate Special Committee on Aging.

This legislation would also roll back other 19-percent increases in part A charges that took effect on January 1. The $15.50 per day coinsurance payment by beneficiaries for skilled nursing care would return to its 1976 level of $13. The $31 per day patients hospitalized from 1 to 3 months must now pay would revert to $26. Medicare beneficiaries who must draw on their lifetime reserve of 60 hospital days would have their coinsurance charge reduced from $62 to the former level of $52.

All of these reductions would be made retroactive to January 1, so as not to penalize those who happened to fall ill in the early months of the year.

Mr. Speaker, we know that our senior citizens have a higher proportion of poverty—one in every six—than any other age group. We know that they spend a higher proportion of their meager incomes on health related expenses. These increases add yet another heavy straw to the backs of America's elderly, and Congress must act quickly on this legislation to prevent a fracture.

It is also important to note, Mr. Speaker, that the bill I introduce today carries with it adjustments in already scheduled medicare payment changes that more than compensate over the long term for the modest cost increases attributable to the rollbacks the bill proposes.

Six million elderly and disabled Americans need the relief that my bill proposes to afford them, Mr. Speaker. I urge prompt and favorable action on this measure; for many of the intended beneficiaries, delay in action will mean no action at all for them.

I include at this point the text of the bill:

H.R. —

A bill to amend the Social Security Act to roll back the deductive and coinsurance charges under Part A of Medicare to the 1976 levels, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) (1) section 1813(b)(1) of the Social Security Act is amended by—

(A) striking "$40" and substituting "$104"; and

(B) striking "1969" and substituting "1978".

(2) Subsection (b)(2) of such section is amended by—

(A) striking "1968" and substituting "1977";

(B) striking "$40" and substituting "$104"; and

(C) striking "1966" and substituting "1975".

(b) The amendments made by subsection (a) shall be effective with respect to any spell of illness beginning after December 31, 1976.

SEC. 2. (a) Section 1401(b) of the Internal Revenue Code of 1954 (relating to rate of hospital insurance on self-employment income is amended—

(1) in clause (3), by striking "1978" and substituting "1977";

(2) in clause (4)—

(A) by striking "1977" and substituting "1976", and

(B) by striking "1981" and substituting "1980";

(3) in clause (5)—

(A) by striking "1980" and substituting "1979", and

(B) by striking "1986" and substituting "1984"; and

(4) in clause (6), by striking "1985" and substituting "1984".

(b) Section 3101(b) of such Code (relating to rate of hospital insurance tax on employees) is amended—

(1) in clause (4) by striking "1980" and substituting "1979";

(2) in clause (5)—

(A) by striking "1981" and substituting "1980", and

(B) by striking "1985" and substituting "1983",

(3) in clause (6), by striking "1985" and substituting "1984".

(c) Section 3111(b) of such Code (relating to rate of hospital insurance tax on employers) is amended—

(1) in clause (4), by striking "1980" and substituting "1979",

(2) in clause (5)—

(A) by striking "1981" and substituting "1980", and

(B) by striking "1985" and substituting "1983",

(3) in clause (6) by striking "1985" and substituting "1984".

REGULATORY REFORM ACT OF 1977

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. WHITEHURST. Mr. Speaker, I am today introducing the Regulatory Reform Act of 1977, which I believe will provide the necessary authority to implement badly needed reforms of our Federal regulatory agencies. I am hopeful that both the House and the Senate will act expeditiously on this legislation so that we can develop a less burdensome and more efficient Federal regulatory structure.

Calls for regulatory reform are not new. Every President for the past two decades has suggested some type of reform. However, with the severe downturn of our economy in recent years, more serious and intense attention has been paid to the tremendous adverse impact that these Federal regulatory agencies have on our economy. Increasingly, Members of Congress and the executive branch have come to realize that the outmoded and misguided policies of these agencies stifle competition, inflate prices, and smother businessmen with needless paperwork. Estimates of the costs of Government regulation to the American people have ranged from $60 billion a year up to as high as $130 billion a year. Consumers carry the dual burdens of higher taxes and higher prices to support policies which do them no good.

Additionally, regulations impede the tremendous productive power of the American economy. Increasingly, the American people are coming to understand that Government must start restoring competition and removing market constraints. If we expect the economy to get better and stay that way, we must strip the wet blanket of unnecessary Government regulation from its back.

Not only does the present regulatory system stifle free enterprise, but the overlap and duplication of the multitude of agencies also tend to make these agencies less effective in carrying out their legitimate responsibilities. Thus, we must streamline and coordinate the functions of the regulatory agencies as well as insure that their policies do not hinder the free market system.

President Ford has devoted a substantial amount of attention to regulatory reform and his administration has devised specific plans for deregulating the airline, railroad, and trucking industries. However, our experience has been that calls for regulatory reform tend to die as a result of pressure brought on by affected interest groups. Consequently, the legislation which I am introducing today provides for a specific timetable for a comprehensive reform of our regulatory system.

This bill would provide that over a period of 5 years, from 1977 to 1982, the President would submit to the Congress by March 30 of each year comprehensive plans for reforming regulation in five specific areas of the economy; namely, banking and finance; energy and environmental matters; commerce, transportation, and communications; food, health, and safety, and unfair and deceptive trade practices; housing, labor-management relations, equal employment opportunity, Government procurement, and small business.

Each plan would include recommendations for increasing competition, and for procedural, organizational, and structural reforms—including the merger, modification, establishment, or abolition of Federal regulations, functions, and agencies. Each plan would be referred to the committee with appropriate subject matter oversight jurisdiction, as well as to the respective Government Operations Committees of the House and Senate.

The bill also provides for an action-forcing mechanism in the form of impending abolition of specific agencies and regulations, unless a comprehensive regulatory reform measure is enacted by a certain date, as the best way to assure prompt and effective action on the full range of regulatory issues. Responsibility for action is thus squarely placed on the Congress as a whole.

My concern with the problems of regulatory reform has grown considerably during my service in the Congress, through accumulated visits and letters from those individuals in the business world who are being harassed by a welter of regulations and a relentless corps of bureaucrats to enforce them. One regulatory agency which has particularly concerned me, and many small businessmen in my congressional district, is the Occupational Safety and Health Administration. The Occupational Safety and Health Act came into being with the valid purpose of cutting down on industrial accidents. In 1973, over 14,000 Americans died in job-related accidents. Many of them would be alive if better safety measures had been in effect, but as the Federation of American Scientists states:

> The Occupational Safety and Health Act has surfaced at least as many problems as it was designed to solve.

The regulations promulgated by this agency are so lacking in uniformity that employers do not know how to comply with them and employees are not in a position to know when a regulation has been violated.

The costs to business for compliance with OSHA regulations are not low. Planned industrial investments in health and safety equipment will rise from $2.5 billion in 1972 to $3.4 billion in 1977.

Many of the observations about OSHA can also be made about the Environmental Protection Agency. EPA regulations are extraordinarily complex and result in major costs to businesses and ultimately to consumers. Just to cite one example, if we adopt the stiff noise standards supported by the EPA, the compliance cost is expected to be $31.6 billion. Yet with all of the regulations of the EPA and OSHA, we still find that a tragic situation, such as the recent Kepone incident in Hopewell, Va., can go undetected and unchecked by these agencies. Perhaps one reason for the failure to prevent the Kepone tragedy is that so many agencies, both State and Federal, have such overlapping functions that none of them have the clear responsibility to deal with the problem.

The airline industry is certainly one which we should make every effort to deregulate. The examples of increased costs to consumers as a result of the Civil Aeronautics Board regulations are startling. CAB-regulated flights from Boston to Washington, D.C., cost more than twice as much as the unregulated intrastate flights of the same distance, such as the San Francisco to Los Angeles run. Another example of the CAB's disregard for the consumer arose in 1974 when the CAB flatly refused to allow London-based Laker Airways to fly regular "no frills" flights between London and New York for $125 each way or slightly over one-third of the current fare.

The surface transportation industry is also one which clearly needs deregulation. Economists have estimated that directly and indirectly the Interstate Commerce Commission costs Americans not less than $4 billion a year and possibly as much as $8.7 billion. The ICC has implemented many restrictions on the trucking industry, requiring trucks to return empty from long hauls, wasting time, money, and vital fuel. The results of all ICC rules concerning the trucking industry cause up to 460 million gallons of fuel to be wasted annually. The ICC even contributes to the extremely high costs of groceries. When a court ruling made the transportation of frozen fruit and vegetables exempt from ICC regulations, shipping rates for those goods declined 19 percent. When freshly dressed and frozen poultry were also deregulated, rates dropped even further by 33 percent.

The communications industry, regulated by the Federal Communications Commission, is another Federal agency which is coming under increasing scrutiny by the American people. A small 5,000-watt radio station in New Hampshire reported that it spent $26.23 just to mail its application for license renewal to the FCC. An Oregon company operating a TV station reported that its license renewal application weighed 45 pounds. These small stations were apparently required to fill out the same forms as the multimillion dollar radio and TV stations operating in major metropolitan areas.

The issue of cable TV is admittedly complex, but it does offer the potential for cutting costs and providing a wider range of services to consumers. Yet the

FCC's reaction to cable TV has been extremely cautious. Seemingly, the Commission has gone overboard in trying to protect the interests of the existing networks which, of course, are highly profitable and not in need of protection from the Federal Government.

Recent revelations have even raised doubts about the effectiveness of the regulatory system for the banking industry. Today, the Federal Reserve Board, the Federal Home Loan Bank Board, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the National Credit Union Administration simultaneously look after the regulation of our Nation's banking system. The result of having all of these agencies is what Arthur Burns has called "a jurisdictional tangle that boggles the mind." The effect is that financial institutions are required to report to a multitude of agencies, yet important problems somehow manage to fall between the cracks. With the recent failure of the Franklin National Bank and with the disclosures that even the First National City Bank and the Chase Manhattan Bank are having difficulties, we must attempt to streamline the regulatory agencies to insure that problem areas are identified early so that solutions can be found.

Through most of their history, Federal regulatory agencies have labored in relative obscurity. Only recently have the American people become aware of the substantial impediment to our free enterprise system which these agencies have caused. Indeed, we still have a substantial number of people and spokesmen who demand that the noose be tightened further with additional restrictions and controls. Thus, I believe it is now time for the Congress to review in depth the functions of the regulatory agencies so that all of our people are aware of the tremendous impact that these agencies have on the personal lives of our citizens. This task will be difficult, but I feel it is of the utmost importance if we are to maintain the free enterprise system and the enormous productive power of the American economy. I would urge my colleagues to act expeditiously to pass this legislation.

LAWNDALE WOMAN OF THE YEAR

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, the City of Lawndale, Calif., has named Mrs. Christine Gardinier, a truly outstanding lady, as Woman of the Year for 1976. It is appropriate that this friendly person, who gives so unselfishly of herself, her time, and her talent whenever the need arises, be recognized and honored in the records and annals of the U.S. Congress.

Married to Robert Gardinier for 24½ years, they have worked side by side in business in Lawndale and have reared three fine sons, David, Paul, and Steven. To some this would seem a sufficient accomplishment, but Mrs. Gardinier has elevated her value in the community through her many activities and honors.

Debilitating disease fund drives have always received her eager and enthusiastic help. For over 6 years she was area coordinator for the Cancer Fund, receiving an award for outstanding services. She has given effort to the Muscular Dystrophy drive, the March of Dimes, American Red Cross, the Mobile Chest X-ray program, and the Heart Fund, which earned her the title of Queen of Heart Drives.

Mrs. Gardinier coordinated the City Hall Dedication Committee, worked tirelessly for the Youth Day Parade, participated in the Lawndale Memorial Wall dedication, was a member of the Bicentennial committee for the city and chaired the Prayer Breakfast. For 5 years, she participated in the Lawndale Christmas Pageant and served on the Women's Committee of the Chamber of Commerce. She sewed the queen's robe for the local beauty pageant, was cochairman of the Angel Tree, helps with Christmas baskets for over 500 needy people each year, and for 2 years hosted a Japanese exchange student, as well as a teacher from England on a group study exchange program.

Christine Gardinier has been extremely active with the PTA, the Fine Arts Association, the Rotary Anns, Lawndale Women's Club, and the Monday Eves—the junior membership of the Women's Club. She is a charter member of the South Bay "25" Club and a charter member of the Soroptimist Club and through these organizations, she has become a guiding light, inspiring others to help their fellow citizens willingly, always with cheerfulness and unselfish devotion to others.

Many have attested to how deeply she is loved by all residents of the community. And so I am singularly proud to bring her many accomplishments to the attention of the Nation on this day as we pause in our business to recognize Christine Gardinier as Woman of the Year in Lawndale for 1976—an accolade she most truly deserves.

SHOULD A CONSCIENTIOUS OBJECTOR BE THE NEW CIA CHIEF

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ASHBROOK. Mr. Speaker, Human Events has done a service in bringing back to light that Theodore Sorensen, Carter's choice for CIA chief, was a conscientious objector during the Korean war. I seriously wonder how this country will be served by having a conscientious objector heading the Central Intelligence Agency.

In the words of Human Events,

Carter has selected as chief of the CIA—the agency upon which the President must depend for making crucial foreign policy and defense decisions—a conscientious objector, an early booster of George McGovern and a backer of "massive" defense cuts.

All this hardly serves as qualifications for Director of the CIA.

At this point I include the text of the article from Human Events of January 8, 1977. I commend it to the attention of my colleagues:

SHOULD A CONSCIENTIOUS OBJECTOR BE THE NEW CIA CHIEF?

What Jimmy Carter was thinking about when he selected Theodore Sorensen to head up the Central Intelligence Agency is anybody's guess, but many in the intelligence community are completely flabbergasted by the choice. The appointment "seems absolutely appalling," says one knowledgeable national security source.

Carter has selected as chief of the CIA—the agency upon which the President must depend for making crucial foreign policy and defense decisions—a conscientious objector, an early booster of George McGovern and a backer of "massive" defense cuts. As John F. Kennedy's "ghost" and key aide, Sorensen was part of an Administration that helped bring us two of Americas greatest foreign policy setbacks: the Bay of Pigs and the no-win war in Vietnam.

His advice during the Kennedy years was almost invariably soft and disastrous. While he contends in his book, *Kennedy*, for instance, that he had only a hint of the Bay of Pigs operation before it was executed, he vigorously defended JFK's decision to block any direct U.S. participation in a Cuban invasion, even while acknowledging that this decision permitted "the disaster that occurred." But Sorensen argued that it helped prevent "a far greater" disaster, intervention of a nature "contrary to our traditions and to our international obligations."

If we had eliminated Castro with direct U.S. intervention, Sorensen said, the results "would have been far more costly to the cause of freedom throughout the hemisphere than even Castro's continued presence." (If the U.S. Navy and Air Force had been "openly committed," he viewed with alarm at another point, "no defeat would have been permitted. . . ." In other words, the worst of all possible worlds for Sorensen was not defeat, but a "commitment" to victory.)

During the Cuban missile crisis, as David Halberstam discloses in *The Best and the Brightest*, Sorensen took a "potentially soft" position that was actually covered up by Kennedy himself.

While he went along with the Vietnam War initially, he opposed any effort to really take the war to the enemy and abandoned the cause after Kennedy's assassination. Indeed, he is extremely defensive and apologetic about JFK's role in expanding the war, invariably suggesting that the "Pentagon" or Eisenhower somehow forced Kennedy to take a questionable course of action.

Sorensen is credited with coining some of JFK's "Cold War" rhetoric, but the Kennedy Administration, as James Reston liked to point out, frequently "spoke like Churchill and acted like Chamberlain." Nowhere was this more true than in the field of disarmament. The gradual decline of American nuclear superiority can be traced to the deliberate, unilateral disarmament policies pursued by the Kennedy Administration.

Indeed, Defense Secretary Robert S. McNamara disclosed in a famous interview in the Dec. 1, 1962, *Saturday Evening Post* that it was the Administration's hope—to avoid nuclear war, he said—that the Soviets would develop an invulnerable strategic offense, "the sooner, the better." With such a defense posture, he suggested, the Soviets would feel more secure and less likely to jump the gun in times of rising East-West tension.

Sorensen's own role in pushing this policy was disclosed in a March 30, 1961, dispatch filed by Thomas Ross of the Chicago *Sun-Times*.

Following his stint with JFK, Sorensen

emerged as a more open dove, running for the U.S. Senate from New York in 1970 on leftish platform. He was now totally opposed to American involvement in Vietnam, said he was inclined to back someone like George McGovern for President in 1972 and issued a position paper calling for "massive cuts in defense spending." He also assailed one of his primary opponents, Richard Ottinger, for being a "big stockholder in major defense contractors."

A week after he received the backing of the Democratic State Committee for the nomination, Sorensen launched his campaign by traveling to Moscow to meet with Soviet big shots.

What causes particular fear and trembling within the intelligence community is that Sorensen appears totally unqualified for the job, lacking managerial experience, a deep knowledge of the intelligence field and the proper temperament (because of his pacifist background).

In a critical editorial, the Washington Post sarcastically suggested that Sorensen's most noted attribute for the job was his "soaring rhetoric contributed to the speeches of assorted political figures." He doesn't have "much administrative experience—and if the CIA has demonstrated a need for any particular talent, it is a need for tight, sound management. As a lawyer, he has been the legal agent of several African governments; it is not clear how that would help prepare him to preside over the U.S. government's espionage agents."

Sorensen, moreover, is hardly in a position to bring a new, "moral" tone to the agency that is so ardently desired by some. To much of the left, Sorensen is forever tainted, having been so closely identified with the Kennedy Administration, whose covert activities against foreign nations have been furiously assailed in certain liberal quarters.

To the right, Sorensen is recalled as the one who cynically ghosted Teddy Kennedy's post-Chappaquiddick TV script—full of dishonest and misleading statements—alibiing for Teddy's decision to let Mary Jo Kopechne stay at the bottom of a pond for nine hours before informing the proper authorities.

But it is Sorensen's pacifist background that may be the most disturbing of all. In the Sept. 23, 1961, Chicago Tribune, Walter Trohan, then the paper's Washington bureau chief, disclosed that Sorensen's Nebraska draft board records revealed that on Dec. 31, 1948, "he was classified I–AO, a conscientious objector available for noncombatant military service only." On Aug. 18, 1950, after the outbreak of the Korean War, Sorensen was "reclassified as III–A, extreme hardship deferment, or registrant with a child or children. On Nov. 20, 1950, his status was reviewed by the board and he remained in III–A.

"On Jan. 8, 1952, he was reclassified I–AO, a conscientious objector. . . ."

If Sorensen had repudiated his pacifist inclinations in any vigorous manner, it has not come to our attention or the attention of a wide number of people in the intelligence community. Indeed, he made a curious but relevant comment on his draft status in the March 26, 1967, New York Times Magazine. Back in the late 1940s, he said, he had "registered with the draft board for noncombatant service as a pacifist." He went on to say that he was "not sure" that he would do that again.

But why was he "not sure" if he had rejected pacifism as a philosophy? Did Sorensen mean that he still held a pacifist position as late as 1967?

Clearly, defense-oriented senators must closely scrutinize Sorensen when he comes before them for confirmation. Judging from what we know now, we hope the Senate will not entrust the fate of the CIA to this curious Carter choice.

HAROLD JINKS, NEARING 70, IS STILL VERY MUCH "ALIVE"

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ALEXANDER. Mr. Speaker, one person that I have come to rely on greatly for counsel since I came to Congress is Harold Jinks of Piggott, Ark. This tireless ball of fire, who is nearing 70 and who shows no signs of letting up, is a public-spirited citizen who is a credit to his community, to our State, and to our Nation.

Recently, the Arkansas Gazette carried a well-deserved and long overdue tribute to this Arkansan that I would like to share with my colleagues:

HAROLD JINKS, NEARING 70, IS STILL VERY MUCH "ALIVE"

(By Leroy Donald)

PIGGOTT.—Few postmen, politicians and elderly and patriotic groups who know Harold Jinks for his work know that he once stood before the American Legion, a .38-caliber pistol strapped to his belt, to defend the right of conscientious objectors for flying Old Glory.

Jinks was postmaster at Piggott for 10 years; served four years as a regional director for the Democratic National Committee, served four years as director of the Postmasters and Rural Carriers Division; was a special assistant postmaster general; is a member of the Mid-America Synod of the United Presbyterian Church; nationally active in all veterans groups; a leader for the American Association of Retired Persons and the National Retired Teachers Association, and just finished a nationwide drive selling 300,000 patriotic booklets he compiled and edited.

He's a fast talking, indefatigable, transplanted Texan who knows how to bargain with the biggies and is proud of the rounds he has won under fire as a public servant.

NEARING 70

He's nearing 70 and enjoys staying around the house tending his gardens better than traipsing across the country mending political fences and dedicating postoffices as he once did.

But he wants the world to know: "Harold Jinks is still alive."

A midwife ushered him into this world February 11, 1906, near New Waverly, Tex., because a fierce thunderstorm had driven the doctor to spend the night in a barn. (He says his father paid the doctor 60 cents in yellow yams for his troubles.)

REARED ON FARM

He was reared on a tenant farm, moving by covered wagon to Bay City, Tex., when he was 6 years old. He studied at Texas A and M in a work-for-an-education program that his father, whose own education only went to the third grade, insisted.

His rovings during the Depression brought him to Northeast Arkansas, where he obtained a job with the Soil Conservation Service and, by attending night school at then Arkansas State College, obtained an "equivalent degree" so he could have professional status under the civil service regulations.

During these years he met and married Wilma Lehman, a Piggott native, and called Piggott his home, no matter where he later resided.

"Every place I spoke and every register I signed, I signed it 'Harold Jinks, Piggott, Ark.,' not Harold Jinks, Washington, D.C., because this was my home," he says.

SENT TO MAGNOLIA

With World War II approaching and the draft proceeding bullishly, Jinks, because of his own church work, was sent to Magnolia to be superintendent of a camp for conscientious objectors on the Southern State College campus.

This camp was for those who objected to the war on religious grounds, mostly such historically antiwar groups as the Mennonites and Quakers. Jinks believed there were some in the camp who didn't want to be targets for ammunition, but he believed in the right of legitimate objectors.

When the camp was started, he recalled, the town liked the idea because of extra income. The war began and two National Guard companies, one from the town and one from the college, marched off to fight, and feelings changed. There was bitterness.

One day the American Legion ordered the camp to lower the American flag, Jinks continued.

Jinks went to the college president and asked him for his views. The president was in agreement that the flag should fly.

"So I had a meeting with the American Legion," Jinks said.

As a United States marshal, he could carry a pistol, and carried one to the Legion meeting. He also took with him the American Legion oath.

"I read it to them and told them that that was my flag flying out there," Jinks recalls. "I told them I worked for the government that passed the laws and set up the appropriations funds and set up the guidelines a conscientious objector would have to meet to be there.

"I told them that we were doing a good work in building farm roads and farm reservoirs, planting pine tree seedlings. And that as long as the government kept me there, I would continue to work these boys.

"But I'd continue to fly that flag," he added.

LEGION OATH READ

He then read to the Legionnaires their own oath and told them it was their duty to uphold it because the oath supported the Constitution.

"I told them that I'd appreciate their cooperation, but if I didn't get it—and patting my pistol—I told them I had not only the right to wear this thing, I could shoot it, too."

The flag flew. Years later, the Columbia County Veterans Organization would ask him to return as guest speaker. He would receive a standing ovation.

After defending the rights of war defectors, Jinks went into active service, with the Navy Air Force. He taught at Naval air stations, then became involved with the B.A.T., the first guided missile, which was used mostly on Japanese shipping in open seas.

At age 40, and with the rank of first class aviation ordnance man gunner, he worked his way out of the service and back home, somewhat disturbed by certain aspects of the growing military complex.

During his last days in the Navy Air Force, his plane was hit and had to make a wheels up landing on coral rock. His spine was ruptured and he spent four years in a cast. This meant retirement from his government job with the SCS.

This "retirement" led to the automobile business, in which he sold Kaisers, jeeps and farm equipment and termed a success. But the long hours he put in prompted his doctors to tell him to quit. So he sold out.

JOINS CIVIL SERVICE

About this time, United States Representative E. E. (Took) Gathings approached him about becoming postmaster here. These post-

masterships then were regarded as patronage jobs that usually changed hands when another Party took over the country.

But Jinks took the civil service exam, anyway, and took over that summer as an acting postmaster.

When Harry Truman upset Thomas Dewey for the presidency, Jinks became Piggott's postmaster, serving most of his tenure under a Democratic administration. During that time he fought off efforts to oust him, he said. He explained that he was investigated five times for charges ranging from violating the Hatch Act (which prohibits government employes to campaign during work) to contentions that he wasn't working a full day.

He cleared himself of all such charges.

When Dwight D. Eisenhower won in 1952, it was the first time civil service regulations locked postmasters into their jobs, according to Jinks.

That same year, he was elected president of the Arkansas Chapter of the National Association of Postmasters. One of his major efforts was to get the word to other postmasters to show some leadership, no matter which Party was in office.

He figures his was a test case.

In 1957 "and since I had established myself as a loyal and contributive member of the Democratic Party," Jinks was chosen a regional director of the Party. His main job was to bring back together feuding factions of the Party. He traveled thousands of miles through Arkansas, Colorado, Kansas, Missouri, New Mexico, Oklahoma and Texas to do this.

"I enjoyed it very much," he says, "because ours is a political government with two great basic philosophies for two Parties."

'HARMONY DINNER'

His biggest problem came in his own state, when the NAACP, and some liberals howled that there would be segregated seating at the big "Harmony Dinner" he was putting together. This was in 1959, two years after the Little Rock Central High School integration crisis.

Some 5,000 persons including many black leaders were expected. Using his connections, Jinks had lined up House Speaker Sam Rayburn from Texas and Stuart Symington of Missouri, in 1960 a presidential candidate. Symington withdrew over the controversy, even though Jinks told him, "I don't run the Party in the state of Arkansas, I'm just putting on a dinner."

Jinks recently said of the incident: "It was a thing I regret very much but I can look back in perspective and understand. The question [of integration] at that time was being brought to the forefront and the media was playing it so that a man like Symington would object.

"If I had my way, there wouldn't have been segregated seating, and there isn't segregated seating today. I think this is a step forward. But I thought the dinner was a healing influence," he added.

His role, however, caused him some problems when he was being considered for a high position in the Post Office Department after the Democrats took over the White House in 1961. For four years, he worked with postmasters and rural carriers, then became the special assistant to the postmaster, traveling across the country and making hundreds of speeches before retiring in 1968.

In recent years he has made several business ventures, including the purchase of a weekly newspaper here in partnership with former Governor Orval E. Faubus and Clifford Cole. It was discontinued in 1969.

One of his proudest ventures was his "The Book of Freedom, Our American Heritage," a handsome booklet on parchment paper that was regarded as a "promotion in patriotism" during the Bicentennial Year. Much of the selling was done by mail carriers.

The book contains such historical information as the Mayflower Compact, the Monroe Doctrine, the Gettysburg Address, maps showing the order of entrance of the states, statements by presidents and explanations of such documents as the Declaration of Independence. It is geared for easy reading, he said.

Besides helping to get a new constitution for the state, he's also writing pamphlets for the Democratic Party and retired persons groups.

Harold Jinks is very much alive.

ENERGY CONSERVING TECHNOLOGY

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. RICHMOND. Mr. Speaker, I have recently introduced a package of legislation entitled "Incentives For the Promotion of Energy Conserving Technology." This legislation consists of six seperate bills aimed at accelerating research, development, and implementation of alternative energy resources to replace dwindling supplies of domestic and foreign oil and natural gas.

Recently, our national energy policy has attempted to counteract imminent energy scarcities by initiating programs for the development of centralized high technologies, such as nuclear reactors and coal-powered electric generators. Despite enormous expenditures, the dangers that these technologies post to our lives and to our environment have not yet been adequately resolved.

The basic question is this: How is it possible to meet U.S. energy requirements without endangering the fragile ecological balance? Clearly, our future energy supplies must meet certain environmental and production requirements.

Generating plants must be environmentally sound, yet able to produce inexpensive energy. In addition, future energy resources must be abundant, so that dependence upon them will not cause future scarcities. Fortunately, today two such infinite energy resources, previously ignored or wasted, may be potentially tapped by Americans as a result of new developments in solar energy and methane conversion technologies.

Solar energy technology may be divided into two categories: Present day capabilities and future possibilities. Today, the effectiveness of solar energy space and water heating and/or cooling capabilities has already been established. To this effect, HUD has developed minimum property standards for solar thermal conversion systems which cover effectiveness of design, cost-output ratio, and materials used.

Basically, a solar energy thermal conversion system is very simple. It consists of black flat plate collectors which absorb solar energy as heat, an air or water circulation system which carries collected heat to a storage area, and a heat storage container, such as a gravel pit. During sunny days, heat is collected and stored to be tapped later when needed.

Methane conversion technology involves anaerobic digester systems, which convert animal and vegetable waste materials into methane gas and fertilizer. Utilization of anaerobic digesters, also known as methane converters will provide the farmer with a substitute for natural gas and propane. Such digesters will also yield fertilizer with a high nitrogen content.

Clearly, these two technologies do not provide a complete answer to the U.S. energy requirements. Nevertheless, if they are developed and implemented rapidly, they can and will help to alleviate our dependence upon our diminishing supplies of oil and natural gas. But, if methane conversion and solar energy technologies are to be any use in alleviating the upcoming energy shortages, mass production of solar energy and methane conversion units for immediate consumer use must be achieved in a critically short period of time.

Mass production of units based on these technologies for residential and nonresidential applications will be the natural result of consumer demand, once consumers and producers are convinced of the viability of such systems. Currently, the initial expense of installing such systems is prohibitive. Solar water heating systems may run as high as $1,500, while solar space heating and/or cooling systems for a 1,500 square foot house can range from $1,500 to $10,000 depending upon climatic conditions and equipment used, although such systems are capable of producing up to 40 percent of the energy needs of the home and farmowner.

Just as the oil industry applied for, and obtained aid in its early days from Federal incentives such as the oil depletion allowance, so is the fledging solar energy and methane conversion industry deserving of incentives for rapid development. The high initial cost may be circumvented by attacking this problem in two ways. The first is a program of incentives for consumers and the second is a program of incentives for producers.

In my package of incentives for the promotion of energy conserving technology, I emphasize primarily the role of the consumer. For homeowners, farmers, and businessmen who wish to purchase solar energy equipment, Federal incentives, such as deduction allowances and guaranteed loan programs, will help to alleviate the high initial expense and risks. Therefore, I am introducing the following legislation:

Amendment to the Consolidated Farm and Rural Development Act. This legislation amends the Consolidated Farm and Rural Development Act enabling individuals to obtain loans under a program designed to encourage the acquisition and installation of solar energy systems in residential structures located on a family farm.

Solar Heating and Cooling Tax Incentive Act of 1977. This legislation amends

the Internal Revenue Code of 1954 to allow businesses to amortize, over a 60-month period, solar heating and cooling equipment which is placed in service for nonresidential structures, and to allow an investment tax credit for the purchase of solar equipment.

Amendment to the National Housing Act. This amendment establishes a guaranteed loan program designed to encourage the acquisition and installation of solar energy systems by private individuals in dwelling units.

In order to promote utilization of energy saving measures by State and local governments in the construction of public facilities, I am introducing:

The State and Public Buildings Solar Energy Systems Assistance Act. This legislation calls for the establishment, within the Federal Energy Administration, of a program to provide Federal matching grants to assist States and localities to implement solar energy systems in public buildings and facilities.

In order to improve the reliability of these technologies, and thereby encourage their consumption, I am introducing:

The Family Farm Energy Conversion Act of 1977. This legislation establishes a study of anaerobic digestors which convert animal and vegetable waste materials into methane gas and fertilizer.

Amendment to the Solar Heating and Cooling Demonstration Act of 1974. This amendment establishes a demonstration program to explore the application of solar heating systems in greenhouses, crop drying structure, livestock shelters, and other nonresidential agriculture structures.

It is the responsibility of the 95th Congress, to make critical energy policy decisions. I believe that the time has come to shift our emphasis from large-scale centralized energy production, such as nuclear and coal generators, reliant upon limited resources, toward small-scale, decentralized energy production based upon limitless resources. Such small-scale, limitless resources include solar radiation and organic wastes such as crop residues and sewage. These resources may be directly tapped by the homeowner, farmer, and business person by installing relatively simple equipment on homes, farms, and factories.

Although solar energy and methane conversion systems are not the complete answer to our energy problems, the Congress should encourage every American to produce some of the energy he or she consumes each day for heating and/or cooling purposes.

These new and viable energy production units have the potential of becoming relatively inexpensive through mass production. Federal incentives for development and implementation, such as the programs I am introducing today, are designed to encourage consumption of these energy conserving units by the public and will in the process cut the time necessary for such systems to become cost competitive with conventional energy systems.

Solar energy and methane conversion systems have enormous potential. It is up to the 95th Congress to realize this potential and initiate utilization without further delay.

LAWNDALE MAN OF THE YEAR

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, the city of Lawndale, Calif., in the 31st District I represent in the U.S. Congress has named Jack Chaddick as Man of the Year for 1976. It is fitting that this outstanding and selfless individual be honored for the many contributions he has made to both his community and his fellow citizens.

For that reason, we pause in the business of this country to pay him honor and to record his many accomplishments before this august body.

A business owner in Lawndale, Jack Chaddick is known as the man who never looks aside when help is needed. A resident of the South Bay area since 1940, he served as a member of the Sheriff Reserve Police Force for 2 years and as a member of the Redondo Beach Police Reserve Force for 2 years.

For 27 long years, Mr. Chaddick has worked with Boy Scouts in Lawndale, has served as institutional representative for Troop 770, and has been service representative for Post 165 of the Explorer Scouts.

He held the position of president of the coordinating council for 1 year and was two-term president of the Optimist Club. In recognition of his work with young people, Jack Chaddick has been given a life membership in the Optimist Club. A member of the Lawndale Optimist Club since 1948, he served on the board of directors for 23 long years. For 8 years he headed the Boys' Work Committee of the Optimists and organized dances for the teens, sponsored boxing and wrestling teams and encouraged quarter midget racing. He presently serves on the board of Optimist Boys' Home in Highland Park.

Jack Chaddick's contributions to his community have been truly outstanding. He was a leader in the civic effort to obtain sidewalks and storm drains for Lawndale. During floods in 1948 to 1950, he worked day and night helping to evacuate stranded families, using his own equipment to pump water out of flooded homes. With his own hands he helped construct two churches, one in Lawndale and one in Hawthorne, contributing equipment, material, and many hours of expertise and labor.

Mr. Chaddick hosted a barbeque on the occasion of the 10th anniversary and dedication of the Lawndale City Hall at which 6,300 citizens were served. Not only has he been an active worker on all civic picnics held by Lawndale, he has been a member of the chamber of commerce since its inception. His many offices include chamber president and director, chairman of the traffic committee, chairman of the zoning committee, and member of an ad hoc committee for service station ordinances.

An enthusiastic member of the citizens advisory group for the Lawndale general plan, he is also a long standing participant in the Lawndale Breakfast Club and supporter of the "We Tip" program.

Fortunately, others have spoken of Jack Chaddick's unusual dedication and service to his community, for he is never one to seek recognition or gratitude for his contributions. Yet when there is a problem to be solved, or work to be done, Jack Chaddick is the first to step forward to help.

I am honored to number Jack Chaddick among those I represent in the U.S. Congress, America should be proud on this day to pay honor to the gentleman who most fittingly deserves the title of Lawndale Man of the Year.

FLAGS OF CONVENIENCE

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. LENT. Mr. Speaker, it has been a hard month for Liberian oil tankers, and while it is gratifying to hear that the Liberian Government is taking steps to investigate the *Argo Merchant* disaster, and to tighten up its maritime regulations in general, the fact remains that as long as some nations offer their flags for the convenience of less than scrupulous shipping firms, more *Argo Merchants* will occur.

In this vein, the New York Times published an article on Modany, January 10, 1977 detailing how serious the problem can be, and I commend it to the attention of my colleagues.

SHIPS UNDER ARGO MERCHANT AGENT REPORTED IN A NUMBER OF INCIDENTS

(By David F. White)

Two months before the Argo Merchant broke up off Nantucket on Dec. 21, spilling 7.5 million gallons of oil, another tanker managed by the same agency suffered an engine room explosion off Cuba, and her superstructure was largely destroyed by the blast and the fire that followed, according to documents published by Lloyds of London and accounts of the United States Coast Guard.

The vessel, the Stolt Argo, which was empty at the time of the explosion, had been involved in three groundings and one collision since Jan. 1, 1973, Lloyds' Weekly Casualty Reports show.

The explosion is only one reported episode to emerge from an investigation into Amership Agency Inc., which managed the two ill-fated tankers. The investigation which covered the last four years, found that vessels managed by Amership had been involved in groundings, at least one collision and a series of labor problems, according to the records.

REPORTS OF LABOR PROBLEMS

A ship agent acts on behalf of the ship owner in matters that may range from maintenance, arranging charters and cargoes and drydocking, to the handling of documentation pertaining to ocean shipping. Sometimes, agents have wide-ranging control of vessels and responsibility for them and sometimes their role is small.

In the case of Amership, it could not be firmly established what role the agent had in running ships.

However, an official of the Iron Ore of Canada, which is now negotiating to get out

of a charter contract involving an Amership vessel, said that the agent in his case was acting as the "operating" agent who did have responsibility for maintenance, crews and drydocking.

At about the same time as the explosion on the Stolt Argo, three other vessels managed by Amership were affected by crew actions that tied two of them up in ports. The actions began with complaints about conditions on board and back pay and ended when the ships' owners agreed to pay to the crews, according to records kept by Lloyds and by the International Transport Workers Federation in London.

Lloyds, the vast London insurance house, publishes a series of reports on worldwide shipping, including voyages and accidents (called casualties), that are used by the industry as a source of authoritative information.

When asked to comment on reports concerning Amership-managed vessels, N.T.K. Skarvelis, listed by Lloyds as president of the agency, refused to discuss any matter pertaining to the vessels. He said the records on the ships were erroneous but refused to say what the errors were. When questioned further, he ended the telephone conversation.

Subsequent attempts to reach the chairman of the agency, identified by Lloyds as M. Madias, were unsuccessful. The Amership offices are at 1 State Street Plaza in Manhattan.

EIGHT SHIPS IN FLEET

Last Friday, The New York Times reported that the fleet managed by Amership, and the owners of record, as listed by Lloyds were the Argo Merchant (Thebes Shipping Inc.), the Argo Leader (Argonaut Shipping Inc.), the Stolt Argo (Ithaca Shipping Inc.), the Argo Castor (Knossos Shipping Inc.), the Argo Master (Jason Shipping Inc.), the Argo Pollux (Thessaly Shipping Inc.), the Argo Trader (Spartan Shipping Inc.) and the Stolt Argobay (Sounion Shipping Inc.).

Further checks into the Lloyd's records indicated that four of the vessels were built since 1960, the last in 1966. But the other four dated from the 1950's. The Argo Merchant, for example, was built in 1953 the Stolt Argo in 1955, another in 1957 and the fourth in 1958, according to the Lloyd's records.

Applying marine insurance standards, which assume a 20-year life for a ship in salt water, the ages of these four vessels put them close to the end of their nautical lives, according to two marine insurance experts.

The Coast Guard admiral charged with merchant marine safety said that if a vessel were 20 years old, it did not necessarily mean that she was not a good ship. But one marine insurance broker, who asked not to be identified, said that "after 20 years, a ship is finished."

He explained that insurance costs were an important part of ship operations. "If you put those costs on a ship more than 20 years old, they skyrocket. It's out of this world," he said.

GROUNDING IN SANTO DOMINGO

In February 1973, long before the Stolt Argo's engine room explosion, Lloyd's records show that she had the first of her three reported groundings since that time. The grounding happened in Santo Domingo, and after she was freed she struck a pier.

Two years later, in February 1975, she collided with the Chinese tanker Tai Hu in the Persian Gulf at Khurramshakr, Iran, according to the casualty reports published by the London company, and a check found the starboard side of her forecastle and eight feet of railing shoved in, as well as damage to the deck in the impact area. No damage to her hull shell plating was found, according to the Lloyd's reports.

The reports also said she ran aground in the Elbe River in December 1975 and once again in Port-au-Prince, Haiti, in March 1976.

Finally, Lloyds carries an account of the explosion last October that shook the Stolt Argo's engine room. While serious damage to her superstructure and engine room was found, there was "no evidence of explosions in cargo tanks" and bottom damage was "not anticipated at present," the report says.

A spokesman for the Coast Guard district headquarters in Miami said that Cuban authorities had taken control of the case and that the eventual fate of the ship was not known.

MORE ACCIDENTS THAN AVERAGE

Rear Admiral William M. Benkert, chief of merchant marine safety at the Coast Guard, said that the record of the Stolt Argo was not "the norm by any means," but he added that such a record did not necessarily mean "you have a substandard vessel."

John C. Herman, vice president of the American Institute of Marine Underwriters, said that the vessel sounded to him like a "jinxed ship."

It was last October also, according to the Lloyds' reports, that crew troubles caught up with three of the ships managed by Amership. First the Argo Pollux, listed as a freighter then at Newcastle, Australia, was tied up by her crew in a dispute over "alleged complaints by the crew [of the ship] over pay and conditions on board the vessel," Lloyds says.

Backed by the International Transport Workers Federation, the dispute spread to two other ships, the Argo Master, listed as another freighter, which had sailed from Jidda, Saudi Arabia, and the Argo Castor, said to be a third freighter and reportedly held up by her crew in Palermo, Sicily, Lloyds says.

More than $160,000 was paid by the owners of the Argo Pollux before she was permitted to sail and payments of about $22,000 and about $110,000 were agreed to by the owners of the Argo Master and the Argo Castor, according to Lloyds.

UNION NEGOTIATIONS RECALLED

In a telephone interview from London, Brian Laughton, an administrative secretary in the Transport Workers Federation with responsibility for "flag of convenience" matters, said Thursday that complaints about conditions on board one of the ships included a charge that some crew members had been locked in the ship's brig without food or blankets for several days.

He said that dealings between the union and representatives of the ships' management had been "on the rough side" and that one Korean seaman who had lost his lower right leg on a ship managed by the agency had still not been paid his injury claim.

Mr. Skarvelis said that the record on these labor matters was particularly riddled with error. When asked what the errors were, however, he said he could not comment. When an attempt was made to repeat these and other specific charges to him, Mr. Skarvelis refused to hear them. Such diverse problems are not unique to Amership, apparently. One marine insurance broker said in discussing all these matters: "There are hundreds of Amerships—hundreds and hundreds."

VOTING REPRESENTATION FOR THE DISTRICT OF COLUMBIA

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. STEERS. Mr. Speaker, today, I am pleased to join with our colleague, the gentleman from Connecticut, Mr. McKINNEY, in introducing a resolution providing for a constitutional amendment granting full voting representation in the Congress to the citizens of the District of Columbia. As the United States enters its third century, it is long past time for us to rectify a glaring problem in our laws. There are some 735,000 U.S. citizens who have absolutely no vote in the Congress. Those citizens have no vote in shaping the laws under which they must live. According to numerous constitutional law experts, those citizens have been disenfranchised due to what was most probably an oversight when the Constitution was drafted. It is time to correct that oversight.

Our Founding Fathers eloquent arguments against "taxation without representation" unfortunately still ring true for three-quarters of a million citizens. These arguments, as stated by Thomas Jefferson in the simple declaration that, "The influence over government must be shared among all the people," speak for themselves. I support the extension of voting rights to the District because it is right, it is fair, and it is an essential element of representative democracy.

Rather than dwell on these points, Mr. Speaker, which I feel are obvious, I would like to mention the thesis that the lack of a provision in the Constitution for congressional representation for the District of Columbia may be seen largely as an oversight, rather than a distinct design, by the framers of the Constitution.

It is indeed clear that in establishing a permanent seat for the National Government, our Founding Fathers desired a locale free from the interference or jurisdiction of any state. Concern along lines was heightened by an incident in Philadelphia in June 1783, during which certain Pennsylvania troops demanding overtime pay marched on and surrounded Independence Hall, where Congress was in session. Congress requested, but did not receive, protection from Pennsylvania authorities and voted to move immediately to Princeton, N.J. It is not disputed that there was a general, recognized need of having the Capital City in a territory where the Federal Government would be sovereign, and that few persons challenged this principle. In my view, there is little to suggest that in addressing the political rights of the residents of the Capital City, by granting them congressional representation, we are violating this purpose.

It appears that slight attention was paid to the constitutional provision establishing the seat of government, either by the Constitutional Convention, or by the various State ratifying conventions. In only 4 of the 13 State conventions was the subject of the Federal district discussed at all. Indeed, one Virginia delegate suggested that the origins for the provision for a Federal seat of government were simply in the "insult" to Congress in Philadelphia.

With respect specifically to the political rights of the residents of the Capital City, there is no mention made in the recorded debates of the Constitutional Convention or in the State conventions. It is precisely this lack of general discus-

sion on the issue that lends credence to the theory that the absence of suffrage for residents of the Nation's Capital was an historical accident—an oversight.

Mr. Speaker, our proposal is simple and straightforward. It would provide that the District of Columbia would get two voting Members of the Senate, and as many Members of the House as its population would dictate. There is no reason to be found, either in constitutional history and law or in simple justice, for us to continue to deny voting representation to so many U.S. citizens who have for so long been without their basic rights as citizens. I urge my colleagues to help rectify this serious problem.

OSHA RECONSIDERED

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. CRANE. Mr. Speaker, even though the year of the Bicentennial is now behind us, those freedoms for which our Founding Fathers gave so much should never be allowed to fade into the recesses of history. If the "Spirit of 76" is to reclaim its meaning, those "certain unalienable rights"—life, liberty, and the pursuit of happiness—to which Jefferson referred in the Declaration of Independence cannot be compromised.

Political philosophers the world over recognize that Jefferson, in drafting the Declaration, was heavily influenced, as were many of the Founding Fathers, by the writings of John Locke. In fact, Locke, in his famous "Second Treatise on Government," had written of the right to life, liberty, and property, setting forth a proposition that is as central to contemporary American thought as it was to followers of Locke, Edmund Burke, and later Adam Smith.

While the right to property is not specifically mentioned in the Declaration of Independence, it is carefully protected in the Bill of Rights. Remembering the abuses suffered at the hands of the British, certain property rights were set forth and protected in the third, fourth, and fifth amendments to the Constitution. The third amendment protects people from the quartering of troops in their homes without consent, the fourth amendment protects people's homes, papers, and effects from unreasonable searches and seizures, and the fifth prohibits people from being deprived of life, liberty, or property without due process of law. Together they have worked well to protect property rights for 200 years now.

Although subsequent Supreme Court rulings have made it clear that nonpublic portions of commercial property are likewise protected by the fourth amendment, the Congress, in 1970, passed a bill which included a section permitting an agent of a certain Federal regulatory agency to enter without delay and at reasonable times any factory, plant, establishment or environment where work is performed by an employee of an employer; and to inspect and investigate during regular working hours, and at other reasonable times and within reasonable limits and in a reasonable manner, any such place of employment and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein, to question privately any such employer, owner, operator, agent, or employee. In practice, this has meant on-site, on-demand inspection by the inspector without the latter having to obtain a search warrant. Thus, the requirement that the Government show probable cause that a violation exists is effectively circumvented which, in turn, compromises the goal of the fifth amendment which is to see that no one is deprived of their property without due process of law.

The law in question is, of course, the Occupational Safety and Health Act of 1970 and the agency created by it has been issuing citations and cease-and-desist orders based on such on site inspections ever since. OSHA has literally become prosecutor, judge and jury in cases it uncovers by such procedures, suggesting not only abridgement of fourth amendment rights but of fifth and seventh amendment rights as well.

While it is indeed regrettable that Congress ever passed such a constitutionally dubious law in the first place, I was most pleased to see that a three-judge Federal panel in the district of Idaho has ruled the onsite inspection provisions of the Occupational Safety and Health Act of 1970 are unconstitutional. As the panel noted, the OSHA act attempts to extend warrantless inspections for the purpose of health and safety, even though all industries are involved not just those which may be federally licensed and regulated and there is no indication of certain "exigent circumstances" which have been recognized traditionally by the courts as grounds for a warrantless search. If such warrantless searches were permitted to continue, the threat they would pose to individual freedom far outweighs any supposed advantages they might produce.

As a matter of fact, there is no reason to believe, constitutional issues aside, that OSHA has done all that much to promote either worker health or safety. For one thing, OSHA is duplicative of what many States were already doing and, because of their greater familiarity with the conditions extant, were in a position to do better. Second, the myriad of OSHA rules and regulations, complex and often contradictory, make compliance so expensive and so difficult that consumer prices go up or, in some cases, the company simply goes out of business. Third, there is little evidence to suggest that enactment of OSHA has contributed to improved safety and health; in fact one may reasonably argue that reducing employee responsibility for his own welfare on the job to unreasonably low levels is, in the end, counterproductive. Certainly, OSHA's desire to see noise levels reduced through prohibitively expensive engineering advances—some not even feasible—when employee earplugs are both effective and available is a case in point; just because an employee might not wear those earplugs, even though they are provided, is hardly justification for threatening the survival of an industry and, at the very least, driving up the cost of products to the consumer.

All these factors simply make the unconstitutional intrusions on personal privacy by OSHA all the more unconscionable. But, thanks to our ingenious system of checks and balances, the judicial system has temporarily provided a needed check. One can only hope that the Supreme Court, which will hear the case on appeal, will see fit to uphold the ruling of the court and bring this nonsense to an end.

In the meantime, I think Congress should not sit back but should act on its own. When my good friend and colleague, STEVE SYMMS, reintroduces his bill to repeal OSHA altogether, I plan to cosponsor and I urge others to do likewise. As the Founding Fathers found out the hard way, unlimited searches and seizure can have the most unpleasant consequences; onsite inspection and citation is hardly any different.

For the benefit of my colleagues who may wish further information, I include the Washington Post account of this landmark Idaho court decision to be entered in the RECORD at this time:

JOB SAFETY INSPECTION HELD ILLEGAL WITHOUT A WARRANT

A panel of three federal judges in Idaho has declared, unconstitutional the 1970 law authorizing the Labor Department to conduct occupational safety and health inspections without a warrant.

The department fears the decision could strip it of all occupational safety and health enforcement power, and plans to appeal.

"We consider the right of inspection to be absolutely vital," Morton Corn, the assistant labor secretary who heads the Occupational Safety and Health Administration, said yesterday. "We will take whatever legal steps are necessary to vindicate that right."

The Idaho ruling, handed down last week, involved an electrical contractor, F. G. Barlow of Pocatello, who refused to let a federal inspector go through his place of business.

He rested his refusal on the Fourth Amendment to the Constitution, which forbids "unreasonable searches and seizures" and says search warrants should only be issued where there is probable cause to suspect a violation of the law.

The 1970 Occupational Safety and Health Act not only authorizes unannounced inspections of workplaces but prohibits advance warnings that inspections are about to occur. It makes no mention of search warrants, and federal inspectors do not obtain them.

In a Texas case earlier last year a three-judge panel said in effect that this failure to mention warrants must have been inadvertent, and ruled that safety inspectors ought to take warrants out in the future. That case is on appeal.

In the Idaho ruling, however, the panel simply said the law is unconstitutional, and left any repairs to Congress.

The Idaho ruling thus left OSHA without any authority to make inspections; the whole authorizing section was struck down as defective.

The Idaho judges then issued an injunction forbidding future inspections of Barlow's place of business and possibly—the panel's meaning is not completely clear—forbidding all further OSHA inspections nationwide.

OSHA lawyers said they would appeal the constitutional finding and seek a stay of the injunction. An appeal would take the issue directly to the Supreme Court, which in the past has upheld some warrantless government health and safety inspections and struck down others.

REIMBURSEMENT FOR NURSE PRACTITIONERS SERVICES IN FEDERAL HEALTH PROGRAMS

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. COHEN. Mr. Speaker, I am introducing today legislation to amend the Social Security Act to provide for the inclusion of the services of registered nurses under medicare and medicaid.

One of the problems that surfaced during the past two years of hearings on health manpower legislation was the critical maldistribution of physicians, both geographic and by specialty. Passage of my bill would be one solution to correct the shortages of medical manpower in underserved rural and inner-city areas and ease the demand for primary care physicians.

Nurses fill an indispensable role in remote areas of our country where severe physician shortages exist, and also in highly specialized medical centers. In my own State, for example, one family nurse association, practicing in Deer Isle and Stonington, provides the first contact patients in that area have with the health care system. Despite their vast amount of training, health care providers like this nurse, are prevented from performing many services of which they are capable because of the present restrictions in the Social Security Act. The result of this practice is the underutilization of highly skilled professionals and an increased burden on our doctors.

Medicare does not reimburse for nursing services outside a physician's office unless they are performed under the direct supervision of a physician. Nurse practitioners not employed by physicians may not be reimbursed for services provided, even if acting under a physician's orders. Medicaid will not reimburse a nurse practitioner unless it is allowed under State law, and the reimbursement practice is included in the State's medicaid plan. A study of medicaid reimbursement policies for physician extenders dated November 1974, found that only 18 States reimburse for some type of nurse practitioner service. Where a unified policy with respect to the use of these health personnel is needed, none exists. Neither do these Federal programs encourage the employment of this valuable health resource.

As a member of the House Select Committee on Aging, I am reminded that the diseases of the elderly—those more likely to take advantage of the medicare and medicaid programs—tend to be chronic in nature and do not readily respond to medical intervention and cure. These chronic conditions are best treated by the types of supportive services and preventative care for which nurses are trained.

There is good reason to believe that enactment of this bill would result in a net savings to the medicare program. Nurses' salaries are roughly one-half to one-third lower than those demanded by doctors. Experience has shown that the introduction of physician extenders where primary care had not previously been available has produced decreases of 10 to 15 percent in hospitalization days. As a result, the National Association of Blue Shield Plans, the American Medical Association, and the American Nurses Association have supported the concept of physician extenders or nurse practitioners and the reimbursement for their services.

When the Congress passed the health manpower bill last session, it provided funds for the training of nurse practitioners. It makes no sense that Government funds are spent for this training when reimbursement is withheld from them when they provide the very services for which they were trained.

By correcting these flaws in the medicare and medicaid statutes, more high-quality health services will be made available to Americans who would otherwise go unserved or who would further strain their already hard-pressed family budgets for necessary health care services.

I commend this legislation to my colleagues.

INTERNATIONAL ECONOMIC OUTLOOK

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. FRENZEL. Mr. Speaker, the economist of the Northwestern National Bank of Minneapolis, Dr. Sung Won Son, writing in his bank's publication, "Climate," has provided an unusually brief and blunt description of the international economic outlook.

Because I believe that many Members would find Dr. Sung's comments of interest, the article follows:

INTERNATIONAL ECONOMIC OUTLOOK

Domestic and foreign economies are interdependent. Strengthening economic activity here means additional demand for raw materials, manufactured goods and services produced elsewhere. Conversely, the economic recoveries of our major trading partners generate export demand for the U.S. economy.

Relative strengths of foreign currencies also play an important role in international trade. A depreciating dollar means that more dollars are needed to buy a unit of foreign currency. For U.S. consumers, imports become more expensive, while the opposite is true for the residents of those countries whose currencies are appreciating against the dollar. Since the price of imports contributes to the inflation rate, such as the CPI, the inflation picture in the U.S. deteriorates. Imports also compete with domestically produced goods. Therefore, higher import prices are likely to allow higher prices for comparable domestically produced goods. What determines the realative value of two currencies? The answer can be found in inflation rate differentials in the two countries. A faster rate of inflation in the U.S. than in Germany tends to result in the dollar depreciating against the Deutsche mark.

With this brief treatise on international economics, the economic outlook for our major trading partners will now be discussed. About a third of our trade is with the United Kingdom, Italy, France, Japan and Germany. Needless to say, the importance of these five countries on the U.S. economy—especially on U.S. multi-national corporations—cannot be overstated.

Before going into specific forecasts of the countries, some general observations need to be discussed. First, the political climate, especially in England, France and Italy, has been shifting to the left. A redistribution of income from the private to the public sector has been in progress, discouraging investment. Second, governmental majorities have been getting thinner and some governments do not have a majority at all. Weak governments are inclined to take the painful steps necessary to correct economic ills and are therefore more inflation-prone. Thirdly, the high cost of oil will now have a more pronounced impact on the economic growth of the industrialized countries. Many of these countries have delayed the adjustment process through a combination of foreign borrowing and exchange rate depreciation. But the stream of international credit has begun to run dry. Instead of financial recycling, real resources will have to be transferred. The resultant curbs on imports by the less developed countries are another potential negative influence on the economic growth of the industralized countries.

UNITED KINGDOM

The British used to criticize the Italians. The Italians are now pointing their finger at the British. Double digit inflation rates are the norm and production is going nowhere. This is not surprising because this welfare state provides for almost everything except the incentive to work.

With stagnating production, high taxes are not enough to maintain the welfare state. Budget deficits skyrocket, and, even worse, the deficits are financed by creating more money. Sooner or later, the rapid expansion of the money supply without matching increases in production leads to more inflation. As inflation rampages, the value of sterling plunges. The weakness in sterling further accelerates inflation. In an attempt to prevent the self-feeding currency collapse without adopting politically painful economic policies, the government buys sterling in the foreign exchange market. Eventually, the country's foreign exchange reserves are depleted and the government is forced to borrow abroad. The country's external balance sheet worsens, another reason to avoid the currency. Normally, the depreciating pound gives a competitive edge to exports, but the import content of exportable goods is so high that exporters are forced to raise prices, offsetting potential benefits of the weaker pound.

The foregoing discussion describes the British economic problems which seem insoluble. Something has to be done to prevent further deterioration of the situation. Britain has to "bite the bullet." Real consumption must be lowered and budget deficits have to be under control. This means a lower standard of living, even if the sacrifice means that the proud British join the ranks of the underdeveloped. Thus far, the British government has not been strong enough to face the problem head-on. Now there is a ray of hope: lender discipline. As a condition to more loans, the lenders, including the IMF, insist that a ceiling be placed on the growth of the domesic money supply, along with a cap on public expenditures. Labor unions, an important source of the deficits, may have no choice but to go along with the austerity

program and agree to wage restraints. The lenders, in turn, may reluctantly accept temporary import controls, either mandatory import deposits or quotas. Consumer goods are the prime candidate for the controls. North Sea oil is another ray of hope for the battered British. By 1980, the country can be self-sufficient in oil, reducing drains on the foreign trade balance.

The U.K. situation is a classical laboratory example of how to ruin the economy. The underlying economic and political problems are so chronic that many years will have to elapse before significant improvement can be expected. Consequently, the economic outlook for next year is not much different from this year.

FRANCE

Like the British, budget deficits and rapid expansion of the money supply are at the heart of the French problem. Inflation rates have been hovering near the double digit range. The balance of payments deficit has been worsening. Consumer and business confidence is poor. The only lofty statistic is the unemployment rate. With so many problems, the French franc has been weakening.

At least the French are ahead of the British in recognizing the problem and wanting to take corrective measures. The new prime minister, Mr. Barre, has correctly diagnosed inflation as the number one problem. Accordingly, Mr. Barre has embarked on a scheme designed to hold down wages through price controls. The measures include a surtax, tighter monetary policy and a price freeze (not wages). The idea is to have management, instead of the government, control wages. The price freeze without wage controls is squeezing profit margins, causing firms to resist excessive wage demands. This in turn has encouraged strikes by the labor unions.

Will the austerity program succeed? It will be difficult. This is because the success or the failure of the austerity program depends upon the willingness of labor to moderate wage demands. Unfortunately, the political climate is shifting against Mr. Barre. A Socialist-Communist coalition is gaining popularity and may win the parliamentary election in March 1978. In this political climate, the government may once again resort to stimulative policies in order to gain political support. This is one of the main reasons why the French economy may continue to stagnate without material improvements on the inflation front.

ITALY

Once again it is a familiar theme. Wage escalation, deficits and rapid monetary expansion are the key problems facing the Italian economy. The political situation is particularly delicate because a minority government subject to Communist veto power has to tackle the problems. Like Britain, lender discipline and rising unemployment may force the Communist-backed labor unions to moderate wage demands. Until significant progress is made in combating some of the chronic problems, the Italians will have to live with low economic growth rates and high inflation rates.

GERMANY

The economic outlook for the rest of Western Europe is greatly influenced by what happens in Germany. This is the largest and one of the healthiest economies in Europe. The labor force is disciplined and productivity is high. Politicians are very inflation-conscious. Led by consumer spending and exports, the German economy began to recover early in the year. The recovery seemed to have stalled last summer, but the government imposed no panic measures to stimulate the economy. The economy is expanding once again with low inflation rates.

The big question is the performance of the export sector. Some 60 percent of German exports go to other European countries. Unfortunately, Western European countries do not have strong recovery prospects and the Socialist countries of Eastern Europe are nearing their debt limits. The affluent OPEC countries can absorb only so many imports. Consequently, export strength cannot be maintained in 1977. Where will economic growth come from? The first alternative is to stimulate domestic demand by expanding the money supply. The second alternative is to allow the Deutsche mark to float upward, with the intent of generating export demand by stimulating the other Western European economies first. From the German point of view, both options are undesirable. The first alternative would risk a new bout of inflation, while the second would further hurt exports. The German government may find the first alternative to be the lesser of two evils. The low inflation rate and the healthy balance of payments position could justify some monetary stimulation. Monetary ease could strengthen consumer spending and encourage capital spending by reducing long-term interest rates. With the stimulation, the German economy could sustain a modest real growth rate of 4 to 5 percent in 1977.

JAPAN

The export-led recovery has certainly made its mark on the trade balance and the yen. Consumer spending also has done its share in strengthening the recovery. Productivity gains and the stronger yen have contributed to the modest abatement of the inflationary pressures, but the inflation problem is far from solved.

Looking ahead to 1977, exports cannot continue to propel the recovery. Consumer-led economic recoveries in the United States and Western Europe, Japan's best customers, have subsided. In addition, protectionist threats among her trading partners are re-emerging, diminishing Japanese export prospects. Without export strength, consumer and investment spending will have to take up the slack. Monetary expansion has been fairly rapid in recent months and consumers and businessmen may very well increase expenditures. However, continued monetary expansion and budget deficits could accelerate inflation prospects.

Beyond 1977, a fundamental shift in economic planning should emerge. If exports continue to grow at the high rate achieved in the 1960's and early 1970's, the Japanese economy would be absorbing about half of the world's raw material output and the world markets would be flooded with Japanese goods. Clearly, such a scenario would be unacceptable to her trading partners. At home, there has been a political reaction to the substantial diversion of resources to exports, away from housing, roads, sewage works and other public needs. These considerations suggest that resources will be shifted from heavy, export-oriented industries to domestic needs such as housing and public infra-structure. With this reduced contribution from the export sector, the Japanese may have to settle for a moderate rate of long-term economic growth, but the inflation picture may brighten somewhat.

ECONOMIC IMPLICATIONS

1. Countries whose economies have fared better—Germany, Japan and the U.S.—accorded top priority to reducing inflation rates. Others, who emphasized unemploymen reduction, have found themselves up against high rates of inflation and weakening currencies without having made significant inroads into unemployment. A cleavage between the "have's" (U.S., Japan and Germany) and the "have-nots" (U.K., France and Italy) has developed. Naturally, the investment climate is better in the "have's."

2. The U.S. economy is in a better position. Cyclically the U.S. economy could grow as fast as most other industrialized countries, or even faster. Secularly, the United States also looks better. During the post-war period, the prosperity among our major trading partners was based on cheap raw materials and the over-valued dollar. Low cost energy and raw materials are no longer available in world markets. Fortunately, the U.S. produces a much larger portion of its raw material requirements than any other countries mentioned here. With the advent of semi-floating exchange rates, it is unlikely that the dollar will be over-valued for a prolonged period. Furthermore, our major trading partners no longer have a labor-cost advantage.

3. The aftermath of another round of major oil price increases is a major risk for the international economy. Without means to postpone oil deficits, the OPEC oil price increase could have severe repercussions in the oil-deficit countries, especially the less developed countries. Competitive devaluations and trade restrictions might be the next steps. Under the circumstances, animosity among traders would be heightened, poisoning international political and economic relations.

THE CARTER CABINET

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for January 5, 1977, into the CONGRESSIONAL RECORD:

THE CARTER CABINET

The most striking feature of President-elect Carter's new cabinet is that after having raised the expectation of new faces and a bold break with the establishment, he has followed the traditional procedure of balancing constituencies and appointing his cabinet from a fairly small, but select, group of Americans.

His choices, campaign rhetoric notwithstanding, have confirmed the impression that he would not stray far from the procedures of cabinet selection followed by recent Presidents. It really should not be surprising that he settled on people with whom he felt comfortable, who satisfied the major political constituencies, and who had political and managerial experience.

No one can predict—and indeed it is silly to try—how this cabinet will perform. But Mr. Carter went about the business of selecting a cabinet in a serious and careful way and he has come up with a solid and able group of people with the experience and diverse abilities needed to run the country.

A few facts about the cabinet are noteworthy. Their average age is 50, somewhat younger than the initial cabinets of Presidents Eisenhower and Nixon and a bit older than the initial cabinet of President Kennedy. Five of them once worked for President Johnson. As a group they are talented and attractive people of high intelligence. They have accumulated 88 years of previous experience in federal appointed office, and 34 years in elected office. Only two of them, (Kreps and Marshall) are newcomers to government. Nine of the 17 cabinet appointees have seen service in previous administrations and three (Adams, Bergland, Young) are seasoned members of the House of Representatives. Two are women (Harris and Kreps) and two are black (Harris and Young). Together they hold 37 earned degrees. Seven are Ph.Ds, six are lawyers, and only two left college without graduating (Bergland and Andrus). Five come from the South, three came from Georgia, eight from the East. Fewer than half of them list the Democratic Party as their political affiliation in their official biographies. Only one (Schlesinger) identifies himself as a Republican. Four of them, (Brzezinski, Vance, Brown, Young), as well as Carter and Vice-President elect Mondale, are members of the Trilateral Commis-

sion, a Commission organized by David Rockefeller to chart a new course in American foreign policy.

The cabinet appointees satisfied sectional, business, labor, women's and black interests. Carter shied away from militant feminists, like Bella Abzug, and outspoken blacks, choosing instead establishment figures, like Mrs. Harris. The appointees are generally considered good managers and pragmatic problem solvers, and not strong on ideology.

As might be expected, the appointees did not satisfy everybody. Labor was disappointed that John Dunlop was not reappointed Secretary of Labor. Blacks don't see a strong, vigorous black leader in a key post. Critics of Vietnam are chagrined that the new National Security team does not have a single member who was a critic of the Vietnam war. Those who supported Mr. Carter for the Presidency because he would bring a fresh approach are dismayed because of the conventional background of the appointees and because of his failure to name a new generation of leaders.

The appointment of Griffin Bell as Attorney General will probably generate the most opposition. He has been a close personal friend of Mr. Carter, a member of two Atlanta Social Clubs which exclude blacks and Jews and he supported G. Harrold Carswell when President Nixon nominated him for the Supreme Court. Mr. Bell does not strike me as the most distinguished candidate for the sensitive post of Attorney General, but the most puzzling appointment was the selection of Theodore Sorenson, a person without experience in intelligence matters or in foreign policy, to run the Central Intelligence Agency.

My guess is that President-elect Carter has wisely rejected advice to appoint a collection of brillant and innovative newcomers, perhaps thinking that the country is looking for reassurance more than anything else. He could have chosen to shake up the centers of established power in the country, but he obviously did not, and he has favored experienced hands over new faces. He has also put great stress on competent performance and managerial efficiency.

The most intriguing question about the cabinet is whether, and to what extent, it will be dominated by Mr. Carter. He has said he would not try to run the government from the White House, but would rely on a strong and independent cabinet. But he has also said that he will be the primary focal point for the evolution of policy. At this point, anyway, it is hard to see any of the appointees becoming dominant figures in their own right, as Secretary Kissinger has been in the present cabinet.

The real test of the cabinet, however, is not how it looks at this point, but how well it performs, not merely as a collection of individuals who preside over vast government bureaucracies, but as an executive council which runs the country. Overall my impression is that the reaction to the appointees throughout the country has been generally favorable, and that the President-elect has assembled a strong cabinet. They certainly should be given a chance to make their mark.

NATIONAL CONDOMINIUM AND TENANTS RIGHTS ACT

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ROSENTHAL. Mr. Speaker, problems associated with condominium purchases and conversions are among the Nation's most pressing consumer issues. Thousands of condominium purchasers are being misled or defrauded and renters—often elderly and poor—are being dispossessed.

Unless strong remedial action is taken, abuses surrounding condominium sales and conversions will become a far greater national scandal than the rash of interstate land sale frauds that swept the country several years ago.

It has been predicted that within the next 20 years half the population may be living in condominiums. The shift to condominiums is particularly acute in New York City and other urban and suburban areas where new and converted condominium units are rapidly displacing multifamily rental apartments.

There is little doubt that the condominium form of ownership has grown dramatically in the past 5 years. Approximately 85 percent of condominium unit owners have purchased their homes since 1970, and in 1973 and 1974, condominiums accounted for 25 percent of the housing starts in the United States. In addition, approximately 100,000 rental units were converted to condominiums during the 5-year period ending in March 1975.

In my own congressional district, in Queens, N.Y., 140 prospective condominium purchasers in a development known as Village Mall Townhouses lost $120,000 in downpayments because of the developer's insolvency and the fact that no law required that deposits be placed in escrow accounts. And 5,000 families in rental apartment developments known as Fresh Meadows and Windsor Park continue to live under the threat of a financially ruinous condominium conversion. Tenants resisting conversion have been subjected to abuse and harassment. They have had to deal with questionable lease riders, maintenance neglect, and unconscionably high utility rates and rent increases.

In my district, I have come to understand the personal tragedies of conversions. Families which have rented and maintained an apartment home for many years are forcefully uprooted. If unable to find comparable dwellings nearby, they must leave their friends and memories and start the difficult task of readjustment elsewhere. This is especially trying for the elderly who in occupying the older buildings often targeted for conversion are frequent victims of this process.

Apart from the psychological stress caused by such a move, the financial burden can be staggering even to middle-income families. According to the American Movers Conference, a typical intracity move in New York City and other large metropolitan areas runs between $240 and $300. Together with other costs, a forced move can wipe out the savings of most poor and middle-income families.

The Federal Government made its first serious attempt to evaluate the many abuses of the condominium boom in the 6-month HUD study mandated by an amendment to the Housing and Community Development Act of 1974. I believe the study results published in July 1975 are useful in many respects, particularly the data profile of the condominium and co-op market and the statement of problems and abuses.

In hearings before my Government Operations Subcommittee on the Federal Trade Commission's investigation of specific deceptive and unfair practices of specific condominium developers, it was found that the abuses and problems associated with condominium development are widespread and that these problems affect the sale, uses, and enjoyment, and resale value of the units.

The FTC focused its investigation on what appeared to be the most serious abuse in new buildings—the use by developers of long-term recreation leases and management contracts. This problem is rooted in inadequate disclosure, understated upkeep fees, misleading advertising, and the lack of ownership of key recreational and maintenance facilities. In addition to their bulk, condominium documents are technical in nature and extremely difficult to understand. In some cases, all documents covering the purchase are not even delivered to the buyer until after the purchase has been concluded and the contract of sale signed. Even if purchasers are given adequate time to inspect the documents, their sheer volume makes it difficult for the average layperson to understand. Thus, it is unlikely that many purchasers have even a vague notion of the commitment they are making when they sign a contract to purchase a condominium.

These hearings on the FTC's investigation showed that there are severe limitations in State laws governing condominiums and that strong Federal action in the area of condominiums is vital. Many State statutes are dependent upon interpretation of the Federal Trade Commission Act and other Federal laws, which has restrictive effects on the States' discretion.

Moreover, fewer than 10 States have meaningful laws protecting purchasers and no more than 3 States have laws protecting those who would be displaced by the conversion of rental units. Even those individuals who reside in States which do have meaningful laws may not receive adequate protection because many developers operate in interstate commerce. Because States are limited to enforcing laws within their own jurisdiction, developers can find refuge by basing their operations in States which have no such laws. In addition, there is a striking lack of uniformity in the State statutes.

To rectify this situation, I am today introducing the National Condominium and Tenants Rights Act, which establishes Federal guidelines for the protection of prospective condominium purchasers and tenants displaced by condominium conversions; and prohibits discrimination in mortgage loans based on age, sex, or nationality. These guidelines will be administered by a newly created Assistant Secretary for Condominium Housing within the Department of HUD.

Under my bill, prospective purchasers of condominiums must be fully informed, 21 days in advance of purchase, of all significant financial and physical aspects of the condominium development. To in-

sure its accuracy, this property report must be approved by the Assistant Secretary before construction or development loans can be made to a developer or mortgage money made available to a purchaser. Tenants of rental buildings about to be converted are protected by requiring 50 percent of the occupants to assent to any conversion and allowing them a reasonable period of time to find another apartment.

Last year, I testified in support of this legislation before a Banking, Currency and Housing Subcommittee overseeing condominium development. It is my hope and expectation that the committee will make prompt recommendations to the Congress for legislative protection.

SUMMARY OF THE MINIMUM INCOME MAINTENANCE ACT, H.R. 952

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. KOCH. Mr. Speaker, a major issue of consideration for the 95th Congress should be that of welfare reform. The President-elect, Members of Congress, and the citizenry as a whole, recognize the grave consequences for our Nation of an expensive and unwieldy welfare program. For the past 6 months I have been working on a comprehensive welfare reform proposal, the Minimum Income Maintenance Act. I would like to share a summary of that bill with my colleagues.

My proposed legislation would reform current welfare programs and consolidate AFDC, SSI, and food stamp programs into a single Federal welfare program which is both equitable and efficient. It includes work incentives and a uniform Federal welfare payment adjusted for cost-of-living differences across the country.

Obviously, there will be a great many proposed solutions to our national welfare dilemma, and my legislation certainly does not address all the problem areas. I do hope, however, that it can serve as a vehicle for much needed discussion and I welcome comments on its contents.

A summary of the bill follows:

SUMMARY OF THE MINIMUM INCOME MAINTENANCE ACT (MIMA) H.R. 952

The Minimum Income Maintenance Act would replace the AFDC, SSI and Food Stamp programs with a single national welfare system of benefits which would be administered by the federal government and for which all qualified residents of the U.S. would be eligible. The legislation would regionalize welfare benefits by utilizing the Bureau of Labor Statistics' (BLS) "lower budget" figure for both SMSA (Standard Metropolitan Statistical Area) and non-SMSA areas. In determining maintenance payments, the bill would establish the applicable BLS figure as the eligibility standards and 50% of the applicable BLS figure as the maximum Koch payment. The Koch benefit would be that maximum figure reduced by one-half of all income and work enabling expenses, as defined by the Act.

A sample of current BLS lower budget figures for a family of four is set forth below to convey an idea of what the level of benefits would be in the different regions across the country.

New York City, $10,266.

Pittsburgh, Pa., $9,205.

Cleveland, Ohio, $9,489.

Detroit, Mich., $9,501 (Maximum payment would be 50% of this figure).

Atlanta, Ga. $8,924.

Baton Rouge, La., $8,588.

Denver, Co., $9,319.

San Francisco, Ca., $10,509.

Note: Currently, BLS provides lower budget figures for a hypothetical family of four and for a retired couple in 40 of the 276 SMSAs. The BLS hypothetical family of four consists of a 38 year old husband employed full time, his non-working wife, a boy of 13 and a girl of 8. The Koch program would have BLS develop comparable figures for varying family sizes and compositions in SMSA and non-SMSA areas.

For purposes of the bill, income is defined as including both earned and unearned income and all public payments, such as veterans' benefits and social security, in order to reduce the inequities created by some state welfare programs which reduce benefits by some government payments but not by others. The Secretary of HEW would determine which inkind and vendor payments would be exempted in computing income. Medicaid is to be the only public payment explicitly exempted for that purpose. Work enabling expenses, as defined by regulations promulgated by the Secretary (including day-care expenses) would be deductible in establishing "income."

The definitions and formulas which follow indicate how the Koch benefit would be computed.

Eligibility Standard—The BLS budget figure for respective family size and SMSA, or comparable non-SMSA figure.

Maximum Payment—50% of the applicable BLS lower budget.

Koch Benefit equals maximum payment minus: earned and unearned income plus public payments minus work enabling expenses divided by 2.

Total Family Income equals earned and unearned income plus public payments plus Koch benefit.

A significant aspect of the Koch formula is the way in which it deals with the problem of work disincentive—a well-known failing of our current welfare systems. Under the Koch bill, benefits decrease as the recipient's income increases by a benefit loss rate of 50% until the ceiling is reached. Thus program benefits are tapered off gradually until the benefit levels have been diminished to an insignificant amount before applying the cutoff. By doing so, the system avoids work disincentives created by an abrupt, though perhaps lower, cutoff point. Similarly, work enabling expenses such as day-care costs are deducted from the income level in calculating benefits so as to avoid penalizing the recipient for having incurred the unavoidable costs of pursuing gainful employment.

Mandatory registration at local employment offices and active job seeking are a prerequisite to receiving benefits under the Koch bill. The elderly, the handicapped and mothers with pre-school children would be exempt from that requirement.

Below are computations which show how the Koch benefit formula would create a rational work incentive scale. (Work enabling expenses are not considered for purposes of this chart.)

ASSUME BLS LOWER BUDGET FIGURE OF $10,000

Income	Maximum payment	Minus ½ income	Koch benefit	Total income
0	$5,000	Minus 0 equals	$5,000	$5,000
$4,000	5,000	Minus ½ ($4,000) equals	3,000	7,000
$7,000	5,000	Minus ½ ($7,000) equals	1,500	8,500
$9,500	5,000	Minus ½ ($9,500) equals	250	9,750

Family is defined in the bill in such a way as to avoid the unfortunate family splitting which resulted from the AFDC program. Childless couples, intact families, individuals, retired couples, dependent children and step-parents (as they contribute to the support of dependents) are defined and included in the program.

Quarterly retrospective accounting and monthly reporting would be employed in administering the program. Though states that wish to participate in the program will be specifically prohibited from supplementing the Koch benefit, emergency needs will be covered by regulations promulgated by the Secretary. Assets shall be imputed to income by disregarding the first $10,000 of assets and counting each additional $10,000 of assets as $100 in income.

The Minimum Income Maintenance Act contains a "grandfather clause" to insure that those families currently receiving AFDC, SSI and Food Stamps do not suffer immediate losses because of the transfer to a national welfare program. Those families for whom benefits under the Koch bill would be less than those which they currently receive from the programs listed above, would continue receiving their current level of payment for two years. Anyone who files an application for public assistance after the bill is enacted would not be entitled to the level of payment insured by the bill's "grandfather clause."

The Inspector General of HEW would be specifically empowered to investigate and, where necessary, prosecute cases of both administrative and recipient fraud. In addition, the Inspector General will be empowered to audit the program for over and under payments.

The total cost of this program would be $35–40 billion according to estimates provided by the House of Representatives Information System. This contrasts to the current total cost of $23 billion which includes the federal, state and local government shares of AFDC, SSI, Food Stamp and general aid. Currently cities, counties and states are carrying over 40% of our total welfare costs.

TO PROTECT THE OCEANS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. WHITEHURST. Mr. Speaker, the continued pollution of our oceans should be a matter of grave concern to all of us, and I hope that my colleagues in the 95th Congress will see fit to act promptly in this regard.

Last Tuesday, January 4, I introduced H.R. 711, to amend the Ports and Waterways Safety Act of 1972 and provide stricter criteria for tanker safety, and H.R. 712, to require that a percentage of U.S. oil imports be carried on U.S.-flag ships, and at this point in the RECORD I

would like to introduce two recent articles which make some excellent points regarding the need for such legislation. The first is from the January 17, 1977, issue of Newsweek and is entitled "How to Make Tankers Safer." It was written by Allan J. Mayer, James Bishop, Jr., and Annabel Bentley. The second is an editorial by Mr. Gordon Dillon, which appeared in the January 7, 1977, edition of the Virginia Observer, and is entitled "The Liberian Tanker Threat."

While we in the United States can do much to make our own ships safer, there is still more that must be done, and it must be done an an international scale. For this reason, I am today introducing a joint resolution calling for an international treaty to protect international waters from further pollution and reverse their present deterioration. I earnestly hope that this legislation, also, will receive prompt and favorable consideration.

With memories of the oil spill from the *Argo Merchant* still fresh in their minds, countries touched by the Gulf Stream should now be particularly willing to discuss international means to prevent such disasters in the future, and I am confident that the new administration will be favorably disposed to initiate the necessary discussions.

The two articles follow:

[From Newsweek, Jan. 17, 1977]

HOW TO MAKE TANKERS SAFER

Off the stormy New England coast last week, rescue planes searched anxiously for traces of the missing tanker Grand Zenith, believed to have gone down with all hands—and 8 million gallons of oil—in heavy seas. On the Delaware River, near Salem, N.J., Coast Guardsmen worked late into the night supervising the pumping of 7 million gallons of crude from the 824-foot-long Universe Leader, which went aground when it veered to avoid colliding with another tanker. Not far away on the same river, clean-up crews struggled to contain the damage done when the giant Olympic Games hit a rock and spilled 134,000 gallons of oil into the Delaware a fortnight ago. In all, eight tankers have gone aground, sunk, exploded or been involved in collisions in or near U.S. waters since the Argo Merchant broke up off Nantucket just before Christmas, dumping 7.6 million gallons of oil into the Atlantic Ocean. The rash of accidents—following a record number of mishaps in 1976—has triggered an angry clamor for tighter tanker-safety standards.

By their very nature, modern supertankers—huge vessels that displace over 100,000 tons and run well over 1,000 feet in length—are immensely hazardous craft, difficult to control and astonishingly fragile. Relative to their vast size, their hulls are so thin that author Noël Mostert labeled tankers "floating balloons" in his 1974 book, "Supership." Fully loaded, a typical supertanker draws up to 100 feet of water, and it is not uncommon for one to lumber into port with less than 2 feet separating its keel from the sea bottom. Stopping a supertanker from cruising speed often takes more than 3 miles with the engines full in reverse—and while the engines are in reverse, the ship cannot be steered.

Tanker experts argue that about 80 percent of all accidents are caused by human errors, and they say that better training of crews is the best way to reduce hazards. But critics are now focusing on the design of the ships—both to prevent at least some accidents and to reduce oil spills when mishaps do occur. Senate Commerce Committee chairman Warren G. Magnuson has scheduled hearings this week to spur "new, tough tanker legislation." What's more, Newsweek has learned, President Ford is planning to announce formation of a task force to deal with oil transportation, including tougher design standards.

Tanker design has been regulated rather loosely, even though there are more than 4,500 tankers of over 6,000 tons plying the oceans—some of them grossly unsafe. The only major international agreement covering tanker operations, a 1973 convention adopted by the Intergovernmental Maritime Consultative Organization, has yet to be ratified by most of IMCO's 100 member-nations, including the U.S. In America, the Coast Guard has the authority to lay down strict operating rules and design standards for all ships entering U.S. waters. But critics in and out of government say the Coast Guard is simply unable to adopt and enforce stricter standards. Something must be done, says administrator Russell E. Train of the Environmental Protection Agency, "to break through the wall of conservatism at the Coast Guard."

The critics claim that the Coast Guard is more concerned with mopping up spills than preventing them and that it is too cozy with the shipbuilders and tanker operators it regulates. The Coast Guard says changes take time, but the experts argue that several badly needed design requirements could—and should—have been developed years ago. Among them:

DOUBLE HULLS

Proponents maintain that the sides and bottom of tanker's cargo compartment should be separated from the ship's outer hull to prevent accidental spills if the hull is pierced. (At the least, they say, compartment bottoms should be separated from the bottom of the hull.) The Coast Guard itself concedes that such a double bottom would have kept the Olympic Games from fouling the Delaware River.

SEGREGATED BALLAST

Proponents want regulations requiring all tankers to store the sea water they take on as ballast in separate compartments from the ones they use to carry oil. This is to prevent oil from being washed into the sea when the ballast is flushed. Currently, the Coast Guard requires a segregated ballast system only on new tankers of over 70,000 tons. While not strictly a safety device, separate ballast tanks would eliminate routine oil flushing—still the biggest source of oil pollution at sea.

BACKUP SYSTEMS

Proponents say that a tanker should have at least two boilers, rudder systems, propellers, radars and gyrocompasses so that control could be maintained if one should fail. Such redundancy might have enabled the Argo Merchant, whose gyrocompass was apparently defective, to stay on course.

COLLISION-AVOIDANCE RADAR

The National Transportation Safety Board, the Maritime Administration and the National Science Foundation, among others, say all tankers should have advanced radar and sophisticated navigational gear. More than 500 tankers already do, but the Coast Guard refuses to make the equipment mandatory, on the ground that it is still in development.

Tanker operators argue that such requirements are not worth the added cost—and might even pose hazards. Double bottoms could lead to explosions by providing an enclosed space into which oil fumes could leak. Thus, they have been banned by several countries. In general, tanker men insist that the real problem is not the ships themselves. "You can't build a ship to protect itself against incompetent personnel," says A. D. Haff, technical manager of Bethlehem Steel's shipbuilding division—and with flag-of-convenience nations such as Liberia, Panama and Cyprus enforcing few if any crew standards, incompetence is not uncommon aboard many tankers.

At bottom, however, the opposition to stricter design standards is a matter of money. "Double-hull ships are no doubt better," says technical affairs chief Gokei Ito of the Shipbuilders' Association of Japan, which has produced 80 per cent of the world's oil tankers. "They're much safer in case of accident. But they're hardly economical right now." But by one estimate, double hulls would raise the price of oil shipped from the Middle East by only about 1 per cent.

Such safer designs are likely to be made mandatory soon—if only because the public's tolerance for oil spills and tanker accidents seems to be reaching a breaking point. If so, it couldn't have happened at a better time. Just last week, U.S. oil imports hit a record 9.4 million barrels a day—and almost all of that was delivered by tankers.

THE LIBERIAN TANKER THREAT

There is serious danger posed to the environment by oil tankers.

Great Britain had a massive oil spill a few years ago on its southern coast when a tanker went off course. Last month, a tanker went off course and went aground off Massachusetts.

And last month a tanker caught fire in Los Angeles and further polluted the already polluted water and air there.

All those tankers had one thing in common. All were runaway ships flying the Liberian flag.

None of the disasters are caused by ships registered in the United States, Norway, Sweden, Denmark, France or Great Britain.

Those countries demand strict safety inspections. They demand competent captains, officers and crews.

Liberia has no annual inspections as required by the western nations. It has no laws to require competent captains, officers and crews. So its ships are buckets of rusted bolts—manned and run by incompetents.

Annual drydock inspections are costly, but they save lives and protect the environment. Competence is also costly, but the crew can stay on course. Both factors really are cheap . . . in the long run.

And there is another angle. Western nations require taxes to be paid. Something Liberia does not do.

All western nations, should not allow any ships into their harbors—or to ply their sea lanes . . . unless the crews and the ships are competent and safe.

Two years ago, a Liberian tanker limped into Norfolk and a new captain was flown in from India to take command. He took one look at the ship and refused to take it out of the harbor because of the rust and its unsafe condition.

He said "I have a God above me" which told him that he could not risk the lives of his crew. He was fired by the company, and the U.S. allowed the unsafe ship to leave.

The United States is wrong to only regulate its own ships for safety—and not the others. The U.S. will require all American ships to have sewer connections so as not to pollute the water while in port, but no others. American ships carry only 6 per cent of our cargo.

So American shipping companies will have to install expensive devices to prevent pollution—while 94 per cent of the ships which ply American ports will be allowed to dump raw sewerage into the waterways.

If American ships must have competent crews, then the others must also. If American ships cannot discharge toilet run-offs into the waterways, then the others cannot.

If the U.S. demands ship safety in its own merchant marine fleet, it cannot permit foreigners to ply our harbors and sea lanes unless they abide by the same standards.

BENEFITS FOR FORMER SPOUSES OF FEDERAL EMPLOYEES

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mrs. SCHROEDER. Mr. Speaker, today I am reintroducing a bill to amend the civil service retirement plan to entitle former spouses married 20 years to Federal employees to a portion of that employee's retirement annuity and a share of the survivors benefits after the employee's death. This would apply to both male and female employees.

Since the bill was introduced late in the 94th Congress, attorneys and academics across the country have contacted me to underline the need for this legislation. Both the Women's Equity Action League and National Organization for Women have voiced support of the measure.

In addition, I have received hundreds of letters and calls about people divorced from Federal employees late in life. They are shocked to realize that when the marital relationship is severed, they had little recourse and no security. They are unable to find a job because of high unemployment and lack of recent paid work experience. They are dropped from pension health plans and find it difficult to get health insurance. They are ineligible for medicare, because they are not covered by social security.

Typical is a letter I received from a former spouse married for 35 years to a Federal employee with 34 years of Government employment:

> At the time we separated our total assets were a little over $15,000 (which were divided equally) so Paul's retirement benefits represented most of our accumulated capital. So that I could retain the same federal benefits as a wife (with minor exceptions) a decree of separate maintenance was granted in 1971.
>
> . . . The divorce was granted in 1973. As a result of this divorce, I am now ineligible for all the benefits that had been accruing to me as his spouse of 35 years; I have no claim on any retirement pay, have no survivor's benefits, am not eligible for any medical program. The final decree of divorce includes no compensation for the loss of these benefits.
>
> Although he has been ordered to pay alimony, he is now more than $4,000 in arrears. The alimony order presents two problems: The first is that enforcement of such orders is minimal; the second is that, even if paid, alimony does not provide financial protection for me in the event of his death.
>
> My own efforts to enforce the provisions of the divorce decree have resulted in a current balance of $2,500 owed to my attorneys. A hearing in June 1976 resulted in an order that he pay $300 toward my attorneys' fees, and "make arrangements" to pay the arrearage. He has done neither and there seems to be no recourse. When the Social Services Act of 1974 (P.L. 93-647, Section 459) made possible garnishment of federal salaries and pensions, I thought these problems of enforcement would be relieved, but this does not seem to be the case. I understand from my attorney that should an order for garnishment be given here I will then have to file in court in the state where Paul now lives and I have retained an attorney there. In short, the procedure is so cumbersome and so expensive as to be virtually ineffectual.

Some have argued that divorce settlements are a sufficient means to deal with the problems resulting from a divorce rate that has doubled in the last 10 years.

However, the trend in divorce is toward no-fault settlement with spousal support for limited periods if granted at all. In fact, a September 1975, survey conducted by Market Opinion Research revealed that only 14 percent of divorced women were awarded alimony, while only 44 percent of the divorced mothers were awarded child support. Moreover, less than half of the payments arrive regularly, with compliance dwindling to zero as the years pass.

Finally, alimony and child support cease suddenly with the death of the breadwinner—leaving absolutely no security for the later years.

This bill is based upon the thesis that marriage is an economic partnership. It is my contention that the former spouse made a significant contribution to the employee's ability to earn the wage and consequently receive the pension. While there is no dispute that homemakers perform valued services for their families and society, it is frequently argued that pensions are an earned retirement benefit. However, I think it is important that the concept of earned benefits be applied to those homemakers who, after contributing substantially to an economic partnership, find themselves divorced in their middle years, unable to find work, and ineligible for social security.

The 1963 report of the President's Commission on the Status of Women affirmed that—

> Marriage as a partnership in which each spouse makes a different but important contribution is increasingly recognized as a reality in this country. During marriage each spouse should have a legally defined substantial right in the earnings of the other, in the real and personal property acquired through those earnings, and in their management. Such a right should be legally recognized as surviving the marriage in the event of its termination by divorce, annulment, or death. Appropriate legislation should safeguard either spouse and protect the surviving spouse against improper alienation of property by the other.

We are a society which places value on home and family, encouraging women to stay home to take care of children. Yet one of the most severe forms of economic discrimination is that we fail to attach an economic value to this service. This feature of pension portability and earned right for the homemaker is essential if spouses are to have a choice whether to work inside or outside the home.

Homemakers have provided a variety of services to our society for which they have not been compensated. Community organizations, hospitals, schools, and churches have depended heavily upon the voluntary services of homemakers. They have frequently been the backbone of the "people programs" in our cities, towns, and rural areas, organizing and running programs that serve people in need, ranging from children and youth to the elderly.

In spite of all the cultural and judicial resistance, the concept that a homemaker does make an economic contribution to marriage is making its way into law. In at least 44 court cases in 11 States, homemakers have been assigned the equitable interest in the retirement and disability benefits of her husband. Three of these States, Colorado, Oregon, and Wisconsin, were noncommunity property States.

In 1974, the California Supreme Court held in Fithian against Fithian that retirement benefits are community property, whether benefits stem from State, Federal, military, or private employment.

Going even further in 1976, the California Supreme Court in In re Brown overruled the 25-year precedent that a pension had to be vested before a spouse could take his/her community one-half interest in retirement benefits.

Furthermore, the American Bar Association in 1974 approved a uniform marriage and divorce act drafted by the National Conference of Commissioners on Uniform State Laws, an organization that promotes model legislation. This act includes detailed economic provisions to protect a wife and children—recognizing the economic contribution of the homemaker, along with her special problems in getting a job and raising young children. Five States—Arizona, Colorado, Kentucky, Montana, and Washington—have adopted most of the economic sections of the uniform act.

The fact is that although more than 3 million employees rely on the Federal civil service retirement system for retirement benefits, the Federal pension plan fails to provide economic protection to the former spouse of a Federal worker. This failure in the system leaves the dependent spouse with no direct retirement benefits despite many years working for no pay managing a home, raising children, and contributing time and effort to the marriage. Although the number of women in the labor market is increasing, the majority of women are still homemakers, and have no independent retirement benefits.

Recent Census Bureau statistics indicate that women outnumber men by 4.1 million among the Nation's elderly and that the gap will widen to 6.5 million by the end of the century. According to the March 1975, census figures there are over 5 million women over the age of 65 who live alone, and half of that number are living their last years below the official poverty line. Most of these women have not always lived alone and most have not always been poor, but their circumstances have deteriorated with advancing age. What happened to them is not inevitable, but rather the result of discrimination throughout their lives which strikes its cruelest blow at the end. It is my view that our public retirement system contributes to the economic impact of sex discrimination and punishes

women for their traditional roles in society.

It is time that Congress look at the Federal retirement system. I do not think it was the intent of Congress to deny old-age protection to these former spouses. The problem today was not envisioned in 1920, when the Federal retirement system was established—15 years before the creation of the social security system. Today, the family unit is no longer as durable as in the past.

The Congress responded to the growing number of long marriages ending in divorce by amending the Social Security Act of 1965 and 1972 to provide benefits for a divorced wife who was married a minimum of 20 years. It would be incongruous for Congress to recognize the needs of social security recipients and ignore the former spouses of civil servants, who are not eligible for social security.

The bill would entitle a former spouse of a civil servant—male or female—to a pro rata share of the retirement annuity based on the number of years of marriage over the number of years of creditable service. For example, if the former spouse was married to the Federal worker for the entire period that the employee worked for the Federal Government, the spouse would be entitled to 50 percent of the retirement annuity. If married to the employee fewer years, the former spouse would be entitled to an amount equal to the ratio of years of marriage over years of covered service.

Since death benefits for surviving spouses are reduced to 55 percent of the annuity, this same reduction would be applicable to former spouses. Therefore, after the death of the Federal employee, the former spouse's portion would be reduced to 55 percent of the pro rata share of the retirement annuity. At the same time, the annuity of the current widow or widower would be reduced by the amount of annuity payable to the former spouse.

Under this bill, the former spouse's annuity rights terminate upon remarriage before age 60. In the event that the Federal employee chooses a lump sum payment instead of an annuity, the former spouse would be entitled to a portion of the lump sum payment based on the same ratio of duration of marriage to years of creditable Federal service.

Let me emphasize that this change in the law will not increase the costs of the civil service retirement system. What is proposed here is that the Federal pension be shared by the civil servant and the former spouse of 20 years during the employee's retirement years and by the former and current spouses after the death of the employee.

TUITION BENEFIT PROPOSALS OF THE IRS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. DRINAN. Mr. Speaker, the Internal Revenue Service is now contemplating the issuance of regulations which would lead to the taxation of educational benefits extended to the immediate families of college employees and faculty members. If the IRS does decide to implement these regulations, the tuition benefits now utilized by college employees such as tuition grants, waivers or exchanges, will be taxed as ordinary income.

I am very much disturbed by the proposed imposition of these IRS regulations. I believe that they would create great hardships on faculty members and employees whose children and dependents attend college. In many cases, the tuition program is the one major benefit which offsets the otherwise disadvantageous salary structure at many colleges and universities.

It is also most troubling to me, Mr. Speaker, to note the very discriminatory nature of the proposed regulations. The IRS argues that tuition benefits are forms of compensation to institutional employees which should be taxed. But while arguing for the elimination of this tax break, the Internal Revenue Service is ignoring similar fringe benefits which have far less social value. Recently, for example, Treasury Secretary William Simon rejected proposals which would tax fringe benefits enjoyed by airlines employees and workers in stores and other merchandise outlets.

I have long been an enthusiastic supporter of tax reform. I feel that we must root out the many tax loopholes and breaks which abound in the U.S. Tax Code. However, to begin our tax reform efforts by singling out those who are least able to pay strikes me as a strange ordering of our tax priorities. Benefits such as those in question might possibly have to be taxed in the end, but certainly not before we have established a federal tax system which is fair and equitable for all levels of American society. And not before the wealthy and large corporations are taxed so that they too bear their fair tax burden.

Mr. Speaker, I would like to bring to my colleagues' attention a number of articles on the tuition benefits regulations now being proposed by the IRS. They include an editorial from the New York Times of January 6, 1977, an article by Frank Thompson of the Boston Herald American on January 2, 1977, and an article which appeared in Newsweek on January 10, 1977:

[From the New York Times, Jan. 6, 1977]

WHY SINGLE OUT TEACHERS?

When it comes to taxes, one person's sound social policy may well be another's loophole. Thus, there is a strong temptation to discount the outcry in the academic community against a change in regulations proposed by the Internal Revenue Service. The I.R.S. wants to start collecting income tax on the value of the free or reduced tuition traditionally given children of college faculty members. Some 27,000 students now attend college on such scholarships; these are worth about $20 million.

On closer examination, faculty families appear justified in their complaint that they are being singled out unfairly. The American Association of University Professors points out, for example, that there is no similar threat to tax physicians on the value of the unpaid medical services they and their families traditionally receive. Many department stores and manufacturers offer their employees untaxed discounts on their merchandise—clearly a fringe benefit whose elimination might result in demands for higher salaries. Airline personnel are not required to pay taxes on the privilege of extensive free travel. Why, then, are courtesy scholarships for faculty children suddenly considered in a taxable class by themselves?

The case for keeping these scholarships tax-free is further supported by a 22-year-old history. In 1954, Senate and House committees specifically approved of the kind of scholarships which the new I.R.S. regulations would reclassify as taxable fringe benefits. The chief of the Individual Income Tax Branch of the I.R.S. reaffirmed in 1971 that "Congress intended to treat" these courtesy arrangements as tax-free scholarships.

At issue is a tradition based on the sensible and civilized view that the men and women who teach other people's children ought not to find their own children excluded, for economic reasons, from the intellectual benefits of the schools where they teach, or at other campuses of similar quality.

Even this genteel motive may ultimately have to give way to the highly desirable goal of reforming a tax agenda made leaky by countless loopholes. But a proper agenda for such reforms ought to start with the economically and ethically least defensible exemptions rather than those that are merely most vulnerable for the lack of politically powerful support. At the very least, no privileges with a long and explicit history of Congressional sanction ought to be changed by mere administrative fiat only months before the sweeping tax reform promised by the Carter Administration.

[From the Boston Herald American, Jan. 2, 1977]

MASSACHUSETTS UNIVERSITIES TO FIGHT IRS PLAN TO TAX FREE TUITIONS

(By Frank Thompson)

Scholarship or fringe benefit?

This is the question to be argued Friday at an Internal Revenue Service hearing in Washington on the agency's proposal to tax as income, free tuitions allowed college or university faculty members, employes, and their families.

The Association of Independent College and Universities in Massachusetts, in a brief filed with IRS, declared the proposal could cause a change in employment for 10,000 persons, or have an impact of $50 million in one year to $75 million in two years on the nation's educational community.

Under Treasury Dept. standards a proposal is considered major if it influences those results.

The independent institutions arrayed their heaviest artillery in defense of the free tuition for faculty and others.

Among the heavy hitters writing to members of Congress or IRS Comr. Donald Alexander in protest of the proposal were:

Boston University President John R. Silber, who wrote House Ways and Means Committee Chairman Al Ullman that because of the legislative history of the practice, "any change in the tax treatment of tuition-remission scholarships must be made by Congress. The amendment proposed by the Commissioner exceeds his lawful authority and should be withdrawn."

Chairman Howard W. Johnson of the Massachusetts Institute of Technology Corporation—"the proposed regulations would produce the anomalous and irrational results of a student or his parents being penalized by being taxed on what would otherwise be a tax free scholarship merely because the student qualified for tuition remission."

President Jean Mayer of Tufts University—"the damage done to the children of faculties and to institutions, forced to increase true compensation to enable employes to pay this tax, will likely outweigh any tax benefits achieved."

Rev. Ernest Bartell, President, Stonehill College, North Easton—"while the right of the IRS to maximize revenues for the Treasury within the spirit and letter of the law cannot be doubted, the recent proposal to tax the value of tuition remission for faculty and staff families in the nation's colleges and universities must be judged unjustifiable both legally and economically."

The Brandeis University Faculty Senate adopted a resolution declaring its "strong objections" to the proposal.

Silber called upon Ullman for help in stopping "the Commissioner of Internal Revenue, in the last 30 days of his administration, from denying educational opportunity to our employes and their spouses and children by arbitrarily ruling that tuition remission scholarships constitute taxable revenue."

This would destroy a 30-year-old program at Boston University "under which children and spouses of janitors, grounds workers, and clerical workers, as well as professors, have been provided access to higher education and the personal and civic benefits that follow from it.

He wrote, "sound public policy requires that tuition remission programs continue to be considered scholarship programs. The taxation of tuition remission will deprive students of educational opportunity.

"The language of the proposed amendments would preclude any child or spouse of an employe from ever receiving a scholarship of any sort from the employer institution. It would thus result in a substantial decrease in scholarships available to students.

"The proposed regulations would wrongly treat all tuition remission scholarships as 'compensation or payment to the employe for services.' The duties of the employes who are childless or whose children are not of college age are precisely the same as the duties of employes who use tuition remission scholarships.

"Admittedly, an employe whose child avails himself of the tuition remission scholarship will be indirectly benefited. However, we should not be misled by this fact.

"All scholarships carry such extended benefits. But these benefits are not taxable. The parents of children who are awarded Truman, Rhodes, Marshall, American Legion, or National Merit Scholarships are similarly benefited, as are the parents of young men and women who are awarded EOG (Educational Opportunity Grants) or other need-based scholarships.

"The Internal Revenue Service appears to have forgotten that benefits are not taxable simply because they are benefits. For sound constitutional reasons, the Congress alone possesses the right to decide which benefits should be tax-exempt on grounds of national policy.

"Wisely, Congress has decided that scholarship benefits should be non-taxable. The Internal Revenue Service has only one reason for deciding that tuition remission benefits should be taxed—they want to tax them no matter how great the educational and social loss.

"Even if these substantial arguments based on Congressional intent, reasonable administrative procedures, beneficial social policy, and plain equity were set aside, the proposed regulations should be found defective on the basis of technical difficulties alone.

". . . The final days of an administration's tenure in office are not the appropriate time for making changes of this magnitude that have potentially devastating effects of individuals, institutions of higher education, and some state governments. The proposed regulations should be withdrawn and a directive issued from the National Office to all District Offices reaffirming past practices and declaring that tuition remission is excludable from gross income as scholarship."

Fr. Bartell, former chairman of the Economics Dept. at Notre Dame University, called the proposal an attempt by IRS to write new legislation.

"Furthermore," he wrote, "to penalize the educational community in this way is inconsistent with toleration of far more extensive exempted 'income in kind' in other sectors of the economy.

"Moreover the proposal is inconsistent with the economics of higher education. Because higher education is marked primarily by fixed costs, it is possible to provide this prerequisite in kind for little or no additional cash costs to colleges and universities.

"To tax the tuition remission at full market value is thereby ultimately inflationary as colleges and universities are forced to raise tuitions in order to generate the cash to compensate faculty and staff for lost income.

"And at the same time such unwarranted increases in tuition can only contribute to pressures for further retrenchment among already financially hard pressed educational institutions.

"In short, the IRS proposal simply contributes further to the 'stagflation' that has already plagued our economy for too long."

[From Newsweek magazine, Jan. 10, 1977]

AN F FOR THE IRS

William D. Ferguson is a professor at the Emory University Law School in Atlanta. As a member of Emory's faculty, he enjoys a special perquisite: his daughter, Kim, 20, attends the undergraduate school free of charge. The arrangement saves Dr. Ferguson $3,100 a year in tuition fees. It is one of the factors that induces him to continue teaching at an annual salary that is at least $15,000 less than he would be able to command in the lucrative world of professional law. "If this benefit were not available," says Ferguson, "there are many of us who would give up teaching."

The tuition breaks that private schools and colleges give to the families of their faculty members have traditionally been treated as scholarship aid by government agencies, and as such, they have been entirely tax-free. But late last year, the U.S. Internal Revenue Service proposed a change of policy. Tuition benefits, the IRS decided, are actually forms of compensation to institutional employees. Since they are awarded solely on the basis of where a parent is employed, the tax authorities argued, tuition breaks are really just another fringe benefit. As part of its campaign to plug tax loopholes, the IRS proposed to tax them as ordinary income.

No sooner was the reform proposed than angry school administrators began to bombard the IRS with protests. Letters and telegrams have been pouring into the Treasury Department from the 800 private colleges and scores of prep schools that would be affected. "I hope and pray," wrote one Midwestern student, "that someone drags you and your tax proposal right up to the highest court in the land." This week, representatives of schools across the country will convene in Washington to fight the measure at a public hearing.

Abuse: The primary argument against the IRS proposal is that it contradicts two full decades of legislation and interpretation. Since the Internal Revenue Code of 1954 was written, Congress, the courts and the IRS itself have repeatedly—and explicitly—approved tuition remission for faculty members as legitimate scholarships. Opponents argue that the IRS's attempt to reverse that policy with a hasty administrative ruling is an unwarranted abuse of bureaucratic power. "Some people talk as if this were some kind of loophole that has just been discovered," says Prof. Julian H. Levi of the University of Chicago, who chairs the taxation committee of the American Council on Education. "It's not, of course. Tuition remission for faculty members started at the University of Chicago in 1901. The books are filled with cases that make it clear that any change in the policy should be made only by legislation, not by this kind of administrative proceeding."

Most educators admit that tuition remission is, at least in part, a kind of fringe benefit that enables private institutions to attract talented teachers at salaries much lower than those they could earn elsewhere. But they argue that this sort of "loophole" has traditionally been ignored in the name of a broader social good: the encouragement of education. They also insist that even if tuition breaks are awarded on the basis of the parent's employment, they are still true scholarships that permit students to attend schools they might not otherwise be able to afford. "The principal beneficiary is the child who is getting the education," says Gary Potter, president of the National Association of Independent Schools. "I can't see why the fact that his or her parent teaches at the school should automatically mean that it isn't a scholarship.

Reform? Even more galling to school administrators is the fact that the IRS seems to be singling them out for reform, while ignoring similar fringe benefits in other professions. Last month, Treasury Secretary William Simon specifically rejected an IRS proposal to tax certain corporate perquisites. "Airline employees do not get their free trips taxed, physicians who get courtesy medical treatment do not have to pay taxes on it, and the discounts department-store workers get are not taxable," complains John Kemeny, president of Dartmouth College. "Why single out professors, who are certainly not some of your higher-paid people?"

The answer, according to beleaguered school officials, is that educational institutions are an easy target. Well-financed corporate lobbies can fend off unwanted reforms in a way that the diverse, unwieldy schools cannot. "This is capricious cupidity," says John Phillips, president of the National Association of Independent Colleges and Universities. "It's more of the continuous buffeting by government agencies that don't really understand the effects their rulings can have on schools."

One effect of the proposal to tax tuition remission may well be that private schools and colleges, already hard-pressed financially, will have to raise the salaries of faculty members with college-age children—or risk losing the teachers to higher-paying jobs. "If that happens," says Phillips, "you can bet your life that the added expense will be passed on to the student body in the form of higher tuition, and the costs of education will inevitably be inflated." That fact alone, the educators think, should be enough to force the IRS to reconsider its proposed reform. And if the tax officials do not budge, the educators plan to take their case to Congress and the courts.

COMMENTS BY MR. YOHE

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. ROSTENKOWSKI. Mr. Speaker, in a recent address to United Airlines Passenger Service Managers in Chicago, Mr. Jack Yohe, the Civil Aeronautics Board's Consumer Advocate said:

Consumerism is about to get its second wind; its energy has flagged recently but that I believe it is about to enter a period of further growth with consolidation of past gains as they become institutionalized in laws and organization practices.

He also urged, for the mutual benefit of consumer and airlines, a "return to old values," where they have been abandoned, and a rehoning of them "Where they have lain idle too long," observing that, "if the concern of business for the consumer has indeed begun to grow casual, then a return to care is in order."

Mr. Yohe's remarks are replete with other timely counsel for both business and consumer and I therefore include the complete text of Mr. Yohe's comments in the CONGRESSIONAL RECORD:

There is a television station back home that uses as its promotional theme a little tune with the words: "Say, don't I know you? I've seen your face before."

What brings it to mind is my renewal of acquaintances today with United employees like Kay Lund, Mechlin Moore, not to mention Irv Roth and Monte Lazarus, to name just a few friends and long time associates.

Since friendship not only withstands but thrives on frankness and candor, let me say that I am genuinely pleased to have been invited to address the annual meeting of passenger service managers from all over United Airlines' system. I believe we both will benefit.

Your invitation referred to my "remarks and outside viewpoint."

That is a credit to you—to any organization that seeks to see itself as others see it.

I also take it as a compliment to the Board's Office of the Consumer Advocate for what I hope is its consistent objectivity.

That is what we strive for along with fairness in our dealings with the carriers as we work in the consumer's interest.

My assigned subject, "Passenger Handling in the Age of Consumerism," should bring no startlingly new message to anyone in a group such as this whose members know passengers' needs and wants from long experience. But verities need to be restated from time to time because we tend to dull them with disuse.

You have heard a lot of instructive talks this morning that, taken to heart, should add to your professional polish.

"The Air Traffic Conference Role in Passenger Handling," "automated sales reporting system," "system operations control," "the communications network and how it should perform for you," "effective utilization of the computer resource"—these are all things that enable you in some way to better serve "the Boss"—the consumer of the services that your airline provides.

All this morning's instructions were good and should contribute to the self- and organizational improvement for which all of you have gathered for these two days. But the best message for the consumer that I've heard today is Bill Neary's "Welcome," not, perhaps, the very words but the feeling they communicated.

Make the consumer feel welcome, not only with your words but also, more importantly, with the attitudes you convey when he needs you to help him with that problem that never should have arisen.

"Welcome" should be a state of mind you share with your passengers.

The consumer of your services is the person who pays your company bills, who can tip the balance between corporate profit and loss.

If that view is too distant, try this closeup.

He is the fellow who makes your paycheck good and keeps it regular, the one who contributes to your retirement plan, who helped you buy the family care, not to mention the house.

Your treatment of him is also the basis of your promotion in the job.

He is the last person you tell to go to Helsinki.

I know that, when you have faced him several dozen times in the course of a day, your patience wears thin.

But in your dealing with a consumer—and not just any consumer but a disenchanted one—your patience is the indispensable tool for the job.

Your patience lowers his voice, your patience calms him down, your patience eventually helps him understand that there may indeed be a reason why his problem has to be handled in a certain way.

Patience may buy the time you both need to settle his problem objectively rather than emotionally.

And the responsive chord I've struck in you is playing back this message: "Easy for you to say, Mr. Consumer Advocate, sitting there well behind the front lines, antiseptically handling complaints by correspondence, unbound by company operating procedures and company supervisory constraints."

Not so. I am well aware of the real world in which you must live and let me say that your consumer record as a company is consistently the envy of many of your competitors.

And I am aware, also, that for every complaint our Office handles, the air transportation industry has handled 9 or 10 or, perhaps more, without the customer having to resort to us.

So, I am not pontificating but suggesting: suggesting that, however good your consumer handling record may be, there is room for improvement.

If you are only No. 2, try harder; if you are No. 1, try hardest.

The Consumer Movement is not about to enter a decline. If anything, it should soon be getting its second wind, which deeply gratifies me.

We all ought to be ready.

One reason that the air transportation consumer expects higher standards of performance than, perhaps, consumers in other fields is that he has been conditioned to high expectation. He is your own creation.

He—the high expectation consumer—was fashioned by competition aimed at assuring and maximizing profits.

I don't believe that has changed. He may have complicated your task somewhat by going forth and multiplying but I cannot believe that any company ever grows so large, by the grace of its customers, that it can afford to ignore even the least of them.

In this era of especially acute cost/benefit consciousness, the time and money required to settle justly a consumer's complaint should not be perceived solely as costs.

Simultaneously, they are immediate benefits—the satisfied customer who at least understands and respects your action—and long term benefits—personal testimonials whose effectiveness in generating new customers can neither be bought nor surpassed.

Some of my successful salesmen friends tell me that one of their most effective prospecting methods consists of developing spheres of customer interest and influence within which each satisfied customer communicates his satisfaction to his friends and colleagues, so that when the salesman makes his calls, his prospects in those spheres are already attuned to what they can expect from him and feel that they have a right to expect nothing less.

As I see it, that approach ought to be even easier with customers of air transportation, who come to you already disposed to buy your product instead of waiting for you to visit them, dispel their objections and close the sale.

"Never forget the consumer (or, if you will, customer)" is no sewing basket platitude but a dynamic rule of business affirmed daily both by use and disuse.

Its disuse erodes consideration of your customers' needs; such as his need and right to know what his fare and type of travel entitle him to, and such as clear and prompt explanations of what services or refunds he is due when you have not seen able to board him on his planned flight or when you have accommodated him but not his baggage.

The vibrations we pick up from our handling of more than 16,000 complaints a year—including the ones against your airline—tell us a number of things. One of them appears to be that consumers are measuring their dissatisfaction not only in the usual sense of receiving less than they believed they were due but also, increasingly, in the context of continuing inflation.

"Air travel is getting to be too expensive," a number of them appear to be telling us, "especially for the middle class traveler."

They are indicating that they feel that air fares are increasing faster than service is improving, if it is improving at all.

The air traveler complainant also tells us that he considers tariff rules unfair when he has to pay more than he expected or was allowed to believe he would pay, especially when the difference is demanded as he is about to board the aircraft.

Those complaints also tell us that reservations and ticketing people may not have adequately informed the passenger of conditions he must meet to qualify for the fare he thought he was buying.

I have been stressing for several years that this kind of fare situation is a sore point with travelers, possibly even more often than I realized.

Now a private citizen who happens to be a much traveled newspaperman has filed a third party complaint against a trunk carrier, claiming he was not given complete enough fare information on at least one of his trips.

In support of his filing he has cited statements by me.

I am taking no position on his filing.

I merely point out that he has filed, and believes he may be giving voice to the feelings of many other air travelers.

I might add that, while I had only the barest of advance notice of his filing, it should not really have come as a surprise to me or anyone else in this industry.

Ever since I came to this consumer interest job six years ago, I have been urging that air travelers be given complete and simplified fare information.

Our Office has also put it in writing with the *Consumer Facts on Air Fares* pamphlet, which has already been distributed to about 17,000 people.

If the Government Printing Office holds to its promised delivery date, we will have a quarter million more copies available for distribution tomorrow.

Getting back to what our own complaint profiles tell us, we read that the air transportation consumer resents what he frequently describes as the "cavalier attitude" of carrier personnel; and it appears that the frequency of the "cavalier" charge increases with the size of the carrier.

Our volume of complaints also tells us that many passengers, rightly or wrongly, are critical of some carriers for not guaranteeing their product and performance.

This goes back to the case for fuller information—before the fact. Because he may not have been fully informed of conditions that apply in his particular case, a passenger frequently feels that he is due a refund when product and performance are found wanting; for example, for undue delays or for fare misquotations or other misinformation.

It is much easier to be thorough and open with him beforehand, telling him what you won't or can't do under certain circumstances, than it is to tell him after the fact why you didn't do it.

This doesn't mean that you have got to read each customer the Federal Aviation Act and the 380-odd rules of the Passenger Rules Tariff.

It does mean a little more interest in him and his plans and needs so that you can offer the thoughtful information that will

enable him to make better informed decisions, and so that you can try to reduce the incidence of problems that he might otherwise encounter.

I seriously doubt that anyone was ever hurt or inconvenienced by too much information.

Our complainants tell us, not surprisingly, they resent not being informed in time of schedule changes that affect them either immediately or somewhere down the line.

They grouse, understandably, at what they (and we) see as a double standard—stating rules and regulations as "the law," thus ruling out a reasonable solution for the passenger's problem; yet apparently glossing over those same rules at times with a monetary consideration enclosed in a final letter response.

Our Office, too, has several pet peeves when it comes to certain approaches to complaints.

One of them, as you may or may not know, is the phrase, "Compensation on our part could subject us to a severe fine."

We hear it frequently quoted as information given the consumer by reservations agents, the people on the front line.

We all know that this is a copout.

I doubt we could find an example in all of regulatory history where a carrier has been fined on the basis of a single instance of such an action.

Where a pattern became evident, that would be another matter but, even then, a penalty could be assessed only after a formal proceeding.

Mainly, what we don't like about this approach is that it shifts the blame for inability to resolve the problem to our Office and to the Board.

We are working to educate the consumer on this point and, since we are all working ultimately for the consumer interest, you also should take care to educate him on the same point.

Travelers also now have a greatly increased awareness of overbooking practices and denied boarding compensation regulations.

We sense this not from any great increase in the volume of oversales complaints but more from the number of news media queries on the subject.

Some writers merely require amplification on specific provisions of Part 250 but quite a few request a first-time explanation, a general orientation on the regulation and the incidence of complaints and compensation payments.

In recent weeks, requests for this kind of information to our Office have given the fiscal year 1975 and 1974 Denied Confirmed Space Report a minor best seller status.

As a result, you and your counterparts at other carriers may soon experience increased attention to and knowledge about passenger rights to notice and payment of denied boarding compensation.

Among the complaints that we do receive on denied boarding compensation, a number consider the amounts provided for to be inadequate and ineffective.

Our own position on those matters is stated in the comments we filed with the Board on October 7.

We stated that, while we do not support abandonment of the current reservations system, we do believe that the penalty provisions of Part 250 must be substantially strengthened to provide a much stronger economic incentive for the carriers to lower the oversale rate.

We also suggested changes in Part 250 which we stated will provide substantially greater protection to those consumers who are oversold.

Among these is the elimination of the major exceptions to eligibility for payment of denied boarding compensation, removal of the $200 ceiling for compensation and simplificaiton and revision of the notice required by Part 250 in order to provide wider understanding among consumers.

Customer relations personnel at virtually all the carriers know by now how our Office operates.

As I said at the outset, we try to be fair and objective while helping the consumer obtain what he is rightfully due, no more, no less.

I believe we attain those goals consistently.

In order to do so there are certain procedures we must follow, certain actions we must take.

One of the most important parts of our complaint handling process is followup.

Followup is a measure of how well a carrier is doing it's job regarding consumer complaints.

Followup is necessary, among other things, to see whether the carrier has complied with its tariffs or has done less than regulations and tariffs required it to do.

The Office of the Consumer Advocate at the Civil Aeronautics Board exists to try to insure that the consumer gets what he pays for, no more, no less.

Followup is a necessary part of our consumer advisory function to enable us to see that the consumer who has an unresolved air transportation complaint receives everything he is entitled to receive.

Followup is a necessary part of every complaint case before we can close it.

Followup, therefore, is an equally necessary part of your own complaint handling process.

Just as no business ever grows so large that it can dispense with customers, so no airline with which we deal can ever grow so big that it can ignore this important step in the consumer service process.

For the credibility and effectiveness of our Office to the consumers and the carriers alike to continue, we must treat all carriers—large and small—equally.

Credibility and effectiveness bring something else to mind, if I may digress for a moment. For those reasons, plus the advantage of resident expertise, my Office in the past has generally leaned toward retaining the consumer functions of air transportation regulation within the Civil Aeronautics Board. We believed also that what was true for us probably was also true for other government agencies.

While it has been our view that an in-house consumer agency offers the opportunity to develop more in-depth expertise, we recognize that there is a strong feeling that the consumer interest can best be served by an independent consumer agency.

We believe this argument has some merit, in that we have experienced consumers who have expressed cynicism as to whether a consumer unit within the agency unbiasedly represents the interests of consumers.

In this context, therefore, the proposal to create an independent consumer agency has great appeal to many consumers and may well, on balance, offer the greatest opportunity for the interest of the consumer to be represented in regulatory proceedings.

Resident expertise in various fields can just as easily reside in one agency, independent of and apart from all the rest. We haven't changed our position but, if we are to preserve and build consumer confidence in our dependability, the consumer at least deserves to have us take another look at the question of in-house consumer units versus an outside consumer agency.

I also said earlier that I believe consumerism is about to get its second wind; not that its energy has flagged recently but that I believe it is about to enter a period of further growth with consolidation of past gains as they become institutionalized in laws and organizational practices.

I believe that any organization—in business or government—that deals with consumers needs to recognize that and prepare for it.

Emphasize and elevate the importance of consumer concern—if not by company fiat, then by your own personal determination.

Many companies, recognizing the upsurge in consumer power, have in recent years upgraded their consumer apparatus.

In some cases consumer representation is at the corporate level.

But I also suspect that some companies, having paid the movement lip service and provided the window dressing of consumer representation in the company structure, now may be inclined to relax again and pay less attention to the consumer and his problems.

In the process, the consumer relations identity tends to blur until it is barely distinguishable from public relations.

They are not interchangeable functions.

Public Relations is not Consumer Service, but good Consumer Service is excellent Public Relations.

I said in a speech to your counterparts at Northwest Airlines last March that my office and the airlines have a lot in common because we both deal with the consumer of air transportation, albeit at different stages.

You sell the consumer your company's service and make certain arrangements that enable him to use that service in one way or another at appropriate times and prices.

We exist to try to insure that he gets what he pays for.

If you do your job well, the consumer will need our help less.

You are in an area of your airline's operation that can significantly affect the amount of business your company does.

If you perform effectively, you can promote repeat business and—word of mouth being the force that it is—you can generate new business.

I told them also, however, that they—and now you—are an important part of the image your company builds.

My Office is not concerned with the image but with the reality upon which any believable image must be built.

If you have a good image, by all means sell it.

If you are performing your service well, your customers must benefit from knowing that you are.

But first, perform the service dependably and well.

The rule has no exceptions.

Do the job.

The image will follow.

Consumer complaint handling is part of that dependable service. It is not something tacked on after the sale; it is part of the sale.

No sales are final until the customer receives what he has paid for.

If the passenger has no need for your complaint handling service, that is to your good.

If he does have cause for complaint, that is when the final part of the sales becomes operative.

This requires only a slight change in approach.

You, like most U.S. airlines, are already set up to handle customer complaints effectively.

The only cost of this changed approach is a slight change in attitudes.

The benefits?

The friendly sky is the limit.

I said that I had no startingly new message for you and I haven't.

What I have proposed is a return to old values, where they have been abandoned, and a rehoning of them where they have lain idle too long.

If the concern of business for the consumer has indeed begun to grow casual, then a return to care is in order.

If your care for the consumer has been thriving all along—as I believe United's has—then revitalize and redouble it.

I believe that the dividends this pays are as real as the ones that appear on your quarterly reports.

SENATE—*Wednesday, January 12, 1977*

The Senate met at 8 p.m., on the expiration of the recess, and was called to order by the Vice President.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, whose Word commands us to "be still and know that I am God", grant to us quiet hearts that we may be receptive to Thy higher wisdom.

We thank Thee for those in every generation who have served this Nation with steadfast purpose and high ideals. At this time we thank Thee especially for Thy servant Gerald R. Ford, for the quality of his manhood, for the depth of his dedication, for the sincerity of his motives and for the redemptive and healing spirit he brought to a broken people. Help us to listen to him with understanding and appreciation and to prepare ourselves for the ongoing work of the Republic. Guide us by Thy Spirit all the days of our lives that we may abide with Thee forever. Amen.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, January 11, 1977, be approved.

The VICE PRESIDENT. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATORS SPARKMAN AND PROXMIRE AND FOR TRANSACTIONS OF ROUTINE MORNING BUSINESS ON FRIDAY, JANUARY 14, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Friday, after the two leaders or their designees have been recognized under the standing order, Mr. SPARKMAN and Mr. PROXMIRE be recognized, each for not to exceed 15 minutes, in that order, and that there then be a period for the transaction of routine morning business of not to exceed 30 minutes, with statements limited therein to 10 minutes each.

The VICE PRESIDENT. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR TALMADGE ON TUESDAY, JANUARY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Tuesday next, after the recognition of the two leaders or their designees under the standing order, Mr. TALMADGE be recognized for not to exceed 15 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM FRIDAY UNTIL 2 P.M. ON TUESDAY, JANUARY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Friday, it stand in adjournment until the hour of 2 p.m. on Tuesday next.

The VICE PRESIDENT. Without objection, it is so ordered.

SENATE RESOLUTION 30—AMENDING PARAGRAPH 2 OF RULE XXV OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The VICE PRESIDENT. The resolution will be stated by title.

The second assistant legislative clerk read as follows:

Resolved, That paragraph 2 of Rule XXV of the Standing Rules of the Senate is amended—

(1) by striking out of the item relating to Commerce, the number "17" and inserting in lieu thereof "18".

(2) by striking out of the item relating to Labor and Public Welfare, the number "15" and inserting in lieu thereof "16".

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ROBERT C. BYRD. Mr. President, the purpose of this resolution is to provide two additional committee seats to the minority side so as to permit the two new members who are temporarily assigned to the Budget Committee to have that committee as a third committee as do the majority members of the Budget Committee.

I emphasize that these assignments under expansion are temporary in nature.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution (S. Res. 30) was agreed to.

SENATE RESOLUTION 31—MAKING TEMPORARY ASSIGNMENTS TO STANDING COMMITTEES OF THE SENATE

Mr. BAKER. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The VICE PRESIDENT. The resolution will be stated by title.

The second assistant legislative clerk read as follows:

A resolution (S. Res. 31) making temporary assignments to standing committees of the Senate.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, these are the nominations of the Republican leadership to fill the vacancies created by the resolution just adopted by the Senate.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution (S. Res. 31) was agreed to, as follows:

Resolved, That Senator John Chafee of Rhode Island (temporary) be and he is hereby assigned to the Committee on Commerce and that Senator Richard Lugar of Indiana (temporary) be and he is hereby assigned to the Committee on Labor and Public Welfare.

APPOINTMENT OF COMMITTEE TO ESCORT THE PRESIDENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President of the Senate be authorized to appoint a committee of Senators on the part of the Senate to join with a like committee on the part of the House of Representatives to escort the President of the United States into the House Chamber.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE A, 95TH CONGRESS, 1ST SESSION—REMOVAL OF INJUNCTION OF SECRECY

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the protocol, signed at Montreal October 16, 1974, relating to an amendment to article 50(a) of the Convention on International Civil Aviation—Executive A, 95th Congress, 1st session—which was transmitted to the Senate yesterday by the President of the United States, and that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Protocol, signed at Montreal October 16, 1974, relating to an amendment to Article 50(a) of the Convention on International Civil Aviation.

Article 50(a) of the Convention relates to the composition of the ICAO Council and provides that it shall be composed of 30 members. The present Protocol would increase the membership to 33 members. I transmit, for the information of the Senate, the report received from the Department of State with respect to the Protocol.

I recommend that the Senate give early and favorable consideration to the Protocol and give its advice and consent to ratification.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

The VICE PRESIDENT. Does the Senator from Tennessee seek recognition?

Mr. BAKER. Mr. President, the Senator from Tennessee does not seek recognition at this time and reserves his time under the standing order.

Mr. CURTIS. Mr. President, will the Senator yield to me for a minute?

Mr. BAKER. Yes.

PROGRAM FOR FRIDAY

Mr. CURTIS. Mr. President, I would like to inquire of the distinguished majority leader what the program will be for Friday.

Mr. ROBERT C. BYRD. Mr. President, to begin with, following the address by the President of the United States this evening, the Senate will stand adjourned until the hour of 12 o'clock on Friday.

After the two leaders or their designees have been recognized under the standing order, Senators SPARKMAN and PROXMIRE will each be recognized for not to exceed 15 minutes, and there will then be a period for the transaction of routine morning business of not to exceed 30 minutes, with statements limited therein to 10 minutes each.

At the conclusion of morning business, unless there is other business that the leadership does not know about at this point, there are certain resolutions which might come over under the rule. They will be subject to debate and, if debated and not acted upon by the expiration of the morning hour, which on Friday would be 2 p.m., the first resolution coming over under the rule would go to the calendar, but it would also be subject to a motion to proceed with further consideration of it, which motion would be debatable.

So in further answer to the distinguished Senator, it is conceivable that there will be rollcall votes on Friday. At the moment, I know of no other business that would necessitate a rollcall vote, other than possibly something in connection with those resolutions coming over under the rule.

Mr. CURTIS. I thank the Senator.

PERMISSION FOR VICE PRESIDENT TO ADDRESS THE SENATE ON TUESDAY NEXT

Mr. BAKER. Mr. President, all of us are aware that the present occupant of the Chair, the distinguished President of the Senate, will soon end his term of office.

I propose, Mr. President, if the distinguished majority leader is agreeable, that subject to the desires and wishes of the distinguished Presiding Officer we might provide a time on Tuesday next for the Vice President to address the Senate, if he wishes.

In that connection, Mr. President, I propose that we allocate 15 minutes at the appropriate time on Tuesday and invite the President of the Senate to utilize that time, if he wishes, for that purpose, or for whatever purpose.

Mr. ROBERT C. BYRD. I thank the distinguished Republican leader for reminding me of this matter at this time. We had discussed it previously.

If there is no objection, I ask unanimous consent that at the hour of 2:30 p.m. on Tuesday next, the distinguished Presiding Officer over this Chamber, the Vice President of the United States, Mr. ROCKEFELLER, be permitted to address the Senate for a period of not to exceed 30 minutes.

The VICE PRESIDENT. The Chair is deeply grateful for the consideration of the leadership of the Senate and accepts the thoughtful offer, for a period of perhaps 10 minutes.

Therefore, without objection, it is so ordered.

Mr. BAKER. My thanks to the majority leader, and my thanks to the occupant of the chair.

The VICE PRESIDENT. I appreciate it.

ROUTINE MORNING BUSINESS

The VICE PRESIDENT. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 8:30 p.m., with statements therein limited to 2 minutes each.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the time be extended to 3 minutes.

Mr. ROBERT C. BYRD. Mr. President, under the regulations and policies that we have been following for years in the Senate, I would be constrained to object. However, I suggest to the distinguished Senator that when he has completed his 2 minutes, Mr. MORGAN or Mr. STONE or Mr. CRANSTON or another Senator will obtain recognition and yield to him.

Mr. METZENBAUM. I thank the Senator.

WINKING AT TERRORISM

Mr. METZENBAUM. Mr. President, 24 hours ago, the French authorities hustled an accused terrorist onto a plane before the charges against him could be properly assessed, and sent him off to Algeria beyond the reach of law and justice.

A lot more than one man left France on that plane. French traditions of honor and justice also had departed from those who made the decision to free Abu Daoud with such indecent haste. The world has witnessed over and over again what a savage price is always paid for winking at terrorism.

This is precisely what has happened in Paris. Terrorists who are freed without trial, who are rewarded with first-class passage and first-class treatment will remain terrorists. Those who support them will remain international disruptors of the peace, secure in the terrorists' conviction that they are above the law, that sovereign and once proud nations will bend the knee to them.

Mr. President, I address myself to this outrage not only in the name of violated justice and cynical disregard of rational legal procedures, but from a perspective of deep personal experience as well.

Two of my closest friends from Cleveland, Dr. Benjamin and Dorothy Berger, are the father and mother of David Berger, one of the men brutally murdered at the Munich Olympics. I knew David as a child and watched him grow up to be a splendid young man, joining what he believed was a creative challenge—working in Israel. All this love and dedication ended when he was shackled and shot in cold blood for the crime of representing the "wrong" nation at an international festival of sports and good will.

But no such cruel and instant punishment is meted out to the man accused of planning these premeditated murders. For him there is no punishment at all, nor any serious examination of the charges. A great nation chooses to condone international banditry and in the process makes decency and order, and life itself, more dangerous for all of us.

I was chairman of the ceremonies in Cleveland when a memorial was dedicated to the memory of David Berger. The eloquent speaker at those ceremonies was the distinguished Senator from Minnesota, Senator HUBERT HUMPHREY. All of us there that day pledged that we would not forget David Berger, nor would we forget the meaning of his death; that love and decency must be protected by courage and order; that there is no greater threat to all nations and to all peoples than the callous, selfish insistence, by terrorists who kill and assassinate in the name of justice on getting what they demand. I cannot put aside my pledge of remembrance today, and I therefore protest in the name of international law and justice against this high-handed and tragic action in setting free an international terrorist without trial—without punishment. It is a sad day for France—an even sadder day for mankind.

ALLOCATION OF TIME ON TUESDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, Mr. TALMADGE has an order for 15 minutes on Tuesday, after the recognition of the two leaders or their designees. Mr. NELSON A. ROCKEFELLER, the Vice President, will address the Senate beginning at 2:30 p.m. on Tuesday.

I ask unanimous consent—and I feel that this will meet with the approval of Mr. BAKER—that the time of the two leaders on Tuesday not extend beyond 2:15 p.m.; that Mr. TALMADGE then be recognized under the order; and that the time between 2 p.m. and 2:15 p.m. be divided between the two leaders or their designees, rather than the standing order of 10 minutes each.

The PRESIDING OFFICER (Mr. STONE). Without objection, it is so ordered.

INTRODUCTION OF A BILL

"CONSERVATION GAS"—AN IMAGINATIVE NEW PROPOSAL

Mr. GRIFFIN. Mr. President, this Nation is going through one of its coldest periods in recent memory.

Already, some 46 deaths across the

country have been directly attributed to the winter weather.

Schools are closing down from Maine to Texas for lack of heat. Workers are being laid off from their jobs.

Why? One major reason is that there just is not enough natural gas to go around.

I propose that we embark on an all-out conservation program that would create an important "new" supply of natural gas.

To paraphrase Poor Richard, a cubic foot of gas saved is a cubic foot of gas found.

It is time that we adopt the concept of "conservation gas" as a supplement to new gas discoveries.

Mr. President, I am introducing legislation to pave the way for implementation of an exciting new conservation concept that would make available the equivalent of 130 percent of the gas deliveries expected from the North Slope of Alaska by the early 1980's.

At the same time, it would provide hefty savings on home heating bills, and would create thousands of new jobs. It would not only reduce industrial curtailment, but it would also make new gas available for industrial expansion. The program would reduce our dependence on oil imports and would help in the effort to improve our bleak balance-of-payments situation.

This proposal would give natural gas utility companies incentive to install ceiling insulation in the homes of all their customers, along with automatic clock thermostats and furnace efficiency modifications.

Under existing Federal law, if a gas utility company were to install ceiling insulation and make other energy-saving modifications, the new gas thus made available through conservation could be reallocated by the Federal Power Commission to other utility companies in other parts of the country. But if a gas utility company could be assured through legislation—by a "finders-keepers" provision—that it would be able to sell any new gas "created" through its own conservation effort, then there would be incentive for the company to generate a new supply of "conservation gas."

Such action would make sense on a profit-and-loss basis to a gas-short utility company (and most are in this category) because the new gas generated through such conservation measures would be obtained more cheaply than the cost of purchasing an equivalent amount of new gas from other sources.

My legislation goes a step further: it provides for a tax credit of up to $225 for the homeowner who has oil heat—or who uses gas but does not care to wait for the utility company—if the homeowner goes ahead, on his own, and installs such energy-saving modifications.

If this plan is implemented, consumers would use considerably less gas and their gas bills would go down—compared to what they must expect to pay if such steps are not taken.

Of course, utility rates would still be regulated by State public service commissions, and not by the Federal Government. But there is strong reason to believe that State regulatory bodies would welcome this innovative program which would provide savings for consumers as well as conservation incentives for utility companies.

Even those whose homes are already fully insulated—as well as those who hereafter install energy-saving measures on their own, without waiting for the gas company to do it—would benefit through lower gas bills—lower than the bills they could otherwise expect if this program is ignored.

The estimated nationwide cost of installing the insulation and making the other mentioned energy-saving modifications is $8.3 billion. However, that should be measured against the fact that it would cost twice as much to construct the 39 new electric powerplants that would be required to produce an equivalent amount of electrical energy.

This approach—which for the first time would make it cost-effective for a gas utility company to create new gas by putting insulation in its customers' homes—has recently been under study by the Federal Energy Administration's Office of Energy Resource Development, headed by William G. Rosenberg, formerly a chairman of the Michigan Public Service Commission.

That State commission, now under the leadership of Chairman Daniel Demlow, has already scheduled public hearings beginning in March on this new concept.

Across the country, this innovative conservation proposal is being greeted enthusiastically by officers of utility companies, State officials and consumer groups.

Endorsements of the concept already have come from the California Energy Commission, the Pennsylvania Public Utility Commission, the National Association of Regulatory Utility Commissioners, and the American Gas Association.

The AGA board of directors met today in Washington to discuss the concept, and issued a statement saying they had "concluded the proposal is in keeping with the sense of urgency needed to make the best use of our cleanest and most efficient fuel."

Encouragement has come also from some leading consumer spokesmen, including Lee White, chairman of the energy policy task force of the Consumer Federation of America.

From coast to coast, State regulatory officials are expressing keen interest in the concept. So are natural gas companies.

I understand, however, that at a meeting today at the Federal Energy Administration of five of its key advisory committees, one key point was made over and over again—that no action is likely unless a Federal "finders keepers" rule is instituted.

That is why it is urgent that we act—and act promptly—so that this vitally important conservation program can get underway.

It is envisioned that this bold, new initiative should be fully implemented within 7 years. If implemented nationwide, by 1985 the plan would save 1.2 trillion cubic feet of natural gas a year—gas that otherwise would be wasted or have to be developed or purchased from more costly sources.

It would result in consumer savings for home heating of between $1.7 and $2.3 billion yearly.

It would also create 69,500 jobs a year in private industry to manufacture and install the insulation and energy-saving devices, primarily in northern urban areas now experiencing high unemployment. Approximately one-quarter of the employment would be for manufacturing and the other three-quarters for local installation.

In Michigan alone, implementation of this plan would create 5,700 jobs yearly and save the average homeowner 39 percent of the gas now used to heat his home.

Depending on how much insulation he now has, a Michigander who heats with gas should find by 1985 that his heating bills will be 19 to 53 percent lower than otherwise would be the case.

Mr. President, although my legislation is essential to the success of the program, it should be emphasized that this would not be a Federal program which depends on Federal appropriations. The program would be implemented by gas utility companies and by homeowners, with the encouragement and assistance of the State Public Service Commissions.

If a utility is allowed to earn competitive returns on such conservation investments, the program can be financed privately without Federal subsidy—except the tax relief to be available to a homeowner who proceeds to insulate on his own.

This proposal seeks to put new gas made available through conservation on a competitive economic footing with new gas that is discovered or produced from traditional sources.

I urge prompt adoption of this program throughout the Nation. It is vital that we conserve our existing natural gas resources, which are projected to dwindle at a rate of 10 percent a year.

As indicated, my legislative package includes tax relief for the homeowner who, on his own initiative, insulates and weatherizes his home to save energy, regardless of the type of heating. This provides some equity for those who depend upon oil or coal for home heating.

My proposal would amend the Internal Revenue Code to permit a residential insulation credit, in a manner similar to a provision approved last year by the Senate Finance Committee. Unfortunately, that provision was not included in the final conference agreement which became the Tax Reform Act of 1976.

This part of my legislation would provide a tax credit equal to 30 percent of the first $750 spent by a homeowner on insulation, for an automatic clock thermostat, furnace efficiency modifications or for other energy-saving home improvements, such as storm doors and windows, weather-stripping and caulking.

The maximum tax credit for a homeowner would be $225.

At first blush it appears that this insulation tax credit would cost the Treasury about $192 million in fiscal year 1977 and $320 million in fiscal year 1978. However, those apparent revenue losses would be more than offset by revenue gains that will be generated by new jobs and increased business activity associated with the manufacture and installation of the insulation.

Because the tax credit would encourage those who use oil heat to insulate their homes, it is estimated that this measure alone would save between 50,000 and 100,000 barrels of oil a day by 1979—in addition to the natural gas that would be saved.

At present, needless to say, there is plenty of room for improvement in the home insulation picture. For example, in the Detroit area only 22 percent of the homes now meet Federal insulation standards—while 39 percent have only moderate insulation and another 39 percent, or 1 million homes, have no ceiling insulation whatever. Yet, 71 percent of all Michigan homes are gas heated.

If he were to do nothing more than just to install the insulation, the average Michigan homeowner could save $80 a year on his gas heating bill by 1985. Of course, the savings will be greater if he has an automatic clock thermostat and as many as 400,000 additional homes in furnace efficiency modifications. Furthermore, if this proposal is implemented, Michigan alone could be served and heated by the new gas saved—generating as much as $650 million in new business activity.

It is time—indeed, long past time—for this Nation to make a stronger commitment to the conservation of our valuable natural resources, and particularly to conserve and make more efficient use of our dwindling supplies of oil and gas. That commitment must come from all sectors of our society—the homeowner, the auto maker, the auto driver, the utility industry, State and Federal regulators and the Congress.

At last, we have one of the most exciting, innovative approaches that I have ever seen to help solve our complex energy problem. I urge its adoption and implementation—not only in Michigan but across the Nation as well.

Mr. President, I ask unanimous consent that the third of my bills, which combines the conservation and natural gas and the tax credit feature, be referred jointly to the Committee on Finance and the Committee on Commerce.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRIFFIN. I also ask unanimous consent that a related article which appeared recently in the New York Times be printed in the RECORD, and that the text of the bills I am introducing also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 26, 1976]

FEA AIDE BIDS UTILITIES SUPPLY HOME INSULATION

(By Edward Cowan)

WASHINGTON, Dec. 26—In a fresh approach to energy conservation, a Federal planner proposes that local gas utilities pay for three types of conservation investments in private gas-heated houses: insulation, clock thermostats that turn down the heat at night and improvements in furnace efficiency.

The cost of saving gas would be less than the cost of buying gas, argues William G. Rosenberg of the Federal Energy Administration. Therefore, he said, all of a utility's customers would benefit from lower costs of purchased gas and the utility could properly recover its investment outlays through the rates it charges all customers.

Mr. Rosenberg outlined his idea and supporting data in a paper circulated last week to FEA advisory committee members. The idea also was mentioned in the agency's year-end statement to Congress.

In a sense, Mr. Rosenberg seeks to stand the established view of utilities on its head. Traditionally utilities have been concerned with selling energy. Mr. Rosenberg would have them be equally concerned with saving it.

Mr. Rosenberg, the assistant administrator for energy resource development, is a lawyer and former chairman of the Michigan Public Service Commission. Apart from one tax question—whether a utility would be allowed to depreciate materials installed in a customer's house—the proposal appears to present no Federal issues and therefore might be ready for examination by state regulators.

However, like most new approaches it raises certain practical and equitable questions.

The most apparent questions concern economics. Utilities and state regulators would want to rework for themselves the analyses done for Mr. Rosenberg by consultants who examined three natural gas markets—southern California, northern California and Michigan.

The analysts found, for example, that the cost of a thousand cubic feet of gas saved by insulation ranged from $3.08 in southern California (where the winter climate is mild) to exactly $1 in Michigan, where cold winters create the potential for saving more gas. The assumed costs of insulating ceilings to Federal standards ranged from $208 to $242.

Similarly, the consultants calculated the cost of gas saved from installation of automatic thermostate controls with a nighttime setback of 5 to 8 degrees and from furnace modifications.

"In virtually every case," Mr. Rosenberg concluded, the cost of gas saved through the investment by the utility company in conservation measures is competitive with new supplemental gas supplies," such as gas from Alaska or from coal.

In all, Mr. Rosenberg calculated, a seven-year effort could yield savings of 1.2 trillion cubic feet of gas a year, roughly 5 percent of present consumption and equivalent to reduced oil imports of 550,000 barrels a day.

In addition, manufacture and installation of conservation materials could create up to 70,000 jobs a year, Mr. Rosenberg estimated.

Mr. Rosenberg acknowledged that a gas consumer who had made no conservation investments of his own would benefit more from utility-paid measures than would a neighbor who had already insulated his house. Nevertheless, he argued, it would not be unjustly discriminatory to put the cost in the rate base because all customers would benefit from lower costs of purchased gas and the country from a reduced oil import bill.

This approach, which Congress could encourage at little cost to the Federal Treasury, is expected to be one of several conservation ideas examined by the incoming Carter administration, which has already signaled that it will emphasize energy conservation.

S. 197

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Conservation Gas Act."

SEC. 2. It is the purpose of this Act to encourage the implementation of programs to conserve natural gas by assuring natural gas distribution companies and the State commissions regulating them that the interstate natural gas supplies of those companies will not be reduced or otherwise affected because of the existence, amount, or end use of the gas conserved thereby.

SEC. 3 As used in this Act—

(1) "conservation gas" means natural gas conserved pursuant to a conservation gas program, the amount of which is determined by a State commission and may be reviewed and revised by the Federal Power Commission.

(2) "conservation gas program" means a program under which a natural gas distribution company or a wholly-owned subsidiary thereof pays, on terms and conditions and in a manner approved by a State utility regulatory commission, for

(1) the installation of natural gas conservation devices, and

(2) the provision of specified conservation services in residential dwellings and in such other buildings as the State commission may approve. Such devices and services may include, but are not limited to, insulation, automatic thermostat controls, and furnace efficiency modifications.

(3) "natural gas distribution company" means a person involved in the distribution or transportation of natural gas for ultimate public consumption other than in interstate commerce.

SEC. 4. The formulation and implementation of conservation gas programs are declared to be matters primarily of local concern and subject to regulation by the utility regulatory commissions of the several States. A certification from a State commission to the Federal Power Commission that the State commission has assumed and is exercising jurisdiction over such programs shall constitute conclusive evidence of such regulatory power or jurisdiction. Upon receipt of certification, the Federal Power Commission shall be without authority under the Natural Gas Act, as amended, to take any action to affect, whether by grant, conditional grant, or denial of any application, by allocation or curtailment, by issuance or amendment of any opinion, order, rule, or policy statement, or by any other action, the natural gas supply of any person subject to the Commission's jurisdiction if such action is based on or considers either (1) the existence of conservation gas, or (2) the amount of conservation gas conserved under a conservation gas program, or (3) the implementation of a conservation gas program, including but not limited to the end use to which conservation gas is put.

S. 198

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Residential Insulation Credit Act."

SEC. 2. GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44B. INSULATION OF RESIDENCE.

"(a) GENERAL RULE.—In the case of an individual there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 30 percent of that portion of the qualified insulation expenditures paid or incurred by the taxpayer during the taxable year with respect to any residence as does not exceed $750.

"(b) LIMITATIONS.—

"(1) APPLICATION WITH OTHER CREDITS.—In determining the credits allowed under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 37 (relating to credit for the elderly),

"(C) section 38 (relating to investment in certain depreciable property),

"(D) section 40 (relating to expenses of work incentive programs),

"(E) section 41 (relating to contributions to candidates for public office),

"(F) section 42 (relating to purchase of new principal residence), and

"(G) section 44 (relating to expenses for household and dependent care services necessary for gainful employment),

the tax imposed by this chapter shall (before any other reductions except the reduction allowed under section 42) be reduced by the credit allowed by this section.

"(2) PRIOR EXPENDITURES TAKEN INTO ACCOUNT.—If the taxpayer made qualified insulation expenditures with respect to any residence in any prior taxable year, then subsection (a) shall be applied with respect to such residence for the taxable year by reducing the $750 amount contained in such subsection by the amount of such prior expenditures allowed as a credit under this section for such prior taxable year.

"(3) VERIFICATION.—No credit shall be allowed under subsection (a) with respect to any qualified insulation expenditures unless such expenditures are verified in such manner as the Secretary shall prescribe by regulations.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED INSULATION EXPENDITURES.—The term 'qualified insulation expenditures' means any amount paid or incurred by an individual for insulation (including amounts paid or incurred for the original installation of such insulation) installed after the date of enactment of The Residential Insulation Credit Act, in a dwelling unit located in the United States which is—

"(A) used by the taxpayer as his residence, and

"(B) in existence on January 1, 1977.

"(2) INSULATION.—The term 'insulation' means any insulation, storm (or thermal) window or door, or any other similar item (including a clock thermostat or furnace modification)—

"(A) which is specifically and primarily designed to reduce, when installed in or on a building, the heat loss or gain of such building,

"(B) the original use of which commences with the taxpayer,

"(C) which has a useful life to the taxpayer of at least 3 years, and

"(D) which meets the criteria and standards for energy conserving improvements prescribed by the Secretary of Housing and Urban Development under section 2 of the National Housing Act, or such similar criteria and standards as the Secretary may prescribe.

"(3) JOINT OCCUPANCY.—In the case of any dwelling unit which is jointly occupied and is used during any calendar year as a residence, by two or more individuals—

"(A) the amount of the credit allowable under subsection (a) (after applying subsection (b)(2)) with respect to any qualified insulation expenditures paid or incurred during such calendar year by any such individuals with respect to such dwelling unit shall be determined by treating all such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of subsection (b)(1)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount paid or incurred by such individual during such calendar year for such expenditures bears to the aggregate to the amounts paid by all of such individuals during such calendar year for such expenditures.

"(4) TENANT STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual—

"(A) shall be treated as owning the dwelling unit which he is entitled to occupy as such stockholder; and

"(B) shall be treated as having paid his tenant stockholder's proportionate share (as defined in section 216(b)(3)) of any qualified insulation expenditures paid or incurred by such corporation.

"(d) REDUCTION OF BASIS.—The basis of any property shall not be increased by the amount of any qualified insulation expenditures made with respect to such property to the extent of the amount of any credit allowed under this section with respect to such expenditures.

"(b) REFUNDABILITY.—

"(1) Section 6401 (b) (relating to amount treated as overpayment) is amended—

"(A) by inserting "and 44B (relating to insulation and other energy-conserving alteration of residence)," after "relating to earned income credit)," and

"(B) by striking out "and 43" each place it appears and inserting in lieu thereof a comma and "43, and 44B". "(2) Section 6201 (a) (4) (relating to assessment authority) is amended—

"(A) by striking out "39 or 43" in the caption and inserting in lieu thereof "39, 43, or 44B", and

"(B) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof a comma and "section 43 (relating to earned income), or section 44B (relating to insulation and other energy-conserving alteration of residence),".

"(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44B. Insulation and other energy-conserving alteration of principal residence."

"(2) Subsection (a) of section 1016 (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44B (d), in the case of property with respect to which a credit has been allowed under section 44B.".

"(3) Section 6096 (b) (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

S. 199

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be called "The Conservation Gas and Residential Insulation Credit Act".

TITLE I—CONSERVATION GAS PROGRAMS

SEC. 101. This title may be cited as the "Conservation Gas Act".

SEC. 102. It is the purpose of this Act to encourage the implementation of programs to conserve natural gas by assuring natural gas distribution companies and the State commissions regulating them that the interstate natural gas supplies of those companies will not be reduced or otherwise affected because of the existence, amount, or end use of the gas conserved thereby.

SEC. 103. As used in this Act—

(1) "conservation gas" means natural gas conserved pursuant to a conservation gas program, the amount of which is determined by a State commission and may be reviewed and revised by the Federal Power Commission.

(2) "conservation gas program" means a program under which a natural gas distribution company or a wholly owned subsidiary thereof pays, on terms and conditions and in a manner approved by a State utility regulatory commission, for

(1) the installation of natural gas conservation devices, and

(2) the provision of specified conservation services in residential dwellings and in such other buildings as the State commission may approve. Such devices and services may include, but are not limited to, insulation, automatic thermostat controls, and furnace efficiency modifications.

(3) "natural gas distribution company" means a person involved in the distribution or transportation of natural gas for ultimate public consumption other than in interstate commerce.

SEC. 104. The formulation and implementation of conservation gas programs are declared to be matters primarily of local concern and subject to regulation by the utility regulatory commissions of the several States. A certification from a State commission to the Federal Power Commission that the State Commission has assumed and is exercising jurisdiction over such programs shall constitute conclusive evidence of such regulatory power or jurisdiction. Upon receipt of certification, the Federal Power Commission shall be without authority under the Natural Gas Act, as amended, to take any action to affect, whether by grant, conditional grant, or denial of any application, by allocation or curtailment, by issuance or amendment of any opinion, order, rule or policy statement, or by any other action, the natural gas supply of any person subject to the Commission's jurisdiction if such action is based on or considers either (1) the existence of conservation gas, or (2) the amount of conservation gas conserved under a conservation gas program, including but not limited to the end use to which conservation gas is put.

TITLE II—RESIDENTIAL INSULATION CREDITS

SEC. 101. This Title may be cited as the "Residential Insulation Credit Act."

SEC. 102. GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44B. INSULATION OF RESIDENCE.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 30 percent of that portion of the qualified insulation expenditures paid or incurred by the taxpayer during the taxable year with respect to any residence as does not exceed $750.

"(b) LIMITATIONS.—

"(1) APPLICATION WITH OTHER CREDITS.—In determining the credits allowed under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 37 (relating to credit for the elderly),

"(C) section 38 (relating to investment in certain depreciable property),

"(D) section 40 (relating to expenses of work incentive programs),

"(E) section 41 (relating to contributions to candidates for public office),

"(F) section 42 (relating to purchase of new principal residence), and

"(G) section 44 (relating to expenses for household and dependent care services necessary for gainful employment),

the tax imposed by this chapter shall (before any other reductions except the reduction allowed under section 42) be reduced by the credit allowed by this section.

"(2) PRIOR EXPENDITURES TAKEN INTO ACCOUNT.—If the taxpayer made qualified insulation expenditures with respect to any residence in any prior taxable year, then subsection (a) shall be applied with respect to such residence for the taxable year by reducing the $750 amount contained in such subsection by the amount of such prior expenditures allowed as a credit under this section for such prior taxable year.

"(3) VERIFICATION.—No credit shall be allowed under subsection (a) with respect to any qualified insulation expenditures unless such expenditures are verified in such manner as the Secretary shall prescribe by regulations.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED INSULATION EXPENDITURES.—The term 'qualified insulation expenditures' means any amount paid or incurred by an individual for insulation (including amounts paid or incurred for the original installation of such insulation) installed after the date of enactment of The Residential Insulation Credit Act, in a dwelling unit located in the United States which is—

"(A) used by the taxpayer as his residence, and

"(B) in existence on January 1, 1977.

"(2) INSULATION.—The term 'insulation' means any insulation, storm (or thermal) window or door, or any other similar item (including a clock thermostat or furnace modification)—

"(A) which is specifically and primarily designed to reduce, when installed in or on a building, the heat loss or gain of such building,

"(B) the original use of which commences with the taxpayer,

"(C) which has a useful life to the taxpayer of at least 3 years, and

"(D) which meets the criteria and standards for energy conserving improvements prescribed by the Secretary of Housing and Urban Development under section 2 of the National Housing Act, or such similar criteria and standards as the Secretary may prescribe.

"(3) JOINT OCCUPANCY.—In the case of any dwelling unit which is jointly occupied and is used during any calendar year as a residence, by two or more individuals—

"(A) the amount of the credit allowable under subsection (a) (after applying subsection (b)(2)) with respect to any qualified insulation expenditures paid or incurred during such calendar year by any such individuals with respect to such dwelling unit shall be determined by treating all such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of subsection (b)(1)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount paid or incurred by such individual during such calendar year for such expenditures bears to the aggregate to the amounts paid by all of such individuals during such calendar year for such expenditures.

"(4) TENANT STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual—

"(A) shall be treated as owning the dwelling unit which he is entitled to occupy as such stockholder; and

"(B) shall be treated as having paid his tenant stockholder's proportionate share (as defined in section 216(b)(3)) of any qualified insulation expenditures paid or incurred by such corporation.

"(d) REDUCTION OF BASIS.—The basis of any property shall not be increased by the amount of any qualified insulation expenditures made with respect to such property to the extent of the amount of any credit allowed under this section with respect to such expenditures.

"(b) REFUNDABILITY.—

"(1) Section 6401 (b) (relating to amount treated as overpayments) is amended—

"(A) by inserting "and 44B (relating to insulation and other energy-conserving alteration of residence)," after "(relating to earned income credit)," and

"(B) by striking out "and 43" each place it appears and inserting in lieu thereof a comma and "43, and 44B".

"(2) Section 6201 (a) (4) (relating to assessment authority) is amended—

"(A) by striking out "39 or 43" in the caption and inserting in lieu thereof "39, 43, or 44B", and

"(B) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof a comma and "section 43 (relating to earned income), or section 44B (relating to insulation and other energy-conserving alteration of residence),".

"(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44B. Insulation and other energy-conserving alteration of principal residence."

"(2) Subsection (a) of section 1016 (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44B (d), in the case of property with respect to which a credit has been allowed under section 44B.".

"(3) Section 6096(b) (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

EC–316. A letter from the Administrator, transmitted January 4, 1977, from the Administrator of the General Services Administration transmitting, pursuant to law, copies in full of the certificates from the Executives of various States of ascertainment of the electors of President and Vice President of the United States chosen in each of the States on November 2, 1976 (with accompanying papers); ordered to lie on the table.

EC–317. A letter from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals for the month of January, 1977 (with an accompanying report); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Public Works, Interior and Insular Affairs, the Judiciary, Foreign Relations, Agriculture and Forestry, Commerce, Armed Services, Labor and Public Welfare, Finance, Banking, Housing and Urban Affairs, and Government Operations, and ordered to be printed.

EC–318. A letter from the Deputy Assistant Secretary of the Department of Agriculture transmitting, pursuant to law, a report on the status of research facilities funds as of September 30, 1976 (with an accompanying report); to the Committee on Agriculture and Forestry.

EC–319. A letter from the President of the National Forest Reservation Commission transmitting, pursuant to law, the report of the National Forest Reservation Commission for the fiscal year ended September 30, 1976 (with an accompanying report); to the Committee on Agriculture and Forestry.

EC–320. A letter from the Acting Secretary for the Department of Agriculture transmitting, pursuant to law, a report covering the activities of the Rural Electrification Administration for the fiscal year 1976 and the transition period (with an accompanying report); to the Committee on Agriculture and Forestry.

EC–321. A letter from the Administrator of the Rural Electrification Administration transmitting, pursuant to law, the approval of a guaranteed non-REA loan to Arkansas Electric Cooperative Corporation of Little Rock, Arkansas (with an accompanying report); to the Committee on Appropriations.

EC–322. A letter from the Chairman of the Indian Claims Commission transmitting, pursuant to law, a report on the final determination in respect to the claim case contained in Docket No. 196 (with an accompanying report); to the Committee on Appropriations.

EC–323. A letter from the Deputy Director of the Office of Management and Budget transmitting, pursuant to law, that the appropriations to the Department of Agriculture for "Salaries and Expenses," Federal Grain Inspection Service, and for "Inspection and Weighing Services," Federal Grain Inspection Service, have been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriations; to the Committee on Appropriations.

EC–324. A letter from the Director of the Selective Service transmitting, pursuant to law, a copy of the Semiannual Report of the Director of Selective Service for the period January 1, 1976 through June 30, 1976 (with an accompanying report); to the Committee on Armed Services.

EC–325. A letter from the Naval Facilities Engineering Command transmitting, pursuant to law, a supplement to the September 3, 1976 report of the Top Ten Architect-Engineer firms (with an accompanying report); to the Committee on Armed Services.

EC–326. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, notice of 23 construction projects to be undertaken by the Air National Guard (with an accompanying report); to the Committee on Armed Services.

EC–327. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a report of the design and construction supervision, inspection, and overhead fees charged by the construction agents for the military construction projects of the Military Departments and the Defense Agencies (with an accompanying report); to the Committee on Armed Services.

EC–328. A letter from the Secretary of the Treasury transmitting, with Presidential approval, a report prepared by the Department of the Treasury on "The State of the United

States Coinage" (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

EC–329. A letter from the Vice President for Government Affairs for the National Railroad Passenger Corporation transmitting, pursuant to law, a report on revenues and expenses for the month of September, 1976 (with an accompanying report); to the Committee on Commerce.

EC–330. A letter from the Administrator of the United States Environmental Protection Agency transmitting, pursuant to law, the report "Waste Disposal Practices and Their Effects on Ground Water" (with an accompanying report); to the Committee on Commerce.

EC–331. A letter from the Chairman of the Migratory Bird Conservation Commission transmitting, pursuant to law, a report of the Migratory Bird Conservation Commission for the fiscal year ended September 30, 1976 (with an accompanying report); to the Committee on Commerce.

EC–332. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on July 20, 1976, and signed by the Mayor on August 26, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–333. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on November 22, 1976, and signed by the Mayor on December 30, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–334. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on October 12, 1976, and signed by the Mayor on November 19, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–335. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on September 15, 1976, and signed by the Mayor on October 8, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–336. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on October 12, 1976, and signed by the Mayor on November 15, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–337. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on October 12, 1976, and signed by the Mayor on November 19, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–338. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on September 15, 1976, and returned by the Mayor without signature on October 20, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–339. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on September 15, 1976, and signed by the Mayor on October 15, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–340. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on October 12, 1976, and signed by the Mayor on November 8, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–341. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act adopted by the Council on September 15, 1976, and signed by the Mayor on October 13, 1976 (with accompanying papers); to the Committee on the District of Columbia.

EC–342. A letter from the Fiscal Assistant Secretary for the Department of Treasury transmitting, pursuant to law, the Statement of Liabilities and Other Financial Commitments of the United States Government as of September 30, 1976 (with an accompanying report); to the Committee on Finance.

EC–343. A letter from the Secretary of the Treasury transmitting, pursuant to law, the Combined Statement of Receipts, Expenditures and Balances of the United States Government for the Fiscal Year ended September 30, 1976 (with an accompanying report); to the Committee on Finance.

EC–344. A letter from the Under Secretary of the Department of Health, Education, and Welfare transmitting, pursuant to law, a report on the findings and recommendations with respect to the appropriateness of reimbursement under Part B of Medicare for services related to aphakia when performed by optometrists (with an accompanying report); to the Committee on Finance.

EC–345. A communication from the President of the United States transmitting a request that the Congress authorize and appropriate funds to pay arrearages and other assessments owed by the United States to the United Nations Educational, Scientific and Cultural Organization (pursuant to law); to the Committee on Foreign Relations.

EC–346. A letter dated January 6, 1976 from the Assistant Legal Adviser for Treaty Affairs transmitting, pursuant to law, the international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–347. A letter from the Secretary of State transmitting, pursuant to law, the twenty-fourth report on the extent and disposition of United States contributions to international organizations (with an accompanying report); to the Committee on Foreign Relations.

EC–348. A letter from the Assistant Legal Adviser for Treaty Affairs transmitting, pursuant to law, the international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–349. A letter dated December 23, 1976, from the Assistant Legal Adviser for Treaty Affairs transmitting, pursuant to law, the international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–350. A letter from the Acting Director of the United States Information Agency transmitting, pursuant to law, a report on the Disposal of Foreign Excess Property during Fiscal Year 1976 (with an accompanying report); to the Committee on Government Operations.

EC–351. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, the annual report of the Department of Defense relative to disposition of foreign excess personal property in areas outside of the United States, Puerto Rico, American Samoa, Guam, the Trust Territory of the Pacific Islands, and the Virgin Islands (with an accompanying report); to the Committee on Government Operations.

EC–352. A letter from the Chairman of the Federal Power Commission transmitting, pursuant to law, notice of the Commission's intention to adopt new or intended uses of information in certain of its existing records systems, in accordance with the Privacy Act (with an accompanying report); to the Committee on Government Operations.

EC–353. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Clemency Program of 1974" (with an accompanying report); to the Committee on Government Operations.

EC–354. A letter from the Comptroller General of the United Sattes transmitting, pursuant to law, a report entitled "Problems in Supporting Weapons Systems Produced by Other Countries" (with an accompanying report); to the Committee on Government Operations.

EC–355. A letter from the Attorney General of the United States transmitting, pursuant to law, two copies of reports of the Department of Justice on systems of records, in accordance with the Privacy Act (with accompanying reports); to the Committee on Government Operations.

EC–356. A report from the Assistant Director for General Services of the U.S. Environmental Protection Agency transmitting, pursuant to law, the anual report on the disposal of foreign excess property; to the Committee on Government Operations.

EC–357. A letter from the Chairman of the National Center for Productivity and Quality of Working Life transmitting, pursuant to law, the annual report of the National Center for Productivity and Quality of Working Life (with an accompanying report); to the Committee on Government Operations.

EC–358. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, a report covering personal property donated to public health and educational institutions and civil defense organizations (with an accompanying report); to the Committee on Government Operations.

EC–359. A letter from the Secretary of the Interior and the Secretary of Agriculture transmitting, pursuant to law, copies of the second bi-annual report on the Administration of the Wild Free-roaming Horse and Burro Act (with accompanying reports); to the Committee on Interior and Insular Affairs.

EC–360. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on changes in the refiner distribution and market shares of the statutory categories of refined petroleum products (with an accompanying report); to the Committee on Interior and Insular Affairs.

EC–361. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on changes in market shares of the statutory categories of retail gasoline marketers for the month of August 1976 (with an accompanying report); to the Committee on Interior and Insular Affairs.

EC–362. A letter from the Deputy Assistant Secretary of the Interior transmitting, pursuant to law, a copy of a proposed contract with the University of Minnesota for a research project (with an accompanying report); to the Committee on Interior and Insular Affairs.

EC–363. A letter from the Chairman of the Foreign Claims Settlement Commission transmitting, pursuant to law, the final report of the Micronesian Claims Commission (with an accompanying report); to the Committee on Interior and Insular Affairs.

EC–364. A letter from the Chief Commissioner of the United States Court of Claims transmitting, pursuant to law, a report con-

cerning the allowance of attorney expense claims in proceedings conducted pursuant to the Alaska Native Claims Settlement Act (with an accompanying report); to the Committee on Interior and Insular Affairs.

EC–365. A letter from the Clerk of the United States Court of Claims transmitting, pursuant to law, copies of all the judgments rendered by the United States Court of Claims for the year ended September 30, 1976 (with an accompanying report); to the Committee on the Judiciary.

EC–366. A letter from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, copies of eight orders in the cases of aliens who have been found admissible to the United States (with accompanying papers); to the Committee on the Judiciary.

EC–367. A letter from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, copies of orders entered in 901 cases in which authority was exercised in behalf of certain aliens (with accompanying papers); to the Committee on the Judiciary.

EC–368. A letter from the Chairperson of the National Advisory Council on Services and Facilities for the Developmentally Disabled transmitting, pursuant to law, a report on the evaluation of the efficiency of the administration of the Council (with an accompanying report); to the Committee on Labor and Public Welfare.

EC–369. A letter from the Acting Director of the Office of Regulatory Review of the Department of Health, Education, and Welfare transmitting, pursuant to law, a copy of regulations sent to the Federal Register on the National Diffusion Network (with an accompanying report); to the Committee on Labor and Public Welfare.

EC–370. A letter from the Acting Director of the Office of Regulatory Review of the Department of Health, Education, and Welfare transmitting, pursuant to law, a copy of regulations sent to the Federal Register on the Final Teacher Corps Funding Criteria (with an accompanying report); to the Committee on Labor and Public Welfare.

EC–371. A letter from the Director of the United States Arms Control and Disarmament Agency transmitting, pursuant to law, the Annual Report for the Calendar Year 1976 on the fourteen scientific or professional positions authorized for establishment in the United States Arms Control and Disarmament Agency (with an accompanying report); to the Committee on Post Office and Civil Service.

EC–372. A letter from the Administrator of the United States Environmental Protection Agency transmitting, pursuant to law, the third of a series of annual reports covering measures taken to implement the objectives of the Federal Water Pollution Control Act; to the Committee on Public Works.

EC–373. A letter from the Administrator of the General Services Administration transmitting, pursuant to law, a prospectus proposing a succeeding lease for space presently occupied at 2000 M Street, N.W., Washington, D.C. (with an accompanying report); to the Committee on Public Works.

EC–374. A letter from the Administrator of the General Services Administration transmitting, pursuant to law, a prospectus for alterations at the Washington, D.C., Lafayette Building (with an accompanying report); to the Committee on Public Works.

EC–375. A letter from the Administrator of the United States Small Business Administration transmitting proposed legislation which would amend the Small Business Act to increase the authorization for certain small business loan programs (with accompanying papers); to the Select Committee on Small Business.

EC–376. A letter from the Administrator of the United States Small Business Administration transmitting proposed legislation to amend the Small Business Investment Act of 1958 to increase the authorization for the Surety Bond Guarantee Fund (with accompanying papers); to the Select Committee on Small Business.

EC–377. A letter from the Chairman for the Federal Election Commission transmitting, pursuant to law, a set of separate proposed regulations which comprehensively treat the Federal Election Campaign Act of 1971 (with accompanying papers); to the Committee on Rules and Administration.

EC–378. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Returning the Mentally Disabled to the Community: Government Needs to do More" (with an accompanying report); to the Committee on Government Operations.

EC–379. A letter from the Chairman of the Board of Directors for the Future Farmers of America transmitting, pursuant to law, a report of the Audit of the Accounts of the Future Farmers of America for the fiscal year ended June 30, 1976 (with an accompanying report); to the Committee on the Judiciary.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. THURMOND:

S. 189. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Finance.

By Mr. BURDICK:

S. 190. A bill for the relief of Dennis M. Viacrucis.

S. 191. A bill for the relief of Romeo V. Kabatay, Esperanza Tinio Kabatay, Rhodora Kabatay, Ronaldo Kabatay, and Erlinda Hernandex.

S. 192. A bill for the relief of Oscar Fadul, Fe G. Fadul, and Katherine G. Fadul.

S. 193. A bill for the relief of Asho Raine.

S. 194. A bill for the relief of Monchito C. Entena, Antonia V. Entena, Robert Entena, Cathleah Entena, Arvin Entena, and Eliza R. Ayala.

S. 195. A bill to amend title 28, United States Code, to provide that Bottineau, McHenry, Pierce, Sheridan, and Wells Counties, North Dakota, shall be included in the Northwestern Division of the Judicial District of North Dakota; to the Committee on the Judiciary.

S. 196. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Finance.

By Mr. GRIFFIN:

S. 197. A bill to encourage the implementation of certain State and local programs to conserve natural gas; to the Committee on Commerce.

S. 198. A bill to amend the Internal Revenue Code of 1954 to allow a credit for expenditures for insulation of a taxpayer's own residence; to the Committee on Finance.

S. 199. A bill to stimulate increased conservation of energy resources by encouraging the implementation of certain State and local programs to conserve natural gas and by amending the Internal Revenue Code of 1954 to allow a credit for expenditures for insulation of a taxpayer's own residence; jointly to the Committees on Commerce and Finance, by unanimous consent.

By Mr. BURDICK (for himself and Mr. YOUNG):

S. 200. A bill for the relief of Bharat M. Parekh; to the Committee on the Judiciary.

By Mr. BURDICK:

S. 201. A bill to amend title 39 of the United States Code to establish an arbitration board to settle disputes between certain organizations and the U.S. Postal Service; to the Committee on Post Office and Civil Service.

By Mr. BELLMON (for Mr. BARTLETT):

S. 202. A bill to establish within the Department of the Interior the position of an additional Assistant Secretary of the Interior, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BELLMON (for himself and Mr. DOMENICI):

S. 203. A bill to amend and extend the Agricultural Act of 1970; to the Committee on Agriculture and Forestry.

By Mr. HART (for himself and Mr. JAVITS):

S. 204. A bill to establish the Federal Sentencing Commission; and for other purposes; to the Committee on the Judiciary.

By Mr. BENTSEN:

S. 205. A bill to amend title 18, United States Code, relating to criminal offenses committed by terrorists; to the Committee on the Judiciary.

S. 206. A bill requiring the President to suspend economic assistance, military assistance, Government and commercial sales of arms, Export-Import Bank loans, and the generalized system of preferences to any country that willfully aids or abets terrorism.

By Mr. BELLMON (for Mr. BARTLETT):

S. 207. A bill to amend the Rural Electrification Act of 1936, as amended, to provide authority for the Administrator of the Rural Electrification Administration to guarantee loans for the furnishing of electric energy for certain municipal electric systems; to the Committee on Agriculture and Forestry.

By Mr. WILLIAMS (for himself and Mr. KENNEDY):

S. 208. A bill to amend the Urban Mass Transportation Act of 1964 to extend the authorization for assistance under such Act, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THURMOND:

S. 189. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Finance.

Mr. THURMOND. Mr. President, I am introducing today a bill which would remove from title II of the Social Security Act the limitation upon the amount of outside income which an individual may earn while receiving social security benefits.

Under the present law, social security recipients under the age of 72 who earn in excess of $3,000 per year have the benefits reduced $1 for every $2 earned over the minimum, except those months in which they earn under $250. This is the so-called earnings test.

Mr. President, there is no question as to the impact of this limitation. Many older persons are pressured into not working for fear of losing their benefits. As a result, an untold amount of valuable skills acquired through many years of hard, honest work are totally lost to our country.

Such a limitation is in direct contradiction of a fact widely accepted by the Federal Government, gerontologists, and others concerned with the health of the elderly. That fact is that the hiring and retention of older workers in all aspects of the economy is very "good medicine" for the elderly. It should be encouraged in every way possible, and removing this limitation is one way to accomplish this objective.

Mr. President, in my opinion, this aspect of the social security program is extremely inequitable. Investment income is not recognized when determining whether an individual's social security shall be reduced. This allows a wealthy man who received thousands of dollars a year in interest income to collect his full social security benefits. However, an average man who never had the time, much less the money, to enter the world of investments, and who might need to continue working in order to insure the economic survival of himself and his family, cannot work without being subject to this penalty. This is simply not right.

It is said that removal of the earnings limitation will be too costly. In my opinion, this begs the question. The people who receive social security are the same citizens who have worked hard all their lives for their salaries. They have not been on the welfare rolls. These people are the backbone of America—they are the men and women who believe in America and have quietly and loyally contributed their fair share to the social security program all their lives. To deny them the fruits of their labors now, when they need it most, is not only illogical, but unjust.

Mr. President, let us remove this obstacle which stands in the way of thousands of our senior citizens who want to work. Work produces income and income produces tax revenue. Work contributes to the good health of our senior citizens who have many valuable skills to contribute to this country. Removal of the earnings limitation is an equitable and reasonable step.

Mr. President, I urge my colleagues to carefully consider this measure, and to join me in this effort to bring meaningful reform to the social security system. Mr. President, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 189

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsections (b), (d), (f), (h), (j), and (k) of section 203 of the Social Security Act are repealed.

SEC. 2. (a) Subsection (c) of section 203 of the Social Security Act is redesignated as subsection (b); and such subsection as so redesignated is amended—

(1) by striking out "Noncovered Work Outside the United States or" in the heading;

(2) by striking out paragraph (1);

(3) by redesignating paragraphs (2), (3), and (4) as paragraphs (1), (2), and (3), respectively;

(4) by striking out "For purposes of paragraphs (2), (3), (4)" and inserting in lieu thereof "For purposes of paragraphs (1), (2), and (3)"; and

(5) by striking out the last sentence.

(b) Subsection (e) of such section 203 is redesignated as subsection (c); and such subsection as so redesignated is amended by striking out "subsections (c) and (d)" and inserting in lieu thereof "subsection (b)".

(c) Subsection (g) of such section 203 is redesignated as subsection (d); and such subsection as so redesignated is amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(d) Subsection (i) of such section 203 is redesignated as subsection (e); and such subsection as so redesignated is amended by striking out "subsection (b), (c), (g), or (h)" and inserting in lieu thereof "subsection (b) or (d)".

(e) Subsection (1) of such section 203 is redesignated as subsection (f); and such subsection as so redesignated is amended by striking out "subsection (g) or (h)(1)(A)" and inserting in lieu thereof "subsection (d)".

SEC. 3. (a) Section 202 (n)(1) of the Social Security Act is amended by striking out "Section 203(b), (c), and (d)" and inserting in lieu thereof "Section 203(b)".

(b)(1) Section 202 (q)(5)(B) of such Act is amended by striking out "section 203(c)(2)" and inserting in lieu thereof "section 203(b)(1)".

(2) Section 202(q)(7)(A) of such Act is amended by striking out "deductions under section 203(b), 203(c)(1), 203(d)(1), or 222(b)" and inserting in lieu thereof "deductions on account of work under section 203 or deductions under section 222(b)".

(c)(1) Section 202(s)(1) of such Act is amended by striking out "paragraphs (2), (3), and (4) of section 203(c)" and inserting in lieu thereof "paragraphs (1), (2), and (3) of section 203(b)".

(2) Section 202(s)(3) of such Act is amended by striking out "the last sentence of subsection (c) of section 203, subsection (f)(1)(C) of section 203,".

(d) Section 202(t)(7) of such Act is amended by striking out "Subsections (b), (c), and (d)" and inserting in lieu thereof "Subsection (b)".

(e) Section 208(a)(3) of such Act is amended by striking out "under section 203(f) of this title for purposes of deductions from benefits" and inserting in lieu thereof "under section 203 for purposes of deductions from benefits on account of work."

(f) Section 215 (g) of such Act is amended by striking out "and deductions under section 203 (b)".

(g) Section 3(e) of the Railroad Retirement Act of 1937 is amended by striking out "under subsections (g) and (h)(2) of section 203 of the Social Security Act" and inserting in lieu thereof "under subsection (d) of section 203 of the Social Security Act".

(h) Section 5(1)(1) of the Railroad Retirement Act of 1937 is amended by inserting "or" after the semicolon at the end of clause (i), by striking out clause (ii), and by redesignating clause (iii) as clause (ii).

SEC. 4. The amendments made by this Act shall be effective with respect to taxable years ending on or after December 31, 1974.

By Mr. BURDICK:

S. 196. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Finance.

Mr. BURDICK. Mr. President, today I am pleased to introduce a bill to amend the Internal Revenue Code. This act would exempt certain agricultural aircraft from the aircraft use tax and provide for the refund of the gasoline tax to the agricultural operator.

I firmly believe that these taxes are unfairly imposed upon the crop sprayers and other agricultural aviators. As my colleagues know, taxes are imposed under the Airport and Airways Development Act of 1970 upon the gross weight of aircraft and upon aviation fuel. The revenues raised go into a trust fund, with a current surplus totaling over $2 billion to be used for construction and improvement of our Federal airport system.

The agricultural aviation industry is paying this tax on aircraft used solely for agricultural purposes. Yet, most agricultural aircraft operators own and maintain private air strips from which their business is conducted. In fact, the "Measures of Use" study, published in April of 1973 by the Federal Aviation Administration, indicated that agricultural aircraft accounted for less than one-half of 1 percent of the use of the Federal system, while the revenues raised by this tax on agricultural operators constitute roughly 4 percent of the total taxes paid by all general aviation. This, Mr. President, is inequitable.

Mr. President, the other component of this amendment is a provision to exempt from taxation gasoline used by agricultural aircraft. Federal taxes paid by farmers are a refundable item when used for machinery on the fields. Gasoline used to propel a tractor across a field is not subject to Federal taxation; why would the gasoline which the same farmer uses to spray the very same field be subjected to Federal taxation? Tax equity, Mr. President, demands a change.

As my colleagues know, the ideas incorporated in my amendment are not new. The substance of this amendment was introduced in the 93d Congress as S. 2567 and in the 94th Congress a similar amendment is contained in S. 1403 which was referred to the Finance Committee in April of 1975. In 1976, I introduced the bill as an amendment to the Tax Reform Act, H.R. 10612. During the floor discussion of that amendment in 1976, my esteemed colleague Senator LONG, chairman of the Finance Committee, stated that he found the bill meritorious and believed the Senate would agree to it after it had been studied.

It is also noteworthy that the substance of this bill has been introduced in the House in several different bills: H.R. 6223 by Mr. BOWEN of Mississippi, H.R. 8098 by Messrs. BOWEN of Mississippi and SISK of California, H.R. 8925 by Mr. MONTGOMERY of Mississippi, H.R.

9335 by Mr. MATHIS of Georgia, and H.R. 11033 by Mr. GOLDWATER of California. Today, Mr. President, it is time for the Senate to act on this matter.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 196

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. . EXEMPTION OF CERTAIN AGRICULTURAL AIRCRAFT FROM AIRCRAFT USE TAX.

(a) IN GENERAL.—Section 4493 (relating to special rules relating to tax on use of civil aircraft) is amended by adding at the end thereof the following new subsection:

"(c) EXEMPTION OF AIRCRAFT USED IN AGRICULTURAL OPERATIONS.—No tax shall be imposed by section 4491 on the use of any aircraft by a person who holds a certificate as an agricultural aircraft operator under part 137 of title 14 of the Code of Federal Regulations, if such aircraft is equipped for agricultural operation as provided in such part 137 and if such person uses it primarily for such agricultural operation.".

SEC. 2. Section 6420(c)(3) of the Internal Revenue Code of 1954 (defining farming purposes) is amended by adding at the end thereof the following new sentence: "For purposes of this subsection 6427(c), if the use of any liquid as a fuel on a farm for farming purposes is in an aircraft and by an aerial applicator who was the actual ultimate purchaser thereof."

SEC. 3. The amendments made by this Act shall take effect as of July 1, 1977.

By Mr. BELLMON (for Mr. BARTLETT):

S. 202. A bill to establish within the Department of the Interior the position of an additional Assistant Secretary of the Interior, and for other purposes; to the Committee on Interior and Insular Affairs.

Mr. BELLMON. Mr. President, on behalf of the distinguished Senator from Oklahoma (Mr. BARTLETT), I introduce a bill and I ask unanimous consent that the bill and a statement by Senator BARTLETT be printed in the RECORD.

There being no objection, the bill and statement were ordered to be printed in the RECORD, as follows:

S. 202

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be hereafter in the Department of the Interior, in addition to the Assistant Secretaries now provided for by law, one additional Assistant Secretary of the Interior for Indian Affairs who shall be appointed by the President by and with advice and consent of the Senate, who shall be responsible for such duties as the Secretary of the Interior shall prescribe with respect to the conduct of Indian Affairs and who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of the Interior.

SEC. 2. Section 5315, title 5, United States Code, is amended by striking the figure "(6)" at the end of item (18) and by inserting in lieu thereof the figure "(7)".

SEC. 3. (a) The following provisions are repealed effective when an Assistant Secretary for Indian Affairs has been confirmed and takes the oath of office:

(1) paragraph (45) of section 5316 of title 5 of the United States Code;

(2) Section 462, Revised Statutes, as amended and supplemented (25 U.S.C. 1); and

(3) the Act of June 5, 1942 (56 Stat. 312) as amended (25 U.S.C. 2a).

(b) The Act of August 8, 1946 (60 Stat. 939; 25 U.S.C. 1a), is amended to read as follows: "The Secretary of the Interior is authorized to delegate any of his functions, powers, and duties with respect to the conduct of Indian Affairs to the Assistant Secretary of the Interior for Indian Affairs and such other officers and employees of the Department of the Interior as the Secretary may designate. The Secretary may amend and revoke such delegations and may authorize such successive redelegations of such functions, powers, and duties as he may deem desirable. The Secretary may also make such rules and regulations as may be necessary to carry out his functions, powers, and duties with respect to the conduct of Indian Affairs.".

(c) All rules, regulations, orders, authorizations, delegations duly issued, made, or taken either by the Secretary of the Interior relating to the Commissioner of Indian Affairs or by the Commissioner of Indian Affairs prior to the effective date of the repeals in subsection (a) of this section shall continue in full force and effect until modified or rescinded by the Secretary of the Interior or his designees and all references therein to the Commissioner of Indian Affairs shall be deemed to be to the Assistant Secretary of the Interior for Indian Affairs.

STATEMENT BY SENATOR BARTLETT

Since the 91st Congress, the Administration has submitted legislative proposals to the Congress for the purpose of establishing an Assistant Secretary of the Interior for Indian Affairs, and both the House and Senate Interior and Insular Committees have acted on the legislation each Congress since then. Yet, the proposals, for various reasons unrelated to the merits of the legislation, have failed to become law. The Senate, in the closing hours of the 94th Congress, passed the bill for the second time. However, the House did not take action and the proposal died for a third time.

This legislation is designed to correct an inequitable situation that existed in the Department of the Interior involving the various bureaus under its jurisdiction. Until recently the BIA was on a lower administrative level than the six major land and natural resources offices within the Department of the Interior which are headed by Assistant Secretaries. Being on this lower level relegated the Commissioner of Indian Affairs to report to the Secretary through an assistant secretary such as the Assistant Secretary for Public Land Management. Because of this lower Administrative position, Indian matters had to compete with land and natural resources on a day-to-day basis and for the attention of the Secretary. Two major detrimental effects on Indian Affairs have resulted from this situation: an aggravation of the inherent conflicts of interest which exist in the federal administration of Indian Affairs and the visibility and importance of the direct human concerns of Native Americans being placed at a lower level than land, water, natural resources, and power concerns.

Recent Departmental administrative action has resulted in the status of the Bureau of Indian Affairs being raised to a level commensurate with the six major offices in the Department, thus allowing the Commission to report directly to the Secretary on the same basis as the six assistant secretaries.

Although the above arrangement would seem to have remedied the situation, I am of the opinion that the Congress should support the Department's actions by enacting legislation that would give the Indian Affairs Commissioner status in title as well as raise Indian Affairs in the Department to its proper level.

I am today introducing legislation to create a new Assistant Secretary of the Interior for Indian Affairs to report directly to the Secretary and abolish the existing position of Commissioner of Indian Affairs. With the thorough hearing record that has been compiled from past hearings on this subject, I would hope the bill could receive expeditious consideration by the Interior and Insular Committee and be quickly acted on by the full Senate.

By Mr. BELLMON (for himself and Mr. DOMENICI):

S. 203. A bill to amend and extend the Agricultural Act of 1970; to the Committee on Agriculture and Forestry.

Mr. BELLMON. Mr. President, one of the most important responsibilities facing this Congress is the enactment of a new farm bill. The present legislation expires at the end of the 1977 crop year. Also, many agriculturally related programs need to be amended and updated. The constraints of the Budget Act make it essential that this legislation which authorizes the spending of a considerable sum of money be enacted without delay.

Mr. President, enactment of a workable farm bill is of immense importance to American consumers. It is sometimes not realized by those outside agriculture how absolutely dependent this Nation's food supply is upon an agriculture industry that is economically healthy. Producers of farm commodities must receive an income sufficient to allow them to purchase the fertilizer, fuel, repairs, and equipment which is necessary, and to pay interest and taxes. Unless they do, producing food in anything like the quantities now demanded by our 215 million people becomes an impossibility. The same is true of the foreign customers who increasingly look to this country for their food supply.

The bill I am introducing today is not simply a bill for the benefit of farmers. This legislation, if enacted by Congress, will be a bill primarily aimed at insuring a continuous abundance of food for Americans and our customers abroad.

There are many problems in the agriculture industry which this bill is intended to help solve. Perhaps the most important is the impossibility for a single producer or even for a group of producers acting in concert to balance farm production with either national or international demand. The vagaries of weather, plant disease, insect infestation, and other production risks make it absolutely impossible for producers of agricultural commodities to know in advance the size of the season's harvest.

In addition, political, climatic, economic, and social conditions here and in other countries have a direct impact

upon the level of demand for American farm products.

For these reasons, it is essential that Congress, in writing a new farm bill, undertake to devise a means of buffering America's food producers against the sharp variations in both production and demand.

With the world population and food demand growing steadily, it is absolutely certain that today's burdensome surpluses will be tomorrow's blessings. It is also certain, Mr. President, that today's excess food-producing capability will be tomorrow's insurance against widespread hunger.

Congress must act to make certain that our food-producing capability is kept in a high state of excellence. Further, we must act to insure that new technology, which will increase our food producing capability is developed ahead of increases in food demand.

Specifically, this legislation provides these changes in the present farm program:

First, commodity loan level rates are increased to more realistic levels;

Second, target prices are adjusted to levels close to current costs of production;

Third, the maturity of commodity loans is extended from 1 to 5 years;

Fourth, provision is made for construction of badly needed on-farm grain storage;

Fifth, restraints are provided that will insure our foreign customers against an unnecessary interruption in their food supply as occurred during the recent grain export embargoes;

Sixth, authorization is granted to the Secretary of Agriculture to establish a reserve of fortified preprocessed food supplements to be used in dealing with emergency conditions; and

Seventh, foreign countries which wish to purchase and store grain in this country to meet their future needs are encouraged to do so.

Mr. President, in general, the experience with the present target price approach has been good. The target price approach allows the market price of grain to move freely so that American farm commodities are competitive on the world market. This movement protects American producers against the conditions which developed under the high support price programs of the past years when we were consistently undersold by our competitors abroad. Also, the target price approach prevents the acquisition by the Commodity Credit Corporation of large quantities of commodities which can later be used to depress market prices.

American farm producers need both the cash flow to pay production costs and the 5-year market term which this bill provides. It is anticipated that during a 5-year period, export demand for any given commodity will strengthen due to increased foreign purchases. It is only during these times that American farm producers—who can produce quantities far in excess of domestic needs—can expect to receive profitable levels of income from sale of their products.

Mr. President, the heavy dependence of the United States upon foreign exchange earned through the export of farm commodities is well known. The ability of American agricultural producers to continue to supply the immense quantities of commodities required for this commerce and to meet our domestic needs is absolutely essential to our national welfare.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 203

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO THE AGRICULTURAL ACT OF 1970

SEC. 3. The Agricultural Act of 1970 is amended as follows:

PAYMENT LIMITATIONS

(1) Section 101(1), as amended by paragraph (1) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981"; and by striking out "$20,000" and inserting in lieu thereof "$30,000".

DAIRY PROGRAM

(2) Section 201, as amended by paragraph (2) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by—

(A) striking out "1977" and "1980" in subsection (e) and inserting in lieu thereof "1981" and "1984", respectively; and

(B) adding at the end of such section a new subsection as follows:

"(g) Section 201 of the Agricultural Act of 1949 is amended by adding at the end thereof a new subsection as follows:

"'(d) Notwithstanding the foregoing provisions of this section, effective for the period beginning with the date of enactment of this subsection and ending on March 31, 1981, the support price of milk shall be established at no less than 80 per centum of the parity price therefor, on the date of enactment, and the support price shall be adjusted thereafter by the Secretary at the beginning of each quarter, beginning with the second quarter of the calendar year 1977, to reflect any estimated change during the immediately preceding quarter in the production costs of dairy farmers. Such support prices shall be announced by the Secretary not more than thirty, nor less than twenty, days prior to the beginning of each quarter.'".

TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND TO VETERANS' HOSPITALS

(3) Section 203, as amended by paragraph (4) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981".

WOOL PROGRAM

(4) Section 301, as amended by paragraph (7) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" each place it occurs therein and inserting in lieu thereof "1981".

WHEAT PROGRAM

(5) Effective beginning with the 1978 crop of wheat, section 401, as amended by paragraph (8) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981" and section 107 of the Agricultural Act of 1949, as it appears in such section 401, is amended by—

(A) striking out "$1.37 per bushel" in section 107(a) and inserting in lieu thereof "$2.25 per bushel, plus the amount per bushel necessary to cover storage, interest, transportation, and other handling costs";

(B) amending the first sentence of section 107(c) to read as follows: "Payments shall be made for each crop of wheat to the producers on each farm in an amount determined by multiplying (1) the amount by which the higher of—

"(A) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under subsection (a) for such crop is less than the established price of $3.10 per bushel in the case of the 1978 crop, and $3.10 per bushel in the case of the 1979, 1980, and 1981 crops, adjusted each such year to reflect any changes in the production costs of farmers after the calendar year 1977, times in each case (2) the allotment for the farm for such crop, times (3) the projected yield established for the farm with such adjustments as the Secretary determines necessary to provide a fair and equitable yield."; and

(C) amending subsection (c) by adding at the end thereof the following: "Loans made under authority of this subsection shall be made for any period, not exceeding five years, specified by the producer-borrower and shall bear interest at a rate not greater than 5 per centum per annum. The Secretary shall pay an amount equal to 50 per centum of the storage costs incurred by the producer for the storage of wheat under the price support program provided for in this subsection.".

TERMINATION OF WHEAT CERTIFICATE PROGRAM, FARM ACREAGE ALLOTMENTS

(6)(A) Section 402, as amended by paragraph (9) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" each time it appears in such section and in the amendments made to section 379b of the Agricultural Adjustment Act of 1938, other than in the third sentence of such section 379b(c)(1), and inserting in lieu thereof "1981".

(B) Such section 402 is further amended by inserting after subparagraph (vii) of subsection (b)(B) a new subparagraph as follows:

"'(viii) The fourth sentence is redesignated as subparagraph (J) and the first three sentences are amended to read as follows:

"(A) Whenever the Secretary determines with respect to any crop of wheat that the carryover stocks of wheat will be of such quantity as to seriously depress the price of wheat and will result in a disincentive to produce such commodity, he shall give producers the option of either (i) setting aside and devoting to approved conservation uses an acreage of cropland equal to such percentage of the wheat allotment for the farm as may be specified by the Secretary, plus, if required by the Secretary, the acreage of cropland on the farm devoted in the preceding years to soil conserving uses, as determined by the Secretary, or (ii) planting for harvest the full wheat acreage allotment for the farm subject to an agreement with the Secretary that a percentage of the wheat crop (based on farm yield) shall be stored on the farm under seal or in a bonded warehouse and be subject to the other provisions of this paragraph. Whenever the Secretary gives producers an option under this subparagraph, then as a condition of eligibility for loans, purchases, and payments author-

ized by section 107(c) of the Agricultural Act of 1949, the producers on the farm must elect to participate under clause (i) or (ii) of this subparagraph and comply with the terms of such election.

"(B) In the case of producers who elect the option under subparagraph (A)(i), the Secretary is authorized to limit the acreage planted to wheat on the farm to a percentage of the farm acreage allotment.

"(C) Notwithstanding any other provision of this Act, the amount of any loan which may be made by the Secretary on any portion of the wheat crop stored pursuant to an election made under subparagraph (A)(ii) shall be $2.25 per bushel, plus the amount per bushel necessary to cover storage, interest, transportation, and other handling costs. Any such loan shall be a nonrecourse loan, shall be for a period of five years, renewable thereafter on an annual basis, and shall bear interest at a rate of 5 per centum per annum.

"(D) The Secretary shall pay an amount equal to 50 per centum of the storage costs incurred by any producer when such costs are incurred by such producer pursuant to an election made by him under subparagraph (A)(ii); and the Secretary is authorized to make such advances to any producer as may be necessary to assist such producer to meet such producer's share of storage cost until such time as the stored commodities are sold by such producer. In any case in which a producer wishes to construct facilities for the storage of any wheat grown on the farm in accordance with an agreement entered into with the Secretary after an election under subparagraph (A)(ii), the Secretary is authorized to guarantee a loan made to the producer by a commercial lending institution for such purpose. Such loans shall be guaranteed with respect to 90 per centum of the total construction cost of any such facility, including plans and site preparation. The term of any such loan shall be any period, not in excess of 10 years, specified by the borrower. The Secretary shall pay any interest on any such loan in excess of 5 per centum per annum. The size of the facility for which a loan may be guaranteed under this subparagraph shall be based upon the amount of space required to store the average quantity of wheat produced by the borrower during the two preceding crop years. The loan guaranty program provided for herein shall be administered by the Secretary through the facilities of the Commodity Credit Corporation.

"(E) Wheat stored under an election made pursuant to subparagraph (A)(ii) may be rotated by the producer to avoid spoilage and deterioration under such conditions as may be prescribed by the Secretary.

"(F) Such wheat may be removed from storage and sold at any time, at the option of the producer, that the price for wheat attains a price equal to 150 per centum of the loan rate on such wheat. The producer shall repay the Secretary out of the proceeds of any such sale the amount of the loan, interest thereon, and the amount of advances made to the producer to meet storage costs.

"(G) At any time the market price for wheat exceeds the loan level of wheat in storage by more than 200 per centum, the Secretary may require producers to pay the loan on such wheat, including interest, and the amount of any advances made by the Secretary for the payment of storage costs. If the Secretary determines that all such loans should not be called simultaneously, he shall specify which loans are to be called, taking into consideration the length of time any such loan has been outstanding.

"(H) Notwithstanding any other provision of law, whenever the equivalent of three hundred and fifty million bushels of wheat is under storage pursuant to elections made by producers under subparagraph (A)(ii), no prohibition or limitation may be imposed on the export of wheat. The foregoing provision shall not apply in the case of exports of wheat to any foreign country if the President has prohibited the export of all agricultural commodities to such country because of national security or foreign relations reasons.

"(I) Payments provided under section 107(c) of the Agricultural Act of 1949 shall be made available to producers on wheat placed in storage pursuant to an election under subparagraph (A)(ii)."

CERTIFICATE REQUIREMENTS FOR PROCESSORS AND EXPORTERS

(7) Section 403(b), as amended by paragraph (10) of the first sentence of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "June 30, 1978" and inserting in lieu thereof "June 30, 1982".

SUSPENSION OF WHEAT MARKETING QUOTAS

(8) Section 404, as amended by paragraph (1) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" wherever it appears therein and inserting "1981".

STATE AGENCY ALLOTMENTS, YIELD CALCULATION

(9) Section 405, as amended by paragraph (12) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" each time it appears therein and inserting in lieu thereof "1981".

SUSPENSION OF QUOTA PROVISIONS

(10) Section 406, as amended by paragraph (13) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981".

APPLICATION OF THE AGRICULTURAL ACT OF 1949

(11) Section 408, as amended by paragraph (15) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981".

COMMODITY CREDIT CORPORATION SALES AND PRICE RESTRICTIONS

(12) Section 409, as amended by paragraph (16) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981".

SET ASIDE ON SUMMER FALLOW FARMS

(13) Section 410 as amended by paragraph (17) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" and inserting in lieu thereof "1981".

FEED GRAIN PROGRAM

(14) Effective only with respect to the 1978 through 1981 crops of feed grains, section 501, as amended by paragraph (18) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by—

(A) striking out "1977" in the language preceding the first colon and inserting in lieu thereof "1981";

(B) striking out "$1.10 per bushel" in section 105(a)(1) of the Agricultural Act of 1949 (as it appears in such section 501) and inserting in lieu thereof "$1.87 per bushel, plus the amount per bushel necessary to cover storage, interest, transportation, and other handling costs";

(C) striking out the second sentence of section 105(b)(1) of the Agricultural Act of 1949 (as it appears in such section 501) and inserting in lieu thereof the following: "The payment rate for corn shall be the amount by which the higher of—

"(A) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under subsection (a) for such crop

is less than the established price of $2.25 per bushel in the case of the 1978 crop, and $2.25 per bushel in the case of the 1979, 1980, and 1981 crops, adjusted each such year to reflect any changes in the production costs of farmers after the calendar year 1977.";

(D) by adding at the end of section 105(b)(1) of the Agricultural Act of 1949 (as it appears in such section 501) the following: "Loans made under authority of this subsection shall be made for any period, not exceeding five years, specified by the producer-borrower and shall bear interest at a rate not greater than 5 per centum per annum. The Secretary shall pay an amount equal to 50 per centum of the storage costs incurred by the producer for the storage of feed grains under the price support program provided for under this subsection.";

(E) striking out "1977" in the fifth sentence of section 105(c)(1) of the Agricultural Act of 1949 (as such section appears in such section 501); redesignating the fourth and fifth sentences of such section 105(c)(1) as subparagraph (J); redesignating the sixth sentence of such section 105(c)(1) as subparagraph (K); and striking out the first three sentences and inserting in lieu thereof the following:

"(A) Whenever the Secretary determines with respect to any crop of feed grains that the carryover stocks of feed grains will be of such a quantity as to seriously depress the price of feed grains and will result in a disincentive to produce such commodities, he shall give producers the option of either (i) setting aside and devoting to approved conservation uses an acreage of cropland equal to such percentage of the feed grain allotment for the farm as may be specified by the Secretary, plus, if required by the Secretary, the acreage of cropland on the farm devoted in preceding years to soil conserving uses, as determined by the Secretary, or (ii) planting for harvest the full feed grain acreage allotment for the farm subject to an agreement with the Secretary that a percentage of the feed grain crop (based on farm yield) shall be stored on the farm under seal or in a bonded warehouse and be subject to the other provisions of this paragraph. Whenever the Secretary gives producers an option under this subparagraph, then as a condition of eligibility for loans, purchases, and payments on corn, grain sorghums, and if designated by the Secretary, barley, respectively, the producers on the farm must elect to participate under clause (i) or (ii) of this subparagraph and comply with the terms of such election.

"(B) In the case of producers who elect the option under subparagraph (A)(i), the Secretary is authorized to limit the acreage planted to feed grains on the farm to a percentage of the farm acreage allotment.

"(C) Notwithstanding any other provision of this Act, the amount of any loan which may be made by the Secretary on any portion of the feed grain crop stored pursuant to an election made under subparagraph (A)(ii) shall be $1.87 a bushel for corn (and the equivalent thereof in the case of other feed grains), plus the amount per bushel necessary to cover storage, interest, transportation, and other handling costs. Any such loan shall be a nonrecourse loan, shall be for a period of five years, renewable thereafter on an annual basis, and shall bear interest at a rate of 5 per centum per annum.

"(D) The Secretary shall pay an amount equal to 50 per centum of the storage costs incurred by any producer when such costs are incurred by such producer pursuant to an election made by him under subparagraph

(A)(ii); and the Secretary is authorized to make such advances to any producer as may be necessary to assist such producer to meet such producer's share of storage cost until such time as the stored commodities are sold by such producer. In any case in which a producer wishes to construct facilities for the storage of feed grains on the farm in accordance with an agreement entered into with the Secretary after an election under subparagraph (A)(ii), the Secretary is authorized to guarantee a loan made to the producer by a commercial lending institution for such purpose. Such loans shall be guaranteed with respect to 90 per centum of the total construction cost of any such facility, including plans and site preparation. The term of any such loan shall be any period, not in excess of 10 years, specified by the borrower. The Secretary shall pay any interest on any such loan in excess of 5 per centum per annum. The size of the facility for which a loan may be guaranteed under this subparagraph shall be based upon the amount of space required to store the average quantity of the feed grain concerned produced by the borrower during the two preceding crop years. The loan guaranty program provided for herein shall be administered by the Secretary through the facilities of the Commodity Credit Corporation.

"(E) Feed grains stored under an election made pursuant to subparagraph (A)(ii) may be rotated by the producer to avoid spoilage and deterioration under such conditions as may be prescribed by the Secretary.

"(F) Such feed grains may be removed from storage and sold at any time, at the option of the producer, that the price for such feed grains attains a price equal to 150 per centum of the loan rate on such grain. The producer shall repay the Secretary out of the proceeds of any such sale the amount of the loan, interest thereon, and the amount of advances made to the producer to meet storage costs.

"(G) At any time the market price for feed grains exceeds the loan level of feed grains in storage by more than 200 per centum, the Secretary may require producers to pay the loan on such grain, including interest, and the amount of any advances made by the Secretary for the payment of storage costs. If the Secretary determines that all such loans should not be called simultaneously, he shall specify which loans are to be called, taking into consideration the length of time any such loan has been outstanding.

"(H) Notwithstanding any other provision of law, whenever the equivalent of five hundred million bushels of any feed grain is under storage pursuant to elections made by producers under subparagraph (A)(ii), no prohibition or limitation may be imposed on the export of such feed grain. The foregoing provision shall not apply in the case of exports of feed grains to any foreign country if the President has prohibited the export of all agricultural commodities to such country because of national security or foreign relations reasons.

"(I) Payments provided under subsection (b) of this section shall be made available to producers on feed grains placed in storage pursuant to an election under subparagraph (A)(ii)," and

(F) striking out "1977" in the third sentence of section 105 (c) (3) of the Agricultural Act of 1949 (as it appears in such section 501) and inserting in lieu thereof "1981".

COTTON PROGRAM

Suspension of Marketing Quotas for Cotton, Minimum Base Acreage Allotments

(15) Section 601, as amended by paragraph (19) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by—

(A) striking out "1977" wherever it appears in the amendments made by such section and inserting in lieu thereof "1981"; and

(B) striking out "1976" in the first sentence of section 342a of the Agricultural Adjustment Act of 1938 (as it appears in such section 601) and inserting in lieu thereof "1980".

COTTON PRODUCTION INCENTIVES

(16) Section 602, as amended by paragraph (20) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by—

(A) striking out "1977" wherever it appears in the amendments made by such section, except in the amendment to section 103 (e) (2) of the Agricultural Act of 1949, as and inserting in lieu thereof "1981";

(B) striking out the first sentence of clause (2) of section 103 (e) of the Agricultural Act of 1949 (as it appears in such section 602) and inserting in lieu thereof the following: "Payments shall be made for each crop of cotton to the producers on each farm at a rate equal to the amount by which is the higher of—

"(1) the average market price received by farmers for upland cotton during the calendar year which includes the first five months of the marketing year for such corp, as determined by the Secretary, or

"(2) the loan level of 38 cents per pound for upland cotton, plus the amount per pound necessary to cover storage, interest, transportation, and other handling costs

is less than the established price of 48 cents per pound in the case of the 1978 crop, and 48 cents per pound in the case of the 1979, 1980, and 1981 crops, adjusted each such year to reflect any changes in the production costs of farmers after the calendar year 1977."; and

(C) adding at the end of paragraph (2) of section 103 (e) of the Agricultural Act of 1949 (as it appears in such section 602) the following: "Loans made under authority of this subsection shall be made for any period, not exceeding five years, specified by the producer-borrower and shall bear interest at the rate of 5 per centum per annum. The Secretary shall pay an amount equal to 50 per centum of the storage costs incurred by the producer for the storage of cotton under the price support program provided for under this subsection.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR COTTON

(17) Section 603, as amended by paragraph (21) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1978" and inserting in lieu thereof "1982".

MISCELLANEOUS COTTON PROVISIONS

(18) Sections 604, 605, 606, 607, and 608, as amended by paragraph (22) of the first section of the Agriculture and Consumer Protection Act of 1973, are each amended by striking out "1977" and inserting in lieu thereof "1981".

SKIPROW PRACTICES

(19) Section 612, as added by paragraph (25) of the first section of the Agriculture and Consumer Protection Act of 1973, is amended by striking out "1977" in the amendment made by such section to section 374 (a) of the Agricultural Adjustment Act of 1938 and inserting in lieu thereof "1981".

PRICE SUPPORT FOR SOYBEANS

SEC. 4. Title I of the Agricultural Act of 1949 is further amended by adding at the end thereof a new section as follows:

"SEC. 108. The Secretary shall make available to producers loans and purchases on the 1978 through 1981 crops of soybeans at such level as reflects the historical average relationship of soybean support levels to corn support levels during the immediately preceding three years.".

FOOD RESERVE

SEC. 5. (a) The Secretary of Agriculture shall establish an emergency human nutrition food reserve (hereinafter in this section referred to as the "reserve") which shall be available to help meet emergency food conditions in any area of the United States or in any foreign country which suffers a severe loss of its food supply as the result of a natural disaster.

(b) The Secretary is authorized to acquire for the reserve any amount of grain not in excess of the equivalent of one hundred million bushels and to process such grain into balanced food supplements.

(c) The Secretary shall provide for the periodic rotation of supplements in the reserve to avoid spoilage and deterioration thereof. Any quality of food supplements removed from the reserve for rotation purposes shall be promptly replaced with an equivalent quantity purchased on the open market.

(d) Except as provided in subsection (c), supplements contained in the reserve may not be sold through normal commercial channels in the United States.

(e) Food grain supplements contained in the reserve shall be in addition to any other reserve stocks of agricultural commodities provided for by law.

FOREIGN PARTICIPATION IN RESERVE PROGRAM

SEC. 6. (a) In order that foreign countries which are traditional buyers of grain from the United States and other foreign countries may insure themselves of a dependable and stable supply of grain, and in order to reduce the cost to producers and consumers in the United States of maintaining reserve supplies of grain, the Secretary of Agriculture is authorized, in accordance with such rules and regulations as he may prescribe, to permit foreign countries to participate in the program providing for the storage of feed grains under section 105(c) of the Agricultural Adjustment Act of 1949, as amended by this Act, and the storage of wheat under section 379b(c) of the Agricultural Adjustment Act of 1938, as amended by this Act. A foreign country may participate in any such program by purchasing the commodity concerned and paying the required storage and other handling costs involved. Any commodities so stored shall not be subject to any embargo placed on the export market by the Secretary. The Secretary shall, in permitting any foreign country to participate in such program, impose such reasonable terms and conditions as he determines necessary to prevent undue disruption of the normal channels of trade in the commodities concerned and to protect producers and consumers in the United States against undue price fluctuations and increases.

(b) The Secretary of Agriculture shall submit a report to the Committee on Agriculture and Forestry of the Senate and to the Committee on Agriculture of the House of Representatives within ninety days after the date of enactment of this Act indicating the action he has taken to implement this section together with any recommendations for additional legislative action necessary to improve the program.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

CROP LOANS FOR WHEAT, FEED GRAINS, AND COTTON EXCLUDED FROM BUDGET TOTALS

SEC. 8. Loans made by the Secretary of Agriculture in carrying out the feed grain

program provided under section 105 of the Agricultural Act of 1949, as amended by the Agriculture and Consumer Protection Act of 1973 and this Act, in carrying out the wheat program provided for in section 107 of the Agricultural Act of 1949, as amended by this Act, and in carrying out the cotton program under section 602 of the Agricultural Act of 1949, as amended by the Agriculture and Consumer Protection Act of 1973 and this Act, and the repayment of such loans, shall not be included in the totals of the budget of the United States Government and shall be exempt from any general limitation imposed by statute on expenditures and net lending (budget outlays) of the United States.

By Mr. HART (for himself and Mr. JAVITS):

S. 204. A bill to establish the Federal Sentencing Commission; and for other purposes; to the Committee on the Judiciary.

FEDERAL SENTENCING STANDARDS

Mr. HART. Mr. President, one problem which plagues the administration of our judicial system is the great disparity of sentences imposed for offenses of similar nature. Sentences in criminal cases vary unpredictably from mild to harsh; no consistent rationale or standards are applied; and public confidence in the impartiality and fairness of Federal criminal justice is undermined.

Studies relating to crime and punishment in America have provided some disheartening statistics. Serious crime in the United States has more than doubled since 1960. The FBI estimates that in 1975 alone serious crime rose by about 10 percent. Apart from the tremendous difficulties in apprehending and convicting criminals, additional problems arise when it comes time to sentence the convicted offender.

For example, the law provides that armed robbery carries with it a fine of not more than $5,000, imprisonment for not more than 20 years, or both. It should be no surprise, then, that sentences imposed throughout the country are so wide ranking in light of the broad discretion sentencing judges are allowed.

All too often, the sentencing judge must compromise conflicting interests having nothing to do with the criminal conduct of the offender awaiting punishment—for example, prison space, budgetary constraints, and evaluations relating to the offender's likelihood of recidivism or need for treatment.

In a 6-month period in 1972, for instance, the average prison term for bank robbery in the southern district of New York was about 6 years, while the average prison term for the same crime in all Federal courts was about 10 years.

Exacerbating this disparity in sentencing is the process of parole. Persons convicted of the same crime may serve vastly different sentences.

To deal with this problem, Senator JAVITS and I now introduce the Federal Sentencing Standards Act of 1977. The bill contains four major elements:

First. It specifies a "just deserts" rationale for sentencing. The severity of a sentence must be commensurate with the seriousness of the offender's crime—rather than being based on his supposed need for treatment or his likelihood of recidivism. Imprisonment, as a severe penalty, would be restricted to serious crimes and would be required for all such offenses. Penalties other than imprisonment would be prescribed for lesser offenses; these would include fines, community service, and evening or weekend confinement.

Second. It limits sentence disparity through the "presumptive sentence". For each gradation in seriousness of criminal behavior, a definite penalty—the presumptive sentence—would be set. Persons convicted of crimes of that degree of seriousness would normally receive the presumptive sentence, unless there were special, carefully defined circumstances of aggravation or mitigation. A previous conviction of a serious offense would automatically be deemed an aggravating circumstance.

Third. The presumptive sentences and the permitted aggravating and mitigating circumstances would be prescribed by a new standard-setting agency, the Federal Sentencing Commission. However, Congress would retain oversight over the Commission's standard-setting actions through a legislative veto. The Commission's standards take effect within a specified number of legislative days after being proposed, unless both Houses of Congress adopted a resolution of disapproval. The Commission would have an initial life of 6 years.

Fourth and finally, indeterminacy of sentence would be phased out, and the prisoner would promptly be informed of the actual length of his stay in prison. On a "just deserts" theory, the length of imprisonment depends on the character of the offense, and the latter is knowable at time of conviction. Prisoners could no longer be kept in suspense for years, waiting for a parole board to make up its mind.

The bill is based on the recommendations of an important recent study of sentencing, "Doing Justice: The Choice of Punishments," by the Committee for the Study of Incarceration, an interdisciplinary group of distinguished scholars under the chairmanship of our former Senate colleague from New York, Charles Goodell. Prof. Andrew von Hirsch of Rutgers University, the staff director of that committee and principal author of its report, "Doing Justice," aided substantially in the drafting of this legislation—as did his Rutgers collegaue, Prof. Richard Singer, who has written extensively on correctional and sentencing law. The bill is also based in part on the report of the 20th Century Fund's Task Force on Criminal Sentencing, "Fair and Certain Punishment," conducted by Prof. Alan Dershowitz of Harvard Law School.

During most of this century, the principal aim of the criminal sentence was thought to be to rehabilitate the offender and restrain him if predictably dangerous. To accomplish this aim, sentencing judges and parole officials were given wide discretion to suit the disposition to the offender's supposed need for treatment and to the risk he posed to society. In a robbery case, for example, a judge has typically been free to impose from as little as a suspended sentence to as much as 10 or 15 years' imprisonment.

This traditional approach has failed. It grossly overestimated our capacity to cure criminality and to predict dangerousness. It has been, simultaneously, too lenient and too severe: allowing many of those convicted of violent crimes to escape with only slight penalties, while imprisoning minor offenders for long periods. Most seriously, it has ignored justice in sentencing: persons whose criminal conduct was equally reprehensible—and who thus merited equal punishment—were regularly given divergent sentences.

This bill takes a wholly different approach: that the sentence should as a matter of justice be based on what the offender did—on the seriousness of his or her offense—rather than on what the sentencer thinks the offender or others will do if he or she is sentenced in a certain fashion. This "just deserts" philosophy used in the bill, is explained more fully in an article by Professor von Hirsch entitled "The Aims of Imprisonment" which appeared in the July-August 1976 issue of Current History magazine, and which summarizes the conclusions of the Incarceration Committee's report, "Doing Justice"; I will later ask that the article be printed in the RECORD.

The basic idea is a simple one, which every punished offender has always known by experience, namely, that criminal punishment is precisely what its name implies: punishment. It is, by its nature, unpleasant and blame-laden. The judge may think he or she is treating or quarantining with no punitive intent, but the sentence nevertheless carries a moral stigma. The severity of the sentence, therefore, should depend on the degree of blameworthiness of the behavior; that is, on the seriousness of the crime. Only grave offenses—acts of violence, for example—merit severe penalties. Nonserious offenses deserve nonsevere punishments. Those committing crimes of equal seriousness should get equal punishments. Sentences that do not comport with the seriousness of the offense are unjust, whatever their imagined rehabilitative or preventive usefulness.

The bill's philosophy leads to a system of more realistic and surer punishments. Imprisonment, as a severe penalty, would be prescribed only for crimes that are serious—that is, crimes involving violence or risk of violence and the more reprehensible white-collar crimes. And even then, time in prison would be measured parsimoniously; we would expect that presumptive sentences of more than 3 years be used sparingly, and the bill imposes a 5-year limit on most presumptive sentences. This 5-year limit would not apply, however, to the most heinous crimes such as murder, manslaughter, or forcible rape—where longer presumptive sentences would be expected.

Under our bill, there would be more certainty that a convicted serious offender will go to prison—and prison time in addition to the presumptive sentence would be given to recidivists convicted of a second or third serious offense. Under today's discretionary sentencing system, an offender convicted of a grave offense such as armed robbery—even if he or she has a record of prior convictions—has a good chance of getting off on probation. Under the bill, with its "just deserts" philosophy, anyone convicted of such a serious crime would have to be incarcerated for a specified period. The convicted armed robber could no longer be put on probation because that seemed "best" for his or her rehabilitation.

Solely for illustrative purposes, it might prove helpful to demonstrate how presumptive sentencing could be practically applied in two cases, armed robbery and petty larceny.

Armed robbery would surely be considered a serious offense, since it entails the threat and risk of substantial harm to those present at the time the crime is committed. Armed robbery, then, might have a presumptive sentence of, say, 3 years' imprisonment. Offenders convicted of armed robbery would normally receive the presumptive sentence of 3 years in prison. However, there might be aggravating circumstances, in which case the sentencing judge could impose a punishment above the presumptive sentence.

For example, the offender might have been the leader in the criminal enterprise or he might have acted in a particularly cruel and inhumane fashion. In such a case, the offender might receive a sentence of 4½ years in prison. If the convicted armed robber has already been convicted of a serious offense, this would be considered as an aggravating circumstance.

There might also be mitigating circumstances, in which case the sentencing judge could impose a sentence below the presumptive sentence. For example, the offender might have played a minor role in the crime or acted under some degree of coercion insufficient to constitute a complete defense but which significantly affected his or her conduct. In such a case, the offender would receive a sentence of less than 3 years in prison, but he would have to serve some time in prison, since he was convicted of a serious offense.

In the case where there are both aggravating and mitigating circumstances, the sentencing judge would have to balance them in determining the appropriate punishment. It is expected that the Federal Sentencing Commission would promulgate guidelines with respect to how this can best be done. The bill does provide that in the case of a repeated offender, however, a sentence more severe than the presumptive sentence must be imposed notwithstanding any mitigating circumstances. In such cases, the Commission would have the power to direct sentencing judges to raise the sentence to a certain level, limiting their discretion in sentencing repeated offenders.

Petty larceny would probably not be considered a serious crime for the purposes of this act. Petty larceny, then, might have a presumptive sentence of making restitution to the victim, a fine, and intermittent confinement on weekends for a period of months. Offenders convicted of petty larceny would normally receive the presumptive sentence; however, there might be aggravating circumstances.

For example, the convicted offender might have a history of prior larcenies which would warrant a more severe sentence. In such a case, the offender might be required to make restitution to the victim, pay a substantial fine, spend specified weekends in jail, and be supervised in the community for 1 year.

There might also be mitigating circumstances. For example, the offender might have been motivated by a desire to provide necessities for his or her family. In such a case, the convicted offender might be required to make restitution to the victim and to spend only several weekends in jail. The offender in such cases might also be required to perform some type of community service.

How helpful will such a system of more realistic but surer punishments be in reducing the crime rate? It is wise to be cautious in what we promise because sentencing reforms in the past have so often been heralded as powerful methods of crime reduction, only to have no impact on crime rates when tried. Sentencing is only a small part of the formal and informal social control mechanisms of a society, and its leverage over crime rates may not be very great. We can, however, say this much:

If sentencing policy can have any impact on crime rates, increasing the certainty that convicted serious offenders go to prison should enhance the deterrent value of the system, as well as incapacitating such offenders for a portion of their potential criminal careers. Given the limited prison resources that are available, moreover, such certainty is more likely to be achieved by shorter sentences than by longer ones.

Even if sentencing reforms are not capable of making much of a dent in crime rates, the bill is still a valuable reform because it would create a fairer system. Offenders' punishment will more closely approximate what they deserve, and equally blameworthy individuals will receive more nearly similar sentences. In a system now characterized by normlessness and disparity, this greater even-handedness would be no mean achievement.

The "presumptive sentence" device, which the bill uses to insure even-handedness of sentences, was recommended in "Doing Justice," and also in the 20th Century Fund's report, "Fair and Certain Punishment." An offender convicted of any given offense would normally receive the prescribed presumptive sentence. However, if there were special circumstances of mitigation or aggravation, rendering the conduct more or less serious than normally would be the case, a limited downward or upward variation in sentence would be allowed. The presumptive sentence is preferable to the mandatory minimum sentence, because it limits disparity more effectively. The mandatory minimum only sets a floor on the severity of punishment, and thus still would allow wide discrepancies above that floor, in the punishments of equally culpable offenders. The presumptive sentence, by contrast, insures that those convicted of similar crimes get similar punishments, while still allowing flexibility to deal with out-of-the-ordinary cases.

Sentencing standards would be set by a Federal Sentencing Commission, as suggested in "Doing Justice" and in Federal District Judge Marvin Frankel's fine book on the problems of sentence disparity, "Criminal Sentences." The Commission should be capable of devising fair and carefully worded standards, since it will have this task as its sole function and since the bill provides the principles it should follow. Such standards will no doubt be revised with experience, and the Commission will be in an ideal position to do so since it must collect information on district courts' actual experience in applying presumptive sentences.

One of the first-appointed commissioners is required to be a member or former member of the U.S. Parole Commission—and other members could include judges, penologists, and others expert in the sentencing field. Congress will retain a reasonable measure of control, through a provision empowering it to disapprove the Commission's proposed sentencing standards.

Finally, on behalf of Senator JAVITS and myself, I would like to acknowledge our indebtedness to two of our Senate colleagues who have introduced proposed legislation in this area. Senator KENNEDY, in his important bill introduced last session, S. 2699, proposed the creation of a Federal Sentencing Commission. Senator BENTSEN, in his bill, S. 3752, proposed using presumptive sentences spelled out in his bill. Absent a sentencing commission.

Senator JAVITS' and my bill starts with the sentencing commission, but then requires the commission to use presumptive sentences and, most important, specifies the rationale the commission should follow—a just deserts rationale. The specification of a clear sentencing philosophy is crucial: as the New York Times noted in an editorial last year:

> Though clearly constructive, legislation (to authorize sentencing guidelines) would only do half the job. There is wide disagreement in the criminal justice community about whether imprisonment is intended to punish, protect law abiding citizens, rehabilitate criminals or to accomplish a combination of those goals. Any new sentencing program which does not address itself to those uncertainties is apt ultimately to lapse into confusion born of the absence of an intellectual core.

I ask unanimous consent to have printed in the RECORD the text of the bill as well as the text of Professor von Hirsch's article, "The Aims of Imprisonment."

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 204

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Sentencing Standards Act of 1977".

FINDINGS; PURPOSE

SEC. 2. (a) The Congress finds that the present system of punishing persons convicted of Federal crimes fails to achieve fairness or consistency, or to protect the public, and that such system—

(1) results in the imposition of penalties that are frequently either unduly lenient or unduly severe;

(2) permits unwarranted, and unreviewable, disparity in sentences;

(3) operates without consistent and understandable rationale or standards; and

(4) undermines public confidence in the equity, impartiality, and effectiveness of Federal criminal justice.

(b) It is the purpose of this Act—

(1) to establish a method of promulgating standards for criminal sentences that will help deter crime and punish convicted criminal offenders fairly and equally;

(2) to establish in such standards the principle that the severity of a sentence should be commensurate with the gravity of the offense;

(3) to reduce the disparity between sentences imposed upon persons convicted of the same crime by requiring that such sentencing standards shall consist of presumptive sentences of varying severity for criminal offenses of varying degrees of gravity, with limited variations allowed for special aggravating and mitigating circumstances; and

(4) to allow each convicted offender sentenced to imprisonment to know at the time that such sentence is imposed the actual duration of his confinement, but also to maintain appropriate incentives for good institutional behavior.

DEFINITIONS

SEC. 3. For purposes of this Act, the term—

(1) "Parole Commission" means the United States Parole Commission in the Department of Justice established in section 4202 of title 18, United States Code;

(2) "Commission" means the Federal Sentencing Commission established in section 4;

(3) "criminal offense" means a category, or any subcategory thereof, established under section 6, of crimes punishable under any statute of the United States;

(4) "convicted offender" means any person who is convicted of or pleads guilty to a crime punishable under any statute of the United States;

(5) "imprisonment" means the requirement that any convicted offender live in any prison, jail, or other institution of confinement;

(6) "presumptive sentence" means a definite and specific penalty, established by the Commission, as provided in section 6, for a criminal offense of a particular gradation of gravity;

(7) "rule" means any rule, regulation, or schedule proposed or adopted by the Commission;

(8) "sentencing judge" means any judge of the United States, as defined in section 451 of title 28, United States Code, presiding at a trial in which any defendant is convicted of or pleads guilty to any criminal offense for which a presumptive sentence is in effect; and

(9) "sentencing standards" means the schedules, rules, and regulations for sentencing convicted offenders which the Commission establishes in accordance with the provisions of this Act.

FEDERAL SENTENCING COMMISSION

SEC. 4. (a) (1) There is established a commission to be known as the Federal Sentencing Commission. Tht Commission shall be composed of 5 members appointed by the President of the United States, by and with the consent of the Senate.

(2) Members of the Commission shall serve for terms of 5 years, except that of the members first appointed—

(A) one shall be appointed for one year;

(B) one shall be appointed for two years;

(C) one shall be appointed for three years;

(D) one shall be appointed for four years; and

(E) one shall be appointed for five years.

The member appointed under subparagraph (E) shall be or have been a member of the Parole Commission or its predecessor, the United States Board of Parole.

(3) Any person appointed to fill a vacancy occurring other than by the expiration of a term of office shall be appointed (A) only for the unexpired term of the member he succeeds, and (B) in the same manner as in the case of the original appointment.

(4) Members of the Commission shall receive compensation equivalent to the compensation paid at level IV of the Executive Schedule (5 U.S.C. 5315).

(b) (1) The Commission shall have an Executive Director who shall be appointed by the Commission. The Executive Director shall be paid at a rate not to exceed the rate of basic pay in effect for level V of the Executive Schedule (5 U.S.C. 5316).

(2) With the approval of the Commission, the Executive Director may—

(A) appoint and fix the pay of such additional personnel as he deems necessary, and

(B) procure temporary and intermittent services to the same extent as is authorized by section 3109 (b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS–15 of the General Schedule (5 U.S.C. 5332).

(3) In carrying out its responsibilities under this Act, the Commission shall, to the fullest extent practicable, avail itself of the assistance, including personnel and facilities, of other agencies and departments of the United States Government. The heads of such agencies and departments may make available to the Commission such personnel, facilities, and other assistance, with or without reimbursement, as the Commission may request.

(c) The Commission is abolished six years after the date of enactment of this Act unless, prior to that time, the Congress adopts a concurrent resolution disapproving the abolition of the Commission.

DUTIES OF COMMISSION; ADMINISTRATIVE PROVISIONS

SEC. 5. (a) The Commission shall—

(1) prescribe rules to carry out the provisions of sections 6, 7, 8, 9, 11, and 12 in accordance with the provisions of subsection (b);

(2) collect from each district court of the United States such detailed information (which each such court shall assist in providing) relating to sentencing practices in each such court as the Commission shall by rule require; and

(3) review the information collected pursuant to paragraph (2) in accordance with the provisions of subsection (c).

(b) (1) Not later than 18 months after the date of enactment of this Act, the Commission shall publish in the Federal Register proposed rules to carry out the provisions of sections 6, 7, 8, 9, 11, and 12. Not earlier than 60 days, but not later than 90 days, after the date of publication of such proposed rules, the Commission shall hold public hearings to afford interested persons a reasonable opportunity to present data, views, or arguments concerning such proposed rules, in an oral presentation, or in writing prior to the hearing. The Commission shall consider fully all submissions respecting such proposed rules, revise such proposed rules on the basis of such submissions to the extent appropriate and consistent with the policy of this Act, and issue a concise statement of the principal reasons for adoption, and the reason for overruling any considerations urged against adoption. All such procedures shall be consistent with the applicable provisions of sections 553(b) and (c) of title 5, United States Code.

(2) The Commission, before adopting any such proposed rule under this section, shall transmit such proposed rule and such statement to the Senate and the House of Representatives.

(3) (A) If the Senate and the House of Representatives do not, through agreement to a concurrent resolution, disapprove the proposed rule within 45 calendar days after receipt thereof, then the Commission may adopt such rule and it shall thereupon become effective. The Commission may not adopt any rule which is disapproved under this subparagraph.

(B) For purposes of this paragraph, the term "calendar days" does not include any calendar day (i) on which both Houses of the Congress are adjourned sine die, or (ii) during a recess by either House of three or more days.

(C) If such proposed rule consists of a schedule of aggravating or mitigating circumstances as provided in section 7, or a schedule of sanctions as provided in section 9(a); any such resolution of disapproval must disapprove such schedule as a whole.

(c) Each year, during the two-year period after the date on which the first rules adopted as provided in subsection (a) become effective, the Commission shall review the information collected as required by subsection (a)(2) and shall reassess such rules accordingly. If the Commission finds, on the basis of such review, that modification of such rules is desirable, the Commission may modify such rules in accordance with the procedures set forth in subsection (b). At the end of such two-year period, the Commission shall conduct such a review at least once every three years, unless the Commission is sooner abolished as provided in section 4. The Commission shall publish the results of all such reviews.

(d) The Commission shall transmit a report to the Congress each year. Each such report shall contain a detailed statement with respect to the activities of the Commission in carrying out its duties under this Act, and any recommendations for legislative or other action by the Congress which the Commission considers appropriate.

PRESUMPTIVE SENTENCES

SEC. 6. (a) The Commission shall establish, in accordance with the provisions in section 5, a schedule—

(1) setting forth gradations of gravity of criminal offenses;

(2) prescribing an appropriate gradation of gravity for each criminal offense;

(3) prescribing a presumptive sentence for each gradation of gravity.

(b) The severity of each presumptive sentence prescribed as provided in subsection

(a) (3) shall be commensurate with the gravity of the criminal offense to which such presumptive sentence is assigned.

(c) (1) For the purpose of subsections (a) and (b), the Commission may establish, solely for purposes of this Act, subcategories of any criminal offense and assign different gradations of gravity to such subcategories, if it finds that such subcategories have distinct degrees of gravity. Whenever the Commission establishes such subcategories, it shall also prescribe the criteria that each sentencing judge must use to determine the applicable subcategory for the criminal conduct engaged in by such convicted offender. For purposes of this Act, such subcategory shall be considered to be the criminal offense of which the criminal offender was convicted.

MITIGATING AND AGGRAVATING CIRCUMSTANCES

SEC. 7. (a) The Commission shall establish, in accordance with the provisions of section 5, a schedule and rules—

(1) prescribing variations from any presumptive sentence established under section 6 on account of mitigating or aggravated circumstances;

(2) specifying which types of circumstances shall qualify as mitigating or aggravating circumstances that justify a variation from such presumptive sentence; and

(3) specifying, with respect to each such type of mitigating or aggravating circumstance, a particular amount or a maximum permitted amount of variation from such presumptive sentence.

(b) If a sentence of imprisonment is prescribed as the presumptive sentence, no variation on account of aggravating circumstances prescribed by the Commission under subsection (a) shall increase the duration of such imprisonment by more than 50 percent.

(c) For the purpose of subsection (a), the Commission—

(1) shall not consider as an aggravating or mitigating circumstance, the anticipated effect on the future behavior of the convicted offender, or of any other person, of imposing a sentence more or less severe than the presumptive sentence; and

(2) may specify as a mitigating or aggravating circumstance, any particular acts or circumstances surrounding the commission of a criminal offense which renders the degree of harm or risk of harm of the criminal conduct, or the degree of culpability of the offender in engaging in such conduct, greater or less than the gradation of gravity prescribed for such criminal offense under section 6.

(d) Notwithstanding the provisions in subsection (c), the Commission shall establish rules, consistent with the provisions of this section, which shall—

(1) prescribe as an aggravating circumstance the fact that a convicted offender has previously been convicted of a serious offense as defined in section 8 (b), and

(2) require the imposition of a sentence more severe than the presumptive sentence in any case in which such aggravating circumstance is present.

SENTENCES OF IMPRISONMENT

SEC. 8. (a) The Commission shall—

(1) prescribe a presumptive sentence of imprisonment under section 6 only for serious criminal offenses; and

(2) prescribe, with respect to serious criminal offenses, no presumptive sentence in excess of five years of actual imprisonment, except as otherwise provided in subsection (c).

(b) A criminal offense is serious for purposes of subsection (a) if, as determined under section 6 (c) (1), it entails a substantial degree of harm or risk thereof and a high degree of culpability on the part of the person who commits such criminal offense. In determining whether the harm or risk thereof is substantial, the Commission shall consider whether the conduct—

(1) involves the infliction, risk, or threat of substantial bodily injury; or

(2) involves the infliction or risk of substantial harm (other than of bodily injury), including but not limited to the substantial abuse of a public office, a public or private trust, or of government processes, or the deprivation of a substantial portion of the livelihood of a victim of such criminal offense.

(c) Subsection (a) (2) shall not apply to the criminal offenses of murder, manslaughter, forcible rape, aircraft hijacking, kidnapping, or treason, or any attempt or aiding or abetting of such offenses.

SENTENCES OTHER THAN IMPRISONMENT

SEC. 9. (a) The Commission shall establish, in accordance with the provisions in section 5—

(1) a schedule of penalties other than imprisonment, to be assigned as presumptive sentences for criminal offenses for which imprisonment may not be prescribed as the presumptive sentence under section 8; and

(2) a schedule specifying the (A) terms and conditions applicable to such penalties, and (B) sanctions which may be applied by any sentencing judge to any convicted offender who violates such terms or conditions.

(b) For the purpose of subsection (a) (1), such penalties may include—

(1) intermittent confinement for days, evenings, or weekends, or portions thereof;

(2) supervision in the community;

(3) a fine or forfeiture;

(4) a curfew or travel restrictions; or

(5) community service.

(c) For the purpose of subsection (a) (2) (A), the terms and conditions of such penalties prescribed by the Commission may include the duration, scheduling, and place of any intermittent confinement; the amount or method of calculating or determining any fine or forfeiture; and the nature, type, and extent of any supervision, curfew, travel restriction, or community service.

(d) For the purpose of subsection (a) (2) (B), no sanction that is imposed on a convicted offender for failing to comply with such terms and conditions may result in the imprisonment of such convicted offender for more than one year.

(e) The Attorney General shall, after consulting with the Commission, establish or designate an office within the Department of Justice that shall be responsible for implementing and carrying out any penalties under this section which are prescribed by the Commission and imposed upon convicted offenders by any sentencing judge.

MAXIMUM SENTENCES

SEC. 10. No presumptive sentence prescribed by the Commission under section 6 for a criminal offense, including any variation thereof on account of aggravating circumstances prescribed by the Commission under section 7, may exceed in severity the maximum punishment for such offense prescribed by any other statute of the United States.

ABOLITION OF PAROLE; EARLY RELEASE FOR GOOD BEHAVIOR

SEC. 11. (a) Whenever the Commission prescribes imprisonment as a penalty under section 6, 7, or 8, the Commission—

(1) shall consider that such penalty refers to the period of time which convicted offenders must actually serve in confinement, except as otherwise provided in subsection (c); and

(2) may by rule prescribe that the release of convicted offenders from imprisonment shall be followed by a period of supervision in the community to aid the transition of such offenders to the community, and prescribe the terms and conditions of such supervision and the sanctions which may be applied to any convicted offender who fails to comply with such terms and conditions, except that—

(A) the duration of any such supervision shall not exceed 10 percent of the convicted offender's sentence of imprisonment; and

(B) no sanction for noncompliance with the terms and conditions of such supervision shall result in the imprisonment of a convicted offender for more than 15 days.

(b) After the date on which the schedule established pursuant to section 6 becomes effective, the Parole Commission shall have no authority under section 4203 of title 18, United States Code, to grant parole to any prisoner except that the Parole Commission shall have the authority—

(1) to grant parole to any otherwise eligible prisoner who was sentenced before that date; and

(2) to administer any supervision in the community authorized by the Commission under subsection (a) (2).

(c) (1) Notwithstanding the provisions of subsection (a), the Commission may establish rules pursuant to which—

(A) each imprisoned offender is entitled to a deduction from the term of his imprisonment if he has not committed a serious disciplinary infraction while imprisoned; or

(B) any imprisoned offender who has committed such a serious disciplinary infraction may be penalized by an addition to the term of his imprisonment.

(2) If the Commission establishes rules as provided in paragraph (1), it shall, after consulting with the Attorney General, the Director of the Bureau of Prisons of the United States Department of Justice, and other appropriate officials, (A) prescribe the procedure for determining whether an imprisoned offender has committed a serious disciplinary infraction, and (B) define what constitutes a serious disciplinary infraction for purposes of this subsection.

(3) No rule established as provided in paragraph (1) shall permit—

(A) any deduction from the term of any convicted offender's imprisonment, pursuant to paragraph (1) (A) in excess of 15 per centum of the duration of such term if such term is three years or less, or 10 per centum of the duration of such term if such term is more than three years; or

(B) any addition to the term of any convicted offender's imprisonment, pursuant to paragraph (1) (B), in excess of 10 per centum of the duration of such term.

(d) Whenever the Commission, in accordance with section 5(c), amends its schedule and rules under section 6 to reduce the severity of any presumptive sentence, or under section 7 in such a manner as could reduce the severity of any penalty imposed thereunder, the Commission may establish rules—

(1) prescribing that any such amendment shall apply retroactively to convicted offenders who were sentenced as provided in this Act prior to the effective date of such amendment and who still are undergoing punishment; or

(2) directing sentencing judges to reduce or terminate the punishment of such convicted offenders, consistently with the Commission's rules under paragraph (1).

DUTIES OF SENTENCING COURTS

SEC. 12. (a) (1) Each sentencing judge shall impose on any convicted offender the presumptive sentence assigned to the criminal offense of which he was convicted, except if a variation from the presumptive sentence is permitted or required by the

Commission's rules under section 7, such judge shall vary such presumptive sentence only as provided in section 7.

(2) If the sentencing judge (A) varies any presumptive sentence, based upon the existence of any aggravating or mitigating circumstance, or (B) refuses, upon request by the defendant or the United States, to vary any presumptive sentence, such judge shall disclose the variation or refusal in open court, and make a statement for the record of the justification therefor, including a description of any such aggravating or mitigating circumstances and all other information, evidence, or other factors considered by the judge, in accordance with the rules which the Commission shall prescribe under this Act.

(b) The Supreme Court of the United States shall have the power, after consulting with the Commission, to prescribe rules of practice and procedure pursuant to section 3772 of title 18, United States Code, with respect to the imposition of sentences under this Act and under the rules of the Commission, except that the Supreme Court may delegate such power to the Commission, subject to such terms and conditions as the Supreme Court may prescribe.

APPELLATE REVIEW

SEC. 13. The convicted offender or the United States may appeal any sentence imposed under section 12 to the appropriate United States court of appeals solely on the ground that—

(1) the sentencing judge imposed such sentence in violation of a rule established by the Commission under this Act or of a provision of this Act; or

(2) any rule established by the Commission and related to such sentence is invalid, because (A) the Commission did not comply with the provisions in section 5 with respect to such rule, or (B) the presumptive sentence, aggravating or mitigating circumstances, or other parts of the sentencing standards adopted by the Commission are arbitrary and capricious.

THE AIMS OF IMPRISONMENT

(By Andrew von Hirsch)

When, and for what purpose, should a convicted offender be imprisoned? Two current developments have made this question acute.

First, we have learned that imprisonment is a far harsher sanction than was once supposed. Prison walls formerly hid life inside from public scrutiny. During the last three decades, however, sociologists have documented prisons' social structure, courts have inquired into institutional conditions, and inmates have made their grievances heard. We know now that living conditions are awful in most institutions—and that the loss of liberty itself is a grievous deprivation.* The former warden William G. Nagel, after conducting a nationwide survey of new prisms, has noted that even in the most "modern" facilities,

[T]he prison experience is corrosive for those who guard and those who are guarded. This reality is not essentially the product of good or bad architecture. It is the inevitable product of a process that holds troubled people together in a closed and limited space, depriving them of their freedom, their families, and their humanity while expecting a relatively few employees to guard, control, punish, and redeem them.

* NOTE.—The citations are omitted in this reprint. They are to be found in the article as it originally appeared in Current History.

Second, we are beginning to question the traditional rationale for imprisoning. The purpose of confinement, it was conventionally supposed, was to rehabilitate the offender and restrain him if he were predictably dangerous. To accomplish these ends, sentencing judges and parole officials were given wide discretion to suit the sentence to the offender's need for treatment and the degree of risk he posed. In a robbery case, for example, a judge has typically been free to impose from as little as a suspended sentence to as much as five or ten years' imprisonment, depending on what he thought would best protect the public or rehabilitate the defendant.

But do judges and parole officials really know what will rehabilitate criminals? It is doubtful that anybody knows. A wide variety of correctional treatment programs have been tried and evaluated, ranging from psychiatric counseling to Skinnerian behavior modification techniques. The results have been largely negative. Not only do the prison-based treatment programs fail, but "community-based" programs outside prison have usually been disappointing.

Can we identify accurately which individuals are dangerous? That is also questionable. When forecasting serious crimes, there is a strong tendency to overpredict: many or most of those identified as potential recidivists will be "false positives"—persons mistakenly predicted to be dangerous.

And what of the fairness of giving sentencing judges and parole officials such broad discretion? Gross disparities in sentences have resulted. Sentencers whose decisions are unchecked by general standards, we have learned, decide similar cases differently.

Such doubts about the traditional ideology have stimulated a search for alternative conceptions. In this article, I shall examine three alternative models that now are attracting penologists' attention: a model that relies on isolating offenders from society; one that is based on general deterrence; and finally, one that employs the moral notion of "just desserts."

THE INCAPACITATION MODEL

Whatever its other drawbacks, imprisonment at least isolates offenders from the community. And while we may not be able to forecast accurately which individual offenders will recidivate, we do know that a substantial number of convicts return to crime. So why not automatically imprison convicted felons for a prescribed time, simply to separate them from society? Why not enact mandatory minimum prison sentences to make sure they are incapacitated, as President Gerald Ford and Senator Edward Kennedy (D., Mass.) have been urging?

The argument in favor of this incapacitative approach was best stated by James Q. Wilson in his recent book, *Thinking About Crime*. Wilson starts with the hypothesis that most serious crimes are committed by repeaters—persons who, because of the many crimes they perpetrate, sooner or later are caught and convicted.

While a few of these persons now serve very long sentences, many others are put on probation and thus can return to crime. Were prison sentences—even those of modest length—invariably imposed in such cases, the incapacitative pay-off would be substantial. Wilson contends that most of those responsible for serious crimes would eventually be taken out of circulation for at least a portion of their criminal careers. The crime of robbery, he suggests, might thus be reduced by 20 percent or more. Nor would one have to try to predict which individuals would offend: the incapacitative payoff comes from the fact that conviction for specified crimes would automatically result in a prison sentence.

Yet this approach has problems. One problem is our limited knowledge of incapacitating effects. Wilson's strategy would succeed only if the "habitual" offenders whom he proposes to isolate are responsible not only for the crimes for which they are convicted, but for the bulk of unsolved crimes as well. Yet we still understand very little about who commits unsolved crimes. It is necessary to assume, also, that if such "habitual" criminals were taken out of circulation, their unlawful activities would not be taken over in large part by newly recruited criminals. Again, we know little about the substitutability of criminal roles.

Cost is another problem. Prisons are expensive to run and still more so to build. In past years, the rate at which persons were sent to prison was relatively stable. If we rely on isolating offenders, however, the prison population would rise sharply—as it already has in many states that are jailing a larger percentage of convicted criminals. This influx of new prisoners could not be accommodated in existing facilities—except with intolerable overcrowding, which several courts are now beginning to prohibit as unconstitutional. An ambitious program of prison construction would have to be undertaken—at enormous expense, since each space for a new inmate costs about $30,000 to $50,000 to build. Given their other fiscal difficulties, few jurisdictions can afford an investment of this magnitude in new prisons.

Fairness is another question. Which offenders should be incapacitated by being sent to prison? To imprison those who perpetrate acts of violence or other grave offenses appeals to our sense of justice, because they seem to deserve it. But what of those who commit crimes that are not so serious, like non-violent thefts of personal belongings? Imprisoning such individuals might be useful as an incapacitant—especially as lesser offenders are apt to have particularly high recidivism rates. But is it just to impose the severe punishment of imprisonment for such lesser crimes?

This problem of fairness is highlighted in mandatory minimum sentence proposals like President Ford's and Senator Kennedy's. If the chief aim is to incapacitate, the mandatory minimum prison sentence seems sensible enough; it ensures that convicted felons will serve no less than a specific time in prison. But if justice is a concern, mandatory minimums still permit judges to incarcerate those convicted of lesser crimes. When limiting discretion to punish leniently, one must simultaneously limit the power to punish harshly.

THE DETERRENCE CALCULUS

Two centuries ago, Jeremy Bentham proposed that sentences be calculated on the basis of their deterrent effect. The idea has recently been revived by University of Chicago economist Gary Becker and others.

General deterrence is the effect of threatened punishment to intimidate people from offending. If A is punished for violating the law, that is a deterrent if it induces him—or induces B, C and D—to comply when they otherwise might not have complied.

According to Bentham and Becker, sentences should be decided by weighing the deterrent returns of the penalty against the "costs" of punishing. Punishment prevents harm by deterring crimes; it also creates harm by making punished offenders suffer—and their pains must be taken into account. The proper sentence, they suggest, is the one that yields the optimum balance of aggregate benefits (crime prevented) over aggregate costs (including the pain inflicted on punished offenders).

The traditional criticism of this approach has been somewhat misdirected. Critics have

challenged the very idea of deterrence arguing that high recidivism rates among convicted offenders show that deterrence "doesn't work." But this argument is fallaicous. Even if a punishment does not alter the behavior of the particular individual penalized, it still works as a general deterrent if the example of his punishment induces others to comply. In the absence of punishment, a much larger number of persons—who now refrain—might have committed crimes.

If one is asking "why should punishment exist at all?", deterrence is a useful notion. As the Norwegian criminologist Johannes Andeneas has said, "it is still a fundamental fact of social life that the risk of unpleasant consequences is a very strong motivational factor for most people in most situations." Crime rates are admittedly high today, but they probably would be higher if assaults, thefts and other antisocial acts went unpunished. One reason for the existence of a system of criminal sanctions is that it deters—at least in the minimal sense of securing more compliance than there would be were there no legal sanctions at all.

Bentham and Becker, however, are more ambitious. They want to rely on general deterrence not merely to justify the existence of punishment, but to decide *how severely* we should punish different classes of convicted offenders.

A DIFFICULTY

One obstacle to the Bentham-Becker deterrence calculus is the insufficiency of data. To decide sentences on the basis of their deterrent effects, we would need reliable information on how the rates of various crimes will be affected as the penalty varies. We are still far from having such information. While there is reason to believe that (for some offenders at least) a penalty serves better as a deterrent than no penalty, we are still far from able to measure the deterrent effect with any precision. Deterrence could be measured by varying a penalty and tracing the effect on the crime rate. The crime rate, however, is affected not only by the penalty level but by a host of other factors—the likelihood of being apprehended and punished, changes in economic conditions, increases or decreases in racial tensions, and so forth. Our techniques of identifying and controlling for such other influences are still rudimentary in deterrence research.

The question of fairness arises again. The cost-benefit calculus looks at aggregates—at how much *total* harm a species of crime does and how much total suffering must be inflicted on offenders to reduce its incidence. In dealing with such aggregates, justice to the person punished may be overlooked. Suppose, for example, that the data were to show that a certain kind of petty larceny could most effectively be deterred by invoking a severe penalty against a very few offenders. The cost-benefit approach could support the use of the severe penalty, if the aggregate harm prevented (inconvenience to many individual victims) exceeded the total pain inflicted (a severe sanction imposed on only a few offenders). Yet is it equitable to inflict such a severe penalty, if the harm done by the individual offender is so slight?

A "JUST DESERTS" MODEL

The Committee for the Study of Incarceration, with which I have been associated, has recently suggested a different conceptual model in its report, *Doing Justice: The Choice of Punishments.*[1] It is to rely chiefly on the idea of *desert:* the offender should be punished as severely as he deserves, in view of the seriousness of his crime.

The idea of desert was long out of fashion. The sentence, it was thought, should fit the criminal, not the crime. Deserved punishment was seen as vindictive and unscientific. Our committee concluded, however, that desert is not only rational but essential to justice in sentencing.

Deserved sentences are those that are proportionate in their severity to the seriousness of the crime of which the offender was convicted. Only grave offenses—acts of violence, for example—merit severe penalties. Non-serious offenses deserve non-severe punishments. Sentences that do not comport with the seriousness of the offense are unjust. As *Doing Justice* puts it:

"The severity of the penalty carries implications of degree of reprobation. The sterner the punishment, the greater the implicit blame: sending someone away for several years connotes that he is more to be condemned than does jailing him for a few months or putting him on probation. In [sentencing] penalties, therefore, the crime should be sufficiently serious to merit the implicit reprobation. . . . Where an offender convicted of a minor offense is punished severely, the blame which so drastic a penalty ordinarily carries will attach to him—and unjustly so, in view of the not-so-very wrongful character of the offense. . . . [Conversely] imposing only a slight penalty for a serious offense treats the offender as *less* blameworthy than he deserves."

To satisfy this requirement of justice, the seriousness of the crime must indicate the penalty. The focus should be on the harm done or risked by the offender's criminal act and his degree of culpability. To allocate penalties on any basis other than seriousness would be unfair.

Desert focuses on the past—on the offender's action. The likelihood of the offender's returning to crime in the future should be irrelevant to the choice of whether and how long to imprison him. Even if crime-forecasting techniques could be improved, an offender doesn't deserve to have his punishment increased (or decreased) on the basis of what he is predicted to do rather than on the basis of the seriousness of what he has done.

A sharp reduction in sentencers' discretion is necessary to such a desert-based system. In order to scale the punishment to the seriousness of the crime, there must be standards governing how severely offenders should be punished for crimes of different gravity. Otherwise, individual judges having different moral outlooks could impose divergent sentences for similar criminal acts. The Incarceration Committee's report, therefore, proposes a system of standardized penalties: for each gradation of seriousness, a definite penalty—the "presumptive sentence"—would be set. The offender would normally receive that specific sentence—unless there were unusual circumstances of aggravation or mitigation. The presumptive sentence is preferable to the mandatory minimum because it limits the power not only to underpunish, but to *over-punish:* severe sanctions for lesser infractions would be barred. Those convicted of similar offenses could expect similar punishments, while some degree of flexibility would still be allowed to deal with out-of-the-ordinary cases.

Severity would have to be reduced. Imprisonment, being a severe penalty, is deserved only for crimes that are *serious*—e.g., crimes of actual or threatened violence and the more heinous white collar crimes. And even then, time in prison should be measured with strict parsimony: the Incarceration Committee's report proposes that most prison sentences be kept below three years, save for murder and certain other especially reprehensible crimes. (We are speaking of time *actually* served in prison, since the prescribed sentences would be definite and not subject to later reduction by a parole board.)

It is worth emphasizing that these punishments, although milder, would be surer. Under today's discretionary system, there is much harshness but little certainty. Some unlucky individuals convicted of a commonplace property offense are sent to prison for substantial periods; on the other hand, many serious offenders receive surprisingly mild punishments—a convicted armed robber with a major prison record has a good chance of getting only probation in some urban jurisdictions. Under a deserts-based system, by contrast, anyone convicted of a sufficiently serious offense would have to go to prison. The criminal who assaulted someone with a weapon could no longer be put on probation because that seemed "best" for him; the seriousness of the offense would determine the sentence, and the judge's discretion would be restricted.

A deserts model has its own problems. One question is how to limit disparities stemming from plea-bargaining discretion. Sentencing standards alone would still leave the prosecutor free to bargain. Plea bargaining (if allowed to continue at all) should be subjected to controls that are designed to achieve consistency between the prosecutor's bargaining decisions and the sentencing standards, devising such controls will be no easy matter. Developing standards for judging the seriousness of crimes will be another major task. While sociologists have found that there is considerable popular consensus as to which crimes are more serious than others, it remains to translate these perceptions into workable criteria for seriousness which judges can use in sentencing decisions.

The attraction of a deserts model lies in the modesty of its aim: it seeks simply to make the system fairer. Rather than trying to surmise on insufficient evidence how this or that sentence will affect crime rates, the system rests on practical and moral judgments—which we are capable of making—of whether one kind of behavior is more harmful and culpable than another.

ANY CONVERGENCE?

While these newer approaches—the incapacitation model, the deterrence calculus and the deserts model—rest on different theoretical premises, they have certain points of convergence in practice.

One common thesis is the limitation of sentencing discretion. In all these models, the emphasis will no longer be on fitting the sentence to the individual criminal's "needs." Instead, there will be norms that prescribe more or less standardized sentences for different categories of crimes. Disparity of sentence will be reduced, it is hoped.

The other is a lessening of the extremes of harshness and leniency. There will be fewer long prison sentences. (In the incapacitation and deterrence models, this is based on pragmatic considerations: lengthy prison terms would be eschewed because they tend to be less certain—since prosecutors and judges tend to find ways to circumvent harsh sentences in cases that evoke their sympathy. In the deserts model, it is a matter of principle: none but the very worst offenses deserve stringent punishment.) On the other hand, those convicted of serious crimes would expect some time in prison.

If there are these areas of agreement, what difference does it make which theory is adopted? One important difference is the criteria for success or failure. The incapacita-

[1] Andrew von Hirsch, *Doing Justice: The Choice of Punishments,* Report of the Committee for the Study of Incarceration (New York: Hill Wang, 1976).

tion and deterrence models are aimed exclusively at crime control. If that is the aim and if surer but milder punishments were to fail to reduce crime, what then? Seemingly, one would, on these theories, be obliged to try more drastic methods and see if they work. Desert, however, has a different aim—achieving fairness. Even if a deserts-based scheme were not successful in reducing crime rates, it is defensible still on the grounds that it is more equitable. This difference in aim may be important. Although we are capable of making the sentencing system fairer, it may be unrealistic to hope for major reductions in crime through any sentencing strategy. In the words of the Incarceration Committee's chairman, former United States Senator Charles E. Goodell (R., N.Y.):

"I [wonder whether] changes in the sentencing and correctional system can work a dramatic reduction in crime rates. However enlightened or ingenious our penal methods become, this country probably will long be condemned to suffer the high crime rates now in evidence—given our history of domestic violence and the extent of disparities in wealth and social status. . . . Today we have not only rampant crime but a gruesome system of punishment: harsh, arbitrary, and lacking in coherent rationale. The latter, at least, we can try to change. We can mitigate severities of punishment to levels more consistent with our pretenses of being a civilized society. . . . We can, I am convinced, mitigate the harshness and caprice of the penal system without losing whatever usefulness in crime prevention it now has. If we could accomplish this much, it would be no mean achievement."

Mr. JAVITS. Mr. President, I am pleased to join today with Senator HART in introducing the Federal Sentencing Standards Act of 1977. In my judgment it represents a very important challenge to an unworkable and essentially unjust sentencing system which has contributed significantly to the extraordinary difficulties which have plagued our criminal justice system in recent decades in the United States.

That larger system—beset with so many ills and bombarded with so much criticism is in little better shape today after the investment of $5 billion in Federal funds through the LEAA program than before the Safe Streets Act was passed in 1968.

Serious crime statistics are still rising. The number of offenders incarcerated in U.S. prisons is also rising—250,000 at the end of 1975, with a million or more on probation or parole, and another quarter million in jails and detention facilities.

Despite the fact that many of its problems are acute—problems of funding, of resource allocation, of administration, of the overwhelming numbers jamming the system, the public has most frequently judged the competency and fairness of the system by the way that it sentences offenders. With good reason it has frequently reacted with frustration, confusion, and outrage at the wide disparity in the sentences imposed for similar crimes and the total absence of any prescribed guidelines to govern the sentencing practices of judges.

In 1972, for example, a study prepared by the distinguished former U.S. attorney for the southern district of New York, Whitney North Seymour, found wide disparity in that court's sentencing for specific crimes as compared to likelihood and length of prison sentence in all all other Federal courts. The study which is summarized in the table following shows the disparity that exists both in white collar and violent offenses:

Offenses	Likelihood of imprisonment (percent)		Average length of prison sentences (months)	
	Southern District of New York	All Federal courts	Southern District of New York	All Federal courts
Bail jumping	66.7	66.2	10.0	25.6
Bank embezzlement	23.2	19.5	18.0	21.3
Bank robbery	82.8	91.8	69.6	124.1
Bribery	25.0	42.5	11.0	15.1
Counterfeiting	51.7	53.7	14.8	40.3
Forgery	41.6	42.8	16.8	32.0
Gambling	37.2	29.9	3.3	14.5
Guns	50.0	45.3	28.2	32.1
Immigration	50.0	42.8	2.5	6.4
IRS	35.4	36.5	5.9	10.4
Interstate	54.8	43.7	18.1	33.8
Narcotics	77.0	70.6	62.4	46.4
Perjury	50.0	53.0	5.2	28.0
Postal	44.3	40.7	18.8	32.5
Embezzlement	43.7	19.0	5.0	11.6
Other	46.3	47.3	20.1	50.5
Rackets and extortion	55.5	47.1	46.2	31.2
Securities	70.4	55.4	31.8	38.7
Fraud	66.7	21.5	20.5	-------
Theft	100.0	57.4	36.5	38.7
Selective Service	63.3	27.8	12.4	22.2
Total	54.1	43.8	35.2	38.1

Note: The figures for the Southern District of New York are based on sentences imposed in a 6-mo period in 1972. The national figures cover the fiscal year ending June 30, 1972.

I would not suggest that the fault is that of the many dedicated and hard working members of the Federal judiciary; for the Congress, the courts, and the legal profession have never developed a comprehensive approach to the problem of sentencing reform.

The bill Senator HART and I are introducing today attempts to achieve that very objective and is the outgrowth of the work of a distinguished panel of experts—the Committee for the Study of Incarceration—headed by my distinguished former colleague from New York, Charles E. Goodell. The executive director of the committee and principal author of its report: "Doing Justice: The Choice of Punishment," was Rutgers University Prof. Andrew von Hirsch who consulted with our staffs in the drafting of the bill.

The four major parts of the bill do, in our judgment, constitute the beginning of a Federal sentencing system which could help with respect to public confidence in our criminal justice process:

First, it would narrow the discretion which can be exercised by sentencing judges by employing the "presumptive sentence" device. For each gradation of seriousness of criminal behavior, a definite penalty—the "presumptive sentence"—would be set. Individuals convicted of crimes of that degree of seriousness would ordinarily receive the presumptive sentence, unless they were special, carefully defined circumstances of aggravation or mitigation.

Second, the presumptive sentence and the permitted aggravating and mitigating circumstances would be prescribed by a Federal Sentencing Commission. The Commission's guidelines would take effect within 30 legislative days after promulgation, unless both Houses of Congress adopted a resolution of disapproval. The Federal Sentencing Commission would have an initial life of 5 years.

Third, the bill sets forth the rationale which the Commission must follow in prescribing its sentences; namely, a "just deserts" rationale. The severity of sentences would have to be based on the seriousness of the individual's offense, rather than on his likelihood of recidivism or need for treatment. Imprisonment, as a severe penalty, would be restricted to serious crimes. For lesser offenses, penalties other than imprisonment will be prescribed, such as fines, community service, and intermittent confinement.

Finally, since the sentence will be based on the seriousness of the offense, indeterminancy of sentence will be phased out. By insuring that the offender serves the sentence determined by the sentencing judge, the public and the prisoner are both assured of both the certainty of punishment and the date of its completion.

Mr. President, I wish also to commend the work done on this subject by two of our distinguished colleagues, Senator KENNEDY and Senator BENTSEN. I look forward to working with them to develop the most effective legislation possible. I wish also to call the Senate's attention to the views of an able lawyer and my longtime friend Robert B. McKay, formerly dean of the New York University School of Law and now the director of the Aspen Institute's Program on Justice, Society, and the Individual.

I ask unanimous consent that his article, entitled, "It's Time To Rehabilitate the Sentencing Process," Judicature, December 1976, be printed in the RECORD at the end of my remarks. In this article Dean McKay discusses many of the questions relevant to any presumptive sentencing system.

Mr. President, the sentencing system demonstrated every day in U.S. courts is characterized by gross disparities and often is totally lacking in overall rationale and fundamental fairness. Equal treatment should be the rule and it is not. These disparities have threatened the credibility of our judicial system. The entire criminal justice process is undermined when significant numbers of offenders randomly escape punishment, while others convicted of similar acts are handled discriminatorily. Congress must act to right this imbalance by enacting our legislation promptly.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IT'S TIME TO REHABILITATE THE SENTENCING PROCESS

(By Robert McKay)

The criminal justice system in the United States is a failure. It is in disarray at every level. It neither controls crime nor punishes criminals. The more than $5 billion spent by the Law Enforcement Assistance Administration in its "war on crime" has had no perceptible effect (unless it be argued that

crime would have been even more prevalent without LEAA).

Consider the dismal facts. Since 1960, serious crime has more than doubled. In 1975 alone, according to the FBI, serious crime rose 10 percent. The agency's annual Uniform Crime Reports said there were nearly 11.3 million serious crimes committed in 1975, but that only one in five ended in arrest.

Despite the disappointing lack of success in catching and convicting criminals, no one can charge the criminal justice system with lack of severe response to those who are convicted. At the beginning of 1976 there were about 250,000 persons confined in U.S. prisons—a national record. About 250,000 others were confined in jails serving short sentences or awaiting trial. An additional million or more were on probation or parole. Prison sentences in the United States are longer than those in any other Western nation or in Japan.

Criminal justice is big business and, in typically American fashion, it is a growth business. Incarceration rates in the United States are substantially more than 200 per 100,000 population. In Great Britain, West Germany and the Scandinavian countries, the rate is below 100, and in the Netherlands the rate is below 25.[1] In Japan the rate of crime is so low (the likelihood of being robbed in the United States is 208 times greater than in Japan) that the prison population is but a small fraction of that in the United States.[2]

Where did we in the United States go wrong? There is certainly no lack of speculation about the cause of crime, theories about the purposes of imprisonment, or statistical analysis of our courts and corrections system. We are full of theories, but we lack agreed-upon answers.

THE CRIMINAL JUSTICE SYSTEM

A criminal justice system should do at least the following: define as crime that conduct which is unacceptable to society as a whole; set up an effective structure for the detection of crime and the apprehension of criminals; devise fair methods of determining guilt; and impose sanctions that are appropriate to the offenses.

The kingpin of the entire structure is the sanctioning process. It is also conceptually the most difficult. We understand how to go about defining crime, establishing police forces, and devising due process trial methods. What we do not seem to understand is the purpose (or purposes) of sanctions. Moreover, we do not seem to know why or when or how to sentence; we do not know who should not be imprisoned and who should and for how long.

It is customary to speak loosely of four purposes that might be served by imposing sanctions—particularly prison sentences—upon those convicted of crime. They are rehabilitation, deterrence (specific or general), incapacitation and punishment.

Rehabilitation: Rehabilitation has long been an American ideal. We cling to the belief that most convicted criminals can be restored to a useful social role, if only we can discover the right triggering mechanism.

In recent decades, the road to rehabilitative salvation was thought to lie in the prisons where inmates could be counseled, educated and trained in new vocational skills. To make the system work, it was obivously necessary to ensure a detention long enough to allow the rehabilitation to take place. Accordingly, sentencing and parole procedures were adjusted to fit that theory—if not to fit the crime. Indeterminate sentences (one to twenty years, for example) became common, with the release date to be fixed by a parole authority instructed to determine when rehabilitation had taken place.

The theory was perfect—except that it didn't work. Prison officials sometimes manipulated the inmates, and inmates sometimes manipulated the system. Rehabilitation failed to satisfy the only criterion of success—reduced recidivism rates. There was even some evidence that the longer the detention, the more likely the offender was to return to criminal activity.[3] The conviction grew that the fault was not with the idea of education, vocational training, and a humane regime in prison, but with the notion that the time served should be extended or contracted to conform to a conviction that rehabilitation is measurable and "happens" at a patricular time. In fact, rehabilitation sometimes seemed more likely in a controlling setting outside the prison than on the inside, an argument for diversion rather than imprisonment.

Dean Normal Morris has stated the judgment now generally accepted:

"Rehabilitative programs in prison must be expanded and improved but they must be related neither to the time the prisoner serves nor to the conditions of his incarceration. Prison training and treatment program must be entirely facilitative, never imposed."[4]

This 180-degree turn from one theory of sanctions to another is having substantial consequences on the criminal justice system. The indeterminate sentence is no longer in favor. In consequence, as Marc Plattner has observed, "Politicians as diverse in their views as President Ford and Senator Kennedy have endorsed a return to determinate sentencing, and several state legislatures seem to be moving in this direction."[5]

Deterrence: Deterrence of crime is the overriding concern of the criminal justice system, just as it is the first demand of every law-abiding citizen. The theory is that those who have not transgressed will be warned against crime when they see punishment imposed on others, and that the offender who is convicted and punished will be dissuaded from repetition.

Both propositions are basically sound. If there were no sanctions, crime would undoubtedly rise further. But the fact that crime rates continue to rise, among both repeaters and first-time offenders, puts in doubt the judgment that deterrence should be regarded as the primary objective of the sanctioning process. When two-thirds to three-fourths of the inmates in most prisons are repeaters, we can be sure deterrence has not worked as we hoped.

Deterrence as an objective should not be abandoned. If detection of crime and apprehension of criminals becomes more likely than not, if trials become speedy, and if conviction of the guilty becomes relatively certain, imprisonment will become a more meaningful deterrent. Meanwhile, there is little reason to believe that the often-recommended expedient of lengthened sentences will have much impact. Speed and certainty are more important to successful deterrence.

Incapacitation: The one objective that imprisonment surely accomplishes is incapacitation of the offender. When the criminal is in prison he cannot commit crimes. But that gain is necessarily limited. Almost all inmates are eventually released, and if the ex-offender leaves prison embittered, abandoned by family and friends, and without employable skills, he or she is likely to return to crime.

Punishment: The final objective of imprisonment is punishment. Every sentence to prison is admittedly a punishment, but we have sometimes not been willing to admit that it is a valid purpose. In the more realistic mood of the present, there is greater willingness to accept the proposition that a principal—perhaps the principal—purpose of imprisonment is punishment. To favor candid recognition of this reality is not to support a social policy of vengeance, but to acknowledge the fact that willful lawbreakers should receive sanctions proportionate to the severity of their offenses.

THE SENTENCING PROCESS

Society has generally failed to determine on a rational and defensible basis what punishment is appropriate to the severity of the offense and for the individual offender. That failure is the most serious injustice inherent in the criminal justice system in the United States.

When the Attica Commission investigated the causes of the tragic uprising at the Attica Correctional Center in September of 1971, it soon discovered that the most urgent inmate grievances were not about prison conditions, although there were serious deficiencies in the administration of the prison as a decent and humane institution. The most persistent complaints were about unequal treatment in the sentencing process and in the parole process. Inmates in adjacent cells believed that sentences were unjust because of unexplained disparity in severity of the sentences. The parole board was seen as a vehicle of further inequality because of unexplained differences in its decisions to release from prison.

The name of the game in prison is the release date. Time served is determined in part by the sentence and in part by the decision of the parole board. If the prisoner perceives both decisions as the product of chance or unexplained (and inexplicable) decisional processes, he can neither trust the justice of the system nor respect the rule of law under which those judgments are made.

The sad truth is that the inmate perceptions are essentially correct, not in every case perhaps, but certainly in gross. The sanctioning system does not serve its intended purpose, and it is not just.

Careful surveys in federal and state courts have repeatedly demonstrated that judges react in strongly individualistic ways in their sentencing decisions. In one group of federal judges, the recommended sentences in a sample tax-evasion case ranged from a six-month suspended prison sentence to a five-year sentence with a $20,000 fine.[6] In a study by the Federal Judicial Center in which disparity was tested by simulated sentencing, the fifty participating judges read presentence reports and made sentence recommendations. In sixteen of the twenty cases submitted to all the judges, they disagreed even on the basic question whether any prison sentence was appropriate.[7] Judges at the same level of responsibility are likely to differ, often sharply, about proper sentencing decisions. Variables that make a difference include the urban or rural setting of the court, individual opinions about the seriousness of different offenses, and differing perceptions of individual defendants. But the gross disparities are not accounted for by those factors alone. Even a single judge may be relatively lenient in his sentencing for some offenses and relatively harsh toward others.

The wide range of sentencing discretion accorded most judges assures an enormous range of results which can only be regarded as unjust by those who are subjected to this prison lottery; the system is perverted by these injustices.

CURBING SENTENCING DISPARITY

Several ways to ease the problem of sentencing disparity have been suggested. Some

Footnotes at end of article.

of the most popular are: reducing judicial discretion by moving from relatively indeterminate sentencing authorizations to relatively determinate; establishing advisory sentencing councils; and providing for appellate review of sentences.

Determinate sentences: The indeterminate sentence was essentially a product of the now-abandoned faith in the rehabilitative powers of prisons. With the reason for wide discretion gone and the resulting disparities well established, there are compelling justifications for narrowing sentencing discretion. Various proposals have been advanced. The two most interesting are those of a Task Force on Criminal Sentencing of the Twentieth Century Fund and of David Fogel, former Minnesota Commissioner of Corrections, in his book, *"We are the Living Proof."* [8]

The Twentieth Century Fund Task Force calls its proposal "presumptive sentencing." [9] A finding of guilt would ordinarily produce a specified sentence unless mitigating or aggravating factors were established. The legislature defines presumptive sentences for each offense and specifies factors of aggravation and mitigation. Under this formula, sentences for first offenders would be relatively low but would increase sharply with succeeding convictions. The sentencing judge would conduct a hearing to establish mitigating or aggravating factors. Deviation beyond the narrow range allowed on these findings would need to be justified by a reasoned opinion.

Because time served is a function not only of the original sentence but of the parole decision as well, the Task Force would also modify release procedures.

"The parole board or releasing agency would have more limited authority than at present to release the defendant earlier than prescribed by the judicially fixed sentence. The board could decide on release, but only within a previously fixed range and on the basis of relevant information (as defined by the legislature) that was not available to the sentencing judge." [10]

David Fogel would similarly give back to the legislature the primary responsibility for fixing sentencing policy. He recommends a narrow range of sentence (four to six years, for instance), which could be increased or decreased by the sentencing judge only by a fixed percentage (20 per cent, for instance). Further, time served would be reduced for good behavior. For every day of time served without serious rule infraction, one day would be cut off the sentence, so that a prisoner might serve only half the original sentence. There would be no parole.

In short, both proposals, in order to avoid the proven disparity in sentencing practices, would limit judicial discretion sharply and return primary responsibility to the legislature. Thus we come full circle, from faith in the capacity of judges to fit the sentence to the crime and to the criminal, to renewed reliance on the legislative process to speak for the public and to provide justice in terms of predictability of result.

Sentencing councils: Even if these relatively drastic changes are not adopted, the movement toward limiting judicial discretion is unmistakable. Sentencing councils have been tried in two federal district courts in Chicago and New York and in a few states.[11] The usual device, although subject to many variations, is to require each sentencing judge to consider the sentencing recommendation of two colleagues, although the final decision remains his own. Some benefit can be expected from such a system; but critics have questioned whether the benefit is sufficient to justify the additional burden on the trial courts.

Appellate review: A final suggestion is to provide appellate review of sentences, so that it will be possible to even out the most egregious disparities. Experimentation is surely worthwhile, but there are also some hazards which should be frankly considered. The views of judges at both the trial and appellate levels range from unsympathetic to hostile. Trial judges are apt to resent appellate review of sentencing as an intrusion into a uniquely trial judge function, doubting the capacity of appellate judges to understand the sentencing considerations. Appellate judges may also doubt their own capacity in the matter; perhaps more important is their reluctance to assume another potentially burdensome task.

Ending sentencing disparity will not instantly halt our escalating crime rate. Even if sentences become uniformly just, Americans will not become uniformly law abiding. But injustice in sentencing, both real and perceived, has caused our criminal justice system to lose credibility and has eroded respect for law.

The suggestions I have made carry no guarantee to reduce crime. But we must take immediate steps to ensure that the sanctioning process is made as just as possible for the sake of the victims of crime, those charged with criminal conduct, and society as a whole.

By Mr. BENTSEN:

S. 205. A bill to amend title 18, United States Code, relating to criminal offenses committed by terrorists; to the Committee on the Judiciary.

S. 206. A bill requiring the President to suspend economic assistance, military assistance, Government and commercial sales of arms, Export-Import Bank loans, and the generalized system of preferences to any country that willfully aids or abets terrorism.

PUNISHMENT FOR TERRORIST CRIMES

Mr. BENTSEN. Mr. President, I rise today to introduce a bill to create strict mandatory sentences for those found guilty of terrorist crimes.

In recent years, such crimes have killed and maimed hundreds of people. According to the FBI, since 1970 there have been almost 1,000 such incidents. There have been bombings and shootings; arsons and snipings. Almost 400 people have been killed or wounded as a result. Property damage has totaled almost $6 million.

Mr. President, the crimes of destroying innocent lives in the pursuit of political objectives is reprehensible, undemocratic, and alien to the traditions of a free and civilized society. There is no excuse, no justification, no reasoning that will suffice to make these acts anything else. Our laws of crime and punishment must reflect the severity of these offenses.

It is in response to the growing incidence of mindless violence that I introduce this bill. This measure would create strict and certain punishment for violent terrorist crimes. It would create a mandatory minimum sentence of from 2 to 10 years. And Mr. President, this would be in addition to the indeterminate sentence for the violent crime covered by present law.

This measure also provides for the death penalty in the most heinous cases of terrorism, those involving the death of a victim. The measure does provide procedural safeguards, such as a hearing to determine the existence of mitigating circumstances that would render the death sentence inappropriate. But it also recognizes that terrorist crimes are wanton and cold-blooded acts of violence that cannot and will not be tolerated, and that those who choose to commit the ultimate crime must know that they may be punished by the most severe penalty, death. This measure states in decisive terms that in our society, there can be no appeal over the ballot to the bullet, and that those who make such an appeal will pay the cost.

Mr. President, to convict under this proposal, all elements of the offense must be proven beyond a reasonable doubt. The violent crime itself must be proven. The fact that it was committed pursuant to the encouragement of a group that employs violence as a political instrument, must also be proven.

In those cases where the death penalty is an option, a sentencing hearing will be held to determine whether the facts of the case warrant the most severe penalty. If the victim dies and the death penalty is found inappropriate, a mandatory prison sentence of increased severity would be given. This could be no less than 4 years; no more than 20. If the facts brought out determine that the crime was vicious and wanton in the extreme, the death penalty could be given.

Mr. President, there is no place for random violence in a free society. There is no place for air piracy, letter bombs, or machine guns in our streets. If the criminal believes that he may destroy the lives of innocent people to seek publicity for his political views, let him know that the law will respond in kind. There can be little mercy for the wanton and reckless killer. He has declared war on free society itself; he has destroyed the right of those immediately affected and endangered the rights of all; he has proclaimed himself above the law; and he

should be aware that in the eyes of the law and the decent opinion of mankind, murder is murder, violence is violence; and no cause or higher belief can justify such action.

Mr. President, my bill would see to it that the punishment would fit the crime. In the increasingly dangerous world we live in, we face the fact that new forms of violence and terror will be available to the deranged and the fanatic. They can strike at cities; or powerplants; military installations; Government buildings; or private homes. They can employ bombs or germ warfare.

Mr. President, we must make sure that those who do so know that their conduct will be met by the outrage and severity it deserves. This bill will increase the punishment for such crimes in a fair and responsible manner. It will state in clear and decisive terms that wanton violence—in the name of any cause—will not be tolerated, and will be met with the full force the law allows.

My second bill, Mr. President, relates to international terrorism. It requires the President to suspend economic and military assistance, Government and commercial sales of arms and Export-Import Bank loans and loan guarantees. I am pleased that last year the Congress approved and the President signed into law legislation I introduced to deny eligibility for the generalized system of preferences to any country which willfully aids and abets international terrorism.

In spite of increased efforts in recent years by certain nations to crack down on terrorist organizations, terrorism has widened in scope and there is growing evidence of cooperation among international terrorist groups. Examples of terrorism are becoming an unfortunate feature of our daily news. Since 1968 alone approximately 800 people have been killed and 1,700 injured in international terrorist incidents; 114 U.S. citizens have been involved and 24 of them killed.

In spite of the fact that international terrorism has continued to grow, however, no legal solutions are in sight. Many nations, particularly those in the Third World, are unwilling to cooperate in efforts to combat terrorism which, they say, can be justified under certain circumstances. Therefore, sources report that almost half of those terrorists captured in the last 5 years have been released. These nations' unwillingness to bring the full force of the law to bear against these international outlaws threatens the safety and peace of all nations.

It has for some time been U.S. Government policy to support adoption of an international convention to mandate sanctions against States which fail to prosecute or extradite international terrorists. However, the convention has made little headway and the prospects for enactment are remote.

I believe U.S. policy of no-negotiation with terrorists is a correct one. But I believe we must go one step beyond this in an effort to meet the problem of foreign governments' harboring of terrorists. My legislation is designed to serve notice to all nations that the United States will not countenance acquiescence to terrorism and that we are willing to take serious action to deal with this problem. I urge the Senate's support for this bill. The civilized world must respond with tough, effective measures against those international outlaws who would seek to destroy the very foundations of the democratic system.

By Mr. BELLMON (for Mr. BARTLETT):

S. 207. A bill to amend the Rural Electrification Act of 1936, as amended, to provide authority for the Administrator of the Rural Electrification Administration to guarantee loans for the furnishing of electric energy for certain municipal electric systems; to the Committee on Agriculture and Forestry.

Mr. BELLMON. Mr. President, on behalf of the distinguished Senator from Oklahoma (Mr. BARTLETT), I introduce a bill and I ask unanimous consent that a statement by Senator BARTLETT be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BARTLETT

Today I am introducing legislation in response to a problem that has developed over the past ten years. The problem relates to changes in the entire energy situation of this country, and is exemplified by the change in policy of the Department of Interior as represented through its electric marketing administrations. The change involves those communities that were previously supplied with "firm power" and now will only be served with "peaking power". The change causes the previously served communities to seek new sources of electric energy for their "firm power" needs, and in some cases, causes the municipalities to involve themselves in constructing new facilities within their corporate limits. These new facilities are required to deliver the power that will be contracted for from the outside source.

The State of Oklahoma is one of the first states to be affected because it is served by the Southwestern Power Administration. Southwestern's policy change will also affect municipalities in Arkansas and Missouri.

The Southeastern Power Administration and the Bonneville Power Administration and Alaska Power Administration are also changing their policies for municipalities previously served with "firm power".

Southeastern serves 80 municipalities in Alabama, Florida, Georgia, North Carolina and South Carolina. Bonneville serves 36 municipalities in Washington, Oregon, Idaho and Montana.

Since most of Southwestern's contracts are near termination, more immediate attention is needed, and I will detail Southwestern's activities in more detail.

SPA serves 35 municipalities, 17 of which are located in Oklahoma. All of these 17 communities have received draft contracts from SPA containing the change from "firm power" to "peaking power". The existing contracts will expire on June 30, 1977, and after that time, these communities will have to rely on alternative sources of electric energy.

By July 1977, SPA will only have 10 municipalities being served with "firm power", and by mid-1983, a complete conversion will be made. Also there is no capability for returning to the previous policy.

Mr. President, I insert at this point a list of municipalities being served by Southwestern Power Administration, and the energy being supplied to each of them.

TABLE III

Customer	Capacity KW	Energy Delivered (000) KWH	Revenue from Power sales
Municipalities:			
Augusta, Arkansas	3,300	13,510	$98,432
Bentonville, Arkansas	18,000	74,724	408,648
Carthage, Missouri	7,400	39,460	257,015
Clarksville, Arkansas	1,200	6,070	39,309
Comanche, Okahoma	3,172	8,453	76,904
Copan, Oklahoma	800	2,737	22,197
Duncan, Oklahoma	18,521	59,830	490,593
Eldorado, Oklahoma	852	2,577	22,219
*Fulton, Missouri	2,000	7,358	56,875
Goltry, Oklahoma	612	1,979	16,508
Granite, Oklahoma	1,328	4,004	34,787
Hermann, Missouri	5,800	6,960	97,440
Hominy, Oklahoma	5,248	18,397	146,669
Jonesboro, Arkansas	53,984	216,975	1,501,391
Kennett, Missouri	12,450	27,695	152,906
Lamar, Missouri	8,170	25,627	170,152
Lexington, Oklahoma	2,016	6,034	52,456
Manitou, Oklahoma	280	876	7,498
New Madrid, Missouri	4,100	17,481	105,157
Nixa, Missouri	2,650	9,133	53,912

Total sale by SPA of electric power and energy (62)	2,238,104	9,496,782	59,606,950
Miscellaneous sales of energy by Corps of Engineers		816	1,666
Total SFPS sales of electric power and energy		9,497,598	59,608,616

*Contract expired as of September 10, 1976. Service discontinued.

These power figures will obviously be cut drastically by the change to "peaking power". As an example, the city of Hominy, with a population of 2,274 received 18,397 KWH, and under the new contract, they will receive 1200 KWH. This is a reduction of 93.5%, and Hominy's cost to build the necessary facilities to receive power from the alternative source is aproximately 600 thousand dollars.

Southeastern Power reports that they are serving 80 municipalities, but does not serve the complete load capacity of any of their preference customers. They currently prorate all power that is available. Southeastern does not anticipate that any of the existing arangements will be revised in the next two or three years, but due to changes in rate structures of the utility companies serving the balance of the power, the capacity components have increased in cost to such a point that the trend, as existing contracts expire, will be to sell power that more nearly corresponds to "peaking power".

Bonneville Power serves all 36 municipalities with "firm power", and these contracts will expire between 1983 and 1993. Thirty-one of these communities purchase their total power requirements from Bonneville.

The other large Department of the interior power source is the Bureau of Reclamation that now serves 220 municipal customers in the following states: Arizona, California, Colorado, Iowa, Minnesota, Nebraska, Nevada, New Mexico, North Dakota, South Dakota, Utah and Wyoming, with the last contract expiring in the year 2004.

The problem that currently faces many of these municipalities, and will face others in the future, is the financing of construction for new facilities to enable them to be supplied by alternate power sources. Not all of the communities will have a problem financing, but many of the smaller cities have had to sell large quantities of bond to meet the federal requirements for such things as waste treatment. The small communities no longer have the capacity to sell additional bonds, therefore, it is imperative to provide these municipalities with a means of financing the required facilities in order that they do not suffer detrimental impacts as the result of inadequate electric power resources.

Congress talks of a productive economy, and insuring that the life and growth of small communities will be perpetuated. Much of rural America has suffered severe out-migration, and a great deal of effort and money has been, and will be spent, to attract business and industry to rural communities in order that their young people will remain or will be attracted to return. To allow those communities that are temporarily unable to finance electric facilities, to become even further depressed would be inexcusable, and Congress can take immediate action to fulfill its previously stated intent to protect rural America by acting expeditiously on my legislation.

The essence of my proposal is that the Rural Electrification Administration will be given the authority to make guaranteed loans to the municipalities that were previously served by a federal power administration or the Bureau of Reclamation. These grants will be for the purpose of constructing the necessary facilities required to obtain alternative sources of electric energy.

The eligibility would be limited specifically to those municipalities previously served, and more particularly, to those municipalities that cannot finance the construction by any other method. The authority of the legislation will also expire on September 30, 2006. This date is two years after the termination of the last existing contract.

This legislation may affect 25 states and countless small communities. I urge my fellow Senators not only to support this legislation but to act as quickly as possible in order to protect those communities that will be seeking alternative electric power sources after June 30, 1977.

By Mr. WILLIAMS (for himself and Mr. KENNEDY):

S. 208. A bill to amend the Urban Mass Transportation Act of 1964 to extend the authorization for assistance under such act, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

NATIONAL MASS TRANSPORTATION ASSISTANCE ACT OF 1977

Mr. WILLIAMS. Mr. President, during the past 5 years, Federal assistance to mass transportation has begun to show positive results on the welfare and vitality of our Nation's urban areas. The Urban Mass Transportation Act, as amended, provides financial assistance for the development of efficient and coordinated mass transportation systems as part of the broad objectives of urban management, development and revitalization.

Public transit has, at last, begun to provide urban areas with transportation alternatives. These alternatives increase the efficient and productive use of the streets and highways, promote energy conservation, add to environmental quality, provides accessibility and tend to knit together the fabric of urban life.

Federal assistance to mass transit has provided the resources to invigorate the quality, and quantity of public transportation by making possible the replacement of obsolete equipment, the rehabilitation of fixed facilities, the construction of new modern transit lines, and the continued improvement of services.

In order to continue this trend of increasing transit improvements and urban benefits and in order to prevent an interruption in the funding of major transit projects, revisions to the Urban Mass Transportation Act are vitally needed.

New authority for discretionary grants for the acquisition of capital equipment and facilities to purchase new buses and related equipment, to rehabilitate or extend existing rail systems and construct new fixed guideway systems is of the utmost necessity. After years of planning, recent Federal decisions have been made to assist in the continuation of new important mass transit projects in cities such as Atlanta, Detroit, Baltimore, Miami, and in northern New Jersey. These decisions involve multiyear fund commitments of annual obligations toward a total project cost, and are each vital parts of comprehensive urban development and revitalization strategies.

The 1970 amendments to the Urban Mass Transportation Act which created the present capital assistance program at a level of $3.1 billion, envisioned a review of funding levels by both Congress and the administration on a 2-year basis. However, this envisioned review has never taken place since, on the reporting dates of February 1972 and February 1974, the administration did not submit requests for additional mass transit funding or any review of program needs. During this period, however, the Congress, on its own initiative added an additional $3 billion in 1973 and $4.825 in 1974. Although 1976 would have been an appropriate year for a review of the needs of the capital grant program, no action has taken.

The multiyear commitments which permit the initiation of large projects must be based on availability of future obligation authority. Although obligation authority of over $3 billion is still available, the capital program is actually more than depleted. Assuming the current rate of bus assistance and rehabilitation projects, and adding the outstanding balance of multiyear commitments already made, the available balance has now dropped to a substantial negative dollar figure.

Unless new authority is provided in 1977—to be available in fiscal year 1978—existing commitments will not be funded and, more importantly, no new commitments will be made. This would jeopardize plans to revitalize several American urban areas and would create a damaging pause in Federal urban transportation assistance.

Authority for a formula apportioned program of transit assistance to all urbanized areas which could be used for operating assistance, as well as, for capital grant assistance, was a landmark section of the 1974 National Mass Transportation Assistance Act. This 6-year program permitted Federal participation in the rapidly escalating local and State efforts to provide operating subsidies. These subsidies have permitted public transportation services to continue and expand with userfares held to reasonable rates in accordance with local decisions on the level of subsidy.

The decision to subsidize mass transit services has had a dramatic impact on public transportation ridership which has risen nationally during the past 4 years. In many areas, ridership increases can be closely tied to public policy decisions on subsidy and fare levels and to the amount of operating expenses devoted to service innovation, expansion, and promotion. The array of success stories includes ridership increases between 1971 and 1975 of 67 percent in Los Angeles; 0.4 percent in Chicago; 13 percent in San Francisco; 2 percent in Washington, D.C.; 17 percent in Pittsburgh; 24 percent in Minneapolis-St. Paul; 7 percent in Baltimore; 30 percent in Seattle; 18 percent in Miami; 115 percent in San Diego; 31 percent in Atlanta; 27 percent in Cincinnati; 48 percent in Kansas City; 79 percent in Denver; 102 percent in San Jose; 58 percent in Phoenix; 47 percent in Portland, Oreg.; 17 percent in Providence; 23 percent in Norfolk-Portsmouth; 110 percent in Sacramento; 41 percent in Eugene, Oreg.; 44 percent in Madison; and 12 percent in Salt Lake City.

After 3 years of experience, the major deficiency in the formula grant program has been an insufficient amount of funds. This is especially true when we take into consideration the increased participa-

tion of local and State government in subsidizing mass transportation. When operating assistance was first debated in the Congress, an overall Federal share of approximately one-third the aggregate subsidized requirement was envisioned. However, the final legislative solutions dropped the Federal share to approximately 18 percent with local and State governments contributing approximately 82 percent of the required subsidies. Therefore, an increase in the total amount of section 5 funds is now called for. This additional Federal participation must be forthcoming if we are to continue to improve public transportation throughout our Nation.

Many of our largest cities, which have made the most important local and State transit commitments are desperately in need of further Federal assistance to prevent service cutbacks, fare increases, and the loss of passengers. Other areas have the additional complication of subsidizing commuter railroads where necessary funding must be increased due to railroad reorganizations and the threat of abandonment of transit services by private railroad companies. Essential commuter railroad services are a vital, efficient, urban transportation resource which cannot be permitted to disappear. In other areas, additional Federal funds could bring about service innovations, and improvements, and the development of special services to dramatically increase transit passengers.

To provide supplemental resources to assist these high impact areas, the National Mass Transportation Assistance Act of 1977 provides a discretionary fund of $250 million a year, for the next 5 years. Without these additional funds, we would be permitting the decay of the mass transportation systems which offer the most important opportunities for efficient and productive urban transportation system improvements.

This legislation would also extend the formula grant program from its current expiration date of 1980 to 1982 thus, providing a 5-year Federal commitment to 279 urbanized areas, enabling each area to plan ahead for service, equipment needs, and local financing. A firm 5 year program is essential if we are to stabilize public transportation services and continue to increase ridership.

Mr. President, the National Mass Transportation Assistance Act of 1977 would authorize a 5-year capital grant program of increasing amounts averaging $2.28 billion per year. The authorizations would begin at $1.9 billion in 1978 and increase to $2.8 billion in 1982, with intermediate amounts of $2 billion in 1979, $2.2 billion in 1980 and $2.5 billion in 1981.

These obligations levels compare with recent levels of $1.196 billion in fiscal year 1975, $1.100 billion in fiscal year 1976 and $1.250 billion authorized in fiscal year 1977.

In addition, in order to stabilize local equipment replacement programs and to secure regular funding for this purpose from the capital grant program for all urbanized areas, a set aside of $500 million per year for new bus equipment purchases is created.

This set aside is to be administratively apportioned to urbanized areas so that they will not have to compete with large rail construction projects for capital grant funds and to permit each area to make replacement plans based on assured availability of Federal funding.

This legislation would also extend the existing formula grant program through 1982 and thereby continue the predictability of assistance for a 5-year period. Authorizations for 1981 and 1982 rise at a comparable rate as the original 1975–80 levels and are $1.1 billion and $1.25 billion respectively. An additional $125 million is provided for 1980 to replace a like amount which was used for the transition quarter between fiscal year 1976 and fiscal year 1977.

In order to increase the Federal share of aggregate operations subsidy needs and to respond to special impact problems and the need for service innovations. This legislation would provide for a new discretionary fund of $250 million per year for the next 5 years. These funds would be made available as supplements to the section 5 formula grant program. The purpose of this new program is to alleviate the effects of the impact on service and transit ridership that have resulted from the initial three years of the formula grant program. It will increase the total availability of Federal funds for operating assistance to about 25 percent of the aggregate subsidy requirements and will assist urbanized areas in providing innovative and specialized services. This new program will also help us to respond to the national problem of maintaining essential commuter railroad services in those areas affected by the recent railroad reorganization and where services are in imminent danger of abandonment.

Also, where urbanized areas are unable to obligate formula grant funds within 2 years after they are apportioned, these funds will be made available to all urbanized areas under the new discretionary section 5 authority. Fiscal year 1975 formula funds remaining after September 30, 1977, will be the first funds to be used in this manner.

In addition, this legislation includes all of the amendments to the Urban Mass Transportation Act of 1964 which were passed by the Senate in September 1975 (S. 662), and on which the House of Representatives failed to act. In 1974, the Congress set aside $500 million out of the capital grant program to be used in non-urbanized areas.

However, a program of only capital assistance to these areas is insufficient to deal with the pressing need for improved services. Therefore, under this legislation these funds would be authorized for use for operating assistance, as well as for capital assistance. S. 662 also included provisions providing for accessible mass transportation for the elderly and the handicapped. A loan forgiveness program, fellowship assistance grants, an expanded definition of construction and new reporting, and update requirements which would effectively create the means for the Congress to review the urban mass transportation program every 2 years.

Mr. President, the enactment of the National Mass Transportation Assistance Act of 1977 is of the utmost necessity if we are to continue our progress in providing efficient urban mass transportation throughout our Nation. This is a task which the Congress began in 1961 as a demonstration program and which today has blossomed into a multibillion dollar program.

Modern mass transportation systems are now under construction in Atlanta, Ga. and Washington, D.C. Initial efforts have also been undertaken in Detroit, Mich.; Miami, Fla.; Baltimore, Md.; and northern New Jersey. In addition, cities such as Buffalo, N.Y.; Denver, Colo.; Los Angeles, Calif.; and Dayton, Ohio, have also begun to take the first steps forward. The Federal commitment contained in this proposed legislation will encourage these cities in their endeavors and give impetus to other cities to provide improved urban mass transportation. If we are to reach our goals of alleviating air-pollution, traffic congestion, rebuilding our inner cities and resolving the energy crisis, our Nation's No. 1 priority must be urban mass transportation.

Mr. President, I ask unanimous consent to have printed in the RECORD a short summary of the fiscal impact of the National Mass Transportation Assistance Act of 1977, together with the bill.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 208

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Mass Transportation Assistance Act of 1977".

SEC. 2. Section 4(c) of the Urban Mass Transportation Act of 1964 is amended by striking out the second through the fourth sentences thereof and inserting in lieu thereof the following: "None of the amounts authorized under the preceding sentence may be obligated after September 30, 1977. There are authorized to be appropriated such sums as may be necessary to liquidate the obligations incurred under this subsection.".

SEC. 3. Section 4 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(e) To finance grants and loans under section 3 of this Act, there are authorized to be appropriated not to exceed $11,400,000,000 for the period ending on September 30, 1982. The aggregate of the amounts appropriated under this subsection may not exceed $1,900,000,000 prior to October 1, 1978; $3,900,000,000 prior to October 1, 1979; $6,100,000,000 prior to October 1, 1980; and $8,600,000,000 prior to October 1, 1981. Appropriations pursuant to the authority of this subsection may be made in an appropriation Act for a fiscal year preceding the fiscal year in which the appropriation is to be available for obligation and shall remain available until expended.".

SEC. 4. Section 3 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(1) The first $500,000,000 appropriated and available for obligation under this section for each fiscal year beginning after September 30, 1977, shall be available only for grants to assist State and local public bodies in financing the acquisition of equipment for use, by operation, lease, or otherwise, in mass transportation service in urban areas. Grants to eligible applicants in any urbanized area shall not exceed the sums allocated to that area under a formula which the Secretary shall develop and publish not later than June 30, 1977. To permit applicants to develop adequate plans for the utilization of such sums, the Secretary shall advise the appropriate local officials in each urbanized area of the amount that is expected to be available each year not later than 90 days prior to the beginning of the fiscal year in which such sums will be available.".

SEC. 5. Section 5 of the Urban Mass Transportation Act of 1964 is amended—

(1) by striking out subsection (c)(2) and inserting in lieu thereof the following:

"(2) There are authorized to be appropriated to finance grants under this section not to exceed $2,475,000,000 for the period ending on September 30, 1982. The aggregate amount of appropriations pursuant to this paragraph shall not exceed $125,000,000 prior to October 1, 1980; and $1,225,000,000 prior to October 1, 1981. Appropriations pursuant to the authority of this paragraph may be made in an appropriation Act for a fiscal year preceding the fiscal year in which the appropriation is to be available for obligation.";

(2) by inserting at the end of subsection (c) the following new paragraph:

"(3) Sums apportioned under paragraph (1) of subsection (b) shall be available for obligation by the Governor or designated recipient for a period of two years following the close of the fiscal year for which such sums are apportioned, and any amounts so apportioned remaining unobligated at the end of such period shall be added to the sums available for obligation under subsection (d) for the next succeeding fiscal year.";

(3) by redesignating subsections (d) through (n) as subsections (f) through (p), respectively, and by inserting after subsection (c) the following new subsections:

"(d) To finance additional grants under this section, there are authorized to be appropriated not to exceed $1,250,000,000 for the period ending on September 30, 1982. Appropriations for such purpose shall not exceed $250,000,000 in any one year. Sums so appropriated shall remain available until expended. Appropriations under this subsection may be included in an appropriations Act for a fiscal year preceding the fiscal year which the appropriation is to be made available for obligation.

"(e) (1) The Secretary may approve as a project for financing through grants under subsection (d), on such terms and conditions as he may prescribe, (A) the acquisition, construction, or improvement of facilities or equipment for use, by operation or lease or otherwise, in mass transportation service (B) the payment of operating expenses to improve or to continue such service by operation, lease, contract, or otherwise, (C) the payment of capital or operating expenses to carry out new, innovative, or specialized mass transit service, (D) the payment of operating expenses related to regional commuter rail service, or (E) the payment of funds related to operating performance and the achievement of operating results under criteria established by the Secretary.

"(2) The Secretary shall issue such regulations as he deems necessary to administer this subsection.";

(4) by striking out "under this section" in the first sentence of subsection (h), as redesignated, and inserting in lieu thereof "under subsection (c)"; and

SEC. 6. The last sentence of section 4(c) of the Urban Mass Transportation Act of 1964 is amended by inserting before the period at the end thereof a comma and the following: "and such $500,000,000 may be used in such areas for the payment of the cost of construction projects or for the payment of subsidies for operating expenses. Grants for assistance in other than urbanized areas shall be subject to such terms, conditions, requirements, and provisions (similar as may be appropriate to those applicable to grants under section 5) as the Secretary may determine to be necessary or appropriate for other than urbanized areas".

SEC. 7. Section 10 of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"GRANTS FOR TRAINING PROGRAMS

"SEC. 10. The Secretary is authorized to make grants to States, local public bodies, and agencies thereof and private mass transportation operators to provide fellowships for training of personnel employed in managerial, technical, and professional positions in the urban mass transportation fields. Fellowships shall be for not more than one year of training in public or private training institutions offering programs having application in the urban mass transportation industry. The recipient of a fellowship under this section shall be selected on the basis of demonstrated ability and for the contribution which he can reasonably be expected to make to an efficient mass transportation operation. The assistance under this section toward each fellowship shall not exceed the lesser of $12,000 or 75 per centum of the sum of (1) tuition and other charges to the fellowship recipient, (2) any additional costs incurred by the educational institution in connection with the fellowship and billed to the grant recipient, and (3) the regular salary of the fellowship recipient for the period the fellowship (to the extent that salary is actually paid or reimbursed by the grant recipient)."

SEC. 8. Section 12(c) of the Urban Mass Transportation Act of 1964 is amended—

(1) by striking out "and" at the end of clause (4);

(2) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(6) the term 'construction' means the supervising, inspecting, actual building, and all expenses incidental to the construction, reconstruction, or acquisition of facilities and equipment for use in public mass transportation, including designing, engineering, location surveying, mapping acquisition of right-of-way, relocation assistance, acquisition of replacement housing sites, acquisition and rehabilitation, relocation, and construction of replacement housing."

SEC. 9. (a) The Secretary of Transportation shall convert equipment and facilitate loans heretofore made under section 3(a) of the Urban Mass Transportation Act of 1964 or title II of the Housing Amendments of 1955 (42 U.S.C. 1492), to grants under the conditions set forth below. A grant agreement for the acquisition, construction, reconstruction, or improvement of facilities and equipment under section 3(a) of the Urban Mass Transportation Act of 1964 shall provide for forgiveness of principal and interest on a loan previously made in lieu of a cash grant in the amount forgiven. Such grant shall be subject to such terms and conditions as the Secretary may deem necessary and appropriate, taking into account the degree of completion of the project financed with the loan.

(b) In lieu of the local matching share otherwise required, the grant agreement may provide that State or local funds shall be committed to mass transportation projects in the urbanized area, on a schedule acceptable to the Secretary of Transportation, in an amount equal to the local share that would have been required had the amount of principal and interest forgiven been the Federal share of a capital grant made when the original loan was made. The State or local funds contributed under the terms of the preceding sentence shall be made available for projects eligible for funding under section 3(a), and may not be used to satisfy the local matching requirements for any other grant project.

SEC. 10. Section 4(c) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following: "To assure orderly planning and program development under section 3, the Secretary shall report to Congress on or before February 1, 1980, a detailed estimate of the cost of grants to be made under section 3 for providing public mass transportation service in urban areas for each fiscal year within the period beginning with fiscal year 1980 and ending with fiscal year 1984. On or before February 1, 1982, the Secretary shall report to Congress a detailed estimate of the cost of grants to be made under section 3 for providing public mass transportation service in urban areas for each fiscal year within the period beginning with fiscal year 1978 and ending with fiscal year 1986."

SEC. 11. Section 16 of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"MASS TRANSPORTATION FACILITIES AND EQUIPMENT TO MEET THE NEEDS OF ELDERLY AND HANDICAPPED PERSONS

"SEC. 16. (a) It is hereby declared to be the national policy that—

"(1) elderly and handicapped persons have the same right as other persons to utilize mass transportation facilities and services;

"(2) special efforts shall be made in the planning, design, construction, and operation of mass transportation facilities and services so that the availability to elderly and handicapped persons of mass transportation which they can effectively utilize will be assured; and

"(3) all Federal programs offering assistance for mass transportation (including the programs under this Act) should effectively implement this policy.

"(b) The Secretary shall require that projects receiving Federal financing assistance under this Act shall be planned, designed, constructed, and operated to allow effective utilization of mass transportation services by elderly and handicapped persons who are unable without special facilities or special planning or design to utilize such facilities and services effectively. The Secretary shall not approve any program or project under this Act unless he finds that the program or project complies with the requirements mandated by this section. The Secretary shall, as part of carrying out this section, require the following:

"(1) Effective immediately, any new vehicle, station, building, or other structure for any new rapid rail system or for any new extension to an existing rapid rail system if the extension forms a usable segment, and any other new vehicle integrated with such a system when feasible shall be subject to accessibility standards issued by the Secretary. Standards issued under this paragraph

shall insure accessibility by elderly and handicapped persons.

"(2) The Secretary shall require that mobility for elderly and handicapped persons is available in each urbanized area requesting a grant or loan under this Act. The Secretary shall determine that this requirement is being met if the applicant demonstrates detailed plans for meeting this requirement either by the provision of a wheelchair accessible regular fixed route system within a reasonable time period or in the alternative provision of a substitute service that provides comparable coverage and service levels as is provided by the regular fixed route system. In order to assure such effective mobility, the Secretary shall prescribe the use of all or such portion of such grants or loans as are necessary to be utilized for the purchase of wheelchair accessible buses or other step entry vehicles.

"(c) In addition to the grants and loans otherwise provided for under this Act, the Secretary is authorized to make grants and loans—

"(1) to States and local public bodies and agencies thereof for the specific purpose of assisting them in providing mass transportation services which are planned, designed, and carried out so as to meet the special needs of elderly and handicapped persons, with such grants and loans being subject to such terms, conditions, requirements, and provisions as are applicable to grants and loans made under section 3(a), and for the purposes of all other laws, any grant or loan under this subsection shall be deemed to have been made under such section; and

"(2) to private nonprofit corporations and associations for the purpose of assisting them in providing transportation services meeting the special needs of elderly and handicapped persons for whom mass transportation and handicapped persons for whom mass transportation services planned, designed, and carried out under paragraph (1) are unavailable, insufficient, or inappropriate, with such grants and loans being subject to such terms, conditions, requirements, and provisions (similar insofar as may be appropriate to those applicable to grants and loans under paragraph (1)), as the Secretary may determine to be necessary or appropriate for purposes of this paragraph.

Of the total amount of the obligations which the Secretary is authorized to incur on behalf of the United States under the first sentence of section 4(c), 2 per centum may be set aside and used exclusively to finance the programs and activities authorized by this subsection (including administrative costs).

"(d) Of any amounts made available to finance research, development and demonstration projects under section 6, after the date of the enactment of this section, 1½ per centum may be set aside and used exclusively to increase the information and technology which is available to provide improved transportation facilities and services planned and designed to meet the special needs of elderly and handicapped persons.

"(e) For the purposes of this section, the term 'elderly and handicapped persons' means any individual who, by reason of illness, injury, age, congenital malfunction, or other permanent or temporary incapacity or disability, including any individual who is nonambulatory wheelchair bound or who has semiambulatory capabilities, is unable without special facilities or special planning or design to utilize such facilities and services effectively.

"(f)(1) Effective immediately, a local advisory committee (at least half of the members of which shall be elderly or handicapped persons) shall be established for each geographical area in which assistance under section 3 or 5 is being furnished. The committee shall be utilized in drawing up a detailed timetable for compliance with this subsection and in carrying out provisions of this subsection. A project agreement for assistance under either such section shall specify the time, not to exceed ninety days from the grant of assistance, for implementation of the timetable.

"(2) Effective immediately, the service proposed to be provided for elderly and handicapped persons shall be presented at the public hearing required as part of the application process for assistance under section 3 of this Act.

"(g) Technical study grants made under section 9 of this Act in support of local transportation planning (including grants made for the fiscal year 1977 planning program) shall include work elements necessary to produce by July 1, 1978, a comprehensive local plan and implementation schedule for developing public transportation service for elderly and handicapped persons within the planning area.

"(h) The Secretary shall establish a National Advisory Council on Mass Transportation for Elderly and Handicapped at least 50 per centum of the members of which shall be elderly or handicapped persons. The Advisory Council shall advise and consult with the Secretary of Health, Education, and Welfare and the Secretary of Transportation on all matters relating to mass transportation for elderly and handicapped persons.

"(i) On or before October 1, 1978, the Secretary shall prepare and submit to the Congress a comprehensive report on the mass transportation needs of elderly and handicapped persons, including information generated under technical study grants subject to the requirements of subsection (g) of this section; research, development, and demonstration activities undertaken in furtherance of the national policy set forth in subsection (a); the progress made in assuring the effective utilization by elderly and handicapped persons of mass transportation services and facilities assisted under this Act, and additional measures to assure such effective utilization; and a determination of the economic impact of regulations adopted under this section as measured in production, productivity, employment, prices, and incomes or other economic indicators as the Secretary may deem appropriate, and a determination of the benefits resulting from such regulations relative to the costs associated with implementing them."

SUMMARY OF FISCAL IMPACT OF NATIONAL MASS TRANSPORTATION ASSISTANCE ACT OF 1977

Section 3 authorizes the following amounts:

$1.9 billion for fiscal year 1978, $2.0 billion for fiscal year 1979, $2.2 billion for fiscal year 1980, $2.5 billion for fiscal year 1981, $2.8 billion for fiscal year 1982.

For the capital grant program, $3,798 billion is still unobligated so that total new authorizations under the Act would amount to $7.702 billion.

For the formula grant program, money has already been authorized for the years 1978, 1979, and 1980. These sums are not included in this bill, except for $125 million for 1980. This $125 million was used during this year's transition quarter for the formula grant program and was taken out of 1980 funds and is thus, being replaced.

For fiscal year, 1981, the formula grant program would be funded at a $1.1 billion level and for fiscal year 1982 at a $1.25 billion level. Thus, an additional $2.475 billion in new authorizations would be necessary to fund the Section 5 program plus an additional $1.25 billion for the new discretionary fund program which would be used to supplement Section 5 formula grants.

Total new authorizations under the 1977 Act would thus, come to $11.427 billion for the full 5 year period through 1982 (Budget impact for 1978 would amount to $250 million and $550 million for 1979).

AMENDMENTS SUBMITTED FOR PRINTING

REORGANIZATION OF SENATE COMMITTEE SYSTEM—SENATE RESOLUTION 4

AMENDMENT NO. 12

(Ordered to be printed and referred to the Committee on Rules and Administration.)

Mr. WILLIAMS. Mr. President, on behalf of myself and Senators PROXMIRE, TOWER, BROOKE, MCINTYRE, and SPARKMAN, I send to the desk an amendment to Senate Resolution 4, reorganizing the committee system of the Senate and for other purposes. I ask that it be printed and referred to the Committee on Rules and Administration.

Mr. President, this amendment is designed to preserve the jurisdiction of the Senate Committee on Banking, Housing and Urban Affairs and to make explicit in the Senate rules that committee's jurisdiction over urban mass transportation. Over the years, the Committee on Banking, Housing and Urban Affairs has been recognized for its expertise in the field of urban affairs of which urban mass transportation is an integral part. This amendment would preserve that jurisdiction and not take away jurisdiction from any committee.

I now ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 5, line 24, strike out "except for urban mass transit" and insert, "including urban mass transit".

On page 8, line 7, strike out "12 Urban mass transit".

ADDITIONAL STATEMENTS

THE INTERNATIONAL MONETARY FUND

Mr. BELLMON. Mr. President, the International Monetary Fund recently loaned almost $4 billion to the Government of Great Britain and $36 million to the Vietnamese. These loans are upsetting to me and I believe to others in the Senate.

They cause me, as a member of the Appropriations Committee, to wonder whether I can continue to support budget requests for funding the International Monetary Fund.

The IMF was created to aid member nations that experienced problems with balance of payments. The United States urged IMF's creation in the 1940's and supplied 20 percent of the original funds.

These funds were misused in making the $36 million loan to Vietnam. I and many other Americans doubt that Vietnam is a bona fide member of the International Monetary Fund.

South Vietnam became a Fund member in 1956, but the destruction of that Government by invaders from the north ended its representation. The new rulers of Vietnam do not become IMF members by mounting military offenses and invading the homes of another government's citizens. The new rulers do not become members by subverting the peace accord negotiated with the United States.

While the Vietnamese Communists and some other countries claim that past South Vietnamese representation gives the new rulers access to membership, the United States has expressed its opposition to the idea.

As I said, the IMF was created to extend loans to member countries to aid the solution of balance-of-payment problems. It is apparent that a deficit in balance of payments is not the major reason for the $36 million loan to the Vietnamese Communists.

The Vietnamese and the IMF may point to various statistics purported to represent the import-export experience of Vietnam, but the true use of this money will be to repair war damages—to make repairs so internal development can progress. Export, as we might infer from Cambodian development since the Communist takeover, is not the major concern.

The IMF, in making the loan, said Vietnam is having internal transportation difficulties. These difficulties exist because the lines of transportation were cut during armed conflict.

The IMF also said Vietnam's fishing trawler availability has been reduced. It was reduced by the number of vessels sent to the bottom during armed conflict.

In negotiating a peace agreement, the United States offered to help pay for the repair of damages from the preceding conflict, but the Vietnamese Communists broke that agreement with their spring 1973 offensive.

This country should not be a party to action that gives the Vietnamese war damages aid through the back door. Let other communist nations that helped prolong the war and that provided the weapons to battle the offensive pay for repairs.

Let us not reward military aggression.

In the case of Great Britain, the IMF is using American dollars to subsidize wasteful socialist programs.

Some $4 billion is being sent to the British to enable them to continue massive Government support of social programs—to continue throwing away money.

Britain today feels the result of trying to place too great a burden on government. Britain today feels the result of deserting private enterprise. Britain today feels the result of destroying the initiative of her people to take care of themselves.

Until the spending habits of the British Government change, we, through the IMF, will be wasting our money with loans such as this one.

Let us not pay for government mismanagement here or abroad.

Let us look at the International Monetary Fund to determine whether our 20 percent funding is being wasted or is being spent contrary to the interests of the American people or is being used as it was originally intended.

DEATH OF SENATOR PHILIP A. HART

Mr. THURMOND. Mr. President, the death of Senator Philip A. Hart has deprived the Senate of a valued friend and the Nation of a humane and conscientious servant. Although he had planned to retire from public life at the end of the 94th Congress, his colleagues of both parties and all political persuasions were hopeful of enjoying, as circumstances might permit, his continued counsel and company. I deeply regret that these hopes cannot now be realized, and, though not one of Senator Hart's closest associates here, I wish to add a few words of respectful tribute to those already spoken.

Senator Hart and I served together on the Judiciary Committee for many years. We often disagreed on the issues that came before us, and we sometimes disagreed profoundly. I think I can say, however, that we never disagreed bitterly. Bitterness, and petty feelings of all kinds, were entirely alien to his character. Moreover, his own kindliness, gentleness, and modesty encouraged the same qualities in others. His was a character that compelled not just admiration, but imitation. Indeed, it might serve as a model for all of us he leaves behind in the contentious world of politics.

It is above all for these rare personal qualities, and for the great sympathy with his fellowman that underlay them, that Philip Hart will live on in my memory. I leave it to others to determine and declare how these attributes were translated into legislative achievement. One other achievement, though, I believe I may appropriately comment upon.

Senator Hart was a lifelong believer in the dignity and usefulness of politics. While some critics railed at all politics as pointless, and all politicians as corrupt, Senator Hart stoutly defended not only the system itself but the men involved in it. Perhaps he was inclined to judge too generously, seeing his own personal virtues too easily in other men. Surely, though, on this point he was more right than wrong. Any profession that can attract the likes of Philip Hart has much to recommend it. The very presence in the Senate of so unselfish and unassuming a man was an honor to us all.

ECHOES FROM OUR BICENTENNIAL

Mr. BURDICK. Mr. President, one of North Dakota's finest citizens has written the attached tributes to America on the occasion of the Bicentennial. I would like to have these poems, "Echoes From Our Bicentennial," by Mr. Ole A. Olson of Fargo, N. Dak., printed in the RECORD.

There being no objection, the poems were ordered to be printed in the RECORD, as follows:

ECHOES FROM OUR BICENTENNIAL 1976

(By Ole A. Olson)

Happy Birthday, dear America, Congratulations to you!
We hoist in adoration, the red, the white and blue.

The war of separation extended into years,
You shed the yoke of England, at the cost of blood and tears.

The champions for independence were brave and fearless men,
Their lives became expendable by the wielding of a pen.
They knew, that should the revolution fail,
They'd all be shot, or sent to jail.

The thirteen states were scattered from Georgia up to Maine;
To weld them all together, was often tried in vain.
The larger states were greedy, and wanted special rights,
The smaller states objected, which started verbal fights.

The Union was just established before
Some states seeded, and spawned a civil war.
But Abraham Lincoln, diplomatic and bold,
Ushered the rebels back into his fold.

With peace again restored, the Ship of State rode high,
Its borders were extended beyond the Western sky.
Immigrants by the thousands, unafraid of toil,
Settled the Western prairies, to plow and till the soil.

The politicians rant and rave, and fight with padded gloves,
The voter, hard of hearing, supports the one he loves.
The Communists and Kings, may rule across the sea,
But bountiful American is good enough for me.

My own Centennial will soon be due,
May God see fit that this comes true.
A couple of years, I'll have to wait,
For now I'm only ninety-eight.

TV COMMERCIALS

Mr. HATHAWAY. Mr. President, every television viewer is familiar with those advertisements that depict the virtues of beer-drinking in living the vigorous, athletic life. These beer commercials suggest to the viewer, directly and subliminally, that drinking the sponsor's product is, first, a form of reward for achievement; and second, promotive of good health and the good life.

In many of these beer commercials the appeal to America's teenage population is explicit. Athletic themes are featured. One recent commercial, run during the presentation of football games this past season, shows a group of teenagers in a playground game of one-on-one basketball. The youngsters are depicted breaking for the neighborhood tavern to celebrate their athletic prowess with a round of the sponsor's product.

Another recent TV spot shows a young man celebrating his birthday at a bar. He is congratulated on attaining manhood by the bartender, who serves him a draft of the advertiser's brew. The implication is unmistakable. The ad relates the achievement of manhood to alcohol imbibing.

Mr. President, I do not want my remarks on this subject misunderstood. For the time being, I do not oppose, per se, with the current laws and regulations permitting alcoholic beverages to be advertised on television, or in other media. But there are also laws, and regulations that place specific limits on the manner in which any product can be advertised,

and it is my belief that such beer advertisements as I have described violate the spirit, if not the letter, of these legal restrictions.

As chairman of the Subcommittee on Alcoholism and Narcotics, I am familiar with the alarming statistics which indicate a rising incidence of alcoholism among young Americans, I am genuinely concerned over the apparent indifference with which advertisers of beer and other alcoholic beverages, the media, and the Federal regulatory agencies with jurisdiction over such advertising view this problem.

The pernicious effect of excessive alcohol consumption on health is well known. I do not need to refer to the problem of alcoholism to make this point. It is sufficient to say that excessive beer drinking—and the thrust of these advertisements, it seems, is that one is never enough—is not the road to athletic achievement or the robust life. The suggestion, particularly to young people, that the way to cap off a good workout is to reward yourself with a couple of beers for the road—the association of healthful living with beer drinking—is a potbellied deception of viewers.

Nevertheless, the Federal Trade Commission, while currently proposing extensive new trade regulation rules governing the advertising of food and its effect on health, specifically exempts alcoholic beverages from the purview of these changes. I believe this to be a serious error, and one which the Commission should move speedily to correct.

Why should direct or implicit claims that a particular food provides "energy" be prohibited unless the advertisement also discloses that the energy is "supplied by calories" when the same disclosure is not required of beer advertisers? Do the calories contained in a Hostess Twinkie package loom, in the vision of the FTC, as a greater threat to the health of young Americans than those contained in a six-pack?

Needless to say, I do not make light of this subject except to point out that there seems to be a serious dislocation of priorities in the Federal Trade Commission on this subject. I wholeheartedly support the FTC's continuing effort to protect the American consuming public from misleading, deceptive, and unfair advertisements, both in the print and electronic media. But I submit that any effort to amend the trade rule on advertising as it affects health with regard to "energy" claims which does not take in alcoholic beverage commercials as they now appear on TV falls short of the mark.

I am, frankly, surprised that the FTC has not taken cognizance of the advertising misrepresentation implicit in specific advertisements such as the ones I have referred to. I am doubly surprised to know that the agency, while in fact directing its attention and resources toward protecting consumers in the area of food-and-energy claims advertisements, seems to be going out of its way to exclude alcoholic beverage advertisers from its proposed new rule.

In testimony on this subject before my Subcommittee on Alcoholism and Narcotics last March, a representative of the Federal Trade Commission testified that his agency had previously deferred to the Bureau of Alcohol, Tobacco and Firearms, BATF, in the Department of the Treasury, on the subject of advertising. However, that individual also testified that

> If there is a problem of a relationship between advertising and alcohol abuse, it is the law of unfairness, rather than the law of deception, that is going to reach that problem.

The BATF, as was clearly pointed out, has been given neither statutory jurisdiction nor sophisticated research and investigative capabilities in the area of "unfairness."

At that time, it was concluded that FTC could in fact consider alcohol advertising, in the context of its own legislative mandate, with no further amendments to the law. For that reason, it seems to me that the inclusion of alcoholic beverage advertising within the proposed new rule is absolutely necessary to curb the current trends in TV beer advertising and other alcohol advertising in broadcast and other media which would lead the youth of America to believe that the road to the good, healthy, vigorous, athletic life is paved with beer cans.

I would, of course, prefer that advertisers and broadcasters themselves might have recognized the misleading nature and social harm of such commercials before beaming them to the public. That failing, however, it remains for the Federal Trade Commission to act in the public interest. The FTC should move immediately to include the advertising of alcoholic beverages within its proposed new rule governing food advertising in general.

If the FTC continues to refrain from including alcohol advertising in its new rules and regulations, however, then it will be my intention to amend the FTC authorizing legislation to include a specific reference to jurisdiction over alcohol advertising. I did so last year, following my subcommittee's hearings on this subject, only to see the efforts die at the end of the session, when the House failed to report a final FTC measure.

RESIGNATION OF KENNETH LAZARUS AS ASSOCIATE COUNSEL TO THE PRESIDENT OF THE UNITED STATES

Mr. THURMOND. Mr. President, on December 17, 1976, President Ford accepted the resignation of Kenneth Lazarus as associated counsel to the President of the United States. During the period 1971–74, Mr. Lazarus served on the minority staff of the Senate Judiciary Committee, completing his service as minority counsel to the full committee.

As the ranking Republican on the Judiciary Committee, I would like to take this opportunity to wish Mr. Lazarus the best of success in the private practice of law. I also ask unanimous consent that Mr. Lazarus's letter of resignation and the President's acceptance of his resignation be printed in full in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, December 10, 1976.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: This is to submit my resignation as Associate Counsel to the President of the United States, effective January 15, 1977.

It has been a great honor as well as a unique and enriching experience to have served on your legal staff for the past two years and I leave with a profound feeling of pride in your conduct of the office of the Presidency. May I ever be of some service to you in the future, I am hopeful that you will see fit to call upon me.

My best wishes to you and Mrs. Ford for a peaceful holiday season and a most successful future.

Sincerely,

KENNETH A. LAZARUS,
Associate Council
to the President.

THE WHITE HOUSE,
Washington, December 17, 1976.

Hon. KENNETH A. LAZARUS,
The White House,
Washington, D.C.

DEAR KEN: I have your letter, and it is with special gratitude for your many contributions to my Administration that I accept your resignation as Associate Counsel to the President of the United States, effective January 15, 1977, as you requested.

In doing so, I welcome this opportunity to express my personal appreciation and that of our Nation for your outstanding work during the past two years. Your dedication, energy, and keen insights have been of great value to me and to our country and have truly earned for you the respect of your many colleagues in Government. I know that in the years ahead you will be able to look back with great pride on your many accomplishments as Associate Counsel.

As you prepare to return to private life, you may be sure that you take with you my very best wishes for every success and happiness in your future endeavors.

With warm regards,

JERRY FORD.

IN MEMORIAM: DR. MARTIN LUTHER KING, JR.

Mr. BAYH. Mr. President, Saturday, January 15, is the birthdate of an out standing American who made a remarkable contribution to the realization of the goals of our Nation. It is the birthdate of a man who had a prophetic vision of just how our country could be, if only all Americans would share the dream that Dr. Martin Luther King, Jr. articulated so well for the Nation he loved and served.

As we enter a new era in America's political history, and begin our third century, I think it appropriate to reiterate the message of Dr. King's unique life and poignant death. Dr. King envisioned an America in which all the scars of our past injustices would once and for all be healed. He envisioned an America in which all citizens could realize the limits of their abilities in an atmosphere free from prejudice and bigotry.

Dr. King preached a philosophy of love, tolerance, and understanding. And he realized that America, more than any other country, has the potential to realize the principles by which he lived and died. True to his philosophy, he set out to confront his adversaries. His tactics were not hate and violence. To the contrary, he utilized the most powerful weapon man possesses for achieving social change, love of one's fellow man. He taught his followers, as well as the entire world, that one must be tolerant and patient if one hopes to remove the ugly shackles of racial bigotry from around the necks of those who bear that affliction. Furthermore, he taught his followers, and also the entire world, that an individual can only break down the differences that exist among men if one is willing to take time to understand his fellow man. In essence, Dr. King took the principles of our Founding Fathers and made them applicable to the entire country. He bridged the gap that had once existed between the ideal of democracy and its limited application to more than 20 million Americans.

Because of the great service that Dr. King rendered to his country, I feel that it is appropriate that the Senate pass a resolution, which will soon be introduced by the Senator from Massachusetts (Mr. BROOKE), and which I will cosponsor, to designate January 15 as Dr. Martin Luther King, Jr. Day. Such an honor should be bestowed in behalf of the memory of a man who dedicated his life to the principle that all persons are created equal; and who sacrificed his life so that some day his dream of racial harmony and solidarity could be a reality.

DEATH OF DR. JAMES M. ARIAIL

Mr. THURMOND. Mr. President, I rise to pay a few words of tribute to Dr. James M. Ariail, one of the most distinguished educators in the history of South Carolina, who died on December 17, 1976, at the age of 92. His many years generated many accomplishments and many friendships, and he leaves behind mourners too numerous to count.

Prominent among them are the generations of students he instructed in English literature during his 70-year teaching career. As professor of English at Columbia College and, during World War II, at the University of South Carolina as well, he expounded the works of the greatest writers in our language, especially Shakespeare, with energy and imagination, winning for them thousands of new and responsive readers. His stimulating mind will be sorely missed by young students and old, in the classroom and out.

Then, there are his own readers, for Dr. Ariail was a prolific writer himself, with many published works in the fields of history and literary criticism. He wrote not only for a scholarly audience, but also for a wider public. His "The Fortune Trail," an edition of the Civil War letters of Dr. B. D. Sanders, has proven especially popular. All those who have learned from and enjoyed his works will be deeply aggrieved to learn that his pen has been stilled.

Also grieving Dr. Ariail will be the various academic institutions with which he was affiliated. Besides Columbia College and the University of South Carolina, these include Wofford College, from which he received a B.A. and an M.A. in 1905 and 1906, and the degree of doctor of literature in 1945, and the University of North Carolina, from which he gained a second M.A. and a Ph. D. in 1925. All these institutions had in Dr. Ariail a loyal and eminent alumnus whose high reputation in scholarly circles was a continuing source of pride and prestige.

Dr. Ariail was as active a churchman as he was a teacher and scholar, and his death leaves a large gap in the leadership of the College Place United Methodist Church and in the affections of all its members. Long involved in administrative work at his own church, he also gave his time, in a number of important capacities, to the South Carolina Methodist Conference. Perhaps his most characteristic form of service to the church, and certainly the one he enjoyed most, was the Sunday school class he organized and taught for more than 35 years.

Those, however, who will feel the most sorrow at the death of Dr. Ariail are unquestionably his beloved family. His survivors range through five generations, and the loss of a devoted stepson, husband, brother, father, grandfather, and great-grandfather can never be repaired. To all of his family, I extend my deepest sympathy, especially to his widow, Mrs. Belva McCall Haynsworth Ariail; his stepmother, Mrs. Annie Ariail Gerhard; his daughter, Mrs. Thomas C. Lawson; his son, Col. Thomas Muldow Ariail; his brother, Rev. Warren G. Ariail; his seven grandchildren; and his seven great-grandchildren.

Sad as this time may be for the friends and family of Dr. Ariail, there is cause for rejoicing, too. Dr. Ariail's life was long and full, and he bequeathes to those who knew him a rich and varied assortment of gifts. To his students, he leaves the love of good literature; to his readers, he leaves writings full of insight, learning, and wit; to the academic community, he leaves the credit of his name; to his fellow Methodists, he leaves a shining example of Christian service; and to his family, he leaves imperishable memories of 92 years of shared experiences and mutual affection. May the thought of these gifts serve as comfort at this time of affliction and as inspiration for the days to come.

Mr. President, at the time of the death of Dr. Ariail, two articles about him appeared in The State newspaper of Columbia, S.C. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Columbia (S.C.) State, Dec. 18, 1976]

RETIRED PROFESSOR DR. J. M. ARIAIL DIES

Dr. James Milton Ariail, 92, a retired professor of English at Columbia College and Shakespearean scholar, died Friday in the Providence Hospital.

Born in Pacolet, he was a son of the late Rev. James Warren and Carolina Hodges Ariail. He was a member of College Place United Methodist Church, where he was one of the original trustees. He organized and taught the Ariail Sunday School Class for over 35 years. He was an honorary member of the administrative board of the church and was a lay leader for many years.

He received his bachelor's degree from Wofford College in 1905, his master's degree in English from the same college in 1906; a second master's from the University of North Carolina and his PhD from the university in 1925. He received a Doctor of Literature degree from Wofford College in 1945.

During World War II, when there was a shortage of college teachers, Dr. Ariail served simultaneously at Columbia College and the University of South Carolina as a professor of English.

In the late 1930s, he was elevated to the post of Stackhouse Professor Emeritus of English at Columbia College. In 1925, he won the Smith Foundation Prize given by the University of North Carolina for his work in English. In the same year, he was a member of the Phi Phi Beta fraternity. Subsequently, he was made a member of Omicron Delta Kappa fraternity at the University of South Carolina.

He once served as president of the English department of the South Carolina Education Association. He was a former secretary of the faculty of Columbia College, chairman of the Board of Pensions of the S.C. Methodist Conference, and was named "Man of the Year" by the Kappa Sigma fraternity.

He was former secretary for the Methodist Conference Board of Claimants, where he was active in the establishment of a retirement system for ministers of the S.C. conference.

Dr. Ariail was former secretary of the Southern Christian Advocate (now the Methodist Advocate) for many years.

His published works include:

"Pippa Passes. A Dramatic Failure;" "In Defense of Bessanio," in the Shakespeare Association bulletin; "The Grammarians' Funeral," P.M.L.A. Journal; "Take Two Chairs," in Notes and Adversaries; "Epworth Notes," Methodist Publishing House; "Methodist Emphasis in Browning's Poetry," South Carolina Methodist Conference; "History of Columbia College," Columbia College Press.

Also, "History of the College Place Methodist Church;" "The Fool, Kent and Cordelia: A Conjecture;" "The Fortune Trail," Civil War letters of Dr. B. D. Sanders.

Surviving are his widow, Mrs. Belva McCall Haynsworth Ariail; his stepmother, Mrs. Annie Ariail Gerhard of Columbia; a daughter, Mrs. Thomas C. Lawson of Huntsville, Ala.; a son, Col. Thomas Maldrow Ariail of Columbia; a brother, the Rev. Warren G. Ariail of Orangeburg; seven grandchildren and seven great-grandchildren.

He was predeceased by a son, James Milton Ariail Jr., who died in 1969, and a daughter, Mrs. Saly Cecilia Ariail Taylor, who died in 1960.

Services will be 3 p.m. Sunday in the College Place United Methodist Church, conducted by the Rev. Ray P. Hook and the Rev. R. Wright Spears. Burial will be in Elmwood Cemetery.

Talbert-Shives Funeral Home is in charge.

[From the Columbia (S.C.) State, Dec. 21, 1976]

TRIBUTE TO A TEACHER

Each generation of educators produces its own master teachers, but seldom does one teacher extend his mastery over as many generations as did Dr. James Milton Ariail.

Before death claimed him last Friday at the age of 92, the Professor Emeritus of Eng-

lish at Columbia College could look back in an illustrious teaching career which had its inception when he was graduated from Wofford College in 1905. In the 71 years since then, he added degrees to his name, laurels to his fame, and—most notably of all—thousands of students to the roster of those whose love of English literature stemmed from exposure to his instruction.

If we accept the testimony of this legion, and of his professional colleagues, he enriched countless lives by introducing them to the superb writings of Shakespeare, Milton, Browning, Keats and other luminaries of literature. But his students' memories of those great men were matched by their memories of him—not only as a teacher, but as a devout Christian whose faith sustained him through personal tragedies which might have crushed a lesser mortal.

Scholar, teacher, and writer himself—James Milton Ariail left a legacy of academic achievement and tutorial influence which imbeds his name permanently in the history of South Carolina education.

DEATH OF EDMUND A. RAMSAUR

Mr. THURMOND. Mr. President, the communications industry in South Carolina recently lost one of its most respected leaders. On December 18, 1976, Edmund A. Ramsaur, president of Multimedia, Inc., and copublisher of the Greenville News-Piedmont, died at the age of 51. The life of Ned Ramsaur was marked by high goals and great achievement—astonishingly great in view of his relative youth at the time of his death. I had the privilege of knowing this exceptional man, and I wish to put on record my admiration for him, my gratitude for all he accomplished for the people of South Carolina, and my deep sorrow at his untimely end.

Born in Greenville, S.C., Ned Ramsaur received his education from Davidson College, the University of South Carolina, and the University of Virginia, from which he graduated in 1949. In 1952, he entered journalism as Washington correspondent for the Greenville News, an enterprise which was to consume a large part of his professional energies, and his affection, for the rest of his life.

With his diligence, his insight, and perhaps above all his verbal craftsmanship, he soon won the attention and respect of his colleagues and superiors. Returning to Greenville as State editor of the News in 1955, he was named associate editor only 2 years later. Thereafter, he rose quickly through the ranks, finally becoming not only publisher of the paper, but president of its parent corporation, Multimedia, Inc. These two important positions made him, at the culmination of his career, one of the most influential figures in media circles in the entire Southeast.

His work made heavy demands upon him. Nevertheless, he somehow found the time to participate vigorously in a variety of civic activities. Devoted to the outdoors and to outdoor pursuits, especially fishing, he served as a member of the South Carolina Parks, Recreation, and Tourism Commission. In this capacity, he advocated measures that would, on the one hand, protect the natural beauty of South Carolina and, on the other, enable as many people as possible to take wise advantage of it. Indeed, Ned Ramsaur deserves a large share of the credit for the rapid growth in tourism—achieved without serious detriment to the environment—which South Carolina has recently experienced.

Ned Ramsaur, though, was more than just an outstanding newspaperman, successful businessman, and good citizen. He was also a devoted friend and family man. Those who were associated with him, whether personally or professionally, will not soon forget his openness, affability, and enthusiasm. An important man, he was never self-important; a busy man, he was never too busy for the small kindnesses and courtesies that smooth the rough edges off of life. His bright personality made him a man to shine in any crowd. The world will be duller and darker without him.

Those who will miss him most, of course, will be those who benefited most from his presence—his family. Although words cannot console for a loss of this kind, I offer my sincere sympathy to his widow, Dorothy Ann Peace Ramsaur; his son, Edmund A. "Ted" Ramsaur; and his daughter, Etca Ann Ramsaur.

There is no telling how much more Ned Ramsaur would have achieved if he had been allotted more time. Certainly, he was at the height of his powers when he died. However, it would be wrong for us to pursue these speculations too far. Rather, I think, we should adopt the same stoical attitude that he himself exhibited in his last illness. Despite the pain and the sadness, he went about his business quietly and uncomplainingly, grateful for what had been given him, resigned to what had been denied. In this matter as in so many others, he left us a worthy example. We honor his memory by following it.

Grief can have no more powerful an antidote than the memory of a man like Ned Ramsaur.

Mr. President, at the time of the death of Ned Ramsaur a number of articles appeared in South Carolina newspapers concerning the man and his achievements. In order that my colleagues may have the benefit of looking over these articles at their leisure, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Greenville News, Dec. 19, 1976]

NED RAMSAUR DIES

Edmund A. "Ned" Ramsaur, president of Multimedia Inc., and co-publisher of The Greenville News-Piedmont Co., died Saturday at his home in Greenville.

Ramsaur, 51, recently took a medical leave of absence.

He is survived by his widow, Dorothy Ann Peace Ramsaur, and two children: Edmund A. "Ted" Ramsaur Jr., and a daughter, Etca Ann Ramsaur, of 1 Rockingham Road.

The Mackey Mortuary of Greenville is in charge of arrangements. Plans for the funeral are to be announced.

Son of the late Claude and Dorcas Lott Ramsaur, he was a native of Greenville, a 1949 graduate of the University of Virginia. He attended Davidson College and the University of South Carolina.

He was active in both professional and civic organizations and his career spanned all phases of journalism, beginning in 1952 when he joined the staff of The Greenville News in Washington. He also worked in the paper's Columbia, S.C., bureau. He served as state editor of the newspaper from 1955 to 1957 when he was named associate editor of the News.

[From the News and Courier, Dec. 20, 1976]

NEWSPAPER EXECUTIVE DIES AT 51

GREENVILLE.—Edmund A. (Ned) Ramsaur, president of Multimedia, Inc., of Greenville, died Saturday at his home in Greenville. He was 51.

Ramsaur was also co-publisher of the Greenville News Piedmont and a member of the S.C. Parks, Recreation and Tourism Commission.

Recently, he had taken a medical leave of absence from the publishing firm. Multimedia owns and operates newspapers and radio and television stations in South Carolina, North Carolina, Tennessee, Georgia, Alabama, Louisiana, Arkansas, Kentucky and Ohio.

The son of Claude and Dorcas Lott Ramsaur, he was a native of Greenville. In 1949 he graduated from the University of Virginia, and also attended Davidson College and the University of South Carolina.

Ramsaur's career covered all phases of journalism, beginning in 1952 when he joined the Washington bureau of The Greenville News. Later he worked in the newspaper's bureau in Columbia. He was state editor from 1955 until 1957, when he was named associate editor.

Ramsaur was active in several civic and professional organizations. He was president of the Educational Foundation of the Atlanta-based Southern Newspaper Publishers Association.

Surviving are his widow, Mrs. Dorothy Ann Peace Ramsaur; a son, Edmund Ramsaur, and a daughter, Miss Etca Ann Ramsaur, all of Greenville.

The funeral will be 2 p.m. Monday at Mackey Mortuary in Greenville. A private burial will follow in Springwood Cemetery.

[From the Greenville News, Dec. 20, 1976]

EDMUND RAMSAUR

Directing daily newspapers covering a vibrant region is a demanding task because it involves intimately the infinity of the human mind and spirit as well as a complicated business and manufacturing process. It is a truism that a newspaper is people.

Those who guide newspaper operations should possess a high degree of special talents and attitudes. Among them are dedication to duty and the public weal, loyalty to the highest ideals of society, faith in people, courage to face adversity, patience, clarity of thought, intellectual honesty, dependability.

The man whose death at age 51 we mourn today possessed those qualifications and used them well to enhance the Greenville newspapers and a multi-state company of newspapers and broadcast stations.

He was Edmund A. Ramsaur, president of Multimedia, Inc., president and co-publisher of The Greenville News-Piedmont Co., his first love in the communications family, and an executive and director of other companies in the Multimedia group.

He was much, much more: he was Ned Ramsaur, a very special person to the host of newspaper and broadcast people and others who knew him as a close friend.

He was a many-faceted person; a talented newspaperman and writer before he became an executive; an energetic, inspiring executive whose horizons constantly expanded; a professional journalist who held leader-

ship posts in state, regional and national journalism organizations; an enthusiastic civic leader; a thinker; a fine conversationalist and companion; a devotee of the great outdoors and of fishing.

Because he loved Greenville and Greenville's newspapers, he gave of himself tirelessly to their service, inspiring others to do likewise. Because he loved South Carolina and this state's great natural beauty, he gave much attention to his duties as member of the State Parks, Recreation and Tourism Commission.

Ned Ramsaur was one who helped organize the successful tourism effort which has made the tourism industry the state's second largest. He played a large role in the development of a system to make widespread, wise use of and to conserve South Carolina's great outdoors. Because he loved the fields and woods and streams, he wanted as many others as possible, including future generations, to share in the bounty and beauty of the outdoors.

He also enjoyed reading and thinking. He was a word expert. He was a fine writer. He could contemplate the abstracts of the universe as well as grapple with the concrete affairs of the world.

Most of all he enjoyed people—working for people, working with people, having fun with people. His office door was open to all coworkers who sought his counsel. He was a delightful companion on any occasion, whether at a formal social or on a fishing trip. He always was the same, straightforward, witty, personable Ned.

He could have spent all his time with family and friends—with travel, fishing, camping, thinking, reading, conversing. But he was a man of action. He recognized the need for action, and plunged enthusiastically into the challenges and trials of newspaper and civic leadership.

The record shows that he excelled, that he grew constantly in his work. He continued to lead and to inspire long after illness sapped his strength, and he maintained a deep interest in these newspapers and in other affairs until the very end. Truly he was a man for all seasons.

We have suffered a grievous loss, because nobody can take Ned Remsaur's place.

We share the grief of his beloved family and extend to the members of the family our heartfelt sympathy.

To a departing friend—to Ned—we say a final word of thanks for many good things to cherish in memory of a gallant spirit.

[From the Greenville Piedmont, Dec. 20, 1976]

NED RAMSAUR MAN OF SERVICE

Edmund A. Ramsaur, known to closer associates as Ned, leaves a professional and civic void which will indeed be hard to fill.

At 51 years of age, he was a highly effective top executive of the electronic and print media firm, Multimedia, Inc., and of the Greenvile News-Piedmont Co. in which he had risen in rank as an experienced, talented newspaperman.

His extra-professional life was full in service to the Greenville region and his fellow citizens.

The latter knew Ned Ramsaur as a leader who accomplished what he and his extensive list of state, national and area affiliation set out as goals for a better life for everyone.

He was most concerned with people, and helped in many ways to make Greenville the type urban area of which we all could be proud.

His colleagues held Ned Ramsaur in warm affection, understanding fully the demands made on him by a key executive office and outside pursuits he continued almost to the last.

They knew him as a friend, as wise counsel, as one always fair and honest.

This inspired his fellow workers on the newspapers to produce an instrument substantially reflecting Ned Ramsaur's desire to contribute much to those around him, be they as close as the office or far as the papers' extensive outreach.

Even in the last days of his illness, Mr. Ramsaur maintained these interests and an unusual vitality that heartened his colleagues despite the looming sadness.

We extend to his family and other loved ones our fullest sympathies.

We know Ned Ramsaur's absence will mean many sad days ahead, and of course we all must unfortunately share a large measure of the grief.

But a man's life must be measured in terms of what he accomplished for those about him.

Ned Ramsaur was a large, large man.

His memory leaves encouragement to help fulfill the excellence we know he would have desired as the finest memorial possible.

To a good friend and fellow newspaperman, we say goodby and God speed.

GOVERNMENT ECONOMY AND SPENDING REFORM ACT OF 1977

Mr. PERCY. Mr. President, I am once again pleased to join as a sponsor of the Government Economy and Spending Reform Act, better known as the Sunset bill. This legislation can have as significant an impact on the workings of the Congress and the Federal Government as a whole as the Budget Reform Act has had.

The Sunset bill was first introduced early in 1976. It was given extensive consideration and revision by the Government Operations Committee's Subcommittee on Intergovernmental Relations, which Senator MUSKIE chairs, and on which I am privileged to serve. The revisions, which took into account the testimony of subcommittee witnesses and other interested parties, improved and refined the Sunset procedure mandated by the bill and the bill was unanimously reported by the full Government Operations Committee last August. Subsequent consideration of the bill by the Senate Rules Committee gave us the benefit of additional comments and suggestions for improvement.

The Sunset approach to Federal programing is far reaching and because we are now beginning a new Congress, our committee has an opportunity to make full use of the recommendations that have been made since the bill was first reported. For example, I have expressed reservations about the applicability of the Sunset approach to tax expenditures and I welcome the opportunity time now provides for futher examination of this new concept.

Senators MUSKIE, ROTH, and GLENN and their staffs on the Government Operations Committee have devoted many hours of work to the initiation and development of this Sunset approach to Government programing and I look forward to working closely with them again as we prepare the bill for consideration by the full Senate. In addition, I hope that the House of Representatives will begin work on its own Sunset legislation as soon as possible so that the best possible bill can be enacted during this Congress.

ARMY ASSOCIATION PAPER ON MILITARY UNIONISM

Mr. THURMOND. Mr. President, between the recess of the last Congress and the beginning of the 95th Congress, we have witnessed continued progress by unions wishing to enroll military personnel.

I plan to reintroduce later this month my bill to prohibit unionism of the Armed Forces. Last year 30 Senators joined with me in support of this legislation. Action on my bill is more pressing than ever and I plan to push hard for its early consideration.

Much has been written on the subject of military unions in the last year. However, one of the best papers I have seen is one issued on December 30, 1976, by the Association of the United States Army. The title of this paper is "Military Unionism—A Hoax and Deception." I urge my colleagues in the Congress to read it carefully, as this subject matter impacts on the national security of our Nation.

Mr. President, I ask unanimous consent that this AUSA position paper be printed in the RECORD.

There being no objection, the position paper was ordered to be printed in the RECORD, as follows:

MILITARY UNIONISM—A HOAX AND DECEPTION

For almost the past two years the Services and the Congress have been "viewing with alarm" suggestions by one or more unions that they might try to oragnize military personnel into unions and take strong action to better the lot of uniformed personnel. There has been a great deal of rhetoric, confusion and general milling around—at a rate controlled by spokesmen for the union who decide on their own when they would like to stir the pot. The situation for a nation of our stature is both incredible and intolerable and needs to be brought promptly to a halt for the good of the country.

The whole concept being bandied about, principally by the American Federation of Government Employees, is a cruel hoax and deception. Implicit in all of their fanfare is the concept that by some magic means the union could obtain for the serviceman increased compensation, better working and living conditions and a much stronger voice in the management of the Armed Forces. Such proposals display either little respect for the intelligence of the individual serviceman or a complete ignorance of our governmental system, our Constitution, and the body of law which governs our society.

This divisive issue impacts seriously on the morale of those who serve and, if for no other reason, should be stopped now.

We urge several courses of action. First, the President should immediately issue a new Executive order that would prohibit service personnel from joining a union. He already has the authority as Commander in Chief of the Armed Forces to do so.

Secondly, the Department of Defense should issue a directive to be promulgated into Service Regulations that prohibit service personnel from joining military unions, bar organizing activities on military installations and continue the prohibition of Commanders from dealing with unions.

Third, the Congress should enact promptly

legislation redefining these prohibitions in clear language so that there can be no misunderstanding of the intent of Congress and the unanimity in the Government on this subject.

Finally, the Services need to insure that wide publicity is given to all ranks explaining more clearly existing grievance machinery and insuring that all in the chain of command understand fully their responsibilities.

There will be those who will challenge the prohibition against joining a union as an infringement of the Constitutional rights of the individual serviceman. We recognize that military personnel enjoy the protection of Constitutional rights. However, those rights in this case, as they do in others, must yield to the unique role of the military. The need for discipline, obedience and unswerving loyalty is an absolute military necessity. These precepts could be seriously eroded were military personnel permitted to join servicemen's unions. By finding the needs of the military to be paramount, this situation need never arise. Moreover, there have been a variety of cases in which the Supreme Court has recognized this unique role of the military. ". . . the rights of men in the Armed Forces must perforce be conditioned to meet certain overriding demands of discipline and duty." United States Ex Rel. *Toth v. Quarles,* 350 U.S. 11 (1955). See also: *Orloff v. Willoughby,* 345 U.S. 83 (1953); *Parker* v. *Levy,* 417 U.S. 733 (1974) which states in part:

"The fundamental necessity for obedience, and the conequent necessity for imposition of discipline may render permissible with the military that which would be constitutionally impermissible outside it."

For many years the Supreme Court was reluctant to review actions arising out of military activities. They and other Federal courts now do so regularly. However, the Supreme Court in such review has recognized that, because of the unique role played by the military, Congress and the executive branches of government are better equipped to govern the military than are the courts. Because the framers of the Constitution entrusted to Congress and the President the responsibility of running the military, the courts have been hesitant to interfere unless clearly defined judicial matters are involved (Orloff v. Willoughby, supra, and Burns v. Wilson, supra).

One of the very purposes for which the Constitution was ordained and established was to "provide for the common defense," and the Supreme Court over the years has on countless occasions recognized the special constitutional function of the military in our national life, a function both explicit and indispensable. (Citations omitted.)

In view of the judicially recognized necessity of discipline and obedience within the military, any activity reasonably calculated to degrade such discipline and obedience must yield. An organization which espouses collective bargaining between soldiers and the Government and which purports to represent and negotiate for soldiers with the chain of command on matters pertaining to pay, personnel practices, grievances and working conditions is inimicable, *per se,* to the maintenance of discipline and obedience. Obedience to military orders cannot be the subject of negotiation or bargaining. Accordingly, membership in such a union by soldiers must yield to the greater national need. This would be so even though the union claims no right to strike; first, because the ultimate bargaining tool of any union, contrary to any representations made, is a work slowdown, job action, or strike (e.g., "illegal" postal strike in 1970); second, because the insertion of a third party between the soldier and his chain of command would, of necessity, degrade the authority of the latter over the former, at least as perceived by the soldier.

It would appear that the mechanics of the problem could be solved promptly by Presidential Executive Order augmenting Executive Order 11491 which covers the administration of labor management relations in the Federal Government, recognition of units, negotiation of contracts, rights and conduct of management, labor unions and employees. It already prohibits striking or bargaining for wages by federal unions or employees. It also prohibits collective bargaining *National Security Organizations,* specifically the Federal Bureau of Investigation and Central Intelligence Agency. It scarcely seems credible that it should be necessary to specifically identify the Armed Forces as "National Security Organizations." But if that is a hang up, we urge the President, in the new Executive Order, to make that point clear.

In our view, the Department of Defense should now issue a directive which the Services could pass downward in the form of regulations that would prohibit uniformed personnel from joining military unions.

We would urge as well prompt passage of legislation along the lines of that proposed by Senator Strom Thurmond and others during the last session of Congress which would prohibit servicemen from joining military unions. This legislation would clear up that gray constitutional area between the Congress and the Executive Branch with respect to specific controls of the military.

The Chief of Staff of the Army has quite rightly made the point that he is the principal ombudsman for the Army. And he has pointed up clearly that the chain of command functioning properly will consistently reflect the morale and concerns of those who serve. If the system functions efficiently, soldiers will look to the chain of command for problem solving. There is no substitute for leadership in these matters. A commander who successfully instills unit pride and sense of mission accomplishment, who makes sure his troops know he is concerned about their welfare, who eliminates petty harassment and senseless details will have no prospects for union membership in his command.

For those instances where the chain of command falters, and there will be instances, the soldiers must know that the existing grievance machinery—beginning in the lowest unit and working up formally through the Inspector General will work fairly and impartially—and that any who seek to impede it will be dealt with harshly. These are areas which the Chief of Staff of the Army is currently giving great emphasis—and they will help immeasurably.

There will continue to be a perception among some, both serving and retired, that the concerns and needs of the military require vigorous support beyond that which is available officially: They want assurance that those concerns and requirements are being fairly presented and getting full consideration at those levels of the government empowered to take corrective action, i.e., the Department of Defense, Office of Management and Budget, the White House and Congress. Moreover, they want to have a sense that their accomplishments and problems have the sympathetic understanding amongst the broad reach of our citizenry.

This is a job that the Association of the U.S. Army and similar associations of the other Services are now performing—and more effectively than any union could. There are a variety of reasons for this.

AUSA and its sister associations enjoy sizable memberships in their Services across a broad spectrum. Organizationally, with Chapters or similar units throughout the country, they have excellent grass-roots participation. Most of these organizations have in recent years increased their coverage and dissemination of information on the needs of the military—through position papers, fact sheets, testimony, newspaper columns, movies and T.V. shows.

These organizations have been active in the military field for long periods of time, most over a quarter of a century. So they are knowledgeable in the complexities of the needs of military people.

Perhaps one of the most significant advantages that these organizations enjoy is the fact that they have the respect and confidence of those who are in a position to make the decisions that affect the welfare of those who serve. Not infrequently they are called upon to help suggest solutions. This role should be broadened.

These organizations perform these useful, even essential functions, without disrupting the chain of command or undermining in any way existing military authority.

Obviously, the costs to the career soldier who wants to support this effort are far less through an association than even minimal union dues.

AUSA's views as expressed above could fairly be termed self-serving because we are the Army—those who serve and those who support them. Our whole reason for existence is to support the Army which is, after all, people. Making the Army a better place to live and work has been our principal effort for the past quarter of a century.

We can be fairly criticized for doing an inadequate job of advertising our wares. In those areas where we have done a good job of publicizing what we do, people use and support AUSA—both as an ombudsman and as an external spokesman for their concerns. This is undoubtedly true of the principal associations of the other Services. But much more needs to be done to publicize the activities and accomplishments to make clear the important role that AUSA and other organizations already play. More public recognition of these association efforts by the Services, the Administration and the Congress would help assure those in uniform that they have strong support for their concerns—in addition to that evidenced in the chain of command.

We are persuaded as we stated publicly last May, that there is no useful role for unionism in the military. Events in the intervening months have strengthened that view. The time to lay this delusion to rest is now. The Administration and the Congress should act promptly so that all can get on with the important work that needs to be done.

THE EMPLOYMENT TAX CREDIT ECONOMIC STABILIZATION ACT OF 1977

Mr. PERCY. Mr. President, I am delighted to join the distinguished Senator from Texas (Mr. BENTSEN) in introducing the Employment Tax Credit Economic Stabilization Act of 1977. This act is similar to legislation introduced by Senator BENTSEN during the last Congress, of which I was also pleased to be a sponsor.

The Employment Tax Credit Act fulfills a principle I have advocated for many years—that of investing in human capital. No amount of investment in physical capital can make up for a failure to give adequate consideration to this vital component of our national output. Making maximum use of scarce physical resources requires a workforce of men

and women who are trained and available to fill today's and tomorrow's jobs.

The legislation we are introducing today will be an incentive and help to business in retaining workers during economic downturns. It will keep workers in productive jobs, allowing them to continue to build their experience and expertise, rather than being displaced to the unemployment lines. As the economy improves, the bill will provide the added incentive and cost differential necessary for businesses to rehire earlier than they would otherwise.

Government cannot possibly provide meaningful productive jobs for millions of people without directly competing with and eventually entering the domain of private industry. To reach our national goals of full employment, high productivity and lowered inflation, we must be willing to invest in workers in the private sector.

Senator HUMPHREY and I will soon reintroduce the Investment Policy Act which declares a national policy in support of sufficient incentives to assure the maximum necessary investment in the private sector. The human side of investment is an integral part of any such policy and I commend my colleague from Texas for his continuing interest and contribution in this area.

I urge the Senate Finance Committee to study this legislation in conjunction with its action on the other economic stimulus proposals that have been made. It would be an important part of any such package.

NATURAL GAS SHORTAGES

Mr. STEVENSON. Mr. President, last September, in anticipation of a colder-than-normal winter and FPC projections of a 30-percent increase in natural gas curtailments, I introduced legislation establishing standby emergency natural gas allocation authority.

This limited legislation which would have expired in April of 1977 and was supported by FPC Chairman Richard Dunham, placed primary reliance on voluntary agreements between pipelines. The actual standby allocation authority would only have been used if voluntary agreements proved inadequate to prevent curtailments of service to residential or small business users.

While the need to protect priority users in such extreme emergency circumstances is a proposition on which all of us ought to agree, pipeline industry objections to even this limited allocation authority combined with the deadlock over natural gas pricing to prevent consideration of this emergency legislation in the last session.

Meanwhile, last September's possibility of a colder-than-normal winter has turned into January's reality. The long-range forecast shows no relief in what so far has been one of the century's coldest winters. By early December, pipeline storage facilities nationwide were down an average of 10 percent from the previous year, with some pipelines experiencing as much as a 30-percent drop in storage over the previous winter.

The possibility of some pipelines being unable to arrange adequate emergency purchases or enter voluntary interconnection agreements in order to maintain supplies to their priority customers in early or mid-February is far greater today than it was last September. So, this week I will reintroduce legislation authorizing standby emergency allocations of natural gas.

I cannot, however, be very hopeful that absent the kind of emergency this bill is designed to avert, the Congress will act any faster than it did last September.

Neither can I accept the proposition that we should all hope for the best and simply wait—until it is too late.

At an informal hearing held by Commissioner James Watt at the FPC on December 16, 1976, pipeline industry representatives indicated they had no contingency plans for maintaining service to priority users should the availability of emergency supplies be inadequate. The companies defended this inaction on grounds that they did not expect emergencies—but conceded that if the worst did occur, voluntary agreements would have to be arranged. Such reasoning is not in the public interest. Contingency planning involving voluntary arrangements between pipeline companies can take place now before a serious chain reaction of shortages makes it too late to prevent suffering.

For 40 years emergency interconnection authority in the electric utility industry has been regarded as a reasonable exercise of the Government's responsibility to protect the public health, safety, and welfare. Priority users of natural gas deserve the same protection.

If the natural gas pipeline industry is opposed to the limited allocation authority I have proposed—authority which would be used only if needed—it should explain to the American public and the Federal Power Commission how it intends to maintain supplies to residential consumers should the cold weather continue while emergency supplies dwindle.

Today I have, therefore, written Federal Power Commission Chairman Richard Dunham urging the Commission to issue a policy statement outlining its proposed response to large scale, high priority curtailments. I have also written the 19 pipeline companies identified by the Commission as most likely to experience supply problems, asking them to provide the Subcommittee on Oil and Natural Gas Production and Distribution with their contingency plans for maintaining deliveries to their priority 1 and 2 consumers for the remainder of this heating season.

Mr. President, I ask unanimous consent that the full text of these letters and the list of pipeline companies to which they were sent appear in the RECORD at the conclusion of my remarks.

Senators MAGNUSON, PEARSON, STEVENS, and HOLLINGS have joined me in this effort to encourage advance planning in anticipation of natural gas shortages this winter.

We hope such plans will not be needed. But if they are, hope alone will not be enough.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *January 12, 1977.*

Hon. RICHARD L. DUNHAM,
Chairman, Federal Power Commission, Washington, D.C.

DEAR MR. CHAIRMAN: On December 9, 1976, the Federal Power Commission released a staff summary concerning the impact of natural gas curtailments for the current winter heating season on customers of nineteen major natural gas companies. The staff report concluded that "under normal weather conditions markets served by . . . the pipelines will experience relatively minor difficulties in absorbing projected curtailments with minimal adverse effects such as production losses or unemployment during the coming winter season."

The report further stated, however, that "No specific information was presented by any of the nineteen companies regarding impact of a colder than normal winter." To date, winter weather has been "colder than normal"—in some areas record cold—for most of the nation during the first two months of the winter heating season.

The FPC has recently undertaken to anticipate the impact of high priority curtailments if colder than normal weather persists in the first few months of 1977. We are concerned, however, that it and natural gas companies may lack contingency planning for extensive supply interruptions of high priority customers.

The authority of the Commission to mitigate administratively under existing law the adverse effects of severe curtailment is unclear. This should not preclude the Commission from developing contingency plans for mitigating emergency situations. A proposed policy statement detailing how the Commission would react if large scale high priority curtailments occur this winter would be one approach that could be taken immediately. We urge the Commission to consider such an initiative.

We are contacting the pipelines identified in the December 9, 1976, FPC staff report in order to determine what measures they are undertaking either independently or in cooperation with other pipelines to mitigate the effects of high priority curtailments should such curtailments occur. Any pertinent information supplied us by the companies will be made available to the Commission.

Sincerely,

ADLAI E. STEVENSON.
WARREN G. MAGNUSON.
ERNEST F. HOLLINGS.
JAMES B. PEARSON.
TED STEVENS.

WASHINGTON, D.C., *January 12, 1977.*

Mr. J. HUGH ROFF, Jr.,
President, United Gas Pipe Line Co., Houston, Tex.

DEAR MR. ROFF: On December 9, 1976, the Federal Power Commission released a staff summary concerning the impact of winter gas curtailments on customers of 19 major natural gas pipelines. Your company participated in the FPC proceeding which resulted in this staff summary (Alabama-Tennessee Natural Gas Company, *et al.*, Docket Nos. RP 76–116, *et al.*).

The Commission proceeding addressed the impact of curtailments under normal weather conditions. It did not analyze the potential curtailments and consequent impacts of such curtailments in the event of a colder than normal winter.

To date most of the nation has experienced colder than normal weather for the current winter heating season. Underground storage gas for many systems is down significantly and working gas, as of December 1, 1976, is

10.4 percent less than that working gas on hand as of December 1, 1975.

There has been little evidence of contingency planning by the Commission or the curtailing major pipelines for resolving on an emergency basis curtailments of the highest priority customers in the event such supply interruptions occur this winter. We would appreciate being informed at your earliest convenience of any steps or measures your company has taken, or proposes to take, in the event high priority curtailments do occur within your system during the first several months of 1977.

The attached letter to FPC Chairman Dunham may be of interest to you.

Very truly yours,

ADLAI E. STEVENSON, Jr.,
WARREN G. MAGNUSON,
ERNEST F. HOLLINGS,
JAMES B. PEARSON,
TED STEVENS.

PRESIDENTS OF PIPELINES IDENTIFIED IN DECEMBER 9, 1976, FPC STUDY

Alabama-Tennessee Natural Gas Company, RP76–116, B. F. Grizzle, President and Chairman of the Board, P.O. Box 918, Florence, Alabama 35630.

NATIONAL HEALTH INSURANCE

Mr. HATHAWAY. Mr. President, the debate about national health insurance is about to begin. With health care taking the position of the third largest industry in the United States, the stakes for the American consumer are high. An ill-conceived solution to our growing health care problems, or one excessively weakened by compromise, may harm both our national health and our economic health for years to come. National health insurance is essentially financing the health care system. Adequate financing alone cannot assure that our health care is good. The state of our health in an industrialized nation depends at least as much on economic, social, and environmental factors as it does on the activities of the health care industry.

The financing of health care, however, has the potential of creating some incentives and disincentives for efficiency and cost control. And in an era when we must make hard choices among worthy social goals, these factors should not be taken lightly.

Some sobriety about the ability of national health insurance to create and distribute health care resources is justified from the experience of other nations. Moreover, we should realize that ability of a financing mechanism for health care to affect average life expectancy and death rates is limited. While realizing we are approaching the point of diminishing returns in health status regardless of financing, we also must realize this argument is beside the point when one asks whether the current burden of health care expenses is fairly distributed, rationally organized, or efficiently administered.

Mr. President, I ask unanimous consent to print in the RECORD an article that appeared in last week's Sunday New York Times magazine which takes a refreshingly candid look at the perennial debate on national health insurance and raises important questions and caveats about our deliberations.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NATIONAL HEALTH INSURANCE—THE DREAM WHOSE TIME HAS COME?

(By Richard J. Margolis)

The A.M.A. JOURNAL (1914): "The socialization of medicine is coming. . . . The time now is here for the medical profession to acknowledge that it is tired of the eternal struggle for advantage over one's neighbor."

During the next four years, Jimmy Carter and the Congress will probably decide whether universal national health insurance—a dream so long deferred that scholars call it "the lost reform"—shall at last be deemed an idea whose time has come, or whether it shall remain an idea that is merely long overdue. Something more than our health appears to be at stake: as with other tough social dilemmas (segregation, for example), this one raises questions about the resources and capacities of our political institutions. In particular, it tests our abilities to overcome the great weight of health-care inertia, a weight that seems to be composed in roughly equal parts of history, bureaucracy and avarice.

The opinion polls suggest that a sizable majority of Americans is now ready for fundamental changes in health care, and the President-elect appears publicly committed to such changes. The 1976 Democratic platform, largely a Carter creation, calls for "a comprehensive national health-insurance system with universal and mandatory coverage"—meaning a program that goes about as far as it can go: all of the people insured all of the time for all of their care.

Nothing could be simpler; nor, if the past turns out to be prologue, more difficult to achieve. The fact is, we have been here before. The history of national health insurance in this country is strewn with predictions about its imminent arrival.

Part of the trouble may arise from the complexity of our burgeoning medical system, which defies instant rehabilitation, and from the apparently high price we must pay for its reform. Many of the recently tried solutions, notably Medicare and Medicaid, have themselves become part of the problem, encouraging waste and driving up costs. Thus far, at least, reform has played handmaiden to inflation. Nowadays, we spend 8.6 percent of our gross national product on health care, about double the portion two decades ago.

The new Congress and the new President will have to confront this general paradox of social progress, in which measures designed to lighten the burden of some may end by increasing the burden of all. As regards the medical-care paradox, it is not as if there have not been efforts to resolve it. Ever since that A.M.A. Journal editor 62 years ago urged doctors to quit "the eternal struggle for advantage over one's neighbor," reformers have been plumping for national health insurance (without, however, any further encouragement from the A.M.A., which soon changed both its mind and its leadership). Franklin D. Roosevelt came within an ace of combining health insurance with Social Security in 1935, only to be dissuaded by the A.M.A., notably by Dr. Harvey Cushing, author, brain surgeon and father-in-law of young James Roosevelt.

Whatever recommendations F.D.R. might decide to make, Cushing wrote to the President, "no legislation can be effective without the good will of the American Medical Association, which has the organization to put it to work." In the politics of health reform, Cushing's comment remains the heart of the matter, and nowadays politicians must seek the cooperation not only of the A.M.A. but also of other health interest groups that have grown up in the interim. Over the decades our health-care system has invented a potpourri of patchwork schemes as substitutes for "the lost reform," and each new expedient—Blue Cross, for example, in the 30's and 40's—has given rise to a new organization in Washington. Like all newcomers, these organizations have become instantly suspicious of change and broadly committed to things as they are. If Cushing were alive today, he could cite at least four other groups whose good will may now be required: the "Blues," the private insurance industry, the hospitals and the medical schools.

The battle did not end with the New Deal. Harry S. Truman took up the cudgels, to secure passage of the Murray-Wagner-Dingell bill, a measure the A.M.A. dismissed as "Marxist medicine." It never reached the floor of Congress, but it has since seen several reincarnations.

Considering the discouraging record, it wasn't any wonder that both John F. Kennedy and Lyndon B. Johnson chose to fight on narrower ground. Each came to the White House prepared to settle for something less than "the lost reform." With the passage of Medicare and Medicaid in 1965, the Congress conferred the blessings of free or low-cost medical care upon both the elderly and the

poor. The new programs enlarged the public's sense of possibilities. If we are closer now to the Promised Land, it is because the events of 1965 showed us a way out of the wilderness.

No sooner, it seemed, had the bills been signed into law than news of yet another "health-care crisis"—it was really the same old one—spread throughout the land. L.B.J. called on Congress to do something about "the soaring cost of medical care," and also about "the inexcusably high rate of infant mortality in the United States." (Seventeen countries still have rates below ours.) A few years later Richard M. Nixon sounded the familiar alarm: "We face a massive crisis in health care, and unless action is taken . . . we will have a breakdown in our medical-care system."

The Congress began to consider new measures, a fresh generation of legislative proposals that would extend the protection of health insurance to some or all of the remaining population. Such proposals have grown more numerous of late. In the last Congress, the 94th, no less than 18 different bills were submitted, each alleging to offer the most practical solutions. These plans are Jimmy Carter's health-reform legacy.

If the titles sound maddeningly alike, their contents exhibit some real differences. By and large, they reflect the contradictory hopes of people and organizations who have something to gain or lose from the redistribution of health care in America—doctors, hospitals, insurers, medical schools and patients. As consumers and taxpayers, one can try to test the merits of the proposals by keeping close to two familiar touchstones: the benefits offered and the costs incurred. In addition, one can examine any bill for its reform potential, meaning the extent to which it can be expected to reorganize health-care along lines that make sense.

Of the 18 now before Congress a half-dozen perhaps can be considered "major," either because of the power and celebrity of their Congressional sponsors or because of the influence of their outside backers. Like the lobbies that support them, these six are a mixed bag. All but one would make health insurance compulsory. They range from a modest proposal that would extend benefits to citizens who have incurred unusually high medical costs the so-called "Catastrophic Health Insurance and Medical Assistance Reform Act," introduced by Democratic Senators Russell Long of Louisiana and Abraham Ribicoff of Connecticut—to the sweeping "Health Security" measure that Senator Edward M. Kennedy has been promoting since 1969.

Taken together, the six proposals offer a fair sampling of what the experts are thinking, what the health-care industry is demanding as ransom and what the public is wishing. What we see is what we may get. Before we pursue this pharmacopeia—an all-Democratic drugstore, no less—it may be well to glance at one object of great attention, what commentators are pleased to call "the national health-care delivery system." In truth, it is less a system than a collection of medical sins and services, a network that appears to be ever-expanding and evermore remote from the patient. Most of us have sensed the new remoteness, both in the reckonings we get and in the services we do not.

We are the world's only industrialized nation without a universal health-insurance program; yet no country on earth spends as much per capita as do we on health care. In a single generation, the total price has soared from $12 billion (in 1950) to $133 billion (in fiscal 1976), making health care America's third largest industry, just behind agriculture and construction. Some of the increase reflects genuine improvements in medicine, and some can be attributed to a wider distribution of services; but much of it must be chalked up to medical inflation pure and simple. Hospital charges, for instance, have risen four times as fast during the past decade as the Consumer Price Index itself.

Health-care inflation is not a new problem; it has long been a fixture on the medical landscape. "Everywhere," lamented the health demographer Louis I. Dublin in 1927, "there is a feeling that something is wrong with the economics of medicine. Large numbers of middle-class families . . . chafe under what they generally consider the unjustifiably heavy cost." With the passage of Medicare and Medicaid, however, inflation took a quantum leap: Costs more than tripled, while annual per capita expenditures shot up 250 percent. In 1965, the average American spent $198 for health care; last fiscal year the sum was more than $500. The alarming spiral seems to have a life of its own; it has proved confoundedly resistant to voluntary self-controls and to Congressional tinkering, like the introduction two years ago of "peer review" for all treatments paid for by the Federal Government.

The dismal history of the medical dollar has made many wary of starting another round of reforms. Yet there seems nothing mysterious or inevitable about medical inflation; in theory, at least, it can be controlled. Richard Nixon came close to doing just that with his 1971–74 price freeze, when health-care prices climbed at about one-third their usual rate. What seems chiefly at fault is Medicare's and Medicaid's peculiar method of reimbursement, whereby they pay whatever the doctor or the hospital claims to be "reasonable" and "customary." In effect, the Congress has handed a blank check to the health-care industry, with predictable results. Not only has the industry jacked up prices for unimproved services, in many instances it has submitted bills for services never rendered. Fraud begets inflation.

It is true that only about one-third of the national health care bill is charged directly to consumers. The rest is paid for by the Federal Government, the states and the private insurance companies. But the citizen ultimately pays those bills, too, in higher taxes and stiffer premiums. Medicare premiums have been hiked a half dozen times since the program's inception; during the same period, Blue Cross rates in some areas have risen fourfold.

Although four-fifths of the population is covered by some kind of health insurance, the protection afforded is often skimpy and unreliable. In last year's recession an estimated 27 million workers and their families were deprived of coverage because of layoffs. Many of the policies still in force, moreover, fail to protect patients against the costs of home care or visits to the doctor's office. Close to half the people who file pleas for bankruptcies each year do so because of medical debts.

Americans might bear these medical burdens more cheerfully were they getting their money's worth; but if the price of health care isn't right, neither is the product. As nearly everyone knows by now, the medical network suffers from several strains of maldistribution, both professional and geographic. Chief among these is a surplus of specialists, particularly of surgeons, and a shortage of primary care physicians—internists, pediatricians and general practitioners.

Officially certified specialties have been part of the health-care scene since 1917, when eye doctors founded the American Board of Ophthalmology. Since then physicians have created more than 20 board-recognized specialties along with some 200 subspecialties, and each year they have attracted a large proportion of medical-school graduates. In 1931, only 17 percent of the nation's doctors were specialists; today the figure is 72 percent.

The imbalance has tended to drive up costs still more (specialists usually charge more than G.P.'s) and to reduce patients to the status of machines with broken parts; it is another symptom of medical remoteness. In surgery, according to more than one Congressional committee, the surplus of specialists has created a greater "demand" for operations, which is to say that some surgeons examine their bank accounts before they examine their patients. At least two million of the operations performed each year are said to be unnecessary, and these lead to some 15,000 preventable deaths.

The geography of health care seems equally unjust, but for the contrary reason: too few doctors, in some places, rather than too many. Because most of the nation's 378,000 physicians locate their practices within easy reach of the affluent, the residents of urban ghettos and rural areas frequently find themselves shortchanged; they are medical orphans. To cite one of the many available statistics, the state of Mississippi, relatively poor and rural, has only 82 doctors for every 100,000 citizens, while in suburban Westchester County, N.Y., the comparable ratio is 260 per 100,000. At last count some 5,000 towns in 135 counties in the United States had no doctor at all: One of them was Webster County, Ga., the county next door to Jimmy Carter's.

The desperate shortage of healthcare personnel in some areas works to strengthen local medical oligopolies, inviting its practitioners to profit at the patient's expense. I came across an instance of how this can occur, and the misery it can cause, when I interviewed a woman who lives in the hills of eastern Kentucky. One day, she told me, her 4-year-old son, Danny, complained of a pain in his stomach.

"I didn't have much money, but Danny was in awful pain, so I paid somebody to ride me into Prestonsburg. The doctor, he looked at Danny. He said the boy had to be operated before his appendix ruptured, but first I had to work things out with the hospital director. Me and Danny went to the director. He told me it would cost $350 and I would have to give a $100 down payment. I said I didn't have no $100. He said, 'Well, when you get it come back, and we'll fix your boy up.' My Danny was vomiting right there in the director's office. He was real sick. I went and borrowed the money from a cousin, and I came back with the money. The director, he says, 'You have to show you got an income so as you can pay the debt.' I said all I ever get is a check every month from the Veterans for $57. He said that would be just fine. Then he made me sign a paper promising to turn over the check to him each month till the bill was paid. I couldn't fight him. My Danny had to be operated."

One story does not make a pattern, but the hearing rooms of Congress over the past few years have resonated with hundreds of such tales. The impression one gets overall is that something has gone sour in American health care and that money has had a lot to do with it—which may be why more patients are writing their Congressmen nowadays.

Overlaid upon all these headaches is the increasingly widespread suspicion that the health-care network, having run amok, is now beyond political reach and therefore beyond redemption. Its phenomenal growth in recent years has been unruly and unplanned, and that is a major part of the problem. But in the political arena the industry, for all its disunity and competing claims, has presented a single face to the public. It is the face of an institution that does not suffer reform gladly.

So: back to the pharmacopeia.

Besides Kennedy-Corman and Long-Ribicoff, four proposals seem worth considering, listed here in a sequence that runs from the relatively broad and generous to the relatively narrow and penny-pinching:

The "Comprehensive Health Insurance Plan" (CHIP), introduced by Kentucky Democratic Representative Lee Carter—no relation. It has been called a "block off the old CHIP" because it closely resembles a bill

of the same name that the Nixon Administration submitted to the Congress in 1973. A nearly identical plan, moreover, in 1974 almost got past Wilbur Mills' House Ways and Means Committee, the historic gatekeeper of health reform.

A complex proposal submitted by Representative Al Ullman, an Oregon Democrat, who succeeded Mills as Ways and Means chairman; it is called the "National Health Care Service Reorganization and Financing Act," quite a mouthful, and it has the official blessings of the American Hospital Association.

The A.M.A.'s latest entry, "The Comprehensive Health Care Insurance Act," sponsored by Representative Richard Fulton, a Tennessee Democrat.

And "The National Health Care Act," a favorite of the Health Insurance Association of America (H.I.A.A.). It was introduced by two conservative Democrats, Senator Thomas McIntyre of New Hampshire and Representative Omar Burleson of Texas.

As might be expected, not all of the bills confront all of the problems; by and large they concentrate on ways of defraying patient costs and of spreading patient benefits, with the unspoken hope that the rest will take care of itself. Still, with the exception of Long-Ribicoff—which continues Medicare's blank-check system of reimbursement—the proposals do make an effort to curb inflation. The chief restraining device envisioned in these bills entails an annual round of negotiations, with doctors and hospitals, on all fees and rates; an attempt to commit the healthcare industry each year to an immutable schedule of charges. In all but the Kennedy-Corman measure, the responsibility for negotiating these schedules is assigned to the individual states; only Kennedy-Corman, which we shall consider first, sees the Federal Government as prime negotiator.

The Kennedy-Corman Health Security bill calls for a compulsory federalized system of health care managed within H.E.W. by a five-member health-security board, and financed chiefly through a half-and-half combination of payroll taxes and general revenues. As is the case with most of the other bills, the payroll taxes are shared by employers and employees. The benefits offered by Kennedy-Corman are broad, generous and virtually free of the kinds of restrictions one finds in the other proposals. But the benefits are not the whole story; what distinguishes this bill from all others is its unique approach to budgeting, an approach that makes private enterprise an instrument of public policy.

Health Security stops short of nationalizing the health-care system, but it does nationalize the health-care budget. Every dollar spent—whether for construction of a new hospital or for purchase of a new tongue depressor—becomes a Federal dollar. The budgeting process is supposed to begin at the local levels where groups of consumers and professionals annually assess their health-care needs and estimate the costs. These estimates filter up through a regionalized system and eventually land in Washington on the health-security board's desk, becoming part of the year's national health-care budget.

Cost controls under Kennedy-Corman turn traditional procedures upside-down: The bill stipulates that the annual health-care budget cannot exceed expected revenues, thereby tying the medical budget to the fortunes of the general economy. If the economy should slip, the Federal Government would have to negotiate a reduced budget, and the bill's supporters insist that the burden of such a reduction would be assumed not by the patient but by the health-care providers. In other words, rather than curtailing services, Kennedy-Corman would curtail the fees and rates paid to doctors and hospitals. The proposal thus jeopardizes the industry's time-honored privilege of controlling fees and services, one reason for the measure's bad reputation among medical practitioners. On the other hand, it enjoys sustained support from both the A.F.L.-C.I.O. and the United Auto Workers, as well as from a coalition of church groups and liberal-leaning organizations like Common Cause and the Urban League. It is the only proposal thus far to have attracted substantial consumer backing.

The Long-Ribicoff proposal is a "major-medical" plan to insure patients against costly illness. Its benefits, presumably, begin about the time a patient has run out of money: after he has spent $2,000 for medical services or has been in the hospital for 60 days. An employer can buy this insurance for his employee either from the Government, in which case he pays a 1 percent payroll tax, or he can choose a Government-approved private plan—Blue Cross, for instance. (As with nearly all the bills, this one makes special provision for both the self-employed and the poor.)

Compared with Kennedy's Health Security proposal, Long-Ribicoff seems both paltry and narrow. It leaves the gears and levers of the health-care enterprise untouched, and the benefits it provides, while they may save some families from bankruptcy, are far from dazzling. Still, the measure has a certain appeal. It is simple and can be immediately "put into place," as the health analysts like to say, whereas most of the other plans would take years to become fully effective. It is also inexpensive, at least from the standpoint of Federal budgeting; and it can be seen not as the Grand Solution but as merely a first step toward eventual enactment of "the lost reform."

Finally, the bill gives the health-insurance industry a piece of the action, an idea that may or may not have merit, but which in any case can be seen to make some tactical sense. It will come as no surprise that the private insurance companies are said to have bestowed their tacit approval upon this modest measure—in fact, to have taken a hand in its drafting. A Kennedy-Corman aficionado claims last year to have seen "at least a dozen of the insurance boys from Hartford in the back of the hearing room, just before the hearing started, making last-minute changes in the bill." The Ribicoff aides I have talked to say this is news to them; but it is true that an earlier version of the Long-Ribicoff bill provided for *Federal insurance only*, leaving no room for participation by private companies.

In any event, because Senator Long is chairman of the Finance Committee, the womb from which any successful Senate bill must issue, the proposal has not lacked for a public platform.

Nor has CHIP, the Nixon bill that never dies. Benefits under CHIP are in some respects as far-reaching as those under Kennedy-Corman, but they include a $150 deductible for each person and also a 25 percent "coinsurance" requirement; that is, the family must pay either one-fourth of its health-care charges or $1,500, whichever is less during a given year. All this is to be financed not by taxes but by premiums paid directly to private insurance companies by employees and their employers; the latter group pays the larger share.

Unlike the other two bills, CHIP leaves virtually all of the program's management to insurance firms and to the individual states, with the Federal Government playing a small, regulatory role. Each state makes its own reimbursement policy, deciding how much money doctors and other providers should be paid for their services. The formula is similar to that now being used under Medicaid, and given that program's record, it is not a promising one. Nevertheless, CHIP has impressed some Congressmen as a workable compromise between "the two extremes" of catastrophic insurance and Health Security. It offers citizens more than the first and it costs the Government less than the second.

The remaining three proposals, like CHIP, give citizens a chance to buy private health insurance at modest cost, entitling them to a variety of benefits, but the benefits are hedged with coinsurance charges and other limits, and they, too, are essentially devoid of cost controls, with all administrative responsibility ceded to the states. What makes these proposals interesting is not the substance of their ideas but the nature of their support. Each is officially backed by a different lobby, and each can tell us something about the aspirations of the health-care network.

Al Ullman's bill, backed by the American Hospital Association, may be the most Byzantine. Besides the insurance and financing provisions, the act mandates creation in every locale of health-care corporations to which citizens may subscribe in advance of services. Apparently, these corporations would function as health-maintenance organizations (H.M.O.'s), which is what medical commentators now call groups that offer services on a prepaid basis. The doctors working for H.M.O.'s earn salaries or else are paid capitation fees—so much per member-patient. Either way, they are cut loose from standard fee-for-service arrangements and thus from temptations to overcharge or overtreat. Studies have shown that in H.M.O.'s the incidence of needless surgery is far less than it is in fee-for-service practice.

All of which sounds promising—but it is not clear from the bill how these local health-care corporations would operate or whether, in fact, an employer or employee could not skirt the corporation entirely and buy his health care from other sources. What does seem clear is that hospitals would play a central role in the new system, since in most places they are the only institutions extant that are capable of developing and managing so complex a plan.

The A.M.A.'s bill is less generous than CHIP and less ambitious than Ullman's. It would leave fee-for-service practice and private-insurance precedents unscathed, with the Federal Government content to mandate the size of the premiums the subscribers would pay and to let the system lurch ahead on its own. To the self-employed wishing to buy insurance, the bill offers a few tax advantages; to the poor it provides "subsidy certificates" they can cash in at their local insurance company. As inadequate as this seems, it represents the farthest A.M.A. members have yet traveled down the road to "Marxist medicine." An earlier, and less-liberal, A.M.A.-backed measure, Medicredit, had to be discarded after the post-Watergate elections of 1974, when 55 of its Congressional sponsors were defeated. (The A.F.L.-C.I.O. ran a nationwide campaign to unseat these enemies of Health Security, using the slogan "Your Congressman may be dangerous to your health.")

Finally, there is the "National Health Care Act," the darling of the H.I.A.A. It has the distinction of being the only plan among the six that permits employers to dismiss it—which is to say that the program is strictly voluntary. If an employer chooses not to buy in, his employees are out of luck. In consequence, the bill has been given short shrift everywhere but in the executive suites of insurance companies. As a labor lobbyist remarked recently, "When you get a proposal that offers less than the A.M.A. does, what have you got? . . . Nothing."

We can pay our money, then, and take our choice, though it is not at all certain just how much money we shall have to pay. A recent H.E.W. study indicates that all six programs are costly—some are more costly than others, but the differences may not be all that great.

The man who conducted the study is Gordon R. Trapnell, a consulting actuary. According to Trapnell, if we enact no new

health-care programs during the rest of the decade and continue spending at the present rate, medical costs will rise to $180.2 billion by 1980—a gain of about 30 percent over this year's tab. From that empyrean base, Trapnell calculated the additional costs that might be incurred by each of the six plans, concluding that the three cheapest were Long-Ribicoff. CHIP and the H.I.A.A.'s voluntary plan. Each would cost at least an extra $10 billion annually. The other three proposals would each run more than twice that amount—an additional $20 billion in the case of the A.M.A.'s program, and an extra $25 billion for Ullman or Kennedy-Corman.

Trapnell's estimates suggest that health-care inflation will remain part of the picture regardless of which program the Congress enacts. Any new plan, he notes, will increase administrative expenses and encourage wider use of medical services, especially among the poor. Yet supporters of Kennedy-Corman continue to insist that their proposal is more or less inflation-proof—in part, because it subsidizes *preventive* medicine and, in part, because its budget is linked to national productivity. "We have the only measure with built-in controls," says Max Fine, who directs the Committee for National Health Insurance, a labor-financed lobby.

Many remain skeptical, among them H.E.W.'s Saul Waldman, whose detailed 210-page summary of all 18 health-insurance bills is the bible of analysts and lobbyists alike. "Nobody really knows whether Health Security could keep the lid on," he says. "True, there's a ceiling on the budget, but there's also a clause in the bill that says Congress can be asked for supplemental funds in case of emergencies. The emergency wouldn't necessarily have to be medical, like an epidemic; it could be an *economic* emergency."

On balance, though, the Kennedy-Corman bill does appear to encourage a fiscal climate in which health-care price will rise no faster than prices overall. The probability under Kennedy-Corman is one of controlled inflation, something we haven't seen in health-care circles since the Nixon price freeze; it would amount to a mild revolution within the health-care industry—a revolution of reimbursements.

But the revolution that Health Security invites us all to join goes beyond fiscal policy. At bottom, it represents a major shift of power and responsibility within the health-care network, a shift away from state governments and private insurance companies toward H.E.W. and the Federal bureaucracy. All other plans cede administrative control to the states (under Federal guidelines) and commercial control to the private insurers. In opposing Kennedy-Corman, the health-insurance industry is fighting for its very existence. The stakes are high. Last year the industry collected nearly $30 billion in premiums.

Dr. Cushing's law writ large is that no legislation can be effective without the good will of health-care interest groups. In assessing the various alternatives, Congress and the President will have to ask themselves whether the superior efficiency and the more generous benefits claimed by Kennedy-Corman are worth the wrench. The other bills' sponsors have already answered the question. "Health Security is too risky," notes Dr. Susan Irving, a health economist who works for Senator Ribicoff. "You can't simply dismantle the insurance industry and expect no consequences. Besides, who said that H.E.W. could run the program efficiently? Its record with Medicare suggests the opposite." Ned Helms, a health specialist on Senator McIntyre's staff, says, "There are 500,000 people working in private health insurance. Are we supposed to fire them or turn them into Federal bureaucrats in the name of health reform?"

The public could make a difference by agitating for one or another approach, but in matters of health reform the public has always been remarkably passive. Even in recent years, with all those bills floating around Congress, citizen interest has seemed anything but keen. The health-reform debate of the past eight years owes less to public pressures than it does to Presidential politics. Because, until recently, Senator Kennedy was viewed as a prime Presidential threat, his introduction of Health Security in 1969 acted as an enzyme in the chemistry of health reform. Richard Nixon responded by announcing his own Family Insurance Plan (FIP), a measure he never got around to submitting. A few years later, with Kennedy again a Presidential possibility, FIP gave way to CHIP, a plan Nixon at one point insisted was $47 billion cheaper than Kennedy's.

In 1974, Gerald Ford was in the White House; Wilbur Mills was still presiding over Ways and Means, and CHIP came close to winning that committee's approval. It did so because Ford, looking to 1976, needed an answer to Health Security, and Mills needed a bill that would buttress his rickety reputation. And the measure failed, largely because most Americans were not aware that it existed. (It failed, too, because the labor unions withheld support; they were counting on the fall elections to bring them a "veto-proof Congress" ready to fling Health Security in Ford's face.)

"The politicians," recalls Paul Rettig, counsel for the Ways and Means health subcommittee, "did not perceive national health insurance as a deeply felt public issue." In the end, and without much fear of public complaint, Ford pulled out, personally telling one of Mills' deputies that CHIP no longer had Presidential backing. "After that," says Rettig, "we were just dancing."

The dance goes on, while lobbyists mark up their bills and patients await "the lost reform" or a reasonable facsimile thereof. "Political life," observed the late Hannah Arendt, "is based on the assumption that we can produce equality through organization." If, in the case of national health insurance, that cheerful supposition seems shaky, it may be because there is so much to organize and so little equality to start with. Perhaps Jimmy Carter, a passionate reorganizer, will be able to make sense of it all; perhaps he can come up with a plan that pleases everyone, even the healthcare industry. Thus far, he has kept his own counsel. The few utterances he has made on the subject have been tactful but contradictory. He has, on various occasions, emphasized his belief in "comhealth insurance," "voluntarism," "immediate action," "a phased-in approach," "universal and comprehensive benefits," "inflation controls," "a Federal role" and "local initiative." No wonder every Congressman I talked to thought his particular health bill had Carter's secret support. They were blind legislators feeling different parts of the Carter elephant (or donkey).

Nevertheless, after the rhetoric of transition has settled, Carter will have to face up to the hard choices. The best guess is that he will appoint a health task force similar to the Committee on Economic Security that F.D.R. created in 1934. The task force will make recommendations; more important, it will give Carter time to do what Presidents before him have had to do: negotiate. The upshot, to continue the guess, may well be a CHIP-type program (Nixon's legacy) that offers a slice of the pie to everyone—doctors, hospitals, insurers and patients. Such a prospect is both scary and pleasing: all that money, all those benefits. But no one can predict anything for certain about the future of health reform. Like Jimmy Carter, it remains a mystery.

THE SIX KEY HEALTH-INSURANCE PLANS

Bill	National support	Estimated cost by 1980	Administration	Financing	Benefits
Kennedy-Corman	A.F.L.-C.I.O. Committee for National Health Insurance.	$24.8 billion.	Special board within H.E.W.; regional and local offices will operate program.	Half to come from Federal general revenues, half from special taxes; 1 percent of payroll for employees, 2.5 percent for employers and self-employed.	Institutional services: hospital care, skilled nursing facilities up to 120 days. Diagnosis and treatment: physicians' services, lab and X-ray, home health services, prescription drugs (for chronic illnesses), medical supplies and appliances. Other services: physical checkup, well-child care, maternity, family planning, dental care (up to age 25), vision care and eyeglasses, hearing care and hearing aids. Patient cost-sharing: none.
CHIP	No formal support.	$11.3 billion.	Insurance through private carriers; states to supervise under Federal regulations.	Employer-employee premium payments, with employer paying 75 percent (65 percent first three years); special provisions for small employers and those with high increases in payroll costs.	Institutional services: hospital care, skilled nursing facilities up to 100 days. Diagnosis and treatment: physicians' services, lab and X-ray, home health services (up to 100 visits), prescription drugs, medical supplies and appliances. Other services: well-child care, maternity, family planning, dental care (under age 13), hearing care and hearing aids (under age 13). Patient cost-sharing: annual deductible* of $150 per person; 25 percent coinsurance,** with annual ceiling of $1,500 per family.

Bill	National support	Estimated cost by 1980	Administration	Financing	Benefits
Ullman	American Hospital Association.	$25.1 billion.	Private insurance carriers under state supervision, according to Federal guidelines.	Employer-employee premium payments, with employer paying at least 75 percent; Federal subsidy for low-income workers and certain small employers; patients enrolling in a health-care corporation get 10 percent subsidy.	Institutional services: hospital care up to 90 days, skilled nursing facilities (30 days), health-related custodial nursing home care (90 days). Diagnosis and treatment: physicians' services up to 10 visits, lab and X-ray, home health services (100 days), prescription drugs limited to specified conditions, medical supplies and appliances. Other Services: physical checkups, well-child care, maternity, dental care (under age 13), vision care and eyeglasses (under age 13). Patient cost-sharing: coinsurance (20 percent) or co-payment*** (up to $5) on most items; special "catastrophic" provisions become effective when patient's out-of-pocket expenses reach a specified amount.
Fulton	American Medical Association.	$20.3 billion.	Private carriers provide insurance under state supervision; regulations issued by a new Federal board.	Employer-employee premium payments, with employer paying at least 65 percent; small employers get Federal help as do all employers with unusual payroll cost increases; self-employed pay own premiums but are assisted by income-tax credits computed on a sliding scale (the lower the income, the higher the credits).	Institutional services: hospital care, skilled nursing facilities up to 100 days. Diagnosis and treatment: physician's services, lab and X-ray, home health services, medical supplies and equipment. Other services: physical checkups, well-child care, maternity, family planning, dental care (under age 18). Patient cost-sharing: 20 percent coinsurance, with an annual maximum of $1,500 per person and $2,000 per family.
Burleson-McIntyre	Health Insurance Association of America.	$11 billion.	Insurance administered by private carriers under state supervision; plan is voluntary.	Employer-employee premium; payments, the ratios to be negotiated between them; low-income workers pay less; self-employed pay entire premium; all participants eligible for special tax deductions.	Institutional services: hospital care, skilled nursing facilities up to 180 days. Diagnosis and treatment: physicians' services, lab and X-ray, home health care (270 days), prescription drugs, medical supplies and appliances. Other services: well-child care, maternity, family planning, dental care (under age 13, one visit), vision care (under age 13, one visit). Patient cost-sharing: annual deductible of $100 per person; 20 percent coinsurance on all items, with annual family limit of $1,000.
Long-Ribicoff	No formal support.	$9.8 billion.	Employers and employees have two choices: to join Federal insurance program administered by H.E.W., or to buy private insurance from federally approved carriers, under H.E.W. Supervision.	Employers pay 1 percent payroll tax and are allowed similar provisions for self-employed.	Institutional services: hospital care, skilled nursing facilities up to 100 days. Diagnosis and treatment: physicians' services, lab and X-ray, home health services, medical supplies and appliances. Other services: None. Patient cost-sharing: first 60 days of hospitalization not covered; first $2,000 in family medical expenses not covered.

*Deductible: Patient's share of annual medical costs before insurance coverage begins.
**Coinsurance: the percentage of a given bill that is charged to the patient.
***Copayment: a flat rate charged to the insured patient on specific items (such as $2 per office visit).

THE PANAMA CANAL

Mr. THURMOND. Mr. President, on November 21, 1976, John A. Mitchell, business editor of the State, Columbia, S.C., wrote a very interesting and informative article on the Panama Canal.

The Mitchell article provides an excellent background for understanding the recent problems in Panama. He has also written a companion article which appears in the same edition of the State entitled, "Canal's Gaillard Cut Is Named for Army Engineer From South Carolina," which gives the historical background of the Gaillard Cut.

Both of these articles are very informative and exceedingly well written. It is my feeling that the Panama Canal issue is one of the most important issues before the American public. The article by John A. Mitchell, in which he interviews Hugh M. Chapman, a member of the Board of Directors of the Panama Canal Company, and chairman of the

board of the Citizens and Southern National Bank of South Carolina, is an excellent piece which I would commend to all my colleagues in the Senate.

Mr. President, in order to share the article on the Panama Canal and its operation, as well as the historical article on the Gaillard Cut, with my colleagues, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

THE PANAMA CANAL—COLUMBIAN DISCUSSES ITS OPERATION

(By John A. Mitchell)

Little, if any, change in the operation of the Panama Canal is likely under the (Jimmy) Carter administration, according to a member of the corporate board of directors of the Panama Canal Co., which runs the business side of the canal.

"Carter the candidate is not Carter the President, and we're not sure he'll be much different (from past Presidents)," Hugh M. Chapman, chairman of The Citizens & Southern National Bank of S.C. and a member of the canal company board since last May, told The State.

"However, I might not be on the board after next Jan. 20 (inauguration date for Carter)," Chapman said.

The 11 directors serve at the pleasure of the secretary of the Army and "In effect, that's at the pleasure of the President, who appoints the secretary," he said.

The unique company was set up to run a government-owned facility, the Panama Canal, as if it were a private business and the board reports to the sole stockholder, the secretary of the Army.

Although the governor of the Canal Zone—an Army major general assigned for a four-year term—is ex-officio president of the Panama Canal Co., the business operation of the canal is entirely separate from the civil government of the zone, and both are separate from the administration of the Army base in the zone, Chapman said.

The board "tries to run the canal like a business and at least break even," Chapman said, but that the company has had a deficit for the past few years.

For fiscal 1975, the company had a net loss of $8.9 million, down a little from the net loss of $11.8 million for fiscal 1974.

The company foots the bill for all operations in the Canal Zone, pays interest charges on the U.S. investment—$14.8 million in fiscal 1975—and repays the U.S. Treasury the net cost of civil government, including health and medical services—$23.55 million in fiscal 1975.

The operation doesn't cost the U.S. taxpayer anything and Chapman says the board wants to keep it that way.

There was a toll increase in 1974—first since 1914—and another is likely to go into effect soon as a result of toll hearings held by the board in August, Chapman said.

Opposition to the toll hikes comes from the shipping lines, but "65 per cent of the ships using the canal are under foreign flags and they should pay, not the U.S. taxpayer," he said.

The company itself runs one ship, carrying mostly government cargo and some government personnel, between New Orleans and Panama. "This is a tie and a lifeline to our personnel there," Chapman said.

Until 1961 the company operated the Panama Line, which had several 10,000-ton ocean liners carrying government and commercial cargo and passengers between New York City and Panama. It was phased out after President Eisenhower in 1960 ordered the line to stop competing with private ships.

"Our job is primarily maintaining the locks and seeing that ships move efficiently through the canal," Chapman said. Basic design and operation haven't changed since the canal opened, Chapman said, although some sections have been widened to allow passage of larger ships and more two-way traffic.

There has been some trouble with Panama, mostly because of the dictator (Gen. Omar Torrijos), Chapman said, but the board "is not the party that negotiates treaties. However, the Secretary of State does keep us informed on the progress of such negotiations."

In the original treaty, signed 1903, the Republic of Panama granted the U.S. "in perpetuity the use, occupation and control" of the Canal Zone and the right to act as "if it were sovereign" in the zone, and that is what Panama primarily objects to now, Chapman said.

"They want an expiration date on the treaty," he said. (In 1974 Secretary of State Henry Kissinger signed an agreement to guide negotiation of a new treaty that would eventually return the Panama Canal to Panama.)

Chapman said a treaty could be negotiated "without giving up our solid rights" and that this would not be the first time the 1903 treaty had been amended. Article II of the 1903 treaty was modified in part by a 1936 treaty between Panama and the U.S. but did not change the basic rights granted the U.S., he said.

"It's not a natural resource. It's an engineering marvel that we built on land we bought and paid for," he said.

Under the 1903 treaty, the U.S. guaranteed Panama's independence (from Colombia) and paid her $10 million. In 1904, the U.S. bought the French Canal Co.'s rights and properties for $40 million and began construction.

The idea of Panama Canal goes back to 1524, when Charles V of Spain ordered the first survey of a proposed route. The French Canal Co., headed by Ferdinand DeLesseps, builder of the Suez Canal, began the effort in 1880 to build the waterway across Panama and tried for 20 years but didn't make it.

The U.S. Army Engineers began work on the Panama Canal in 1904 and it was completed and opened by late 1913 at a cost of about $387 million. The purpose was to aid U.S. defense and to expedite world shipping.

"Since then, our people have poured millions back into Panama," Chapman said. In addition to the country of Panama getting revenue from the canal, a number of Panamanians are employed in the operation, he said.

In fiscal 1975 $83,685,357 was paid to 8,549 non-U.S. citizens working in the Canal Zone. The 2,236 U.S. citizens employed there got $75,645,086.

The canal was opened to commercial traffic in August, 1914, when the SS Ancon made the first official ocean-to-ocean transit. In 1974 there were 15,269 transits and the ships paid $121,319,791 in tolls and toll credits. The pre-World War II traffic peak was 7,479 vessels in 1939.

The largest toll, $49,208.04, was paid by the Tokio Express in November, 1974, and the smallest, 36 cents, was paid by the adventurer Richard Halliburton for swimming the canal in 1928.

The tolls are cheaper than sailing the vessels around the tip of South America, Chapman said.

Panama Canal traffic picked up somewhat while the Suez Canal was closed, following the 6-day Israeli-Arab War in 1967, but declined when the Suez Canal re-opened last year, he said, because a lot of shippers from northern Europe like to go through the Mediterranean Sea, the Suez and around India to reach Far East destinations like Japan.

This also contributes to competitive toll pricing, he said.

In negotiating a Panama Canal treaty, a changing world and national interests must be considered, he said. Current treaty negotiations began under the late President Johnson.

"Most people don't realize that it's not a natural asset," Chapman said. "It takes precise engineering to make it work, not only the locks but also in piloting ships through, for if one ran aground, it would delay all."

South American economic problems, with resulting unrest and strife, as well as massive unemployment in Panama under its dictator, have contributed to the situation, he said.

"We understand and sympathize with these problems, but we shouldn't give up what is ours," Chapman said.

"The issue becomes the canal itself, and we've got to have qualified people to run it and keep it open."

CANAL'S GAILLARD CUT IS NAMED FOR ARMY ENGINEER FROM S.C.

(By John A. Mitchell)

The deepest canal cut in the world is named for a South Carolinian who supervised the slash through the Continental Divide, where the Panama Canal passes between banks exceeding 300 feet in height in some areas.

Originally the Culebra Cut, this section was renamed the Gaillard Cut in 1915 after Col. David DuBose Gaillard, who was born at Spring Grove Plantation in 1859 near the Clarendon County Town of Remini.

In 1928, a bronze plaque, 8 by 10 feet and weighing 1,200 pounds, was erected high on the rock face of Contractor's Hill, overlooking the cut, in Col. Gaillard's honor.

Gaillard attended Mount Zion Acadamy in Winnsboro and took the examination for an appointment to West Point while a clerk in the store of J. Fleming McMaster there, where he started work at 14.

Although he won, there was some question about his appointment because it was from Sumter County and he lived in Winnsboro (Fairfield County). However, Secretary of War Robert T. Lincoln ruled that a son under 21 was considered a resident of the place where his father lived (Sumter County) and Gaillard got the appointment.

He was graduated from West Point in 1884 and assigned to the U.S. Army Engineering Corps.

Gaillard was a lieutenant colonel when he was appointed a member of the Isthmian Canal Commission and made a director of the Panama Railroad in March, 1907.

He was supervisory engineer in charge of dredging the harbors, building breakwaters and all excavation except that which had to do with lock and dam construction.

In July, 1908, he was made division engineer of the Central Division, which included the "famous and terribly difficult" Culebra Cut, which was plagued by numerous mud and land slides.

When he took over, he cut the cost of moving dirt so that it would cover the extra work caused by the slides, and still had a surplus when the work was finished.

Average cost of moving dirt was $1.50 a cubic yard during the 12 months before he took over, and Gaillard cut that to 47 cents a cubic yard.

"Engineers say it will go into history as one of the great labors of the age. Gaillard made his way fighting. Literally he was forced to shackle the feet of the mountains. He did it and the chain is for all time," according to accounts in a book written by Helen K. Henning.

The jungle took its toll on Gaillard and in July, 1913, he was stricken with a severe illness brought on by overwork and the trying weather of tropical Panama, the book says.

He was unconscious when President Woodrow Wilson pressed the button on Oct. 10, 1913, to blow up the dam at Gamboa, letting the waters of the Atlantic into the cut to merge with the waters of the Pacific.

Gaillard, who was made a full colonel by act of Congress while he was ill, died Dec. 5, 1913, 26 days after the canal opened.

"Colonel Gaillard was the real builder of the canal . . ." the book says, and few will disagree.

QUORUM CALL

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS—QUORUM CALL

The PRESIDING OFFICER. The hour of 8:30 p.m. having arrived, morning business is now closed. Pursuant to the previous order, there will now be a quorum call, and the clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT SESSION OF THE TWO HOUSES—MESSAGE OF THE PRESIDENT OF THE UNITED STATES

The PRESIDING OFFICER. Under the previous order, the hour of 8:40 p.m. having arrived, the Senate will form itself into a body and proceed to the Hall of the House of Representatives.

Thereupon, at 8:40 p.m., the Senate, preceded by the Vice President, the Secretary of the Senate, Francis R. Valeo, and the Sergeant at Arms, F. Nordy Hoffman, proceeded to the Hall of the House of Representatives to hear the address by the President of the United States.

(The address by the President of the United States, this day delivered by him to the joint session of the two Houses of Congress, appears in the proceedings of the House of Representatives in today's RECORD.)

ADJOURNMENT UNTIL FRIDAY

At the conclusion of the joint session of the two Houses, and in accordance with the order previously entered, at 9:59 p.m., the Senate adjourned until Friday, January 14, 1977, at 12 meridian.

HOUSE OF REPRESENTATIVES—*Wednesday, January 12, 1977*

The House met at 8 o'clock p.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths.—Proverbs 3: 5, 6.

Eternal Father, grant us anew the sense of Thy presence as we worship Thee in spirit and in truth. Give us wisdom to know Thy will and strength to do it for our sakes and the sake of our Republic.

Bless Thou our President who speaks to us this evening. We thank Thee for his high purpose, his firm faith, his untiring devotion, and his dominant desire to serve our country as well as he could serve her. Now as he leaves office grant unto him peace of mind, health of body, strength of spirit, the memory of good work accomplished, and the grateful affection of our people.

Bless Thou our Nation. As a people give us the faith to walk with Thee and the strength to work for Thee that Thy kingdom may come and Thy will be done on Earth.

In the spirit of Him who is the Way we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
January 11, 1977.

Hon. THOMAS P. O'NEILL, JR.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 3:50 p.m. on Tuesday, January 11, 1977, and said to contain a message from the President in which he transmits the Report on Federal Energy Functions.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, JR.,
Clerk, U.S. House of Representatives.

REPORT ON FEDERAL ENERGY FUNCTIONS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–43)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Government Operations and ordered printed with illustrations:

To the Congress of the United States:

Under the provisions of section 162(b), Public Law 94–385, the Energy Conservation and Production Act of 1976, I am required to submit recommendations to the Congress on the reorganization of Federal energy and natural resources activities.

A study of alternative organizational arrangements has been underway since May 1976 under the leadership of the Office of Management and Budget and the Energy Resources Council.

After considering the alternatives, I have decided to recommend that the Congress approve creation of a Department of Energy. The details of the proposed organization, together with the necessary legislation, are included in the enclosed report which was prepared by the Office of Management and Budget and the Energy Resources Council.

I commend the report to the attention of the Congress and urge prompt action to create a Department of Energy.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

COMMENDATION OF PRESIDENT AND MRS. FORD

Mr. RHODES. Mr. Speaker, I send to the desk a resolution and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 101

Whereas Gerald R. Ford, a former Member of the House of Representatives, and Mrs. Ford have conducted themselves with an openness and honesty that have done much to restore confidence in our government and to earn them the respect of the people of the United States; Therefore be it

Resolved, That the House of Representatives of the United States commends President and Mrs. Ford for their dedicated public service, and looks forward to a continuation of the bonds of friendship and affection which exist between the Members of this House and their former colleague.

The resolution was agreed to.

A motion to reconsider was laid on the table.

RECESS

The SPEAKER. Pursuant to the order of the House on Tuesday, January 5, 1977, the Chair declares the House in recess until approximately 8:40 o'clock p.m.

Accordingly (at 8 o'clock and 7 minutes p.m.), the House stood in recess until the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 8 o'clock and 45 minutes p.m.

JOINT SESSION OF THE HOUSE AND SENATE HELD PURSUANT TO THE PROVISIONS OF HOUSE CONCURRENT RESOLUTION 1 TO HEAR AN ADDRESS BY THE PRESIDENT OF THE UNITED STATES

The SPEAKER of the House presided.

The Doorkeeper (Hon. James T. Molloy) announced the Vice President and Members of the U.S. Senate who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to escort the President of the United States into the Chamber: the gentleman from Texas (Mr. WRIGHT), the gentleman from Indiana (Mr. BRADEMAS), the gentleman from Washington (Mr. FOLEY), the gentleman from Arizona (Mr. RHODES), and the gentleman from Illinois (Mr. MICHEL).

The VICE PRESIDENT. The President of the Senate, pursuant to the order previously entered, appoints the following Senators as the committee on the part of the Senate to join a like committee on the part of the House of Representatives to escort the President of the United States into the House Chamber: the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Minnesota (Mr. HUMPHREY), the Senator from California (Mr. CRANSTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Ohio (Mr. METZENBAUM), the Senator from North Dakota (Mr. YOUNG), the Senator from Tennessee (Mr. BAKER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Alaska (Mr. STEVENS), the Senator from Nebraska (Mr. CURTIS), and the Senator from Texas (Mr. TOWER).

The Doorkeeper announced the Ambassadors, Ministers and Chargés d'Affaires of foreign governments.

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments entered the Hall of the House of Representatives and took the seats reserved for them.

The Doorkeeper announced the Chief Justice of the United States and the Associate Justices of the Supreme Court.

The Chief Justice of the United States and the Associate Justices of the Supreme Court entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

The Doorkeeper announced the Cabinet of the President of the United States.

The members of the Cabinet of the President of the United States entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 9 o'clock p.m. the Doorkeeper announced the President of the United States.

The President of the United States, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives, and stood at the Clerk's desk.

[Applause, the Members rising.]

THE STATE OF THE UNION—ADDRESS BY THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–1)

The SPEAKER. Members of the Congress, I have the great pleasure, the high privilege, and the distinct honor—I might say personal honor—to present to you an old friend, the President of the United States.

[Applause, the Members rising.]

The PRESIDENT. Mr. Speaker, Mr. Vice President, Members of the 95th Congress and distinguished guests:

In accordance with the Constitution, I come before you once again to report on the State of the Union.

This report will be my last, maybe.

But for the Union, it is only the first of such reports in our Third Century of Independence, the close of which none of us will ever see. We can be confident, however, that 100 years from now a freely elected President will come before a freely elected Congress chosen to renew our great Republic's pledge to Government of the people, by the people, for the people.

For my part, I pray the Third Century we are beginning will bring to all Americans, our children and their children's children, a greater measure of individual equality, opportunity and justice, a greater abundance of spiritual and material blessings, and a higher quality of life, liberty and the pursuit of happiness.

The State of the Union is a measurement of the many elements of which it is composed—a political union of diverse states, an economic union of varying interests, an intellectual union of common convictions and a moral union of immutable ideals.

Taken in sum, I can report that the State of the Union is good. There is room for improvement as always, but today we have a more perfect union then when my stewardship began.

As a people, we discovered that our Bicentennial was much more than a celebration of the past; it became a joyous reaffirmation of all that it means to be Americans, a confirmation before all the world of the vitality and durability of our free institutions.

I am proud to have been privileged to preside over the affairs of our Federal Government during these eventful years when we proved, as I said in my first words upon assuming office, that "our Constitution works; our Great Republic is a Government of laws and not of men; here, the people rule."

The people have spoken; they have chosen a new President and a new Congress to work their will; I congratulate you—particularly the new members—as sincerely as I did President-elect Carter. In a few days, it will be his duty to outline for you his priorities and legislative recommendations. Tonight, I will not infringe on that responsibility, but rather wish him the very best in all that is good for our country.

During the period of my own service in this Capitol and in the White House I can recall many orderly transitions of governmental responsibility—of problems as well as of position, of burdens as well as of power. The genius of the American system is that we do this so naturally and so normally; there are no soldiers marching in the streets except in the Inaugural Parade; no public demonstrations except for some of the dancers at the Inaugural Ball; the opposition party doesn't go underground but goes on functioning vigorously in the Congress and the country; and our vigilant press goes right on probing and publishing our faults and our follies, confirming the wisdom of the framers of the first amendment.

Because the transfer of authority in our form of government affects the state of the union, and of the world, I am happy to report to you that the current transition is proceeding very well. I was determined that it should; I wanted the new President to get off to an easier start than I had.

When I became President on August 9, 1974, our Nation was deeply divided and tormented. In rapid succession, the Vice President and the President had resigned in disgrace. We were still struggling with the after-effects of a long, unpopular and bloody war in Southeast Asia. The economy was unstable and racing toward the worst recession in 40 years. People were losing jobs. The cost of living was soaring. The Congress and the Chief Executive were at loggerheads. The integrity of our Constitutional process and of other institutions was being questioned.

For more than 15 years, domestic spending had soared as Federal programs multiplied and the expense escalated annually. During the same period, our national security needs were steadily shortchanged.

In the grave situation which prevailed in August, 1974, our will to maintain our international leadership was in doubt.

I asked for your prayers, and went to work.

In January 1975, I reported to the Congress that the state of the union was not good. I proposed urgent action to improve the economy and to achieve energy independence in ten years. I reassured America's allies and sought to reduce the danger of confrontation with potential adversaries. I pledged a new direction for America.

Nineteen seventy-five was a year of difficult decisions, but Americans responded with realism, common sense and self-discipline.

By January 1976, we were headed in a new direction, which I hold to be the right direction for a free society. I was guided by the belief that successful problem-solving requires more than Federal action alone; that it involves a full partnership among all branches and all levels of government, and public policies which nurture and promote the creative energies of private enterprises, institutions, and individual citizens.

A year ago, I reported that the state of the union was better—in many ways a lot better—but still not good enough.

Common sense told me to stick to the steady course we were on, to continue to restrain the inflationary growth of

government, to reduce taxes as well as spending, to return local decisions to local officials, to provide for long-range sufficiency in energy and national security needs. I resisted the immense pressures of an election year to open the floodgates of Federal money and the temptation to promise more than I could deliver. I told it as it was to the American people and demonstrated to the world that, in our spirited political competition, as in this chamber, Americans can disagree without being disagreeable.

Now, after 30 months as your President I can say that while we still have a way to go, I am proud of the long way we have come together.

I am proud of the part I have had in rebuilding confidence in the Presidency, confidence in our free system and confidence in our future. Once again, Americans believe in themselves, in their leaders, and in the promise that tomorrow holds for their children.

I am proud that today America is at peace. None of our sons are fighting and dying in battle anywhere in the world. And the chance for peace among all nations is improved by our determination to honor our vital commitments in defense of peace and freedom.

I am proud that the United States has strong defenses, strong alliances and a sound and courageous foreign policy.

—Our alliances with our major partners, the great industrial democracies of Western Europe, Japan, and Canada, have never been more solid. Consultations on mutual security, defense and East-West relations have grown closer. Collaboration has branched out into new fields, such as energy, economic policy and relations with the Third World.

We have used many avenues for cooperation, including summit meetings held among major allied countries. The friendship of the democracies is deeper, warmer and more effective than at any time in 30 years.

—We are maintaining stability in the strategic nuclear balance, and pushing back the spectre of nuclear war. A decisive step forward was taken in the Vladivostok Accord which I negotiated with General Secretary Brezhnev—joint recognition that an equal ceiling should be placed on the number of strategic weapons on each side.

With resolve and wisdom on the part of both nations, a good agreement is well within reach this year.

—The framework for peace in the Middle East has been built. Hopes for future progress in the Middle East were stirred by the historic agreements we reached and the trust and confidence that we formed.

—Thanks to American leadership, the prospects for peace in the Middle East are brighter than they have been in three decades. The Arab States and Israel continue to look to us to lead them from confrontation and war to a new era of accommodation and peace. We have no alternative but to persevere and I am sure we will. The opportunities for a final settlement are great, and the price of failure is a return to the bloodshed and hatred that for too long have brought tragedy to all the peoples of this area, and repeatedly edged the world to the brink of war.

—Our relationship with the People's Republic of China is proving its importance and its durability. We are finding more and more common ground between our two countries on basic questions of international affairs.

In my two trips to Asia as President, we have reaffirmed America's continuing vital interest in the peace and security of Asia and the Pacific Basin, established a new partnership with Japan, confirmed our dedication to the security of Korea, and reinforced our ties with the free nations of Southeast Asia.

—An historic dialogue has begun between industrial nations and the developing nations. Most proposals on the table are initiatives of the United States, including those on food, energy, technology, trade, investment and commodities. We are well launched on this process of shaping positive and reliable economic relations between rich nations and poor nations over the long-term.

—We have made progress in trade negotiations and avoided protectionism during recession. We strengthened the international monetary system. During the past two years the free world's most important economic powers have already brought about important changes that serve both developed and developing economies. The momentum already achieved must be nurtured and strengthened, for the prosperity of the rich and poor depends upon it.

—In Latin America, our relations have taken on a new maturity and a sense of common enterprise.

—In Africa, the quest for peace, racial justice and economic progress is at a crucial point. The United States, in close cooperation with the United Kingdom, is actively engaged in that historic process. Will change come about by warfare and chaos and foreign intervention? Or will it come about by negotiated and fair solutions, ensuring majority rule, minority rights and economic advance? America is committed to the side of peace and justice, and to the principle that Africa should shape its own future free of outside intervention.

—American leadership has helped to stimulate new international efforts to stem the proliferation of nuclear weapons and to shape a comprehensive treaty governing the use of the oceans.

I am gratified by these accomplishments. They constitute a record of broad success for America, and for the peace and prosperity of all mankind. This Administration leaves to its successor a world in better condition than we found. We leave, as well, a solid foundation for progress on a range of issues that are vital to the well being of America.

What has been achieved in the field of foreign affairs, and what can be accomplished by the new administration, demonstrate the genius of Americans working together for the common good. It is this, our remarkable ability to work together, that has made us a unique nation. It is Congress, the President, and the people striving for a better world.

I know all patriotic Americans want this Nation's foreign policy to succeed.

I urge members of my party in this Congress to give the new President loyal support in this area.

I express the hope that this new Congress will re-examine its constitutional role in international affairs.

The exclusive right to declare war, the duty to advise and consent on the part of the Senate, and the power of the purse on the part of the House, are ample authority for the legislative branch and should be jealously guarded.

But because we may have been too careless of these powers in the past does not justify congressional intrusion into, or obstruction of, the proper exercise of Presidential responsibilities now or in the future. There can be only one Commander-in-Chief. In these times crises cannot be managed and wars cannot be waged by committee. Nor can peace be pursued solely by parliamentary debate. To the ears of the world, the President speaks for the Nation. While he is, of course, ultimately accountable to the Congress, the courts and the people, he and his emissaries must not be handicapped in advance in their relations with foreign governments as has sometimes happened in the past.

At home, I am encouraged by the Nation's recovery from the recession and our steady return to sound economic growth. It is now continuing after the recent period of uncertainty, which is part of the price we pay for free elections.

Our most pressing need today and in the future is more jobs—productive and permanent jobs created by a thriving economy.

We must revise our tax system both to ease the burden of heavy taxation and to encourage the investment necessary for the creation of productive jobs for all Americans who want to work. Earlier this month I proposed a permanent income tax reduction of ten billion dollars below current levels including raising the personal exemption from $750 to $1,000. I also recommended a series of measures to stimulate investment, such as accelerated depreciation for new plants and equipment in areas of high unemployment, a reduction in the corporate tax rate from 48 to 46 percent, and eliminating the present double taxation of dividends. I strongly urge the Congress to pass these measures to help create the productive, permanent jobs in the private economy that are so essential to our future. All of the basic trends are good; we are not on the brink of another recession or economic disaster. If we follow prudent policies that encourage productive investment and discourage destructive inflation, we will come out on top; and I am sure we will.

We have successfully cut inflation by more than half: when I took office, the Consumer Price Index was rising at 12.2 percent a year. During 1976, the rate of inflation was five percent.

We have created more jobs, over four million more jobs today than in the Spring of 1975. Throughout this nation today we have over 88 million people in useful, productive jobs—more than at any other time in our nation's history. But, there are still too many Americans unemployed. This is the greatest regret that I have as I leave office.

We brought about with the Congress, after much delay, the renewal of general revenue sharing. We expanded community development and federal manpower programs. We began a significant urban mass transit program. Federal programs today provide more funds for our states and local governments than ever before—$70 billion for the current fiscal year.

Through these programs and others that provide aid directly to individuals we have kept faith with our tradition of compassionate help for those who need it. As we begin our third century we can be proud of the progress that we have made in meeting human needs for all of our citizens.

We cut the growth of crime by nearly 90 percent. Two years ago, crime was increasing at a rate of 18 percent annually. In the first three quarters of 1976, that growth rate had been cut to two percent. But crime, and the fear of crime, remains one of the most serious problems facing our citizens.

We have had some successes. And there have been some disappointments.

Bluntly, I must remind you that we have not made satisfactory progress toward achieving energy independence.

Energy is absolutely vital to the defense of our country, to the strength of our economy, and to the quality of our lives. Two years ago I proposed to the Congress the first comprehensive national energy program:

A specific and coordinated set of measures that would end our vulnerability to embargo, blockade, or arbitrary price increases, and would mobilize U.S. technology and resources to supply a significant share of the free world's energy after 1985.

Of the major energy proposals I submitted two years ago, only half belatedly became law. In 1973, we were dependent upon foreign oil imports for 36 percent of our needs. Today we are 40 percent dependent, and we'll pay out 34 billion dollars for foreign oil this year. Such vulnerability at present or in the future is intolerable, and must be ended.

The answer to where we stand on our national energy effort today reminds me of the old argument about whether the tank is half full or half empty. The pessimist will say we have half failed to achieve our ten-year energy goals, the optimist will say that we have half succeeded. I am always an optimist, but we must make up for lost time.

We have laid a solid foundation for completing the enormous task which confronts us. I have signed into law five major energy bills which contain significant measures for conservation, resource development, stockpiling and standby authorities.

We have moved forward to develop the Naval Petroleum Reserves; to build a five hundred million barrel strategic petroleum stockpile; to phase-out unnecessary government allocation and price controls; to develop a lasting relationship with other oil consuming nations; to improve the efficiency of energy use through conservation in automobiles, buildings and industry; and to expand research on new technology and renewable resources, such as wind power, geothermal and solar energy.

All these actions, significant as they are for the long term, are only the beginning. I recently submitted to the Congress my proposals to reorganize the federal energy structure, and the hard choices which remain if we are serious about reducing our dependence upon foreign energy.

These include programs to reverse our declining production of natural gas and increase incentives for domestic crude oil production. I propose to minimize environmental uncertainties affecting coal development, expand nuclear power generation and create an energy independence authority to provide government financial assistance for vital energy programs where private capital is not available.

We must explore every reasonable prospect for meeting our energy needs when our current domestic reserves of oil and natural gas begin to dwindle in the next decade.

I urgently ask Congress and the Administration to move quickly on these issues. This Nation has the resources and the capability to achieve our energy goals if its government has the will to proceed, and I think we do.

I have been disappointed by inability to complete many of the meaningful organizational reforms which I contemplated for the Federal Government, although a start has been made.

For example, the Federal Judicial System has long served as a model for other courts. But today it is threatened by a shortage of qualified Federal judges and an explosion of litigation claiming Federal jurisdiction.

I commend to the new Administration and the Congress the recent report and recommendations of the Department of Justice, undertaken at my request, on "the needs of the Federal Courts." I especially endorse its proposals for a new commission on the judicial appointment process.

While the Judicial Branch of our Government may require reinforcement, the budgets and payrolls of the other branches remain staggering. I cannot help but observe that while the White House Staff and the Executive Office of the President have been reduced and the total number of civilians in the Executive Branch contained during the 1970s, the Legislative Branch has increased substantially, although the membership of the Congress remains at 535. Congress now costs the taxpayers more than a million dollars a year per member; the whole Legislative budget has passed the billion dollar mark.

I set out to reduce the growth in the size and spending of the Federal Government, but no President can accomplish this alone. The Congress sidetracked most of my requests for authority to consolidate overlapping programs and agencies, to return more decision-making and responsibility to State and local governments through block grants instead of rigid categorical programs and to eliminate unnecessary red tape and outrageously complex regulations.

We have made some progress in cutting back the expansion of Government and its intrusion into individual lives—but, believe me, there is much more to be done, and you and I know it. It can only be done by tough and temporarily painful surgery by a Congress as prepared as the President to face up to this very real political problem.

Again, I wish my successor, working with a substantial majority of his own party, the best of success in reforming the costly and cumbersome machinery of the Federal Government.

The task of self-government is never finshed. The problems are great; the opportunities are greater.

America's first goal is and always will be peace with honor. America must remain first in keeping peace in the world. We can remain first in peace only if we are never second in defense.

In presenting the State of the Union to the Congress and to the American people, I have a special obligation as Commander-in-Chief to report on our national defense. Our survival as a free and independent people requires, above all, strong military forces that are well-equipped and highly trained to perform their assigned mission.

I am particularly gratified to report that over the past two and a half years we have been able to reverse the dangerous decline of the previous decade in the real resources this country was devoting to national defense. This was an immediate problem I faced in 1974. The evidence was unmistakable that the Soviet Union had been steadily increasing the resources it applied to building its military strength.

During this same period the United States' real defense spending declined. In my three budgets, we not only arrested that dangerous decline, but we have established the positive trend which is essential to our ability to contribute to peace and stability in the world.

The Vietnam War both materially and psychologically affected our overall defense posture. The dangerous anti-military sentiment discouraged defense spending and unfairly disparaged the men and women who serve in our armed forces.

The challenge that now confronts this country is whether we have the national will and determination to continue this essential defense effort over the long term, as it must be continued. We can no longer afford to oscillate from year to year in so vital a matter. Indeed, we have a duty to look beyond the immediate question of budgets, and to examine the nature of the problem we will face over the next generation.

I am the first recent President able to address long-term basic issues without the burden of Vietnam. The war in Indochina consumed enormous resources, at the very time that the overwhelming strategic superiority we once enjoyed was

disappearing. In past years, as a result of decisions by the United States, our strategic forces leveled off. Yet, the Soviet Union continued a steady, constant build-up of its own forces, committing a high percentage of its national economic effort to defense.

The United States can never tolerate a shift in strategic balance against us, or even a situation where the American people or our allies believe the balance is shifting against us. The United States would risk the most serious political consequences if the world came to believe that our adversaries have a decisive margin of superiority. To maintain a strategic balance we must look ahead to the 1980s and beyond. The sophistication of modern weapons requires that we make decisions now if we are to ensure our security ten years from now.

Therefore I have consistently advocated and strongly urged that we pursue three critical strategic programs: the Trident missile launching submarine; the B–1 bomber, with its superior capability to penetrate modern air defenses; and a more advanced intercontinental ballistic missile that will be better able to survive nuclear attack and deliver a devastating retaliatory strike.

In an era where the strategic nuclear forces are in rough equilibrium, the risks of conflict below the nuclear threshold may grow more perilous. A major long-term objective, therefore, is to maintain capabilities to deal with, and thereby deter, conventional challenges and crises, particularly in Europe.

We cannot rely solely on strategic forces to guarantee our security or to deter all types of aggression. We must have superior Naval and Marine forces to maintain freedom of the seas, strong multi-purpose tactical Air Forces, and mobile, modern ground forces.

Accordingly: I have directed a long-term effort to improve our worldwide capabilities to deal with regional crises.

—I have submitted a five year Naval building program indispensable to the Nation's maritime strategy.

—Because the security of Europe and the integrity of N.A.T.O. remain the cornerstone of American defense policy, I have initiated a special, long-term program to ensure the capacity of the alliance to deter or defeat aggression in Europe.

As I leave office, I can report that our national defense is effectively deterring conflict today. Our Armed Forces are capable of carrying out the variety of missions assigned to them. Programs are underway which will assure we can deter war in the years ahead.

But I also must warn that it will require a sustained effort over a period of years to maintain these capabilities. We must have the wisdom, the stamina and the courage to prepare today for the perils of tomorrow, and I believe we will.

As I look to the future—and I assure you I intend to go on doing that for a good many years—I can say with confidence that the State of the Union is good, but we must go on making it better and better.

This gathering symbolizes the Constitutional foundation which makes continued progress possible, synchronizing the skills of three independent branches of government, reserving fundamental sovereignty to the people of this great land.

It is only as the temporary representatives and servants of the people that we meet here—we bring no hereditary status or gift of infallibility and none follows us from this place. Like President Washington, like the more fortunate of his successors, I look forward to the status of private citizen with gladness and gratitude. To me, being a citizen of the United States of America is the greatest honor and privilege in this world.

From the opportunities which fate and my fellow citizens have given me, as a member of the House, as Vice President and President of the Senate, and as President of all the people, I have come to understand and to place the highest value on the checks and balances which our founders imposed on government through the separation of powers, among co-equal Legislative, Executive and Judicial Branches.

This often results in difficulty and delay, as I well know, but it also places supreme authority under God, beyond any one person, any one branch, any majority great or small, or any one party. The Constitution is the bedrock of all our freedoms; guard and cherish it; keep honor and order in your own house; and the Republic will endure.

It is not easy to end these remarks; in this chamber, along with some of you, I have experienced many, many of the highlights of my life. It was here that I stood 28 years ago with my freshman colleagues as Speaker Sam Rayburn administered the oath—I see some of you now, Charlie Bennett, Dick Bolling, Carl Perkins, Pete Rodino, Harley Staggers, Tom Steed, Sid Yates and Clem Zablocki, and I remember those who have gone to their rest.

It was here we waged many, many a lively battle, won some, lost some, but always remaining friends. It was here surrounded by such friends, that the distinguished Chief Justice swore me in as Vice President on December 6, 1973. It was here I returned eight months later as your President to ask not for a honeymoon, but for a good marriage.

I will always treasure those memories and your many, many kindnesses. I thank you for them all.

My fellow Americans, I once asked you for your prayers, and now I give you mine: May God guide this wonderful country, its people, and those they have chosen to lead them. May our third century be illuminated by liberty and blessed with brotherhood, so that we and all who come after us may be the humble servants of thy peace. Amen.

Good night and God bless you.

[Applause, the Members rising.]

At 9 o'clock and 51 minutes p.m., the President, accompanied by the committee of escort, retired from the Hall of the House of Representatives.

The Doorkeeper escorted the invited guests from the Chamber in the following order:

The members of the President's Cabinet.

The Chief Justice of the United States and the Associate Justices of the Supreme Court.

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

JOINT SESSION DISSOLVED

The SPEAKER. The Chair declares the joint session of the two Houses now dissolved.

Accordingly, at 9 o'clock and 58 minutes p.m., the joint session of the two Houses was dissolved.

The Members of the Senate retired to their Chamber.

MESSAGE OF THE PRESIDENT REFERRED TO THE COMMITTEE OF THE WHOLE HOUSE ON THE STATE OF THE UNION

Mr. WRIGHT. Mr. Speaker, I move that the message of the President be referred to the Committee of the Whole House on the State of the Union and ordered printed.

The motion was agreed to.

LEGISLATION TO PERMIT AWARD OF REASONABLE COSTS FOR PUBLIC PARTICIPATION IN PROCEEDINGS BEFORE FEDERAL AGENCIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, I have introduced this week H.R. 66, a bill to permit the awarding of reasonable costs for public participation in proceedings before Federal agencies and for some types of litigation concerning agency decisions.

This measure would provide funds to accomplish what has already been envisioned by the Congress through statutes intended to open to public view and participation the proceedings of Federal regulatory and administrative agencies such as the Federal Trade Commission, the Securities and Exchange Commission, the Food and Drug Administration, and many others.

For years consumer and public-interest groups, small businesses, and private citizens have protested that they are denied equal participation in the decisionmaking process of Federal agencies. These groups and individuals have argued, persuasively, that their ability to pay for representation before the agencies effectively keeps their voice from being heard.

Big businesses, major trade associations, and special-interest groups have suffered no such restriction, however. Their treasuries are large enough to pay the costs of representation.

A number of laws have been enacted guaranteeing those affected by agency decisions to be heard. But this assurance does no good until the necessary funds are there.

This bill would provide those funds. The total costs are expected to be less than $2 million a year—a reasonable sum when one considers the good that should come from the opening of Commission

proceedings to all those with a valid interest.

Under this legislation, the payment of reasonable costs would be authorized by the agency involved only when a significant contribution was made by those appearing. In legal actions contesting regulatory agency decisions, attorneys' fees, and other costs would be provided only when the plaintiffs substantially prevailed.

These procedures could, conceivably, result in an overall cost reduction for the Government. By insuring adequate public participation before regulatory agencies and commissions, we can reasonably expect better decisions and fewer challenges that consume both time and money.

Mr. Speaker, I believe this is needed legislation to complete a process of public participation that already has begun.

WHALEN TO SPONSOR BRIEFING ON WESTIN REPORT ON MEDICAL RECORD PRIVACY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, I wish to congratulate the National Bureau of Standards on the excellent report they released this morning, entitled, "Computers, Health Records, and Citizen Rights."

This report was authored by Columbia University Prof. Alan F. Westin, one of the Nation's foremost experts on the subject of rights of privacy. The NBS report provides what appears to be the most indepth analysis to date of the problem of managing data systems in the health field so that citizens' privacy rights are adequately protected.

We all know that medical records contain absolutely the most sensitive, personal information about us. Now, there is increasing concern over the confidentiality of those records.

Traditionally, personal medical records could be obtained only by going to the individual's personal physician or by checking hospital records, and most people felt secure in relying upon traditional concepts of doctor-patient privileged communications to protect the confidentiality of those records.

But now medical practice is becoming more institutionalized. Primary health care is coming more and more from clinics or via health care plans. And hospitals are increasingly called upon to deliver certain kinds of primary health care that previously have been delivered by private practitioners. So, there is perhaps a less secure feeling on the patient's part, because he or she does not have a personal relationship with the physician.

More ominous, though, is the vast growth in the amount and variety of medical data that flow to third parties—insurance companies, employers, investigators, researchers, et cetera. The use of computerized data storage and retrieval makes medical records far easier to accumulate, store, and use. This, I believe, is what really troubles most Americans when they contemplate the security of their medical records.

Professor Westin's report probes this problem and many other important issues in the medical record privacy area.

Related to the third-party access problem is the common practice of insurance companies and others routinely requiring individuals to sign forms giving open-ended consent for an examination of all available personal medical information. Westin analogizes this kind of blanket release form, which is generally obtained under implied coersion, to the sort of general search warrant that the British Government used during our colonial period. The fourth amendment now prohibits the use of such warrants by Government authorities.

I believe that the issue of confidentiality of medical records is one that touches every American and should be of interest and concern to all Members of Congress. Consequently, Mr. Speaker, I have arranged for Professor Westin and others associated with the National Bureau of Standards study to come to the Hill sometime early in the week of January 24 to conduct a briefing for Members and staff. The details now are being worked out and I will announce them as soon as possible.

In the meantime, I want to insert at this point in the RECORD the "Code of Citizen-Rights Practices for Health Data Systems" and the "Twelve Basic Principles for Safeguarding Privacy of Health Data Systems." Both are extracted from the NBS report, "Computers, Health Records, and Citizen Rights," which was released today:

CODE OF CITIZEN-RIGHTS PRACTICES FOR HEALTH DATA SYSTEMS*

1. Health data systems should be created, significantly altered, and periodically audited through public rather than closed procedures.

Health data systems should be created by public notice and privacy-impact procedures, communicated to any population of known individuals about whom records are to be kept, and reviewed by an independent authority. Major expansions, and tests of the system's adherence to rules, should also be reviewed periodically by outside authority.

2. Every health data system should observe limits of relevance and social propriety in what personal and medical information it collects or records.

Such limits will depend not only on what each data system really needs to carry out a mission approved by society but also on how effectively, by law and practice, an organization handles the particularly sensitive health information it seeks to record.

3. Every health data system should promulgate clear rules and procedures that insure citizen rights.

These include advance notice to individuals of the uses that will be made of their personal information; a right to obtain full information about the contents of their health records and to inspect such records if they desire; information-release forms that specify what is to be released, to whom, and for what period of time; and patient's rights handbooks and representatives for all health-care facilities.

4. Health data system managers should take special measures to protect the accuracy and security of the data they keep.

Personal data should be kept accurate, timely, and complete, measured by the kinds of uses that are being made of it. Staffs should be trained in citizen rights principles and procedures, and data security measures should be taken in accordance with the history of data threats in that organization's experience.

5. Managers should follow special procedures to allow medical research, health-care evaluation, and public oversight without impairing citizen rights.

Such procedures include using records in statistical or coded forms for most review or research purposes, having protective committees screen requests for access to data when informed consent of the individual cannot be obtained, and using random audit rather than individualized review procedures in order to avoid invading privacy rights.

*This code incorporates the twelve principles contained in the final chapter of *Computers, Health Records, and Citizen Rights*, published by the National Bureau of Standards.

[From Computers, Health Records, and Citizen Rights—National Bureau of Standards]

TWELVE BASIC PRINCIPLES FOR SAFEGUARDING PRIVACY OF HEALTH DATA SYSTEMS

(Directed by Alan F. Westin)

The report recommends 12 major principles for the management of data systems in the health field, and discusses alternative ways that these principles might be carried out. The 12 principles are:

1. There should be a procedure for issuing a public notice and privacy-impact statement whenever an automated data system is created in the health field, filed with an appropriate outside authority and communicated to any continuing population of individuals whose records will be affected.

2. Socially-acceptable standards of relevance and propriety in the collection of personal data should be worked out for data systems in each of the three zones of health-data use, through public discussion and appropriate policy-setting mechanisms.

3. Individuals should be given a clearly-written account of how their personal information will be used whenever they are asked to supply personal information to a health data system, along with the procedures to be followed before any uses are made of their data other than those originally specified.

4. Forms used to release personal information from a health data system should be for a specific purpose, describe the information to be released, and should be limited in time, and the individual's consent to such releases should be informed as well as voluntary.

5. As a general matter, patients should have a right to full information about their health conditions. Where health data is to be used to make judgments about service payment and claims, or in any non-medical social and governmental programs, the individual should have an absolute right to inspect what is to be released from his/her record. In chronic and acute care, patients should also have a right to see any part of the medical record, including the medical professional's working notes, if the patient insists upon this after the medical professional has had a chance to explain directly to the patient why he or she feels that such disclosure would not be in the patient's best medical interest. A special procedure is suggested for patient-access problems in psychiatric care.

6. Managers of health data systems must take steps to see that the personal records they store are as accurate, timely, and complete as the uses to be made of them require, not only to assure the individual's proper health care but also to protect the individual's rights.

7. Data security measures must be taken to control access according to the policies set by law or by management policies, and the adequacy of those measures will be meas-

ured by the previous history of threats to data confidentiality in that type of organization.

8. Health data systems should conduct special orientation and training programs to inculcate respect for citizen rights among their staffs and to deal with problems that may arise.

9. Each health data system should prepare and distribute a patient's rights handbook, and install a readily-available and independent patient rights representative in the organization.

10. Because new issues are posed whenever health data systems adopt new file applications, there should be provision for periodic independent review of each system.

11. Special efforts should be made so that confidentiality rules do not interfere with the public's right to know what is being done by government agencies or by private recipients of government funds, and to carry out critical oversight functions in the public interest.

12. The importance of health-care evaluation and medical research calls for developing special procedures so that these activities can be carried on without jeopardizing citizen rights.

NATIONAL NEIGHBORHOOD POLICY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. BURKE) is recognized for 5 minutes.

Mrs. BURKE of California. Mr. Speaker, today I am reintroducing the National Neighborhood Policy Act which addresses the need for developing a comprehensive and coordinated policy on neighborhoods. It seeks to establish a National Commission on Neighborhoods which would be charged with evaluating the impact of public policies and programs on neighborhoods.

This bill is identical to a bill I introduced in the 94th Congress and similar to legislation reported out of the Subcommittee on Housing and Community Development at the end of the last Congress.

The condition of many of our major cities makes obvious the need for a comprehensive neighborhood policy which takes into account the great diversity in neighborhoods throughout the Nation. The legislation I am introducing today is in recognition of the fact that people live, not in abstract regions or statistical areas, but in community groups called neighborhoods. It is the first step toward reversing the decline of cities through a recognition of their vitality and the importance of drawing city dwellers into the decisionmaking process.

Research carried out under the auspices of the National Center for Urban Ethnic Affairs suggests that although it may be far removed geographically, the greatest single influence on urban neighborhoods is the Federal Government. The impact which Federal policies and programs have upon neighborhoods for good or bad is extensive. Often it is indirect and, unfortunately, it is often unintentional. In some cases, mistaken policies involving large sums of money have had tragic effects for the residents.

We have seen these effects in many urban redevelopment programs. Programs which were intended to improve the lot of inner-city residents have instead forced these people out to make room for the affluent. In all the programs intended to help people, the goal we have never accomplished is the redevelopment of a neighborhood for the people who currently live there. The only way we are going to do this is to develop a comprehensive plan for neighborhood revitalization. We must find out exactly what these Federal programs are doing to neighborhoods. Programs do not exist in a vacuum any more than do people. We must learn how these diverse programs interact in a neighborhood to contribute to that neighborhood's strength or to its decline.

The policy framework for this legislation evolved from a discussion paper written by Mr. Arthur J. Naparstek and prepared for the National Urban Policy Roundtable. The paper was subsequently published as a monograph entitled "Policy Options for Neighborhood Empowerment." Mr. Naparstek makes some convincing arguments and innovative suggestions. At this point, I am inserting selected passages of Mr. Naparstek's monograph for my colleague's review:

POLICY OPTIONS FOR NEIGHBORHOOD EMPOWERMENT

(By Arthur J. Naparstek)

Just as city policies must support decentralization efforts, so must state and federal policies aim at removing disincentives while fulfilling various preconditions appropriate to each level of government. At federal and state levels, major efforts must encompass removal of legal barriers to decentralization, provision of resources, and reorientation of agencies and programs. The following discussion presents several policy options.

A principal problem in writing legislation has been to define the appropriate role of the federal government. For the purposes of this chapter, we define the role as having three major areas of concern: structuring financial resources, reorientation of federal programs and agencies, and provision of technical assistance through model legislation.

(1) Structuring Financial Resources. Policy must support programs which can redistribute resources and provide subsidies and general incentives for reinvestment. Resource allocation must be a fundamental part of any decentralization strategy; here the federal government has the most direct impact.

* * * * *

A multiplicity of federal programs impact directly or indirectly on the neighborhood. However, no comprehensive analysis of their effect has been made. Before future policy options are developed, comprehensive assessment of current practices in code enforcement, urban homesteading, and mortgage insurance is needed. Further, criteria for utilization of revenue sharing funds, community development block grants, and Title II special revenue sharing for social services at the neighborhood level must be developed.

Unless policies stimulate confidence, provide incentives and capital investment, and can offset the complex web of structured disincentives and neighborhood disinclination to invest, early neighborhood decentralization efforts cannot succeed. For neighborhoods to remain viable, a financial climate must be created which can attract both large and small scale reinvestment. Given the expectation that public subsidies will be limited, policy options should provide direct incentives to lenders at a neighborhood level (NEA Neighborhood Conservation).

* * * * *

(2) Reorienting Regulatory Agencies and Programs. If certain regulatory agencies do not function adequately, policy options promoting incentives and redistribution are meaningless. Of critical concern is the Federal Home Loan Bank Board, which would be given increased powers through the Financial Institutions Act.

Congress empowered the Board to safeguard citizen housing needs. However, evidence presented during House and Senate hearings on redlining and disinvestment indicate that the FHLBB has been more vigilant in attending to the safety and soundness of its member savings and loan associations than it has in encouraging them to meet the housing needs of their respective communities. Board representatives testified against the Home Mortgage Disclosure Act of 1975 (S. 1281), which would improve public understanding of the role of depository institutions in home financing. During the hearings testimony clearly showed that the regulatory agency did not actively intervene in those cases in which savings and loan associations were discriminatory in their lending patterns.

Another problem is that regulatory agency board members are often retired savings and loan association officials or others with close ties to the industry. While their accumulated expertise is of vital importance to effective regulation, nevertheless, their relationship to the industry makes objectivity difficult.

Since incentive programs must directly confront and offset disinvestment practices, the role played by regulatory bodies is crucial. Therefore, practices of the following agencies should also be assessed: the Federal Deposit Insurance Corporation (FDIC), the Federal Savings and Loan Insurance Corporation (FSLIC) (which regulates not only federal institutions but also the majority of state-chartered institutions utilizing their deposit insurance), and the Federal Reserve Board (FRB).

Although the transition from categorical programs to community development block grants has virtually eliminated direct federal funding of neighborhood programs, most agencies are still engaged in various research and demonstration projects which impact on neighborhoods. The Department of Housing and Urban Development, in collaboration with the FHLBB, has funded Neighborhood Housing Service demonstration programs in 20 cities. The Department of Commerce, through the Economic Development Administration and the Office of Minority Business Enterprise, has sponsored several economic revitalization projects. The Department of Health, Education, and Welfare has carried out many demonstration programs on neighborhood approaches to human services, health care, mental health, and drug abuse. The Law Enforcement Administration Agency, under the National Priorities Program, has allocated funds for citizen initiative programs in crime prevention, criminal justice, and corrections.

Unfortunately, federal demonstration programs are guided by no comprehensive policy. Agencies have no program priorities. Most of the money is discretionary and not subject to Congressional oversight.

(3) Future Directions. The problems of decentralization are myriad. They relate to the degree of autonomy to grant neighborhoods, the separation of overlapping jurisdictions delivering city services, and conditions appropriate to meaningful citizen participation. Clearly, the federal government must provide technical assistance and guidance in dealing with these issues.

An Omnibus Neighborhood Act needs to be enacted to serve as a model for a comprehensive approach to restructuring procedures of governance. This Act could help cities and their residents define a workable mix of centralization and decentralization of services, necessary financial systems providing subsidy and incentive programs, federal programs appropriate to local conditions, and

strategies generating relevant oversight of regulatory bodies, given neighborhood problems and priorities.

To begin to develop such an Act, the Senate Committee on Banking, Housing, and Urban Affairs should hold hearings on neighborhood-related issues. These hearings should focus on the full range of existing programs; assess city and state laws pertaining to neighborhood decentralization; and identify legal, administrative and political obstacles. Further, a Presidential Commission on Neighborhood Life should be convened to develop a more refined set of policy options.

* * * * *

Although neighborhood approaches to governance and services delivery do not represent a panacea for all problems, it is an area of overriding concern for urban policymakers. The challenge to government at all levels is to devise creative policies which can support political and administrative decentralization. This chapter has presented several conceptual schemes in order to provide a foundation for possible city, state, and federal policy options.

RELEASE OF PLO TERRORIST UNCONSCIONABLE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, I am sure our colleagues share my sense of outrage and shock over the deplorable action taken by France in releasing the suspected terrorist, Abu Daoud.

International terrorism is one of the most disturbing and frustrating aspects of our modern-day world. It knows no boundaries and affects all nations. It can only be controlled and eliminated through the strong will and cooperation of civilized people everywhere. To give in to such terrorism—particularly in a case such as this where no hostages or lives are immediately threatened—is to set this effort back by years.

Both Israel and West Germany are democratic nations with established histories of fair and open judicial systems. Had Mr. Daoud been turned over to either country to stand trial for one of the most heinous crimes of the last 30 years, he would have been given a fair and public hearing. His fate would have been determined through the normal judicial process.

I am dismayed by France's action. I can only hope that the outcry of public opinion in this case will cause its leaders to reconsider, should they ever be in a similar circumstance again. To give in to international terrorism is to encourage it and condone it. Such an attitude is unconscionable.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FRENZEL) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, immediately following Mr. CONABLE'S special order for 1 hour on January 13, 1977.

Mr. WHALEN, for 5 minutes, today.

(The following Members (at the request of Mr. BENJAMIN) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mrs. BURKE of California, for 5 minutes, today.

Mr. OTTINGER, for 5 minutes, today.

Mr. FASCELL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GILMAN.

Mr. HANSEN.

Mr. MCDONALD in two instances.

Mrs. MEYNER.

(The following Members (at the request of Mr. FRENZEL) and to include extraneous material:)

Mr. COUGHLIN in two instances.

Mr. FINDLEY.

(The following Members (at the request of Mr. BENJAMIN) and to include extraneous matter:)

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. MAZZOLI in two instances.

Mr. LEHMAN.

Mr. MINISH.

Mr. WAXMAN.

Mr. HAMILTON.

Mr. ROYBAL.

Mr. LONG of Maryland.

Mr. BRECKINRIDGE in 10 instances.

Mr. BLANCHARD.

Mr. KOCH in six instances.

Mr. GAYDOS in 10 instances.

Mr. RICHMOND.

ADJOURNMENT

Mr. WRIGHT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 59 minutes p.m.), the House adjourned until Thursday, January 13, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

391. A letter from the Comptroller General of the United States, transmitting a report on U.S. forces in Korea; jointly, to the Committees on Government Operations, and Armed Services.

392. A letter from the Comptroller General of the United States, transmitting a report on ways to improve Department of Defense management and congressional overview of new requirements for Field Army low-altitude, surface-to-air defense weapon systems; jointly, to the Committees on Government Operations, and Armed Services.

393. A letter from the Chairman, Federal Election Commission, transmitting the Commission's proposed regulations governing Federal elections, pursuant to section 316(c) of the Federal Election Campaign Act of 1971, as amended (H. Doc. No. 95–44); to the Committee on House Administration and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT (for himself, Mr. BOB WILSON, Mr. MOLLOHAN, Mr. SPENCE, Mr. BADHAM, Mr. BEARD of Tennessee, Mr. BRINKLEY, Mr. ROBERT W. DANIEL, JR., Mr. DAVIS, Mr. DICKINSON, Mr. EMERY, Mr. HILLIS, Mrs. HOLT, Mr. LLOYD of California, Mr. MCDONALD, Mr. MONTGOMERY, Mr. NICHOLS, Mr. RUNNELS, Mr. STRATTON, Mr. TREEN, Mr. TRIBLE, Mr. WHITE, Mr. WHITEHURST, and Mr. WON PAT):

H.R. 1755. A bill to authorize appropriations during the fiscal year 1978 for procurement of naval vessels, and for other purposes; to the Committee on Armed Services.

By Mr. BLANCHARD (for himself and Mr. MINETA):

H.R. 1756. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; jointly to the Committees on Rules and Government Operations.

By Mr. CARNEY:

H.R. 1757. A bill to establish a Voter Registration Administration within the Federal Election Commission for the purpose of administering a voter registration program through the Postal Service, and for other purposes; to the Committee on House Administration.

H.R. 1758. A bill to amend the Securities Exchange Act of 1934 to require notification by foreign investors of proposed acquisition of equity securities of U.S. companies, to authorize the President to prohibit any such acquisition as appropriate for the national security, to further the foreign policy, or to protect the domestic economy of the United States, to require issuers of registered securities to maintain and file with the Securities and Exchange Commission a list of the names and nationalities of the beneficial owners of their equity securities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1759. A bill to amend the Securities Exchange Act of 1934 to restrict persons who are not citizens of the United States from acquiring more than 35 percent of the nonvoting securities or more than 5 percent of the voting securities of any issuer whose securities are registered under such act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1760. A bill to provide for posting information in post offices with respect to registration, voting, and communicating with lawmakers; to the Committee on Post Office and Civil Service.

H.R. 1761. A bill to amend title II of the Social Security Act and the Internal Revenue Code of 1954 to provide that an individual who has attained age 65 may elect to treat any employment or self-employment performed by him as not covered for social security benefit purposes and exempt from social security taxes; to the Committee on Ways and Means.

H.R. 1762. A bill to amend title XVI of the Social Security Act to provide that support and maintenance furnished in cash or kind to an eligible individual by members of his or her immediate family shall be disregarded (and shall not serve to reduce his or her supplemental security income benefits) to the extent that it does not exceed $250 a month; to the Committee on Ways and Means.

H.R. 1763. A bill to amend title 39, United States Code, to provide that the postmark on mail matter shall disclose the name of the

city or community in which the mail matter is actually mailed, the assigned ZIP code, and the date and time of mailing, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1764. A bill to amend the Internal Revenue Code of 1954 to provide an additional income tax exemption for a taxpayer supporting a dependent who is mentally retarded; to the Committee on Ways and Means.

H.R. 1765. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the social security program, with a substantial increase in the contribution and benefit base and with appropriate reductions in social security taxes to reflect the Federal Government's participation in such costs; to the Committee on Ways and Means.

H.R. 1766. A bill to amend titles II and XVIII of the Social Security Act to include qualified drugs, requiring a physician's prescription or certification and approved by a formulary committee, among the items and services covered under the hospital insurance program; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. ECKHARDT:

H.R. 1767. A bill to amend the Federal Trade Commission Act to expand the authority for the bringing of suits for redress for violations relating to unfair or deceptive acts or practices by authorizing suits to be brought by persons, partnerships, and corporations injured by such violations; to the Committee on Interstate and Foreign Commerce.

By Mr. GILMAN:

H.R. 1768. A bill to amend title II of the Social Security Act to reduce from 72 to 65 the age beyond which deductions on account of an individual's outside earning will no longer be made from such individual's benefits; to the Committee on Ways and Means.

By Mr. KOCH (for himself, Mr. FISHER, and Mr. SOLARZ):

H.R. 1769. A bill to amend schedule 8 of the Tariff Schedules of the United States in order to require proof of liability insurance for automobiles entered into the United States for personal use by nonresidents and foreign government personnel, and for other purposes; to the Committee on Ways and Means.

By Mr. KREBS:

H.R. 1770. A bill to amend the Federal Election Campaign Act of 1971 to provide that political committees shall not be required to report to the Federal Election Commission changes in information relating to the list of candidates supported by such committees contained in statements of organization filed by such committees; to the Committee on House Administration.

By Mr. KREBS (for himself, Mr. PHILLIP BURTON, Mr. KASTENMEIER, Mr. MOSS, Mr. ROYBAL, Mr. ANDERSON of California, Mr. SEIBERLING, Mr. EDWARDS of California, Mr. LONG of Louisiana, Mr. CHARLES H. WILSON of California, Mr. BROWN of California, Mr. DELLUMS, Mr. CARR, Mr. KOCH, Mr. MCCLOSKEY, Mr. STARK, Mr. JOHN L. BURTON, Mr. HANNAFORD, Mr. LLOYD of California, Mr. MILLER of California, Mr. MINETA, Mr. PATTERSON of California, Mr. WAXMAN, Mr. BEILENSON, and Mr. PANETTA):

H.R. 1771. A bill to enlarge the Sequoia National Park in the State of California by adding to such park the Mineral King Valley area, to provide for certain planning respecting the management of such addition, and for other purposes; jointly to the Committees on Merchant Marine and Fisheries and Interior and Insular Affairs.

By Mr. KREBS (for himself, Mr. VAN DEERLIN, Mr. REUSS, Mr. BINGHAM, Mr. MIKVA, Mr. SIMON, Ms. HOLTZMAN, Mr. ROE, Mr. DODD, Mr. RANGEL, Mr. HARKIN, Ms. SCHROEDER, Mr. BAUCUS, Mr. WEAVER, Mr. MCHUGH, Mr. OTTINGER, Mr. BADILLO, Mr. TRAXLER, Mr. HARRIS, Mr. SOLARZ, Mr. HEFTEL, Mr. WEISS, Mr. AKAKA):

H.R. 1772. A bill to enlarge the Sequoia National Park in the State of California by adding to such park the Mineral King Valley area, to provide for certain planning respecting the management of such addition, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, Interior and Insular Affairs.

By Mr. SAWYER:

H.R. 1773. A bill to name a certain Federal Building in Grand Rapids, Mich., the Gerald R. Ford Building; to the Committee on Public Works and Transportation.

By Mr. SLACK:

H.R. 1774. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. RHODES (for himself, Mr. DEL CLAWSON, Mr. DEVINE, Mr. FRENZEL, Mr. STOCKMAN, Mr. LOTT, Mr. SEBELIUS, Mr. BROOMFIELD, Mr. CONTE, Mr. GUYER, Mr. WIGGINS, Mr. DICKINSON, Mr. WINN, Mr. GOLDWATER, Mr. COCHRAN, Mr. DUNCAN of Tennessee, Mr. RUDD, Mr. TREEN, Mr. THONE, Mr. TRIBLE, Mr. BURKE of Florida, Mr. BAFALIS, Mr. KETCHUM, Mr. EDWARDS of Oklahoma, and Mr. BADHAM):

H.J. Res. 135. Joint resolution to designate the week commencing with the third Monday in February of each year as National Patriotism Week; to the Committee on Post Office and Civil Service.

By Mr. HANSEN (for himself, Mr. MONTGOMERY, Mr. SEBELIUS, Mr. ROBINSON, Mr. KINDNESS, Mr. EDWARDS of Oklahoma, Mr. BAFALIS, Mr. THONE, Mr. BADHAM, Mr. BURGENER, Mr. ABDNOR, Mr. JOHN T. MYERS, Mr. HARSHA, Mr. GUYER, Mr. GILMAN, Mr. CRANE, Mr. GRASSLEY, Mr. MOORHEAD of California, Mr. MARRIOTT, Mr. BAUMAN, Mr. MCDONALD, Mr. ICHORD, Mr. LOTT, Mr. LUJAN, and Mr. ROUSSELOT):

H. Con. Res. 56. Concurrent resolution expressing the sense of the Congress that inspections pursuant to section 8(a) of the Occupational Safety and Health Act of 1970 shall cease pending a determination by the Supreme Court of the United States of the constitutionality of such inspections; to the Committee on Education and Labor.

By Mr. KOCH (for himself, Mr. BADILLO, Ms. BURKE of California, and Mr. MOFFETT):

H. Con. Res. 57. Concurrent resolution endorsing the publicly declared Vietnam-era reconciliation program of the President-elect and urging the President-elect to extend that program to include all Vietnam-era selective service offenders and all Vietnam-era veterans who received less than honorable discharges or who deserted or were absent without leave during such era; jointly to the Committees on the Judiciary, and Armed Services.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASPIN:

H.R. 1775. A bill for the relief of Karin, Michael, and Andreas Ehard; to the Committee on the Judiciary.

By Mr. PHILLIP BURTON:

H.R. 1776. A bill for the relief of Mrs. Ikuko Fukuoka Whedon; to the Committee on the Judiciary.

H.R. 1777. A bill for the relief of Cathy Gee Yuen; to the Committee on the Judiciary.

H.R. 1778. A bill for the relief of Preny Donna Gracia Gandeza; to the Committee on the Judiciary.

H.R. 1779. A bill for the relief of Gilberto Taneo Gilberstadt; to the Committee on the Judiciary.

H.R. 1780. A bill for the relief of Gustavo Hada; to the Committee on the Judiciary.

H.R. 1781. A bill for the relief of Edgardo Faro Herrera and Eliso Feliciano Herrera; to the Committee on the Judiciary.

H.R. 1782. A bill for the relief of Petros Karaolanis; to the Committee on the Judiciary.

H.R. 1783. A bill for the relief of Rhody E. Laigo; to the Committee on the Judiciary.

H.R. 1784. A bill for the relief of Patrick Andrew C. Laygo and Christina Socorro C. Laygo; to the Committee on the Judiciary.

H.R. 1785. A bill for the relief of Ngar Shing Lee; to the Committee on the Judiciary.

H.R. 1786. A bill for the relief of Jose Ramon Morales and his wife, Joyce; to the Committee on the Judiciary.

H.R. 1787. A bill for the relief of Paz A. Norona; to the Committee on the Judiciary.

H.R. 1788. A bill for the relief of Benjamin Sandoval Paglinawan; to the Committee on the Judiciary.

H.R. 1789. A bill for the relief of Maria Otilia Solorzano; to the Committee on the Judiciary.

H.R. 1790. A bill for the relief of Raul Domingo Santiago; to the Committee on the Judiciary.

H.R. 1791. A bill for the relief of Maria Isaura Russo; to the Committee on the Judiciary.

H.R. 1792. A bill for the relief of Francisco A. Magsino; to the Committee on the Judiciary.

H.R. 1793. A bill for the relief of Rose Marie V. Teehankee; to the Committee on the Judiciary.

H.R. 1794. A bill for the relief of Rosario Imelda Seiler (also known as Rosario Imelda Torres Quino); to the Committee on the Judiciary.

H.R. 1795. A bill for the relief of Ernestina Rosales; to the Committee on the Judiciary.

H.R. 1796. A bill for the relief of Leandro D. Quintana; to the Committee on the Judiciary.

H.R. 1797. A bill for the relief of Virgilio G. Makalalad; to the Committee on the Judiciary.

H.R. 1798. A bill for the relief of Kwong Lam Yuen; to the Committee on the Judiciary.

H.R. 1799. A bill for the relief of Reynaldo Ayala; to the Committee on the Judiciary.

H.R. 1800. A bill for the relief of Nicolas G. Benoza; to the Committee on the Judiciary.

H.R. 1801. A bill for the relief of Rudy Montemayor Cacho; to the Committee on the Judiciary.

H.R. 1802. A bill for the relief of Joseph and Christopher Camilleri; to the Committee on the Judiciary.

H.R. 1803. A bill for the relief of Samuel Darby; to the Committee on the Judiciary.

H.R. 1804. A bill for the relief of Min Kwong Chan (also known as Matthew Chan); to the Committee on the Judiciary.

H.R. 1805. A bill for the relief of Benjamin R. Esteva (also known as Ben Esteva); to the Committee on the Judiciary.

H.R. 1806. A bill for the relief of Mr. and Mrs. John F. Fuentes; to the Committee on the Judiciary.

H.R. 1807. A bill for the relief of Maria Gracia Bautista Waldren; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

SUPREME COURT'S ABORTION RULING

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. MAZZOLI. Mr. Speaker, as we approach the anniversary of the Supreme Court's landmark ruling that a woman has the constitutional right to terminate pregnancy with an abortion—and as thousands prepare to March for Life in Washington—it is timely that we reflect on the effect the ruling has had on our society.

I, for one, feel the Court's decisions are incorrect law and unwise public policy. I have supported numerous legislative efforts to weaken and nullify the rulings, and I continue to explore new approaches for dealing with the distressing abortion subject.

I would like to share the following article with my colleagues. It appeared in the January 2, 1977, Washington Post.

This article, in citing a most unfortunate and tragic circumstance, serves to reinforce my strong feeling that the Supreme Court erred in its abortion decisions.

It also serves to reinforce my view that we cannot merely stop with antiabortion efforts. We must educate the public in the area of family planning. We must provide counselling services to young women faced with unwanted pregnancies. And, we must treat the social, economic, and medical problems which force the use of abortion.

I believe Mr. Wills' article is well worth a careful, thoughtful reading by us all.

The article follows:

A MATTER OF LIFE AND BREATH

(By George F. Will)

Born to a 15-year-old in a Virginia boarding school, the baby was found two days later in the incinerator, and the county attorney says, "We haven't determined the cause of death." He says "as far as I know" the school did not notice that the girl was pregnant. How pregnant? When asked if the baby was born alive, the attorney said only: "It breathed."

It? He? She? Was a baby born or a fetus "terminated"? If this was "merely" a fetus, it was, presumably, an "it," like a million others aborted each year. If this was a birth, it was the more remarkable because the girl may have performed the delivery unassisted.

At 15, she may have a better mastery of obstetrics than of birth control. But then, this society permits abortions in the third trimester of pregnancy, and performs a million abortions a year. In such a society, abortion is a form of birth control, and many abortions resemble obstetric operations.

The county attorney is investigating whether criminal charges should be brought. Evidently his cryptic remark—"It breathed"—is portentous. But on what grounds can this society make a convincing fuss if the baby (may we call "it" that without prejudging the issue) breathed a bit? Hundreds of thousands of fetuses aborted each year have heartbeats and brain activity. Why is a bit of breathing all-important in the eye of the law?

It is all-important because the Supreme Court has stared long and hard at the Constitution and has come to a remarkable conclusion. The constitutional "right of privacy," which the authors of the Constitution neglected to mention, is so sweeping that no state may forbid the destruction of even a "viable" fetus if destruction is necessary to protect the woman from "harm," which includes "distress." So whether a baby breathes determines whether it has become human life fully protected by the law. If the Virginia baby breathed, it was no longer an "it."

At Miss Porter's School in Connecticut, there has been distress about a male fetus, or perhaps it was a baby. It may or may not have breathed before it was stashed in a plastic bag beneath the bed of the girl who was the—what? Mother? It is hard to know what she was because it is hard to know what she did; she may have done it alone.

She was not alone in her condition. Of the more than one million teenagers—one in 10 teenage girls—who become pregnant each year, 30,000 are 14 or younger. According to one study, one out of four 15-year-old girls is sexually active, one out of five 14-year-olds, and one out of ten 13-year-olds.

The state of Connecticut wanted to know if the male fetus, or infant, at Miss Porter's died of "natural causes." It is an interesting question. Pregnancies in young girls result in a high rate of premature deliveries, stillbirths and infant mortalities. If a baby was born alive at Miss Porter's, it was born into hazardous tumult.

The moments after delivery are busy in even a well-staffed delivery room. The umbilical cord is cut and tied; the placenta is entirely removed from the uterus; the baby's breathing is assisted. Imagine, if you can, the pain, bravery and terror of a 14-year-old trying to cope alone. It is easy to imagine the "natural" causes of death to which a baby is vulnerable in that situation.

But there is something highly artificial about the distinction between "natural" and "unnatural" deaths in such a situation. Suffice it to note that the slender 14-year-old arrived at Miss Porter's seven months pregnant. She is reported to have set curious minds at ease by saying that she had a tumor in her abdomen. Of course in the eyes of the Supreme Court a tumor and a fetus are roughly equal.

The Supreme Court has suggested how we should organize our thoughts about the status of life in its early stages. But when we try to think as the Supreme Court would have us think about the episodes in Virginia and Connecticut, the Supreme Court's suggestion seems, I think, obviously unnatural and unsatisfactory.

COUGHLIN DENOUNCES FRENCH ACQUIESCENCE TO TERRORIST DEMANDS

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. COUGHLIN. Mr. Speaker, the hasty capitulation of the French Government by its release of terrorist Abu Daoud is a shameful surrender to international lawlessnes with ramifications far beyond the initial embarrassment to our NATO partner.

By submitting to blackmail by terrorist organizations and their Arab allies, France has signaled its own moral cowardice and its intention to dishonor international agreements when its mettle is tested.

The shocking implications, not only to Israel which is constantly exhorted to trust the Western Allies, but to all nations which are united in defense of Western Europe, must cause our Government to ponder just how much Frances's word is worth.

Form the very elemental level of widows and children left fatherless by the 1972 Munich massacre of Israeli athletes to the international reverberations, the action of the French Government, in a word, stinks.

The precipitous release of Abu Daoud, accused as the mastermind behind this heinous crime, is perhaps the biggest blowout of any case in international jurisprudence within memory.

The seriousness of the case—and granting the French their due—and the legal problems involved called, at the very least, for a continuance of the matter while Abu Daoud remained in French custody.

I concede that the arrest of the Black September leader posed a predicament for France.

But governing a nation, especially one steeped in the traditions of liberty, is not easy especially in the turbulent situation caused by an Arab stranglehold on oil supplies, growing Third World agitation and world economic conditions.

But was France's position any more difficult than that of the United States when the Arab States embargoed its oil to us, because we supported Israel's right to defend itself and exist as a sovereign state?

I know that many of my colleagues have attempted, through resolutions and speeches, to announce clearly the intent of the Congress that this Nation will not tolerate international terrorism and hijackings. I joined in many of these efforts and regret only that we have not been able to influence enough governments throughout the world to stand united against terrorism.

The outrage to Israel's Government and its citizens is reflected in the reported denunciation of the French action by our Secretary of State. It is shared by the American people whose driving quest for justice remains one of the traditions of which we are so proud.

The French surrender helps poison the atmosphere that the United States and some of the more moderate Arab leaders have been cultivating in the Middle East in trying to arrange a peace settlement.

It is no wonder that Israel, which has been condemned for maintaining a siege mentality, clings to the belief that its safety and existence must depend on the force of Israeli arms.

Now no one need wonder.

U.S. CANAL ZONE: COMMUNISM IN PANAMA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. McDONALD. Mr. Speaker, the agreement on December 3, 1976, between the U.S. Secretary of State and Foreign Minister Aquilino Boyd of Panama to resume negotiations for a new Panama Canal Treaty—Washington Post, December 4, 1976, page B11—has again focused wide attention on one of the most gravely important foreign policy problems of the United States—the security of Isthmian Canal Transit and the safety of the Caribbean—Gulf of Mexico Basin.

Though the Soviet infiltration of this strategic area is well known among close observers, very little has been published about Red influences in Panama, which is now allied with the Havana-Moscow Axis. With the encouragement of the State Department, Panama has been waging a hostile propaganda campaign against the United States but, so far as I have been able to see, our State Department officials never reply publicly to Panama's most outlandish charges and threats.

In Panama, as in other Latin American countries and the United States, there are patriotic citizens who are strongly opposed to a Communist takeover of their country and have organized to prevent it. One of these groups, the Panamanian Committee for Human Rights recently provided extensive information on the overall situation on the isthmus.

A recent issue of The Herald of Freedom, P.O. Box 3, Zarephath, N.J., 08890, a monthly publication of which Frank A. Capell, an experienced investigator, is editor, make some significant disclosures derived from a report of the Panamanian Committee. He describes the current movement to surrender U.S. sovereign control over the Canal Zone, if approved, as the "culmination of a Soviet objective initiated years ago by Alger Hiss." See House Document No. 474, 89th Congress, pages 91–92 and 169–176 for authoritative documentation.

Mr. Speaker, as the indicated article should be of unusual interest to all Members of the Congress concerned with the protection of the Western Hemisphere as well as to the Nation at large, I quote it as part of my remarks:

[From The Herald of Freedom, Dec. 17, 1976]

COMMUNISM IN PANAMA

On October 19, 1976, Ambassador Ellsworth Bunker quietly left Washington to resume the controversial negotiations with Panama for a new Panama Canal Treaty. Washington sources stated that he slipped out of town without making any statement, but State Department officials confirmed his departure for Contadora Island where the talks were scheduled to begin on October 20. The previous session on the negotiations was held in May, 1976, and it was learned that resumption of the talks was agreed on earlier in October at the U.N. in conversations between Secretary of State Henry Kissinger and Panamanian Foreign Minister Aquilino Boyd. In the October 15, 1976 issue of the (Panamanian newspaper) Star & Herald it was reported that Ambassador Bunker and a U.S. team would meet with Panama treaty negotiators on the resort island of Contadoro, the site of negotiations since February of 1974, when Secretary Kissinger and former Panamanian Foreign Minister Juan Antonio Tack signed an 8-point statement of principles that became the framework of the negotiations on a canal treaty to replace the 1903 treaty. Although it has not been made clear to the American public (and there have been charges and countercharges), the report stated, "In the statement of principles, it was agreed to negotiate a treaty that would give Panama full control over the Canal and the Zone." Panamanian Foreign Minister Boyd stated in a recent interview that once the teams agree on the duration of a new treaty, there will be a draft treaty within two months.

Ellsworth Bunker has been Ambassador-at-Large since September 1973. He was born May 11, 1894, and was 73 years old when he and the 45-year-old Carol Laise were married. (Carol Laise is one of the few women members of the Council on Foreign Relations.) Bunker is known as a man of the Left who can be counted on to administer the most onerous plans and programs of the Establishment insiders.

His record of betrayal includes arranging the surrender of West New Guinea to Communist Achmed S. Sukarno, saving the Communist regime of Yemen from the wrath of Saudi Arabia's King Faisal, and presiding over the betrayal of South Vietnam. According to the State Department Biographic Register, he has been in charge of the Panama Canal Treaty negotiations since October 1973. On February 8, 1974, it was reported from Panama City that Secretary of State Henry Kissinger and Ambassador Bunker had pledged to present the U.S. Canal Zone to Panama and were working out the details for surrender of the Panama Canal.

Both Bunker and his wife would be considered security risks if proper standards were being maintained. Bunker is a member of the radical Council on World Affairs, honorary president of the subversive Foreign Policy Association, a longtime member of the C.F.R., and a trustee of the (Marxist) New School for Social Research in New York. Official government records show that he was a director of the American-Russian Institute for Cultural Relations with the Soviet Union, an organization cited as Communist and subversive by both the U.S. Attorney General and the Senate Internal Security Subcommittee.

There are many dedicated conservatives and anti-Communists in the Panama Canal Zone, among them members of the military, police and business community. Among the Panamanian citizenry there are likewise anti-Communists who are worried about a Communist take-over of Panama and the Canal Zone. One group, called the Panamanian Committee for Human Rights, recently prepared a lengthy report on the overall situation in Panama. We are grateful to this committee for the following information on Communism in Panama.

Since the onset of the Socialist Republic of Cuba, that country has steadily been infiltrating the weakest Latin American countries, both politically and militarily. First objective is the Central American countries and then the Caribbean ones. To date, Cuba has very successfully infiltrated the Panamanian Dictatorship. In Panama, under Omar Torrijos military dictatorship, Fidel Castro's gains are dramatic. He has the unquestioned backing of the People's Party-Panamanian Communist Party—which (since 1969) openly backs Dictator Torrijos' regime. At the present time, Fidel Castro has agents occupying such key positions as: the Agrarian Communes, organized by Torrijos' regime and controlled by the Panamanian Communist Party (PCP); the Tomas Herrera Military Institute, where the Guardia Nacional's new military men are formed and whose adviser is a Cuban militianman; the sugar mills, built by Torrijos' regime and run by Cuban technicians sent by Castro beginning in 1973.

On October 11, 1973 Torrijos passed a law creating the Digedecom, a government agency run jointly by Castroites and members of the PCP, founded mainly for the creating of "Juntas Comunales," which exercise total control of the communities. The 505 Juntas Comunales are tantamount to the "Comisarios del Pueblo" found in Cuba and other Communist countries; the State's radio station, "Radio Libertad," is closely managed by members of the Latin Press—the Cuban regime's press office—with their home base in Panama. Prior to the re-establishment of relations with Cuba's Socialist Republic, Latin Press offices were the headquarters for the Panamanian Marxist Party. All trips of Panamanians to Cuba from 1971 to 1975 were arranged from these offices. It was also the epicenter for all of Cuba's international infiltration in Central America and the Caribbean nations. The Caribbean "push" has proved extremely successful.

The Panamanian National Guard's repressive G–2 department works under the close supervision of Cuba's regime, in the persons of Pineiro, alias Red Beard, and Universo Saenz. Before relations between the two countries were re-established, one of the first officials of the Panamanian regime to travel to Cuba was Manuel Antonio Noriega, feared head of the G–2 of Panama. Since 1970, all members of the G–2 Department have openly traveled to Cuba for training and orientation in "Political Security." At first these trips were made on planes belonging to the Panamanian Air Force, but afterwards they were followed by delegations of athletes, students from Panama University, union leaders, and Communal Junta leaders. The G–2 controlled the list of invited "guests," in collaboration with the Latin Press offices in Panama.

The number of diplomatic employees in the Cuban Embassy in Panama surpasses that of any other accredited embassy in the country. Some of the 225 employees of the Cuban Embassy give advice to Director Torrijos, and from that embassy, North American goods are bought for shipment to Cuba through a company called Transit, S.A., owned by Rodrigo Gonzales, right-hand man of Torrijos. It is also through this company, working jointly with the Cuban Embassy, that Cuban products are introduced into Panama and equipment and goods are exported to Cuba. Cuban agents in Panama receive their orders through the Cuban Embassy and the PCP sends its members to Cuba for training and indoctrination courses; frequent cultural interchange missions are arranged.

Up until October of 1968, the Panamanian Communist Party (PCP), known as the "People's Party," was militant only in Panama City, and so its influence over the Panamanian people was very limited. It considerably increased since that time so that by September of 1974, according to a leftist Argentine journalist, the People's Party controlled 38 labor unions instead of 5 in 1968; the People's Party offshoot, Student Federation of Panama, boasted 110,000 students. The expansion of the PCP began after the military coup of October 1968 when the constitutionally elected government was overthrown after only 11 days in office. On October 11, 1968 the military took over the reins of the government in a coup headed by Col. Boris Martinez, who had no known political ties. Torrijos, then a colonel, tried to promote a meeting between Martinez and leaders of the PCP, but Martinez would not cooperate. Then in February of 1969, after having made prisoners of Martinez and his followers and expatriated them to Miami,

Florida, Omar Torrijos assumed charge of the military dictatorship. A month later, Torrijos signed a political pact with the PCP and it did not take long before the Communists were in key positions in the government. Guided by the PCP, Torrijos crushed all opposition to his regime and took up the issue of the new canal treaty as his political platform. The Communist Party's priorities were established in a document called "The Guideline of March 1969 Revised," which contained seven points.

The Communists have made evident gains in Point #1, the recuperation of the Panama Canal, which is their main objective, and Torrijos has the full support of the Marxist organizations of Latin America, Africa and Asia in securing the Canal Zone.

With respect to Point #2, Panama had attained sustained economic growth for 10 years, but beginning in 1973, its economy has deteriorated because private Panamanian investors lack trust in the future of the country due to the hostility shown by the dictatorship toward private enterprise. By creating laws which bankrupt private concerns, Torrijos has left them in the hands of the laborers, thus producing the "social area" of production. Furthermore, land has been expropriated, and turned over to Rural Settlements subsidized by the regime and land has been forcibly taken in urban communities because t he land was "needed." Torrijos has built five sugar refineries which are government owned. In a recent "agreement" with the Torrijos dictatorship, the Chiriqui Land Co., an American company devoted to the banana business, will be forced to "sell" its assets to the Panamanian regime, after having been subjected to continuous harassment by the dictatorship. This means of promoting the "social area" of production, emphatically pursued by the Panamanian Marxists and Torrijos, systematically discourages private investment to the point where soon all of the Panamanian economy will be penetrated. It will become "social area," and the PCP will be able to modify the "relationship of the internal powers."

Point #3, to make the Communal Juntas work effectively, has enabled the PCP to extend its influence into all areas of the country through an extensive network of "Communal Committees" which are controlled by Party members. Thanks to Torrijos, the PCP has members in all the rural communities of the country and these members have access to the monies of these communities which allows them to promote their Marxist indoctrination. The Rural Settlements are controlled by a government organization created by Torrijos, which is integrated by CP members. The organization, called "Digedecom," is the group which advised Torrijos to expel the U.S. Peace Corps members in 1972 with the excuse that they were members of the CIA.

Regarding Point #4, establishing relations with all countries of the world (meaning Socialist countries, especially Cuba), the Panamanian Communists have another victory. Torrijos declared in January 1976, while visiting Cuba, that "the Panamanian Revolution pursued the same objectives as the Cuban Revolution but through other methods," Aquilino Boyd, Minister of Foreign Affairs, said, through the Russian News Agency Tass, that Panama considers Moscow "a great friend".

Regarding Point #5, Educational Reform, Communist infiltration in education is centered in this, under the direction of Party ideologists. This program has been economically feasible thanks to the donation of $11 million that AID gave to Torrijos regime to promote this reform. In Chiriqui Province the presence of Marxist texts in the high school's required material was denounced at a public meeting. These texts had been sent by the Ministry of Education through the offices of the Educational Reform Center. Money given by AID to the University of Panama has also ended in the hands of members of the Communist Party which controls the university; it is being used to furnish the university bookstore, stacked with Marxist texts.

Point #6 affirms that the capitalist growth seen in Panama creates "contradictions" which won't be solved until the country's anti-colonial dispute is won or until there is a modification of the relationship of the internal powers.

With respect to Point #7, having the National Guard play an important part in all political moves, the Communist Party acknowledges that the true political power resides in the Military Posts in Panama. This has committed the Party to infiltrate the National Guard in Panama. Recently, one of the Party's members, Major Roberto Diaz Herrera, cousin of Dictator Torrijos, was promoted to Lt. Col., without losing the position he formerly occupied as Major, which was that of Executive Secretary of the National Guard of Panama.

The National Guard has fields sown with rice and sorghum in the country's central provinces, with the intention of substituting the private producers. This position has been denounced by the agricultural producers of the Chiriqui Province. On the other hand, Dictator Torrijos recently created the "Tomas Herrera Military Institute" with Cuban instructors. In this way, in a few years, the control of the National Guard will be in the hands of the Communists, for they are systematically indoctrinating the young officers who will in time replace the retired officers and colonels. Torrijos is also naming non-Communist lieutenant colonels to civil positions, thus removing them from active duty in the National Guard.

Since the beginning of Torrijos' dictatorship in 1968, the Communists have had a strong influence in his regime and the following represents a partial list of Communist personalities in the administration.

Omar Torrijos Herrear, at 14 years of age, appears in a photograph bearing a Communist flag while a member of the Young Veraguas (partisan Marxist organization). His closest relatives and advisers were Marxists. During the "Cerro Tute" uprising in 1959, Marxist guerrillas denounced Torrijos (who as a captain in the National Guard was forced to fight against them) as a "traitor to the cause." From 1960 to 1963, while he was Chief of the Colon Military Post, he maintained continuous meetings with Marxist agents of that province, while at the same time, instituting an "anti-Communist" fund with monies provided by private enterprise.

During the 1969 "Peking-Moscow Discord," Torrijos sided with the Moscow faction. In 1963 Edison and Nitido Diaz Herrera (two of Torrijos' first cousins) returned to Panama after lengthy training in Cuba, and were allowed to set up their Communist operation quarters in the Military Post in Chiriqui Province. Thus the banana plantations of Chiriqui became the Panamanian Communist Party's most efficient stronghold. In 1966 Torrijos' sister, Toya de Jaen, was arrested at Tocumen International Airport for carrying a large amount of Marxist propaganda she was bringing from Mexico. Torrijos obtained her freedom without confiscation of the material. Omar Torrijos' brother, Moises, openly belongs to the PCP.

Gerardo Gonzales Vernaza, Vice-President of the Republic, also is related to Torrijos. He was former Minister of Agrarian Development, is an active member of the PCP of which he was formerly treasurer and conveyor, and also belonged to the "Young Veraguas" in his youth. He is considered one of the Party's most important executives in the government's hierarchy and runs all the "day to day" work of the Panamanian presidency.

Roberto Diaz Herrera, first cousin of Gen-Torrijos. Even though he did not fill seniority requirements, he was promoted to Lt. Col. in the National Guard. A card-carrying member of the Marxist Party since his teen years, Diaz acts as Executive Secretary of the National Guard from which position he has effective control of all military orders. His brothers are: Efebo Diaz Herrera, Panama's Ambassador to Cuba; Nitido Diaz Herrera, Chief of Customs; Edison Diaz Herrera, Municipal Treasurer.

Manuel Antonio Noriega, Lt. Col. in National Guard, as head of G-2 (the State's Security torture squads), is actively involved in Castro's infiltration in Panama. His Marxist background goes back to his student days. His brother, Luis Carlos Noriega, also belongs to the PCP and is President of the Electoral Tribunal of Panama.

Marcelino Jaen, a lawyer, is married to Torrijos' sister Toya. A long-time member of the Communist Party, he belongs to the Central Committee. He is now President of the National Legislative Commission, which is the Communist-controlled lawmaking committee.

Moises Torrijos Herrera, Omar's brother, is Panama's Ambassador to Spain and has been a Marxist since his youth. A member of the Central Committee, he is connected with the international drug traffic.

Ruben Dario Herrera, economist, is a member of the PCP and one of the Party's most influential ideologists. He is held responsible for the Party's economic policies.

Balbino Moreno, former school chum of Omar Torrijos. He, too, belonged to the "Young Veraguas."

Eligio Salas belonged to the Communist Party from his start in politics. He was an activist in the "Frente de Reform Universitaria." He was in charge of the Student Affairs Department of Panama University, from which he controlled the pro-Moscow student organizations, and was recently named Dean of the University, which is under Soviet-Communist control.

Rolando Murgas was a firebrand student leader for the Party as a member of the "Frente de Reforma Universitaria." He is a brilliant but dogmatic one-track-minded ideologist for the Party's Political Committee. He authored Panama's new Labor Code, considered one of the most important factors in Panama's economic paralysis; was later named Minister of Labor; now is a member of the Communist-controlled Legislative Committee.

Adolfo Ahumada, Marxist agitator since his student days, is considered an ideologist with great practical political sense. A formal member of the Communist Party, he is much respected by Marxist youth groups, is sly and extremely dangerous. He is on the Legislative Committee and participates informally in the Panama Canal Treaty negotiations, representing the Party. A personal advisor to Gen. Torrijos, he also occupies the important Communist-dominated post of Minister of Labor.

Renato Pereira, Communist Party member was the Director of the Student Affairs Department, is now Mayor of Puerto Armuelles, a port city on the Pacific side of the Isthmus, in the heart of the area fully controlled by the Communists.

The proposed treaty to turn over the sovereignty of the Panama Canal and Zone, if approved, would be the culmination of a Soviet objective initiated years ago by Alger Hiss.

MARY DEES STARTS NEW CAREER

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. JONES of Oklahoma. Mr. Speaker, "Brighten the corner where you are"

begins a popular refrain. No person more exemplifies that message that my dear friend, Mrs. Mary Dees, who has devoted her lifetime to helping others, brightening their lives, and giving of herself.

No wonder, then, that so many of us considered her retirement from 42 years of service in the telephone industry and the Communications Workers of America on November 1, 1976, something special. Actually it was not really a retirement for this remarkable lady, only the beginning of a new career.

She is now continuing her life's work of serving mankind by working for the Tulsa United Way, YWCA, a local children's center, the area diabetes clinic, and the CWA Retired Members Club.

Mary Dees has spent a lifetime serving people. She utilized her seemingly limitless energy in the Democratic Club, in political action groups and efforts, as a member of the Tulsa Business and Professional Women's Club, and as a member of the Governor's Commission on the Status of Women, having been appointed by two separate Governors. She served on the Advisory Committee on the Employment Securities Commission, on the Oklahoma United Nations Day Committee, as a member of the Community Chest, and Oklahoma AFL–CIO.

Always concerned about women's rights, she was a member of CWA's Concerned Women's Advancement Committee and was active and instrumental in efforts to pass Oklahoma's Equal Rights Amendment.

Her life has been filled with accomplishment, but those of us who know her are more appreciative of her friendship and what she has so unselfishly done for others.

She has ended one career, embarked upon another. As she does, she is loved not only by the two fine sons, Donald and Stephen, she has raised, but a legion of friends.

Surely, she has brightened the lives of all she has come in contact with and so many more who have been the beneficiaries of all she has done.

AMNESTY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 11, 1977

Mr. OTTINGER. Mr. Speaker, I am pleased that Congressman KOCH and Congressman MONTGOMERY have provided us with an opportunity to comment on President-elect Carter's intention to pardon those men who resisted the draft during the Vietnam war and on the respective proposals that the President-elect expand or eliminate the program.

In the 4 years since the United States concluded its direct involvement in the Vietnam war we have done little to reconcile ourselves with its conclusion. The tragic problems which are the legacy of that conflict have been ignored, and the failure to resolve the fate of the draft resisters is one symptom of our inactivity.

It is often suggested that amnesty should be considered only on a case-by-case basis—that while some of the resisters acted out of conscience, many certainly acted out of fear. I am sure that this is so. But I am also sure that it would be impossible to separate those men who acted out of the strength of sincere conviction from those who acted out of cowardice. It is probable that many were moved by both feelings.

I support President-elect Carter's intention to pardon the draft resisters, and I hope that he will consider a means of reviewing the vast number of less than honorable discharges which were issued during the Vietnam war as well.

TRIBUTE TO TORATH EMETH HONORS FOURTEEN COUPLES

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. WAXMAN. Mr. Speaker, I am proud to call to the attention of the House and of the public a noteworthy event to be held by a distinguished educational institution in my district. On January 23, 1977, Yeshivath Torath Emeth Academy, an Orthodox Jewish day school, will honor 14 couples as "Pillars of the Academy" at the 22d annual banquet to be held at the Beverly Hilton Hotel.

I have had the privilege of representing both Yeshivath Torath Emeth and the great majority of its pupils and staff since I first entered public life. I am proud to count its principal leaders among my dear and long-time friends. I observed first hand the struggles Torath Emeth had with the old facility on South Fairfax which was inadequate in every respect. I saw changing social patterns in the neighborhood add new difficulties and anxieties to the life of the school.

I saw not only adversity but also tremendous energy, faith and determination within the Torath Emeth "family." After all, for most of the men and women who created the academy, adversity was nothing new. The majority of them had survived the holocaust and founded Torath Emeth in a fierce determination to preserve the intensive Torah-true education they knew in pre-World War II Europe.

Rabbi Juda Isaacsohn, a man burdened both with ill-health and myriad community obligations, inspired the community to make the sacrifices necessary to build a magnificent new building. Rabbi Isaac Soibelman, in a stunning display of energy and endurance, worked on the building project while discharging his tremendous obligations as education director. He did all this selflessly—without regard to personal honor or credit.

My good friends Mr. and Mrs. Sam Menlo undertook not only enormous financial responsibilities, but also the day-to-day chores of construction. They were joined and supported primarily by the 13 couples who are the "Pillars of the Academy" honored at this year's banquet.

I should like to enter into the RECORD the names of each and every one of the 14 honorees. Each of these couples earned by its generosity and dedication all the praise and honor being accorded to all 14. The Pillars of the Academy are: Mr. and Mrs. Jamie Deutsch, Mr. and Mrs. Stanley Diller, Mr. and Mrs. Leonard Einhorn, Mr. and Mrs. David Goldstein, Mr .and Mrs. Jona Goldrich, Mr. and Mrs. Jacob Kornwasser, Mr. and Mrs. Mark Kornwasser, Mr. and Mrs. Sol Kest, Mr. and Mrs. Armin Mandel, Mr. and Mrs. Sam Menlo, Rabbi and Mrs. Abraham Rubin, Mr. and Mrs. Louis Schoen, Mr. and Mrs. Ladislaw Wintner, and Mr. and Mrs. Morris Weiss.

In the schus of the Torah studies of the pupils of Torath Emeth Academy may the 14 "Pillars of the Academy," Rabbi Juda Isaacsohn, Rabbi Isaac Soibelman, the faculty, staff and supporters of the academy be granted an abundance of blessings from the Almighty's "full, open, holy and ample hand."

POSTAL SERVICE ON THE RIGHT TRACK

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. LEHMAN. Mr. Speaker, as a member of the Committee on Post Office and Civil Service, I listen to many people talk about our mail service. Paradoxically, most of them like their own postmen but not the Postal Service. I am pleased, therefore, to share with my colleagues a recent editorial which appeared in the Miami Herald:

POSTAL SERVICE ON THE RIGHT TRACK

Love hasn't always been the postman's lot. Mail service is a favorite target for gripes from consumers who expect the best.

They still aren't winning any popularity contests, but postal officials can cite some nice things they've done for the blase American public during 1976, as results of long-term programs.

Local mail got to addresses the next day 95 per cent of the time, except during the Christmas season in some cities. This was up from a 92 per cent rating four years ago.

More dramatic improvement came in the two-day delivery of mail from a 600-mile radius. It was up to a 92 per cent rate, from 80 per cent just three years ago. Cross-country deliveries within three days rose from an 80 to a 90 per cent level.

Not bad. But for consumers frustrated by deaf and blind bureaucracies, the good news may have been in such attempts to make contact as the Consumer Service Card. That's the simple form designed to pass along gripes so your local post office can take proper action.

Sometimes the gripes get results, postal officials note with justifiable pride. In the past year, cards have brought about changes in window hours, new locations for street boxes and repairs to stamp vending machines without the all-too-common delays.

Another notable attempt to pierce the red tape wall is a Nielsen-like ongoing survey of customers. In Dade County, 400 users are keeping tabs on their service and reporting regularly to the post office, which says it will put the feedback to good use promptly.

These steps have been taken in tendem

witn an actual cutback in personnel. Since January 1975 the department has trimmed 50,500 from its payroll, it reports, mostly by attrition. Post offices in 228 small towns have been closed, and delivery areas combined.

All of this is due to a more business-like attitude at the Postal Service, which borrowed not only technology but some veteran executives from industry to achieve reform. Hundreds of newcomers were put into key spots about two years ago and charged with turning the mails into an efficient, if not profitable, venture.

Automation has done a lot; only one letter in four was machine-sorted in 1971, but now nearly two of every three are handled thus.

We think the Postal Service is on the right track and wish it the best for the New Year. For those who continue to scowl at the 13-cent stamp, we note that inflation has hit almost everyone.

Besides, it costs an average of 18 cents to send a letter first-class in Europe—where they don't travel as far.

HURRAH FOR HUBERT HUMPHREY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. FINDLEY. Mr. Speaker, may I bring to the attention of the House the following editorial from The Christian Science Monitor of January 7, 1977, which recognizes the "informed and buoyant humanity" of Senator HUBERT HUMPHREY. Members of both parties can well be proud of Senator HUMPHREY'S continuing contribution to his fellow man. It is hard to imagine how our Nation might have turned out had Senator HUMPHREY not been on the scene, but I know it would be much the poorer without him. I, for one, look forward to many more years of working with the senior Senator from Minnesota.

The article follows:

HURRAH FOR HUBERT HUMPHREY

The Senate has created a new position of high prestige for Hubert Humphrey. "It had to," said the Senator's fellow Minnesotan, commentator Eric Sevareid, going on to cite the Humphrey personal and political record which Senate colleagues could not ignore.

Some good old-fashioned sentiment was involved, and rightly so, as the Democratic caucus unanimously voted Mr. Humphrey the title of deputy president pro tem of the Senate. It was a kind of consolation prize after he withdrew from the contest for majority leader. It gave him some extra salary and perquisites, as well as the benefit he not unexpectedly valued most: the chance to be on the leadership team that meets with the President on policy.

But even if there had been no occasion for a solacing gesture, Mr. Humphrey deserved the finest recognition his colleagues could give. Though the former Vice-President never reached his presidential goal, he continues to enrich and enliven the political scene with an informed and buoyant humanity that must be carried on if the American national character is to be fully expressed in the world. It is particularly appropriate that his latest honor ensures the Humphrey touch will be present in the highest councils of a new administration that expresses a belief like his in the possibility of improvement.

What about the problem of overpromising? Mr. Humphrey was asked the question in Boston last summer. The reply came with that Humphrey verve which makes the neck hairs rise and leaves no excuse for not trying:

"You have to overpromise. The Sermon on the Mount is an overpromise. The Pledge of Allegiance is an overpromise. Anything worthwhile is an overpromise. What you think you can do is half what you ought to do."

TRIBUTE TO THE LATE REV. MARSHALL W. LEE

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. COUGHLIN. Mr. Speaker, I was saddened this week to learn of the death of one of Montgomery County, Pa.'s most prominent and beloved citizens, the Reverend Marshall W. Lee.

Reverend Lee's long life spanned many crucial decades of our history which saw major advances in human rights and social reform. He was, in fact, a leader in bringing a better life to the disadvantaged, the poor, and the sick. Born to a former slave in 1886, Reverend Lee came to Conshohocken, Pa., as a small child. Fifty-four years ago he founded St. Paul's Baptist Church in Conshohocken where he remained pastor until his retirement in 1975.

Reverend Lee's spiritual ministry was marked by active community involvement. He was for 34 years a member of the Montgomery County Housing Authority, serving for a time as vice chairman of that organization. He also served as vice president and director of the Conshohocken Visiting Nurse Association, director of the Red Cross of Montgomery County, chairman of the Rent Control Board of Bucks and Montgomery Counties, director of the Tuberculosis Society of Montgomery County, director of health and welfare for Montgomery County, and treasurer of the Conshohocken Borough Authority.

In addition, Reverend Lee spearheaded human rights efforts and organized the Human Relations Committee of Southeastern Pennsylvania. He also served ably as treasurer of the Baptist Minister's Conference of Philadelphia and vicinity for 15 years and as president of the Conshohocken Ministerium.

Whether in the pulpit, in the community meeting room, or in the home of the needy, Reverend Lee's was the same voice of compassion, understanding, and hope which touched the lives of several generations of Montgomery County residents. His passion for helping others caused him to go wherever help was needed and to serve in whatever capacity he could, and led him to assume prominent roles in the fields of health, housing, and human rights. To Reverend Lee, these were all arenas in which the struggle for human dignity was being waged, a struggle to which he committed his life.

Rev. Marshall W. Lee will be sorely missed but always remembered by the many who knew and loved him. Countless others who were not privileged to know him personally will lead better lives as a result of his ideals, his compassion, and his life's work. My sincerest condolences are extended to Reverend Lee's family, including his children, grandchildren, great-grandchildren, and great-great-grandchildren.

THE FRENCH GOVERNMENT DISPLAYS NOT THE TRICOLORS BUT ITS TRUE COLORS—ABJECT COWARDICE

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. KOCH. Mr. Speaker, in today's world one does not expect too much in the way of conscience from the many nations that sit in the United Nations. However, a nation, which many of us expected much more of, has joined the cowardly and the irresponsible. That country, regrettably, is France. For the French Government to free a leading Palestinian terrorist arrested by French intelligence agents as being responsible for the killing of 11 members of the Israeli Olympic team at the 1972 Olympics in Munch is obscene. The terrorist, known as Abu Daoud, was freed and sent to Algeria by first class jet, after the French court in a clearly political decision which was undoubtedly influenced by the French Government rejected requests from Israel and West Germany that Daoud be detained in France, pending formal extradition proceedings.

Where is French honor today? It lies buried with the 11 dead Israeli and 6 others, all innocents struck down by a vicious terrorist attack planned by Abu Daoud. Those of us who have seen the classic documentary, "The Sorrow and the Pity," know that many of the French although they would deny it today, collaborated with the Nazis in the destruction of the French Jewish community. By releasing this deadly terrorist the current French Government is collaborating with and assisting the Arab terrorists who would like, if they could, to destroy the community of Israel. This same perfidy was exhibited once before by the French Government, when it cut off arms to Israel at the very moment that it was being attacked by the intransigent Arab states surrounding it, bent on its destruction.

Only in one way is this outrageous action by the French helpful. It graphically confirms what the Israelis have been saying year after year. When importuned to lay down their arms, surrender the territories won by them in a war waged against them by Arab nations seeking to drive them into the sea, and instead depend on guarantees by countries such as France to protect the peace, the Israelis have said "no." The Israelis are right. No nation can be counted on to protect them from invasion, when the choice lies between taking a moral stand and submitting to Arab demands reinforced by threats of an Arab oil boycott. The only real defense

available to Israel to safeguard its security and borders is the inconquerable will of its people to survive, along with the weaponry to make that possible.

There are decent people in France. Indeed, over the years the French people have opposed the actions of their government and have demonstrated time and time again their support of Israel when the French Government was doing all that it could to harm that State. Vive la French people; a bas the French Government.

THE ISSUES IN 1977

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. HAMILTON. Mr. Speaker, I would like to share some thoughts I have on the issues facing the 95th Congress and the American people in the coming year.

Trying to obtain some material for the evening news report, a TV reporter asked me the other day to identify the major issues before the Congress in 1977, and to keep my answer to under 1 minute in length. That question, which incidentally tells us a great deal about the nature of television news today, was fair enough. My brief comments did not begin to respond adequately, so this newsletter is an attempt to complete my response so you will know what to watch for from Washington in 1977.

Everyone agrees that the top item on the Nation's agenda is the same one that faced John F. Kennedy 16 years ago: "To get the economy moving again."

The problem, of course, is how to create more jobs without reigniting inflation or jeopardizing the aim of a balanced budget by 1981. Stimulation of the economy is a certainty and the debate now is over the size of the package of fiscal stimulus—likely to be in the $15 to $25 billion range—and the makeup of the package, that is, how much additional spending and how much tax reduction.

Congressional ethics will be a continuing issue because of the reports of Korean gifts to House Members, and the misdeeds of several Members. There is a good chance that a strong new code of ethics for Members will be adopted with full disclosure of income, gifts, liabilities and assets, tight limitations on outside income, reduced junkets, and the elimination of office slush funds.

Fortunately, in foreign policy the Congress is not faced with a shooting war. But even so the balance of peace is precarious, and pitfalls lie at every turn. Steps must be taken to strengthen our ties with our allies of Japan and Western Europe because that relationship is at the heart of our international relations, and will become even more important in the future if we are to avoid serious economic difficulties. There also should be no weakening of efforts to achieve a better relationship with the Soviet Union, to continue strategic arms limitation talks, and to conclude a Middle East agreement. But closer attention will have to be paid to Africa, where the move to bring a peaceful transition to majority rule must be supported; to Latin America, where a new treaty with Panama is the clear priority; to Asia, where the challenge is to expand relations with China without sacrificing the independence of Taiwan; and to developing countries where a more sympathetic understanding of their demands is required.

In defense, the overriding problem will be how to maintain and strengthen the Nation's military capability at present or even reduced levels of defense spending. The Congress will not allow a deterioration in American military strength, or in the world's perception of that strength, but that should not deter a hard look at the chief areas where savings can be made: pay scales, the high ratio of support to combat manpower, and the exploding cost and sophistication of weapons.

Because social programs were oversold, underfunded, and often maladministered, it is popular to call for the reduction or elimination of many social programs. But the problems of poverty, welfare and the denial of civil rights are still with us and need attention. Total reform of these social programs may be politically and financially out of reach, but the Nation is going to have to begin to deal with these difficult problems by tackling them realistically and competently. The financial problems of New York City are still with us and should warn us that other major urban centers are sliding toward similar distress. Washington has not yet worked out a comprehensive, coordinated strategy for the Federal role in the development of the cities and the rural areas of the country.

Encouraging progress has been made recently in protecting the American environment, but in 1977 major advances will likely occur in environmental programs, including amendments to the Clean Air Act and the Water Pollution Control Act and efforts to strengthen legislation dealing with oil spills, strip-mining, and nuclear safety.

The Federal Government, which has wrestled with the problem of developing a comprehensive energy policy, will almost certainly continue that struggle, moving in the direction of deregulation of oil prices, more stringent conservation and the more rapid development of alternative sources of energy.

These items by no means complete the agenda. Public doubts have arisen about the effectiveness of education in this country and the Federal programs designed to improve it, and a renewed concern about them will probably emerge. Civil liberties have almost been disregarded in recent years, but issues like the right of privacy and the growth of surveillance are beginning to assert themselves and to concern the Congress. And, of course, the rising cost of health care and the more efficient delivery of health care services to the people are certain to command priority attention in the coming year.

No reasonable person would expect this national agenda to be completed in 1977 or even 1987. But the 95th Congress must have the courage and the vision to confront the profoundly difficult issues in the Nation.

THE IMPORTANCE OF STRIPPER WELL PRODUCTION

HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. LONG of Louisiana. Mr. Speaker, last year when it approved the Federal Energy Administration Act Amendments of 1976 the House wisely included in that act a provision granting an exemption from price controls for oil from wells producing no more than 10 barrels a day—the so-called stripper wells. On numerous occasions over the past few years, I have taken the floor to present the case for the preservation and encouragement of stripper well production. Encouraging stripper well production gives incentive to the small, independent oil producers, who account for 80 percent of the new wells drilled domestically.

Last Friday, January 7, 1977, the Wall Street Journal in a front-page article reported on the importance to the Nation of stripper well production. I would like to share that article with my colleagues and request that it be printed at the conclusion of my remarks.

The article demonstrates the validity of a number of concepts that those of us who have sought energy independence for the Nation have advocated. First, that stripper oil is a significant portion of domestic production and should be encouraged. Second, that the productive life of stripper wells is extremely sensitive to price increases. Third, that independent producers depend to a greater extent on stripper production for their cash flow than the major companies, therefore prices that encourage stripper well production encourage competition within the industry.

In my legislative endeavors in this area, my efforts have been directed toward the twin goals of increasing domestic oil production and reducing the Nation's dependence on foreign oil. Over three-fourths of the nearly 500,000 domestic oil wells are in the stripper category, yet they yield approximately 14 percent of the oil produced in this country. With domestic production stabilizing at around 8,000,000 barrels a day this means that the 375,000 stripper wells produce over 1,100,000 barrels per day or an average of less than four barrels per well per day.

With this small volume of production per well, operating costs can quickly consume any cash flow the well generates. When a well begins losing money it must be plugged with the remaining reserves permanently lost to the Nation. For this reason, I sought throughout the deliberations in the last Congress on H.R. 7014, the Energy Policy and Conservation Act, a provision for encouragement for this type of production. It was especially

gratifying to me when the House did approve price relief for stripper producers last summer and I believe this article confirms the wisdom of our action.

The article also cites the important contribution to domestic oil production of the independent oil producers. None of the producers cited in the article owns any service stations or refineries. These are the kind of men and women who work every day exploring for and producing oil. Too often the publicity about the oil industry centers on the major companies and ignores the role of the independents. As relevant statistics reflect, independents drill a majority of the domestic wells and rely heavily on the price they obtain from their stripper oil for the necessary capital to continue meaningful exploration. An important indirect benefit of price relief for stripper oil that I have often pointed out is that such relief allows competition to flourish within the last vestige of the oil industry wherein there is truly competition.

The Wall Street Journal article concludes with a sobering comment that constitutes a challenge to this Congress: all of the wells currently producing in this country will some day fall into the stripper category and domestic production will continue its gradual decline. I do not anticipate that the Nation will choose the course of rationing or artificially limiting oil consumption; nor will the Nation make a conscious decision to rely on continually greater amounts of unreliable foreign sources of oil. Therefore, the Congress must endeavor to provide the incentives necessary to encourage not just the current level of domestic exploration, but an increased amount of activity that will provide the Nation with as much domestic oil as possible while we develop alternative sources of fuel. The solutions to the Nation's energy needs will not come easily. I applaud the Wall Street Journal for focusing on one very significant element of the Nation's energy picture.

The article follows:

MA AND PA PETE: SMALL OIL WELLS NOW PLAY IMPORTANT ROLE AS U.S. ENERGY SOURCE

(By Douglas Martin)

Staff Reporter of the Wall Street Journal

DERRICK CITY, PA.—E. James Bryner's grandfather was an oilman of the old school, distinguished by silk top hat, diamond-studded belt buckle and extravagant weekends in the resort town of French Lick, Ind. His father was a wildcatter too, famed for the gushers discovered on nearby Music Mountain.

Mr. Bryner is also in the oil business, though hardly in such a grand manner. His 50 oil wells together pump only about a dozen barrels of crude daily from the aging Bradford Field here. Further declines in production seem inevitable.

Yet the Bryner Family has little reason for despair. Those daily 12 barrels, shared by Mr. Bryner with his brother, uncle and aunt, are now bringing in $60,000 a year. That's about double the revenue earned five years ago, when the family's wells were producing 15 to 20 barrels a day. Moreover, Mr. Bryner observes, he has expended "essentially no more effort" over the years to achieve that revenue increase

Mr. Bryner's wells are strippers, a term applied to all wells that produce 10 barrels a day or less. For years, such wells played only a minor role in the U.S. energy picture; many oilmen considered them a bothersome byproduct of the industry. But lately, the foreign oil cartel and controversial government policies have combined to push the price of oil from stripper wells far above the cost of producing it. As a result, there is renewed interest in the tiny wells; they currently account for 14% of ever-declining U.S. oil production.

A $100 BILLION INDUSTRY?

These days, "stripper production is very significant," says John Murrell, chief executive officer of DeGolyer and MacNaughton, a leading natural resources consulting firm. "Without it, we'd have to import a lot more oil." Indeed, proved reserves of stripper well oil are estimated at nearly eight billion barrels or just two billion less than those discovered on Alaska's North Slope. (Total U.S. proved oil reserves are estimated at about 32.7 billion barrels.) And at current prices, the value of these stripper reserves is over $100 billion.

Clearly, however, the increased importance of stripper wells isn't all good news: Future increases in the contribution from these wells to total domestic oil production will come only because the far more important output from larger wells will continue a natural decline, many experts believe. "Someday, they're all going to be strippers," says DeGolyer and MacNaughton's Mr. Murrell. Already, about three quarters of the nation's 500,000 wells are in the stripper category.

The new significance of the small wells is also a matter of economics. Last fall, oil from stripper wells was removed from government price controls, making it the only U.S. production commanding prices on a par with those paid foreign producers—or about $14 a barrel in some cases. By contrast, other domestic oil remains under controls, held to an average of around $11.40 a barrel for so-called "newly-discovered" oil and an average of $5.18 a barrel for "old" oil. (Even before decontrol, stripper production was priced at the "newly-discovered" rate.)

A BOOST FROM THE ARABS

One ironic effect of decontrol is that now, higher prices for the foreign oil cartel mean higher prices for U.S. stripper well operators, who also sell at the world price. Thus, stripper oil producers here are sure to benefit from the 8% to 10% price increase expected to result from last month's Organization of Petroleum Exporting Countries meeting in Qatar. "The Arabs are the best friends we ever had," says Edward T. Heck, executive vice president of Minard Run Oil Co., which produces 400 barrels a day from 638 Pennsylvania wells.

Of course, costs are also sharply higher for stripper producers. "If we didn't have higher prices, we couldn't afford to produce any oil," says Mr. Bryner, the Pennsylvania producer. Indeed, by some estimates, the cost of electricity needed to keep stripper wells operating has trebled, and the cost of labor has doubled in the past three years. But those increases, while holding down profit margins for many operators, clearly have been outpaced by the increase in stripper oil prices to around $14 from $4.50 a barrel in the same three-year period. And the result is a boon to the small independent oilmen who account for most stripper production.

Consider John D. Riggs of Graham, Tex. His three-man stripper operation of 1973 has now grown to 17 employes and his net income has rocketed from $20,000 to $250,000. Or Tom McAdams Jr., Bristow, Okla. His stripper wells in Oklahoma and Kansas produce a pretax income of $787.50 a day, compared to $67.50 in 1973.

A particularly intriguing case is Morris Tidmore, a 69-year-old retired construction worker in Albany, Texas, who produces 15 barrels a day from 16 wells, one of which is 75 feet from his back door. He does most of the manual "roustabout" work himself. It's worth it: He makes $45,000 a year, compared to a high of about $10,000 working construction. "If it weren't for these wells, you could classify me as a pauper," he says with a chuckle.

PURSUING PROFIT

In pursuit of such hefty profits, stripper owners are continuing to operate wells that in earlier day would have been abandoned as losers. Billy Ray Watson of Monahans, Tex., for example, says many of his 200 stripper wells were so unprofitable before 1973 that he "couldn't afford to plug them." Now he's producing around 700 barrels a day from them. Overall, fewer strippers were abandoned last year than any year since 1959.

For the U.S., maintaining stripper production has become an increasingly important goal; in the past six years, total domestic oil output has slipped to 8.1 million barrels daily from 9.6 million barrels, while demand for petroleum has risen. So in addition to decontrolling the price of stripper oil, the federal government also supplies incentive for producers to coax more production from stripper wells through what is called the "once a stripper, always a stripper" rule. This allows oilmen to charge stripper prices even though a well once classified as a stripper is now producing more than 10 barrels a day because of technical improvements.

One independent producer who has made good use of this rule is Ralfe D. Reber, president of the national Stripper Well Association and holder of interests in 300 stripper wells. Last year, after production from one of his Illinois wells sagged to two barrels a day, Mr. Reber deepened the well and made some other improvements. It is now producing 50 barrels a day and bringing stripper prices.

Prodded by higher prices, oilmen are even reviving wells earlier abandoned as worthless. For example, XRG Inc., a firm that specializes in reworking old oil and gas fields, found a decrepit oil well near Alice, Tex., that the previous operator had just walked away from years earlier. He hadn't even bothered to plug it. XRG put in some new tubing and rods, and began pumping the well. It is now producing 10 barrels a day, worth nearly $50,000 a year.

PROFITABLE "POSTHOLES"

Because even small amounts of oil can be worth finding these days, oilmen are also drilling on prospects they used to ignore. Mr. Riggs, for instance, has drilled 75 wells in the last three years, most of them strippers. The majority are very shallow—from 500 feet to 1,500 feet (he calls them "postholes")—and thus not likely to tap vast reservoirs. Nonetheless, these 75 wells are churning out an average of two barrels daily each. That works out to more than $760,000 annually.

And, although stripper wells are almost completely the province of smaller independents, the major oil companies also claim a few. Shell Oil Co. produces 22,000 barrels of stripper oil a day, worth about $100 million a year. Exxon Corp. produces 24,000 barrels of stripper oil daily, accounting for 3% of its U.S. production.

Uncontrolled stripper prices aren't without their problems. For one thing, they create an incentive for unscrupulous operators to cut back production in an attempt to qualify non-stripper wells as strippers and thus move their oil into an often sharply higher price range.

"I suppose we have as many crooks in this business, as any other," acknowledges Mr. Reber, president of the stripper well group. "There's got to be some cheating going on." Indeed, the Federal Energy Administration is constantly auditing producers' records; the Dallas office currently has some 300 auditors involved in 225 audits. Those unlucky oilmen proven to fudge their

records or production are liable for as much as $20,000 in fines and a jail term.

AN ECONOMIC DAMPER

Potential fraud isn't the only difficulty. Another bad effect of decontrolling only stripper prices is the economic damper it puts on all-out production of the lower-priced "old" oil. "We're not going to spend a lot of money on 'old' oil wells that happen to be down," Mr. Reber says. "But we're going to fix an eight-barrel stripper well fast."

The solution, say many oilmen, is to encourage all truly marginal production with price incentives, regardless of daily volume. Texas Senator Lloyd Bentsen agrees: "There is no magic to the 10-barrel number," he contends.

But even raising the 10-barrel maximum on stripper wells by a few barrels wouldn't much benefit the major oil companies, who claim to possess the huge amounts of capital and expertise necessary to find and produce the oil America needs. Stripper decontrol, Rawleigh Warner Jr., chairman of Mobil Corp., claims, "is just another example of Congress trying to take care of the little guy on the premise he needs more help than the big fellow does."

ALICE PAUL IS 92

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mrs. MEYNER. Mr. Speaker, I am proud to add my congratulatory sentiments to the many expressions of admiration and respect that Alice Paul will receive as she celebrates her 92d birthday. I hope that all Americans will join me as I pay tribute to a woman who personifies the understanding of equality and the spirit of action that America represents.

A prominent leader of the women's suffrage movement, Alice Paul was born and raised in Moorestown, N.J., where she still resides. After a distinguished academic career that included three law degrees and a doctorate, she worked as a social worker before directing her energies toward what was to become her life's work—securing equal rights for women.

As the founder of the National Women's Party in 1917, and the original author of the equal rights amendment in 1923, Ms. Paul represents the millions of Americans who believe that the Constitution should not deny equal protection of the law to any citizen. Her activism on behalf of women earned her several prison sentences, but her dedication never wavered. Now, 50 years later, her words stand only four States short of becoming the 27th amendment to the Constitution. How fitting it would be if the Congress and the people could present the final ratification of the ERA as a birthday gift to Ms. Paul.

Perhaps Ms. Paul and her many supporters will see the realization of their dreams in 1977. Although the progress has been slow, I do believe that we are only a short step away from providing constitutional protection to all Americans. The philosophy that has guided the supporters of this freedom is best reflected in Alice Paul's own words:

I always thought that once you put your hand on the plough, you don't remove it until you get to the end of the row.

The end of the row is now in sight. Happy birthday, Alice Paul.

PRESIDENT'S PROPOSED AMNESTY

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. MAZZOLI. Mr. Speaker, President-elect Carter's proposed amnesty for Vietnam-era draft offenders has, quite predictably, generated a wave of controversy.

After much thoughful study of this vexing issue, I have concluded that the pardon—as proposed by Mr. Carter—is in the best interest of our Nation. And, I have notified the President-elect of my support for his proposal.

There are those who argue quite ardently that extending amnesty to Vietnam-era draft offenders dishonors and denigrates those who met the call of duty in Vietnam and lost their lives or became permanently handicapped in meeting that call.

Others argue as ardently that an amnesty should be extended to include even military deserters if we are ever to close the chapter on the tragedy and futility of Vietnam.

I ask permission, Mr. Speaker, to extend in the RECORD for the benefit of my colleagues certain materials which articulate both sides of this argument.

In my judgment, issuance by Mr. Carter of a pardon in his first week in the White House will neither bind up as many wounds, as claimed by the proponents, nor reopen as many wounds as claimed by the opponents.

As a veteran of the U.S. Army and as one who believes that America may have to fight wars in the future to preserve our liberties, I am concerned and uneasy about taking action which could possibly interfere with the raising of adequate future military forces.

But, on balance, I believe a Presidentially issued pardon will do more good than harm, will reunite more than it will divide, and will aid in a national reconciliation.

The materials follow:

[From the Wall Street Journal, Jan. 6, 1977]

THE CASE AGAINST BLANKET AMNESTY . . .

(By Ernest W. Lefever)

One of my first acts as President, said Jimmy Carter, will be to pardon Vietnam draft violators: "I think those kids who lived in Sweden or in Canada or who have avoided arrest have been punished enough." Deserters, as distinguished from draft evaders, would be treated on a case by case basis, but on December 5 Mr. Carter said he may extend his blanket pardon to other "violators." On December 17, The New York Times reported that as many as 250,000 Vietnam-era veterans with tarnished military records might benefit from a Carter amnesty order.

The national debate on this thorny moral, legal and political problem has been complicated by misinformation, oversimplification, and impassioned code words. The issue, said one blanket amnesty advocate, is between those who seek "social justice" and those who insist on "law-and-order vindictiveness." Such advocates variously regard U.S. involvement in the Vietnam war or the draft law or both as profoundly unjust. Hence, men who evaded the draft or deserted the armed forces are moral heroes who need no pardon. (Pardon implies there is a wrong to be forgiven, but amnesty makes no such judgment.)

Other amnesty advocates regard violators less as heroes and more as victims of an unjust or unpopular war. Healing the nation's wounds, they argue, requires a broad, forgive-and-forget policy. Both groups have been critical of the "earned reentry" approach of President Ford's 1973 clemency proclamation.

OVERLOOKED FACTS

Without presuming to advise Mr. Carter, it may be useful to record several largely overlooked facts and considerations:

1. The motives for draft evasion and desertion varied widely. Given the complexities of the human psyche, no one knows how many violators acted out of conscience—the conviction that all war was wrong, this war was wrong, or the draft law was unjust. Thousands of violations resulted from confusion, ignorance, cowardice, or sympathy with the enemy. One survey found that only 14% of the deserters opposed U.S. involvement in Vietnam.

2. More than 21,000 violators sought to reestablish their good name under President Ford's clemency program, including 55% of the deserters and 16% of the draft evaders. Some 7,500 accepted alternative civilian service and more than 5,000 were granted outright pardons.

3. The political wisdom and morality of U.S. Vietnam involvement is still disputed, but the effort was legal by any reasonable definition. It was supported by five Presidents and by repeated congressional appropriations. We who elected these Presidents and Congressmen had ample freedom and information to debate the merits of our involvement. Vietnam was the most fully and vividly reported war in history.

4. The draft law, which sought to spread the burden fairly, was legally enacted but, like all laws, it did not deliver perfect justice. Conscientious objectors to all wars were given the option of alternative civilian service. From 1964 through 1975 some 35,000 draftees chose and received such service. An estimated 30,000 more chose and received non-combatant military service in the medical corps. For various reasons, some requests for these special services were turned down.

5. The draftee who did not oppose all war on moral grounds (and hence was not eligible for alternative service), but opposed only the Vietnam war or the draft law, had a clear-cut and honorable alternative to dramatize his convictions—he could inform the authorities of his opposition and accept a prison sentence. Between 1961 and 1975, some 9,500 men were convicted for draft violations; the number who were conscientious objectors is not known.

6. An estimated million eligible men refused to register or to be inducted, again an unknown percentage for reasons of conscience. Some hid out in the Untied States. Others fled to Canada or Sweden. Each refused to accept the burden of military service, civilian work or imprisonment. In some cases, a fellow American died in the place of the violator.

In dealing with men who have committed a felony (restricted here to draft violators), what are the requirements of security, justice, compassion, national reconciliation and the rule of law? Certainly a blanket pardon would set a potentially dangerous precedent.

If in a grave future crisis each man of military age could decide whether to obey or flout the draft law—believing he would escape scot free whether he was motivated by conscience or disloyalty—our national security could be jeopardized. If no penalty—not even compensatory civilian service—were meted out to draft violators, would this not encourage self-indulgence, cowardice and disrespect for the very disciplines of freedom which are under siege around the world?

EVERY MAN HIS DUE

Justice, which Aristotle defined as giving every man his due, must be accorded not only to draft violators, in all their diversity, but also to the soldier who did his duty, the law-abiding conscientious objectors in the medical corps and civilian service, and the men who accepted prison. Is not a measure of justice also due the majority of the American people (despite their misgivings about Vietnam) who never regarded U.S. participation as immoral or unjust?

Proponents of unconditional amnesty frequently seek to buttress their position by citing the pardons of Presidents Lincoln and Truman, but their amnesty programs were neither universal nor unconditional in intent or application. Lincoln made a sharp distinction between men who rebelled against the U.S. government and men in the North who evaded the draft or deserted and, ironically, he was quicker to pardon Confederate than Union soldiers. President Truman's Three-man Amnesty Board, created to examine the cases of violators but not deserters, considered 15,805 cases and pardoned 1,523 men, or about 10%. No one was excused because he sympathized with the Germans or Japanese.

Throughout U.S. history, virtually all war-related presidential amnesties provided for case-by-case determination. The weight and wisdom of this precedent should not be lightly brushed aside. Certainly there is no place in the American ethic for vindictiveness or revenge, but the requirements of justice tempered by mercy suggest that each man should be judged on the merits of his own case rather than a given a blanket pardon.

[Mr. Lefever, director of the Ethics and Public Policy Program of the Kennedy Institute at Georgetown University, is an ordained minister.]

. . . AND THE ARGUMENT IN FAVOR

(By Barry W. Lynn)

President-elect Carter has promised to issue a non-judgemental "blanket pardon" to some 13,000 violators of the draft laws. His stated goal is to "heal our country after the Vietnam war."

Unfortunately, such an action lacks the boldness and breadth to accomplish this result. Although non-cooperation with the Selective Service System was one form of Vietnam protest, a pardon only for these men would ignore the moral courage of those who chose other methods of dissent. Similarly, it would fail to erase the stigmas induced by a capricious military justice system which issued over 750,000 other-than-fully-honorable discharges during the Vietnam years.

A universal and unconditional amnesty would actually strengthen the nation's future by returning to productive life over a million no-longer-so-young Americans who became the living victims of a war conducted without their advice or consent.

"UNDESIRABLE" DISCHARGE

One commonly maligned group of war resisters are the more than 4,500 long-term military absentees, so-called "deserters," still living in exile or underground in the United States. Many of these men were eligible for Gerald Ford's "clemency program" and could have removed themselves from legal jeopardy by signing an oath of reallegiance and accepting an "undesirable" discharge. Under Mr. Ford's program "deserters" were not actually required to complete alternate service. The absentees who remain refused the "offer" because they would not have their rejection of the war labeled as morally reprehensible.

The stereotype of the deserter who jeopardized his fellow soldiers by his acts of "cowardice" is utterly unfounded. For example, even the conservative report of the presidential clemency board noted that only 0.1% "deserted" under fire. Generally, they left service while on "rest and relaxation" between duty tours after recalling witnessed horrors or after basic training when they realized that the explanations given for fighting in Vietnam seemed fraudulent, foolish, or immoral.

Many are traditional conscientious objectors; others are selectively opposed to wars of aggression. However, most military commands took unkindly to requested discharge for such reasons, the Army rejecting 95% of such claims during some Vietnam years. A few absentees did not develop clear ideologies which demanded resistance, but they reached the intuitive judgment that a real family crisis required their attention and commitment far more than a distant squabble which had no connection to the national defense. All in all, government samples show that the major difference between these men and draft evaders is that the draft evaders tend to be white and well-educated while "deserters" are more likely to be the poor and minorities.

Most of those who need "amnesty," though, have already been discharged from military service. They are "social exiles" who hold other-than-fully-honorable discharges. Ninety percent of these discharges ("general" or "undesirable") were issued administratively. If the man had a hearing at all, there was no right to cross-examination, no rules of evidence, and no verbatim transcript upon which to base appeal. If formal charges were levied, they could be for violations of the Uniform Code of Military Justice as vague as "all conduct of a nature to bring discredit upon the armed forces . . ." or a prohibition against "contempuous words against the President, the Vice President, or the Congress."

These lax administrative routines and general accusations presented easy ways to cover up the vast quantity of anti-war sentiment in the Vietnam-era military, whether it was in the form of refusal to carry guns, distribution of anti-war leaflets, or speaking out against the rampant racism.

Stigmatizing discharges were, according to the Department of Defense, given disproportionately to members of minority groups. They are a lifelong punishment which makes a person virtually unemployable. Everyone who received such a discharge was not a war resister, but, with the exception of a few genuine criminals who could be easily screened out of a general amnesty, the others were mainly persons who should never have been inducted for either mental or physical reasons or persons with honorable service in Vietnam who committed trivial offenses after their return. All of these men need an honorable discharge. Should President Carter avoid covering them in his "pardon," he will give a clear message to young men that enlisting in the military is a dangerous business where a single "mistake" or a change in one's moral philosophy while in the service can lead to a lifetime of unemployment.

CRITICAL PREREQUISITE

Granting an amnesty would not heal all the wounds of the Vietnam war. It is, however a critical prerequisite for reconciliation.

I am afraid that we will always lack courageous men willing to resist that which they see as unjust. In spite of the massive resistance to the Vietnam war, personnel needs were met from a pool of only 30% of the draft-age eligible men, the other 70% being legal draft avoiders. Nations including our own have granted broad amnesties without any increase in general lawlessness. Grants of amnesty, particularly so many years after a war has ended, have never led to any difficulty in raising an army for the next war. Any Vietnam amnesty now would only serve to modestly and symbolically uphold the right to dissent and relieve much needless human suffering.

[Mr. Lynn, a minister in the United Church of Christ, is a member of the national steering committee of the National Council for Universal, Unconditional Amnesty.]

[From the U.S. News & World Report, Jan. 10, 1977]

PRO-CON DEBATE: PARDON ALL DRAFT DODGERS

YES—"END A VERY DIVISIVE PERIOD IN THE LIFE OF THIS COUNTRY"

(Interview With Representative EDWARD I. KOCH, Democrat, of New York)

Q. Representative Koch, why do you favor a presidential pardon for all draft dodgers—people who admittedly violated the Selective Service law during wartime?

A. Whether one was for the war or opposed to the war—and I fall into the latter category—I believe it's time that we ended a period in the life of this country which is very divisive. And the only way that we can end that divisiveness is to pardon or amnesty these people.

Q. Might not a blanket pardon set a dangerous precedent if the U.S. is again in a war and we need to draft a new Army?

A. It didn't set any great precedent when we provided amnesty and pardoned the Confederate soldiers in our great American Civil War. Somehow or other we survived that humanitarian, compassionate response. And I think that we would similarly have a better life for our country coming out of such a response today.

Q. How do you justify pardoning a young man who ducked out of his military obligation when so many others responded and paid the price with their lives?

A. It is not in any way an attack upon those who responded to our country's call. And I must say candidly—and I served in World War II—that if I had been called to serve during Vietnam, my makeup is such that I would have gone in and fought, because that's the way I would respond even though I was opposed to the war.

But that doesn't mean that those who refused to serve should not receive a compassionate response from this country. We are now four years past the point where the war was ended, and most people looking back would say: "We never should have been in that war in the first place."

Many people happen to believe in selective CO [conscientious objector] status which would permit alternative civilian service—and we ought to have had that. But, regrettably, we didn't have it at that time.

Q. Would you go further than President-elect Carter, and also pardon all military deserters of the Vietnam conflict?

A. Yes, I would. I know that's tougher for people to accept. Desertion is a very difficult situation for people to ever approve in any way. But those who have looked at the matter will say that in many cases—not all, obviously—there were people who deserted, not out of conscience, but simply to save their own skins, which may be understandable, but not acceptable.

But there are a number of people who deserted as a result of conscience, even though they went into the Army willingly. I've met some of those people who went into the Army, willingly went to Vietnam, and then

were conscience-stricken there for a number of reasons. My Lai might be one, but there were other reasons. And rather than having the situation of the middle class, the more affluent, the more educated, who were able to avoid being drafted in the first place, it was often those who were in the lesser socio-economic classes who didn't have that option, who went in, got conscience-stricken there, and found that their only recourse was to go AWOL—and ultimately that resulted in a charge of desertion.

Q What about your resolution, now being presented to the House, in support of President-elect Carter's position on a pardon—just what is the purpose of that?

A My purpose in introducing the resolution is to show that there is support for what he's doing. I don't expect that we're going to get an overwhelming number of members to sign it. I suspect that an overwhelming number of members agree with it, but would prefer not to have to go on record because it raises great emotional controversy.

There are people who simply will not accept any pardoning or amnesty on the grounds that, in some way or other, that sullies the records of those who served and those who died in Vietnam, fighting because they were good Americans following the orders of their country. I don't think that it does sully those records. I think that, of the men who served our country, many agree that it's time we brought this matter to a conclusion.

I have no expectation that it, in fact, would be passed. But what I'm trying to do is to indicate to the President-elect that he has support.

Q If the draft dodgers ultimately are pardoned, do you expect that this will bring home everybody who is living now in voluntary exile in Canada, Sweden and elsewhere?

A Everybody, no, but almost everybody.

"When the war is just"—

Looking ahead, do you favor some basic change in the laws to be made now in order to provide a legal alternative for youths who might object to fighting in future wars?

A Yes. I submitted to the Congress, maybe four years ago, a bill which would have created the classification of selective conscientious-objector status. That means that if you can establish that you have the same moral opposition to a particular war required of those opposing all wars, you would be given conscientious-objector status on a selective basis and serve in a civilian role.

You might say, "Oh, isn't that opening doors to fraud?" Well, we have had judges in this country—they were ultimately overruled—who said, "No, that wouldn't open the doors to fraud."

But in Great Britain, for example, even during World War II, the British had—and still have—selective CO status, so that if there were people who were opposed to a particular war, they could serve in a noncombatant way. Few people will avail themselves of that opportunity when the war is just.

Q How many people do you think should be pardoned?

A All of those whose lives were in some way blemished as a result of the Vietnam War—including 250,000 who now have a "tarnished military record" and another 250,000 who failed to register, and thus are in violation of the draft law.

NO—"IT WILL OPEN UP MORE WOUNDS THAN IT WOULD HEAL"

(Interview With Representative G. V. ("SONNY") MONTGOMERY, Democrat, of Mississippi)

Q Representative Montgomery, why do you oppose pardoning young men who objected to this country's role in Vietnam, years after that war has ended?

A The years really don't have anything to do with it. These persons broke a federal law. Unless the law is changed retroactively, I think they should have to come back and face the music like everyone else who breaks a federal law.

We would be setting a bad precedent by giving a pardon to draft evaders. I think President-elect Carter is really opening up a can of worms that goes further than the precedent that he will set. The hard feelings that he will cause among the families whose sons have lost their lives, or husbands whose lives have been lost in Vietnam, or the millions of other Americans who went to Vietnam—I think he's going to have to face all that if he goes ahead and gives his pardon.

He's going to have to go back and look at all the discharges, which is a point that has not been brought out—all the discharges that are less than honorable of those who participated in the Vietnam War. And we're talking about over 300,000 such discharges.

Q Wouldn't a blanket pardon be the best way to heal the wounds left by the war?

A I believe it will open up more wounds than it would heal. I think Mr. Carter will open up other areas that probably he or others didn't realize might be involved.

Take a man who fought well in Vietnam. He was given commendations and bravery ribbons, he came back to the U.S., he got drunk, he stole the company commander's Jeep and took $20 that was in the Jeep, and he wrecked it and he ended up with a dishonorable discharge. Well, you have to go back and consider this fellow's discharge. In my opinion, he's done far less than the man who fled to Canada and was an evader.

Q. Would you favor lumping togther the draft dodgers and the military deserters and making them all pay a price for wiping the slate clean?

A I have problems trying to follow Governor Carter on what's the difference between an evader and a deserter. In my opinion, they're both in the wrong, but I don't think evading is any less of a violation than deserting.

If he lumps them together, maybe that will slow it down and there would be further opposition to what he's trying to do.

Q Draft violators offer a wide spectrum of reasons for their actions. Do you believe all of them should go to prison now?

A I don't have any set formula that a young man should go and stay 10 years in jail. I'm not advocating that. All I'm saying is that he broke the law, and under the law he should come back and face the judge. I have no problems as to whether he's given a suspended sentence or what happens to him. I'm not for putting them in jail for a long period of time. I think, though, that they do have to come back and stand trial.

Q If they don't do this, will there be a large number of young Americans who will be in hiding or overseas in exile indefinitely?

A I don't think so. Eventually these Americans—large numbers of them—will come back to the United States and will go and stand trial.

In the past wars, this has happened. Most of the Americans who deserted or even stayed in parts of Korea and China have come back to the United States. I have no objections to their coming back. But I do think that they have to come back and stand trial.

Mass amnesty: Dangerous precedent—

Q A lot of the people who have opposed this pardon say that it would set a dangerous precedent for future wars. Do you hold with that, too?

A Yes, I do. I think that's definitely true. You can go back—and I've done some research on the situation of past pardons and amnesties—I do think this would be a precedent by President-elect Carter.

No pardon or amnesty as I understand it, was given for the Korean War. No pardon was given for World War I. Now, if you read closely about President Truman's amnesty for World War II, it was, in effect, handled case by case, and they still had to pay the penalty, and it didn't give them a clean bill of health.

Q You've mentioned the case-by-case trial of individuals who have violated the law. Is that your solution?

A I think that this is the way to do it—case by case. And I'm not saying what sentence that these young people should have when they come back. That's up to the judge. I accept his decision on it; I accept the jury's decision on it. But until we change the law, I have no better solution.

Q President Ford's clemency program seemed to work fairly well for the military deserters, but not at all for the draft dodgers. Do you think something like "earned forgiveness" would be the solution?

A It would be better than what President-elect Carter has offered.

Q You circulated a letter to your colleagues seeking to drum up opposition to President-elect Carter's proposal. What has been the reaction?

A I've been very pleased with the reaction that I have received from members of the House of Representatives the ones that I polled. We secured 106 signatures, about evenly divided on a bipartisan basis—I believe 66 Republicans, 40 Democrats of the 106 that I have received in support—asking President-elect Carter to reconsider his position on the draft dodgers.

We are not trying to embarrass President-elect Carter in ony way. This is American. This is bipartisan.

ONGOING LOAN PROGRAM AS JOB STIMULUS

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. MINISH. Mr. Speaker, I rise to bring to the attention of my colleagues legislation (H.R. 1683) I introduced yesterday to provide an ongoing loan program for priority areas such as housing, public works construction, small and medium size businesses, and other job creating projects.

My bill would create a National Development Bank, patterned after the New Deal Reconstruction Finance Corporation. The bank, financed initially by a $2 billion Federal government purchase of its stock, would provide a flexible tool to stimulate the economy. It would be authorized to make direct and guaranteed loans to State and local governments for public works and facilities. Individuals and corporations unable to secure credit in the marketplace could also apply to the bank for "job creating" loans.

The bank would be similar to the Reconstruction Finance Corporation, which helped the country out of the Depression of the 1930's. It should be noted that the RFC was one of the few Government agencies of this type to close its books in the black.

The National Development Bank would provide a flexible tool to assure that credit be allocated to areas of greatest need. It would also be charged with

developing innovative approaches to areas like new energy sources.

However, the bank would in no way serve as a "bail out" agency for companies which are failing due to poor management. On the contrary, the bank would be required to determine that a company was being managed competently and efficiently prior to extending credit and that it provide a prescribed number of jobs if the loan is granted.

As its most important function, the bank would attempt to meet, on a comprehensive basis, the pressing financial needs of local governments throughout the country. Many communities in areas like northern New Jersey are in dire need of this type instrument to adequately finance essential local services.

It is essential, Mr. Speaker, that sufficient credit be available for housing production, small business, and other investments essential to our economic well-being.

Most importantly, we must create jobs in order to lower our tragically high and completely unacceptable unemployment level. Clearly, the availability of credit on a continuing basis, as with the NDB, would have an enormous beneficial impact on the jobless rate.

INTRODUCTION OF REVISED COMMISSION ON THE HUMANE TREATMENT OF ANIMALS

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. KOCH. Mr. Speaker, because Mr. PATTISON and I continue to be concerned that each year millions of animals suffer needless pain and death at the hands of the humans who control their lives, we reintroduced on January 4, the Koch-Pattison bill to establish a Commission on the Humane Treatment of Animals, which was labeled H.R. 11112 during the 94th Congress and is now renumbered H.R. 446 for the 95th Congress.

I was gratified, as I am sure many of my colleagues were, that Chairman POAGE was able to schedule a hearing on this bill before the Agriculture Subcommittee on Livestock and Grains at the 11th hour of last session. The hearing was educational in nature, coming as it did on September 30, the day before Congress adjourned; but it was, I think, a valuable prelude to what I hope will be further hearings and favorable committee action on this legislation.

During the hearing, witnesses testifying in support of the bill focused upon several categories of inhumane practices that lack any apparent justification and that remain for the most part hidden from the public view. Numerous cases were detailed of needless animal suffering in experimental research and testing and in certain modern methods of intensive livestock rearing, and the current explosion in the domestic pet population was described. The word to emphasize here is "needless," for in virtually every alleged case of inhumane treatment, more humane alternatives that are also practical and economical were offered to present practices.

It will be recalled that the Koch-Pattison bill proposes to establish an 11-member Commission that would conduct a 2-year investigation into a wide range of animal problems, including but not limited to allegations such as those above. At the end of 2 years, the Commission would present its findings to the President and Congress together with its recommendations for legislative remedies to any practices found to be inhumane. None of these recommendations would, of course, be binding, but I would hope that, should such a Commission be established, my colleagues would weigh its conclusions carefully.

The revised version just introduced, H.R. 446, is substantially similar to the original bill; but it contains some changes proposed during the September 30 hearing by several widely respected animal-welfare experts; and these changes, I believe, are worthy improvements. First, the Commissions' makeup, which many people have correctly pointed out would be the most vital factor in the Commission's performance, is now tied to a more precise formula than before. Members would be chosen by reason of their knowledge and expertise of the matters to be studied by the Commission in the following proportions: five persons representing medical schools, the profession of zoology or wildlife biology, and the practice of veterinary medicine or animal husbandry; five persons representing animal welfare and humane societies; and one person of demonstrated administrative or judicial ability to serve as an impartial chairman.

Second, to make the Commission's work more manageable and more defined, the scope of its investigation, which formerly covered any and all animal problems the Commission might wish to examine, from the clubbing of baby seals to the interstate transportation of pets, has been limited to three areas: First, laboratory research and testing, second, raising of animals for human consumption, and third, overpopulation of pets. These are the areas believed by animal welfare experts to be in most urgent need of attention.

In studying these three areas, the Commission will seek answers to such questions as—

Do current farming practices and laboratory experimentation—including biomedical and military—cause needless pain, prolonged discomfort, or distress in animals?

Does any adequate substitute exist for the use of animals with rsepect to laboratory experimentation—including the testing of toxic substances?

Do current domestic pet growth rates pose dangers to public health?

What is the effectiveness of existing law, if any, with respect to the problems being studied by the Commission?

Finally, to insure a constructive dimension to the Commission's work, a provision has been added to it's mandate requiring that it evaluate and recommend practical and economic alternatives to current inhumane practices and that it evaluate the effectiveness of existing public and private programs with respect to the development of such alternatives.

Many people have argued that the proposed Commission would be a waste of tax dollars, but one need only read the record of the September 30 hearing to see that this claim is untrue. Some insist that the Animal Welfare Act of 1966 as amended already protects animals in the laboratory. While I welcome the progress that has been made by that law, it covers only the conditions under which animals are kept within the laboratory and the means by which they are procured, not the actual experiments conducted upon them.

I want to make it clear, at this point, that I am not an antivivisectionist, who would end all animal experimentation of any kind no matter how important that research may be for the legitimate benefit of mankind. I do believe, however, that, when an experiment involves suffering and death, it should be carefully weighed to ascertain whether it has a cause sufficient to justify the suffering involved. When such experiments are found justifiable, then every effort should also be made to treat the animals involved as humanely as possible; and further, wherever feasible, nonanimal substitutes should be used.

Another frequent argument voiced in opposition to the Koch-Pattison bill holds that an investigation into inhumane treatment of animals on farms is unnecessary because, as any farmer knows, livestock put on less weight and other animals produce less when they are treated poorly, which makes it uneconomical for a farmer to be inhumane. This dictum used to be true; but the economics of giant-scale agribusiness, in which hundreds of thousands of animals are raised in confined spaces, makes it cheaper to overstock and accept a lower yield per animal due to stress than to treat each animal humanely. Undoubtedly, agribusiness is here to stay, but methods are being pioneered to raise animals on the same scale at an equivalent cost in a more human fashion. The Commission would be able to promote these methods before the more extreme methods become entrenched.

The main reason a Commission on the Humane Treatment of Animals is needed now, while such a need was not evident in the past, is simple: the three areas to be investigated are relatively new problems not heretofore addressed. Vast amounts of animal research and testing, giant agribusinesses, and the explosion of the pet population are all fairly recent developments; but we are now faced with these problems, and a Commission is needed to determine how best to deal with them.

As an afterword, it may be of interest to fellow Members that the following notables were included among those testifying in favor of the Koch-Pattison bill: Ms. Ruth Harrison, author of "Animal Machines" and a distinguished British advocate of humane legislation, who flew from London specifically for the hearing; Mrs. Christine Stevens, secretary of the Society for Animal Protective Legislation; Dr. Michael Fox, director of the Institute for the Study of Animal Problems, the Humane Society of the

United States; and Ms. Carole Koury, national coordinator of the Fund For Animals, who testified in place of that organization's president, Mr. Cleveland Amory, who was unable to attend.

GOVERNMENT ECONOMY AND SPENDING REFORM ACT

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. BLANCHARD. Mr. Speaker, on January 4, 1977, Mr. MINETA and I introduced H.R. 85, the Government Economy and Spending Reform Act, with the support of some 62 colleagues.

Since then, I have received continuing inquiries and expressions of support for the concept of zero-base review which H.R. 85—called the sunset bill by some—embodies. For the information of those who may be unfamiliar with it, I would like to briefly discuss its history and to include in the RECORD some background materials relating to it.

The idea of a regular review of Government spending programs in their entirety, rather than a review limited to proposed additions to those programs, is one which has surfaced from time to time over the years in Congress with varying degrees of interest. I know of at least one attempt, under the leadership of Representative CHARLES E. BENNETT of Florida, in recent years, and there may have been others.

My own interest in the idea dates from an article on zero-base budgeting written by Peter H. Pyhrr, a business executive, which appeared in the Harvard Business Review. As it happens, that same article was read by President-elect Jimmy Carter, who was then about to take office as the Governor of Georgia. Subsequently, he invited Pyhrr to come to Georgia and help to implement the concept in the Georgia State government.

Shortly after being elected to Congress in 1974, I resolved to make zero-based budgeting a major legislative priority, and in July, 1975, I introduced the "Truth in Budgeting Act," a precursor of H.R. 85.

In February 1976, Senator EDMUND S. MUSKIE of Maine introduced the initial version of the Government Economy and Spending Act. Subsequently, Mr. MINETA and I introduced the bill in the House, and many of the 68 cosponsors who had joined us on the Truth in Budgeting Act followed suit. By the time the 94th Congress adjourned, the Government Economy and Spending Reform Act had attracted the support of 113 Representatives and 54 Senators.

The basic concept of H.R. 85 is relatively simple and straightforward. Every Federal spending program, except those which are funded through trust funds—in short, those into which people make payments in anticipation of receiving assistance in the future—would be subject to a full review every 5 years.

The bill contains a number of other provisions, aimed at improving the flow of information to Congress on the Federal budget process and specifying the timetable for review, but this is its heart.

Standing committees will be responsible for reviewing programs to determine whether they should be continued, and if so, at a funding level less than, equal to, or greater than the existing level of funding.

The review of a program is to include:

First. Questioning and identifying the original goals of the program;

Second. Determining to what extent those goals are being achieved;

Third. Looking at the performance and cost of the program over the previous four fiscal years;

Fourth. Assessing the program's staff costs, the paperwork it generates, the number of people it serves, and so forth; and

Fifth. Analyzing the effect of reducing, holding steady, or increasing the funding level.

Mr. Speaker, it is our hope that this will result in some of the hard questions being asked about spending programs—questions which are too often neglected:

Is the program still relevant? Some have been in existence for decades.

Should it still be a priority of the Federal Government?

Could it work just as well with less money?

Is it being duplicated somewhere else in the Federal Government?

Answering these questions and others about government's effectiveness and efficiency is a must if we are going to keep trying to address new problems in the years ahead. We cannot expect to keep on enacting new programs and chartering new agencies without eliminating old ones. The Federal budget simply will not bear the burden.

In some cases, no matter how good the ideas and intentions were initially, programs are not going to work, no matter how much money we spend on them. And rather than perpetrate a fraud on the people by giving them a false sense of security or hope, it might well be better to quit fooling around and put our money and time into areas that will work.

The last few years have seen a dramatic growth in the size and reach of the Federal Government—a growth accompanied by sharply increasing disillusionment on the part of the American people as to the ability of that government to accomplish its stated goals.

I believe it is time now for a period of evaluation, and assessment, to provide a sounder and stronger basis for deciding what we hope to accomplish in the future.

Enacting legislation of this nature will not be an easy matter. There are many conflicting interests which must be resolved and many changes which must be made. But the time to begin is now. Each year which goes by, the need becomes more compelling, the structure of government more unwieldy, and reorganization more difficult to achieve.

To date, H.R. 85 has attracted 75 cosponsors in addition to Mr. MINETA and myself. In the weeks ahead, we plan to continue seeking support and attempting to inform colleagues of the purposes and provisions of this legislation. I urge all those who are interested to join us.

At this point in the RECORD, I would like to insert further background material on the Government Economy and Spending Reform Act of 1977.

[From the National Observer, June 5, 1976]

"SUNSET" BUDGETINGS: HIGH NOON FOR FEDERAL WASTE?

(By Mark R. Arnold)

WASHINGTON, D.C.—The hottest political idea of the year is something called the sunset bill. It has nothing to do with daylight-saving time. It has everything to do—or so its sponsors say—with making the Federal Government more accountable and more efficient.

A response to a widely held view that the Federal bureaucracy is wasteful and inept, sunset is being eagerly embraced by liberals such as Hubert Humphrey and Charles Percy and conservatives such as Barry Goldwater and James Eastland.

The measure would set a termination date—a date for the sun to set—on every Federal program. Each would be renewed only if, after rigorous analysis by Congress its performance could justify its existence and spending level.

Every five years each Federal program would face extinction unless a "zero-based budgeting" review demonstrated its value to the nation. Such a review would weigh the effect of various levels of spending—beginning with zero, or termination—upon the program's goals.

Sunset is modeled in part on the zero-based budgeting techniques instituted by former Gov. Jimmy Carter in Georgia in 1972. The measure would reverse the assumption under which most bureaucracies operate—that programs, once established, should be continued (and usually grow). Sunset, says chief Senate sponsor Edmund Muskie of Maine, "offers one of the few chances we have to clear out some bureaucratic deadwood to make way for the nation's changing agenda."

Muskie and Delaware Republican William Roth introduced the sunset bill in the Senate on Feb. 3. "We hoped to get some hearings going and build a record that would lead to passage in the next Congress," says Alvin From, staff director of Muskie's Intergovernmental Relations subcommittee, which reported the bill May 13. But the proposal has attracted so much attention—and the support of both Majority Leader Mike Mansfield and Minority Leader Hugh Scott—that the Senate could vote on it before the July recess. House action may not be far behind.

As of last week, 48 of the 100 senators and 110 of 435 House members were cosponsoring sunset or zero-based budget legislation in Congress, representing all viewpoints on the ideological spectrum. "Conservatives see this as a way of reducing the responsibilities of Government, liberals as a way of getting our house in order to take on new responsibilities," says Muskie. Adds House sponsor James Blanchard of Michigan: "This is a good-government issue, not a liberal or conservative issue."

Interest in the idea is not confined to Washington. Colorado recently became the first state to adopt sunset legislation when Gov. Richard D. Lamm signed into law a bill that swept through the legislature with strong bipartisan support. The measure requires that all of the state's 43 regulatory agencies undergo a complete performance audit every seven years. Other sunset bills have been introduced this year in the legislatures of Minnesota, Florida, Louisiana, California, Illinois, and Alaska.

Behind the interest in sunset legislation lies a popular reaction against the growth of government. The largest increase in public-sector spending over the past 20 years has come at the state and local levels, but the growth rate of government at all levels has exceeded the growth rate of the economy during the period, according to studies by the Senate subcommittee. One consequence: The average family's tax burden has doubled in 20 years.

The period has also seen a dramatic rise in the most visible kind of Federal aid—that earmarked for domestic social programs. The Federal Government today has roughly the same number of employes it had a decade ago (2.8 million), but they administer more than 1,000 programs of assistance to all 50 states and 80,000 units of local government. In the health field alone, 10 agencies run 228 different programs.

"Government has become out of touch and out of control," says Muskie. Proponents see the sunset bill as a way of regaining control over the services that the Federal dollar buys. This is "a logical second step," adds Muskie, to the Budget Reform Act of 1974, which gave Congress a framework to help set national priorities. "No one in the executive branch or Congress really knows if we're getting the most for the money we spend."

The sunset bill is officially known as the Government Economy and Spending Reform Act of 1976. It would require that all Federal programs—including income-tax deductions—be reauthorized every fifth year or go out of existence. The only exemptions to the termination edict are payments for interest on the national debt and programs under which individuals make payments to the Government in the expectation of future benefits, such as Social Security.

THE ZERO-BASED PROCEDURE

Programs would be grouped for review by functional purpose (all defense programs would be reviewed in one year, all health programs in another, and so on). The President would submit with his budget request a zero-based review of all programs earmarked for termination in the coming fiscal year and an independent evaluation of their effectiveness.

The appropriate committees of Congress would consider the President's zero-based reviews and evaluations, perform any additional studies deemed warranted, and recommend to the House or Senate how much—if anything—to spend on each program. Its backers believe the process would identify numerous areas of waste and duplication. "There's the potential for billions of dollars of savings," says Muskie.

The House bill introduced by freshman Democrat Jim Blanchard of Michigan is modeled after Muskie's. It has been endorsed by 106 House Members, including 45 of the 75 freshman Democrats. Blanchard says the bill is particularly appealing to liberals:

"We all want new programs, but we know it's politically unacceptable these days to raise taxes to finance them. The only way to pay for them is to weed out programs that have outlived their usefulness. Zero-based budgeting is how you find them."

BENEFITS AND DRAWBACKS

The oldest and most comprehensive use of zero-based budgeting is Jimmy Carter's Georgia system, which has been continued and refined by his successor, Gov. George Busbee. National Observer interviews in Atlanta with state budget officials, agency administrators, and legislators suggests that the process can yield some benefits but that political factors limit its potential. In addition, because that system calls for *annual* zero-based review, some administrators complain that it causes needless paper work.

Georgia officials cannot recall a single program that has been "zero-budgeted" out of existence. But administrators say the system keeps them on their toes and makes programs more efficient. In addition, argues Clark Stevens, who oversees the system for Governor Busbee, "we can look at all expenditures and measure them off against each other better. Old programs compete for resources with new proposals, and ideas don't get squeezed out on the grounds that the money has already been committed."

POLITICS OVER PERFORMANCE?

As a governor's management tool, the Georgia system has important advantages over traditional budgeting techniques, but its utility is severely hampered because the state legislature ignores it. "We prepare a continuation budget, and so does the governor," says Georgia legislative-budget analyst Pete Hackney. "Then they decide which items in addition to that ought to be funded. If old things get cut out, it's usually because they've proved pretty unpopular."

No one has yet opposed the legislation in Congress, but numerous skeptics wonder if political considerations, rather than performance, might not sway Congress' deliberations. "Any ongoing program has a constituency around the country that is going to be mighty unhappy with anyone trying to tamper with their line into the Treasury," says a White House official.

PROGRAMS SEEN JEOPARDIZED

Sunset's backers insist that it would give reformers ammunition they now lack in facing down defenders of ineffective programs. "We'd be viewing programs as they relate to other programs and spending options, not in a vacuum as we do now," says Blanchard. "That's got to be a plus."

Another criticism holds that program evaluation is too primitive an instrument—"more art form than science," says James Lynn, director of the Office of Management and Budget—to produce the standardized measures of effectiveness that the legislation would seem to require. Lynn, testifying on the Muskie bill in April, called the Senate formula "too mechanical and inflexible." His lieutenants are working with Senate aides to try to iron out the difficulties.

Requiring periodic reauthorization for all Federal spending "might put suicidal demands on Congress," worries a legislative-appropriations expert. Without additional resources to undertake thorough reviews, he adds, "We might end up with a BS type of recertification procedure, a paper exercise."

PILOT PROJECTS SUGGESTED

Moreover, a functional approach to consideration of Federal spending would require a thorough realignment of the present haphazard committee structure. No longer, for example, would 17 committees of Congress have jurisdiction over energy legislation. Muskie thinks sunset would spur this needed realignment, but he concedes, "If we don't solve the jurisdiction problem, implementation will be weakened."

These problems prompt some sunset backers to conclude that the legislation should be implemented in phases, beginning with some pilot projects. "We don't want to bite off more than Congress can chew and discredit the whole idea," says a strategist for Common Cause, which is pushing sunset in Washington and in state legislatures.

Whatever approach prevails, the idea behind sunset—to force a systematic and periodic re-evaluation of Government programs—is gaining strength. Says Muskie:

"People are fed up. They read about abuses in the Medicare program and cost overruns in defense spending. They don't know if it's the tip of an iceberg or the whole iceberg. I don't know either. The fact is, nobody knows. But we, as their representatives, have an obligation to find out."

[From the Richmond News Leader, May 10, 1976]

COLORADO'S "SUNSET" LAW

"The Colorado legislature deserves praise for undertaking some spring plowing in the idle fields of bureaucracy. The legislature passed a 'sunset' bill that would mandate review of 44 state agencies every six years. And Colorado's governor has signed it into law.

"Under the 'sunset' concept, agencies that no longer could justify their existence at review time would be phased out. This kind of approach to overgrown government may be the best news for the taxpayers in years. Traditionally, legislatures and the Congress have been eager to approve new programs, but legislators and Congressmen rarely do away with any old ones. Consequently, many agencies—especially regulatory ones—manage to hang on to their empires long after the reasons for their existence have passed.

"In one of its more sensible campaigns, Common Cause was responsible for putting the 'sunset' bill on Colorado's legislative agenda. According to a Common Cause spokesman, the 'sunset' approach will accomplish four objectives: (1) increase an agency's accountability to the public; (2) establish an automatic review schedule; (3) make legislators review programs as part of their duties; and (4) give taxpayers a voice about agencies and programs in open hearings. These objectives are so sound that the 'sunset' bill attracted support from every corner.

"Fortunately, Colorado's pathfinding has caught the eye of some Senators in Washington. Senator Edmund Muskie is sponsoring a bill—cosponsored by a number of other Senators of varying ideologies—that would place all federal programs on a review schedule every four years. The approach is similar to the Colorado approach; one hopes that the Muskie bill will attract bipartisan support.

"Congress knows that the public has grown weary of bureaucratic interference in private lives; almost every Congressman and Senator running for re-election is running 'against Washington.' Those two words comprise a slogan that evokes visions of an army of entrenched bureaucratics hard at their busy-work.

"This busy-work includes the formulation of thousands of rules and regulations that nobody can understand, much less follow. Most of these rules and regulations inhibit the free market and add immensely to consumer costs without serving any particular public good. Yet the bureaucrats—unaccountable to the taxpayers who pay their salaries—keep on building their empires.

"The 'sunset' bill approach, on a national level, embodies the anti-Washington mood. If the Muskie bill can ride that mood to enactment, perhaps at long last the three major branches of government will get a handle on the bureaucratic monster they have created.

". . . the Colorado bill and the Muskie bill evoke some hope that a review system may restore government to its role as a servant of the people, rather than as an oppressor. Offhand, there must be at least 150,973 agencies and programs across the land that could rise into the sunset to a standing ovation from the taxpayers. Let 'em ride."

[From the Denver Post, May 7, 1976]

SUNSET IDEA SPREADS

"Any bureaucratic-reform proposal so utilitarian in its approach, so surgical in its implementation deserves broad publication. Fortunately, the Colorado idea had instant appeal to the populace at large and its basic thrust has made an impression on the U.S. Congress.

"Several bills currently pending in the Congress hope to capitalize on the public's 'anti-

Washington' mood; they would make federal programs regularly justify their existence or come to an end. A Senate subcommittee has completed hearings: on one proposal that generally would require all federal activities to be reapproved every four years.

"One of its sponsors, Sen. Edmund Muskie, D-Maine, notes that 'the proliferation of a bumper crop of federal programs, accompanied by duplication, inefficiencies and conflicting purposes, has resulted in a bumper crop of public disenchantment with government so unresponsive that it cannot even perform the simple day-to-day tasks that need to be done.' To which one might add, amen.

"James T. Lynn, director of the Office of Management and Budget (OMB), agrees that the goals of the Muskie bill are laudable, but deplores such an 'inflexible and mechanical' approach to evaluating federal programs. We'd remind Lynn that, while he might be correct, a start has to be made somewhere. Refinement, if needed, can come later. And we wouldn't turn the matter over to a committee for study; such a group might be still in existence 100 years from now.

"Any American who's ever been trapped in Washington's smothering bureaucratic maze or who simply thinks that enough in the expansion and perpetuation of governmental agencies should murmur a soft 'thank you' for 'sunset' legislation."

[From the Washington Star, Feb. 5, 1976]

MORE BANG FOR THE BUCK

Senator Edmund Muskie has come up with a legislative proposal that has the look of a winner.

Instead of following the usual practice of plowing more money into federal programs year after year whether they work or not, Mr. Muskie says, why not take a fresh look at them periodically?

Indeed, why not? Congressional failure to reexamine what it creates is a major reason why the budget keeps getting bigger, the bureaucracy keeps growing, and the taxpayers keep wondering why they don't get more bang for their bucks.

The way Mr. Muskie and the bill's cosponsors—Republican William Ruth of Delaware and Democrat John Glenn of Ohio—see it, the government will never have enough money for new initiatives if it continues to throw good money after bad programs.

Under the Muskie bill, beginning in 1979 almost all federal programs would be put on a four-year authorization cycle. This means that each program, with the exception of such things as servicing the federal debt and Social Security pensions, would be examined every four years to see if it is doing what it was established to do. Any program that was not reauthorized would automatically be abolished.

There's more. Programs deemed worthy of keeping would not necessarily be retained at existing or greater size. Congress would start at "zero base" in its re-examination and every dollar of authorization would have to be justified as to the job it is supposed to do and the impact on overall government spending.

To help the process, the executive branch would be required to make a "zero-base review and evaluation" of programs scheduled for extension or termination.

Enacting the Muskie proposal will not be easy. Congress is a world of 535 fiefdoms and each potentate has pet programs that he's determined to hang onto. Then there are the special interests—the lobbyists, if you will—that cajole, badger and even now and then bribe congressmen to keep programs going that benefit the special interests. The government bureaucracy itself is an important influence in keeping programs going long after they have served their purpose or proved to be inadequate; abolished programs mean abolished jobs, and paper shufflers can always find arguments to keep them in business.

Inertia is a factor in keeping programs going. Unless there is an external force to change its direction, a program continues on its course. Congress is not a body that works very hard at overcoming inertia.

As Senator Muskie said, there is no valid basis for the assumption that old programs and old agencies deserve to be continued simply because they existed the year before. "Government," he said, "has become out of touch and out of control." The time may be ripe for doing something about it, given the growing public sentiment for cutting back the government—and the Muskie plan seems a good place to start.

RUSSIA CAMPAIGNS FOR WESTERN DISARMAMENT WHILE SEEKING ABSOLUTE MILITARY SUPERIORITY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. McDONALD. Mr. Speaker, the Soviet Union continues to seek absolute military superiority over the United States. Benefiting from the work of an outside panel of experts, the Central Intelligence Agency has at last taken cognizance of the U.S.S.R.'s hegemonic military goal, although the evidence has been available for years that "détente" was another Soviet tactical ploy and that the U.S.S.R. is preparing to survive a nuclear war and that the Red Army is being strengthened to aggressively wage both conventional and nuclear war.

The Soviets have vastly increased their fleets in the Indian and Pacific Oceans and the Mediterranean. Red Army forces in Eastern Europe and Warsaw Pact troops have been strengthened; Russian air defenses are being built up; and an elaborate civil defense program calling for both mass evacuation and the construction of immense underground shelters is underway. Since the 1972 SALT agreements, the U.S.S.R. has deployed more than 1,000 SS–17 and SS–19 multiple warhead intercontinental ballistic missiles. Soviet ICBM sites have been "hardened"; and new high technology methods for blinding or destroying our reconnaissance satellites are being developed.

And as the Soviets struggle not for parity, but for superiority in weaponry, the Russians and their allies in Western countries have reinitiated an intensive campaign urging the United States to disarm in the name of "détente." The Communists have shown us by their own practice that what they call a period of "peaceful coexistence" and "détente" is one in which the Communists use all means short of open military force to undermine and subvert non-Communist governments and institutions; while the non-Communists agree not to fight back and sell the Communists food and new technological advances.

Sophisticated propaganda campaigns aimed at altering "world public opinion" in line with Soviet foreign policy objectives. Internationally, the U.S.S.R.'s "peace" line is pushed via the World Peace Council, now about to open another "World Congress of Peace Forces" in Moscow.

Following its détente victories in Vietnam and Angola, the Soviet Union has reheated its stale old campaign for Western disarmament in order to, as the Soviets say, "make détente concrete."

Beginning this week, the pro-Soviet Communists and their allies in various Western countries will conduct "peace and disarmament drives." These call for the "supplementing of political détente with military détente, disarmament, stoppage of the arms race, and for the reduction of military spending so as to solve the main social problems and problems in education and the health service." This is how Moscow's Tass, the state propaganda agency, described the "peace" program to be spearheaded in West Germany by the German Communist Party during January.

Preparations for the international "peace" campaign were concluded at a 4-day World Conference To End the Arms Race, for Disarmament, and Détente held by the Soviet Union's chief international propaganda and "public opinion" apparatus, the World Peace Council—WPC—in Helsinki during September 1976. In a report on its conference, the WPC Secretariat stated:

In a concluding declaration, the Conference said: "Détente cannot become irreversible without the ending of the arms race and the carrying out of effective and concrete measures of disarmament and military disengagement."

The World Conference also called for the dismantling of foreign military bases, the creation of nuclear weapon free zones, gradual reconversion of the arms industry for peaceful purposes, and reduction of military budgets which could help in rendering assistance to developing countries.

The Conference stressed the need for immediately implementing United Nations resolutions prohibiting the sale of arms to colonialist and fascist regimes.

These Soviet-backed campaigns are paralleled by several overlapping and interconnected groups in this country which began flooding congressional offices with nearly identical demands during December.

Our responsibility to our country requires us to examine national defense issues before our votes; and to examine the records of the groups and individuals involved. I recognize that some Americans and some of my colleagues feel such a strong commitment to disarmament and détente that they believe it is irrelevant who is providing the leadership for the disarmament campaign. However, it is relevant and important, because the most active groups supporting it are not really interested in peace. They are really seeking to destroy our present form of government, our society and institutions and replacing them with a new one based on those of Cuba, Vietnam, and Cambodia.

COALITION FOR A NEW FOREIGN AND MILITARY POLICY

The Coalition for a New Foreign and Military Policy, operating from 120 Maryland Avenue, NE., Washington, D.C.

20002 (202—546-8400), and its "grassroots" branch, the Campaign for a Democratic Foreign Policy—CDFP—are the successors to the old anti-Vietnam groups—the People's Coalition for Peace and Justice—PCPJ—and preceding New Mobilization Committee to End the War in Vietnam—New Mobe—which were heavily influenced by the Communist Party, U.S.A.—CPUSA—and which had several other Communist factions as members as well as Socialist, pacifist, and religious groups.

The CNFMP and CDFP, supported by highly biased and selective "research" provided by the Institute for Policy Studies and the Center for Defense Information, oppose American development of new weapons to counter the growing Soviet arsenal; demand an end to American support for friendly non-Communist countries, particularly those who face serious Communist threats along their borders or internally; but demand that the United States provide assistance to the new Communist dictatorships in Southeast Asia.

The CNFMP is particularly interested in removing all American troops and nuclear weapons from South Korea. They state it is a "great national risk," but do not make it clear that the "national risk" is to North Korea which stridently denounces our presence in South Korea as the main obstacle to "reunification"—an invasion by the Communists.

CNFMP attacks "dictatorial regimes which torture and imprison their political opposition." First, CNFMP equates imprisonment with torture which is ridiculous. Second, CNFMP specifies that the target countries are all non-Communist nations which face or have faced in the recent past major challenges by Soviet-supported Communist movements. CNFMP states:

> The Coalition believes that popular outrage in America, not diplomatic subtleties will best serve the hundreds of thousands of political prisoners in Indonesia, Philippines, South Korea, Brazil, Argentine, Uruguay, Chile and other countries.

To briefly set the record straight, the Indonesian Communists staged an attempted coup in Indonesia ten years ago which failed, because a single Indonesian general managed to escape capture. Several thousand Communist insurgents were imprisoned for their treason; and recently Indonesia, perhaps unwisely, announced the release of most of those detained.

Philippine President Marcos declared martial law in 1972 in the face of a combined military threat from the Maoist Communist New People's Army, from some pro-Soviet guerrillas, and from the Libyan-supported Moslem separatist guerrillas. Faced with military defeats and isolation, large numbers of insurgents from the three factions have surrendered in response to presidential amnestys. Some insurgents are in jail, others have been released.

North Korea's Soviet stooge, Kim Il Sung, has never ceased his aggression against South Korea and against American troops at the DMZ as witnessed by the vicious unprovoked murder of U.S. soldiers trimming trees at the DMZ last year. In addition to its usual sabotage and espionage operations against the South, North Korea has staged demonstrations of radical students and others of various political orientations. The leaders of anti-government activities have been prosecuted in courts. It is unreasonable to equate this with "torture and barbarity" on the part of South Korea; the barbarian label belongs to the bloodthirsty regime in the North.

Brazil, Argentine, Uruguay, and Chile have military governments. In each instance, the present military government took over in response to a strong Communist threat coupled with the inability or unwillingness of the civilian government to cope with that threat. Brazil, a growing economic and military presence in Latin America, was first faced with a Communist problem in the early 1960's when the Marxists were protected by Joao Goulart. After his overthrow, militant Communists with Cuban support formed the first urban guerrilla terrorist organization headed by the infamous Carlos Marighella. During the past 2 years, extensive underground Communist cells were broken up by Brazilian authorities.

Uruguay was successful for the most part in crushing the Castroite Tupamaros terrorists. However, many Tupamaros and their supporters emigrated to Argentina and Chile under the Allende regime, joined the local Castroites and continued their terrorist activities. The three countries have cooperated in crushing the united insurgent forces, although terrorist activities from left and right extremists continue. Each country has prosecuted and jailed insurgents; each country has also released large numbers of persons detained for questioning and allows persons who wish to emigrate to do so.

In none of these countries is there a program of "state terrorism" as envisaged and put into practice by Lenin, Trotsky, Stalin, and Mao. The Coalition for a New Foreign and Military Policy has no criticism of rule by terror and intimidation and specifically attacks "the cold war tactic of politically and economically isolating new Communist regimes" as "evidencing a rigid U.S. policy unable to accept global change." And the "global change" CFNMP wants Congress and the American people to accept is the enslavement of millions of men, women, and children under new Marxist-Leninist regimes.

The coalition demands as part of its program for a "new foreign and military policy," that the United States end its "bankrupt" policy with regard to the Communist regimes in Vietnam, Cambodia, and Laos and "help rebuild the war-devastated region." However, the devastation of war was brought on by the Communists; it was the Communists who waged a systematic program of terror, intimidation, and terror against their fellow countrymen. What the CFNMP asks is that America now take up some of Russia's economic burden and help the Communist regimes become truly established.
